

Request for Proposal (RFP) for Selection of Vendor for Supply, Implementation, and Maintenance of Customer Relationship Management (CRM) Solution on Subscription (SaaS) Model.

RFP Reference: GEM/2026/B/7188106 dated 03rd February 2026

Addendum1

Sr No.	Clause in RFP	Clarifications/ Changes made
	Annexure 02 – Evaluation Terms A.Eligibility Criteria Compliance B. Financial Turnover	
1.	The Bidder must have registered average annual turnover of Rs. 75 Crore during the last three completed financial years i.e for FY 2022-23, 2023-24 & FY 2024-25* from Indian Operations only (Not inclusive of the turnover of associate companies).	The Bidder must have registered average annual turnover of Rs. 70 Crore during the last three completed financial years i.e for FY 2022-23, 2023-24 & FY 2024-25* from Indian Operations only (Not inclusive of the turnover of associate companies).
	Annexure 02 – Evaluation Terms A.Eligibility Criteria Compliance C. Experience & Support Infrastructure	
2.	The solution should have been hosted in a public cloud with a single-tenancy architecture for scheduled commercial banks in India for a minimum of three years.	The solution should have been hosted in a public cloud with a single-tenancy / multi-tenancy (Tenant Isolation Requirement with complying all the guidelines of DPDP,RBI, MeitY)* architecture for scheduled commercial banks in India for a minimum of three years. * The solution should meet the following, including Data isolation: per-tenant encryption + separate keys (BYOK, etc) Access isolation, Network isolation, Operational isolation, Security, Service Level Objectives (SLOs)
3.	Bidder should have implemented at least 3 modules out of 6 proposed modules* in one or more Scheduled Commercial Bank in India, having minimum 1,500 branches as on date of RFP, with minimum of 5,000 licensed users on CRM Platform.	Bidder should have been implemented at least 3 modules out of 6 proposed modules* in one or more Scheduled Commercial Bank in India, having minimum 750 branches as on date of RFP, with minimum of 2500 licensed users on CRM Platform.

e.g. Sales Management Module implemented at “X” Bank, Lead Management Module & Service Management Module implemented at “Y” Bank will be considered as implementation of 3 modules. The platform should be in use /live as on date of published RFP and should be in operation for minimum of 6 months. *Proposed Solution should include following Module 1. Lead Management 2. Campaign Management 3. Sales Management 4. Service Management and customer 360 degree 5. Complaint management 6. Contact centre with IVR integration	e.g. Sales Management Module implemented at “X” Bank, Lead Management Module & Service Management Module implemented at “Y” Bank will be considered as implementation of 3 modules. The platform should be in use /live as on date of published RFP and should be in operation for minimum of 6 months. *Proposed Solution should include following Module 1. Lead Management 2. Campaign Management 3. Sales Management 4. Service Management and customer 360 degree 5. Complaint management 6. Contact centre with IVR integration.

Request for Proposal (RFP) for Selection of Vendor for Supply, Implementation, and Maintenance of Customer Relationship Management (CRM) Solution on Subscription (SaaS) Model.

RFP Reference: GEM/2026/B/7188106 dated 03rd February 2026

	TOTAL MARKS	100	
	Commercial Bid (Stage 2) The commercial bids of only those bidders who qualify in both eligibility and technical evaluation will be opened. The date for opening of the commercial bid would be communicated separately to the technically eligible Bidders. The commercial bid would be evaluated based on a “Total Cost of Ownership” (‘TCO’) basis. The key considerations of the TCO would be the total payouts for entire project through the contract period of 3 years, discounted at 10% to arrive at the present value of the future cash outflows. The evaluation will be done as follows:		Commercial Bid (Stage 2) The commercial bids of only those bidders who qualify in both eligibility and technical evaluation will be opened. Annexure 21 - Service Level and Non-Disclosure Agreement Format 40. Data Protection Clause a. The Service Provider shall immediately dispose the data after completion of its permitted use as per the Bank's instructions and in case Bank observes that the data have not been purged/deleted at Service Provider's end from all servers/storage as per Bank's instruction, bank may claim indemnity from Service Provider for actual/direct/indirect/collateral loss suffered by it without any limit. b. The Service Provider shall immediately purge data or any of its remains upon termination of this agreement between bank and Service Provider. c. The data provided by Bank to Service Provider for a particular purpose shall not be used by Service Provider for any other purpose. d. Bank shall have a right to obtain and analyze Service Provider's latest Internet Security audit report, external validations of data security measures and BCM activity report. e. Bank shall have a right to conduct verification of IT security measures and cyber security measures adopted by the Service Provider. f. Bank may claim indemnity for any sort of data breach of its customers by any act/omission of Service Provider. g. The Service Provider shall strictly follow the provisions of "THE DIGITAL PERSONAL DATA PROTECTION ACT, 2023" from	Annexure 21 - Service Level and Non-Disclosure Agreement Format <u>40. Covenants for Data Protection</u> i. The Service Provider shall process all personal data or confidential information received from and on behalf of Bank pertaining to Bank, Bank's customers or any third parties strictly in accordance with applicable Indian data protection laws, including but not limited to the Digital Personal Data Protection Act 2023, the Digital Personal Data Protection Rules, 2025, the Information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules 2011 and RBI regulations in force from time to time. ii. The Service Provider shall use the data pertaining to Bank, Bank's customers or any third parties which Bank has provided to the Service Provider only for the purposes explicitly set out in fulfilling the objective of scope of works and shall not retain such data longer than necessary for the fulfilment of contractual obligations, unless required otherwise by law. iii. The Service Provider shall take all reasonable security safeguards to prevent personal data breach which shall inter-alia include- (a) appropriate data security measures, such as securing of personal data through encryption, obfuscation, masking or the use of virtual tokens mapped to that personal data. (b) appropriate measures to control access to the computer resources used by Service Provider. (c) visibility on the accessing of such personal data, through appropriate logs, monitoring and review, for
---	--

	its effective date as per the relevant notification of Government of India in the Official Gazette at any point of time in future during the currency of this agreement.	enabling detection of unauthorised access, its investigation and remediation to prevent recurrence. (d) reasonable measures for continued processing in the event of confidentiality, integrity or availability of such personal data being compromised because of destruction or loss of access to personal data or otherwise, such as by way of data-backups. (e) for enabling the detection of unauthorised access, its investigation, remediation to prevent recurrence and continued processing in the event of such a compromise, retain such logs and personal data for a period of one year, unless compliance with any law for the time being in force requires otherwise. (f) appropriate provision in the contract entered between Service Provider and any of its sub-agent/sub-contractor, wherever such sub-agency or sub-contracting is permitted in writing by Bank, for taking reasonable security safeguards; and (g) appropriate technical and organisational measures to ensure effective observance of security safeguards. iv. The Service Provider shall promptly intimate the Bank regarding any actual or suspected personal data breach (if any) and cooperate in all required remediation and reporting actions. The Service Provider shall send intimation to Bank under this sub-clause only by sending an intimation to the designated electronic mail address dpo@bankofbaroda.bank.in. This e-mail address shall serve as the exclusive channel for reporting personal data breaches and suspected cases of personal data breach, independent of any other single point of contact or communication channel specified elsewhere in this
--	---	---

		Agreement for other operational or contractual purposes. Any intimation made to a different contact or by different mode shall not be deemed as valid notice/intimation of a personal data breach under this Agreement. Intimation under this clause shall include- (a) a description of the breach, including its nature, extent and the timing of its occurrence. (b) the consequences relevant to Bank, Bank's customers or third parties whose data has been shared by Bank with the Service Provider, that are likely to arise from the breach. (c) the measures implemented and being implemented by the Service Provider, if any, to mitigate risk. (d) the safety measures that Service Provider may take to protect interests of Bank as well as Data Principle; and (e) business contact information of a person who can respond on behalf of the Service Provider, to queries, if any, of the Bank. v. Upon termination of this agreement, at the Bank's instructions, the Service Provider shall return or securely delete all data pertaining to Bank, Bank's customers or any third parties which Bank has provided to the Service Provider and after deletion of same, provide a written confirmation to Bank. vi. The Service Provider shall ensure that all personnel handling Bank data pertaining to Bank, Bank's customers or any third parties are bound by confidentiality and data protection obligations at least as protective as those set forth in this agreement.
--	--	--

		vii. The Bank reserves the right to conduct periodic audits of Service Provider's in compliance with data protection requirements under this agreement. viii. Bank shall have the right to obtain and analyze Service Provider's latest Internet Security audit report, external validations of data security measures and BCM activity report. ix. Bank shall have the right to conduct verification of IT security measures and cyber security measures adopted by the Service Provider. x. Including but not limited to indemnity clauses mentioned in Principal agreement, Bank may claim indemnity for any sort of data breach due to any act/omission of Service Provider. xi. The Service Provider shall strictly follow the provisions of "THE DIGITAL PERSONAL DATA PROTECTION ACT, 2023" from its effective date as per the relevant notification of Government of India in the Official Gazette at any point of time in future during the currency of this agreement. xii. The Service Provider shall immediately furnish any information requested by Bank which Bank is bound to submit to Central Government in compliance with Rule-23 of the Digital Personal Data Protection Rules 2025 or in accordance with any other law for time being in force. xiii. For purposes of this clause: - a) "Data" means a representation of information, facts, concepts, opinions or instructions in a manner suitable for communication, interpretation or processing by human beings or by automated means. b) "Personal data" means any data about an individual who is identifiable by or in relation to such data.

6. Module wise License Requirement:(The **same user can exist in multiple modules** e.g complaint and lead module)

S.No	Module name	No. of users(approx)
1	Lead Management	25,000
2	Campaign Management	500
3	Sales Management	25000
4	Service Management and customer 360 degree	40000
5	Complaint management	25000
6	Contact centre with IVR integration	2000

Addendum to following Annexure:

Annexure 12- Project Scope

Clarification of Pre-bid queries is enclosed as part this Addendum as per ‘Annexure A’

All other Terms & Conditions are same as per our RFP No. GEM/2026/B/7188106 dated 03rd February 2026 for Selection of Vendor for Supply, Implementation, and Maintenance of Customer Relationship Management (CRM) Solution on Subscription (SaaS) Model.

Annexure 12 – Project Scope

1. Background

The Bank is undertaking an enterprise-wide CRM transformation to modernize and unify service, sales and digital customer engagement across branch, contact centre and digital channels. The CRM program aims to improve service turnaround time (TAT), first contact resolution (FCR), customer effort and cross-sell/upsell performance through redesigned, simplified, and compliant workflows that enable branch and service users to execute end-to-end STP journeys with minimal clicks and maximum straight-through processing.

The CRM platform is expected to support the Bank's target operating model where frontline users can effectively shift from "service-only" to "service-to-sales" roles through contextual customer 360, guided actions, embedded next-best-actions and integrated fulfilment.

Scope Overview

The scope of work shall include procurement (subscription/license), implementation, configuration, integration, migration, and ongoing support services for the selected enterprise CRM platform (leading market solutions or equivalent) including:

1. End-to-End Transformation Services

- Design and delivery of the Bank's target customer engagement operating model (people-process-technology), including service and sales process redesign with clear handoffs between branch, contact centre, back office and digital channels.
- Service blueprinting and journey redesign for high-volume service requests and sales journeys to reduce steps/clicks, eliminate re-keying, and maximize STP, with measurable baseline vs target KPIs.
- Role-based experience design for branch officials, service agents, relationship managers and supervisors (including assisted-service flows), supported by configurable guided workflows and scripts.
- Having Configuration-first approach (low-code/no-code where possible).

2. Business Outcomes and KPI Management

- Define KPI framework and measurement approach for all modules including service and sales outcomes (e.g., TAT, FCR, repeat contacts, customer effort, complaint aging/escalations, lead conversion, cross-sell, pipeline hygiene).
- Implement dashboards and operational performance management for regions/zones/branches and resolver groups, with drill-down to process bottlenecks and root causes.
- Adoption KPIs and sustained adoption plan (pre-go-live to post-go-live), including usage/quality metrics and training effectiveness measures.- **The bidder is required to propose the KPIs. However, the Bank will finalize.**

3. Architecture and Integration Principles

- Loosely coupled, composable architecture: CRM to act primarily as a system of engagement and orchestration. Authoritative “systems of record” (e.g., Core Banking, lending, payments) remain in Bank platforms; CRM maintains only necessary interaction/context data.
- API-first and event-first: all integrations through versioned, documented APIs and asynchronous events. Avoid proprietary point-to-point integrations.
- Packaged business capabilities (PBC) / modular design: capabilities to be delivered as reusable modules/services that can be composed and recomposed as business needs change.
- Integration patterns must support omnichannel continuity (preserve interaction context across voice and digital) and minimize customer effort by orchestrating multiple backend systems until the customer outcome is fulfilled.
- Provide full integration inventory, target-state integration architecture, data flows, sequencing and error-handling design; include non-functional requirements (latency, throughput, resilience).

4. Data, Knowledge and Analytics

- Customer 360 and interaction history to be assembled from Bank systems with a clear data ownership model and data quality controls.
- Knowledge management capability for agents and branch staff (knowledge capture, curation, contextual surfacing, and governance) to support consistent resolutions and faster FCR. **The bidder must integrate with existing system of knowledge management (sharepoint based). However, they may require to create additional process and artifacts to support the requirements of the RFP.**
- The CRM must integrate with the Bank’s Data Lakehouse and Analytics/AI Centre of Excellence and consume Bank-provided insights (segments, next-best-action, propensity, risk flags etc). **However, the platform should provide foundational analytical capabilities that enable the design, development, and execution of custom analytics tailored to specific business requirements of the Bank. Bank’s existing Q-lik platform can be leveraged. However, customer experience should not break.**
- Support multimodal/structured and unstructured data references (notes, attachments, call/chat transcripts) with retention and privacy controls.

5. Agentic AI Readiness

- CRM must be able to leverage the Bank’s Agentic AI framework and guardrails for use cases such as agent assist, auto-summarization, next-best-action, intelligent routing and guided service-to-sales prompts.

The proposed solution should support the integration of customized Bank Agentic AI capabilities.

- Ensure human-in-the-loop controls for any AI-assisted recommendations/actions, with explainability, audit trails and the ability to disable vendor AI add-ons while retaining core CRM functions.
- Provide telemetry and observability for AI-assisted journeys (usage, quality, drift/exception tracking) and cost controls for any AI features.

6. Security, Compliance and Governance

- Support regulated-bank needs including auditability, maker-checker where applicable, data masking, retention/archival, legal hold, and evidence generation.
- Establish CRM governance structure, change control, release management and environment strategy (dev/test/UAT/pre-prod/prod) aligned to Bank standards.
- Define cultural change and adoption approach to address user concerns and build trust in AI-enabled CRM processes, including structured change journey and training/upskilling plan.
- According to Digital Personal Data Protection (DPDP) Rules, 2025, Establish a comprehensive framework for processing digital personal data, empowering users with rights over their data and requiring strict compliance from fiduciaries regarding consent, data breaches, and child data protection.

7. Siebel CRM Migration

- Perform Siebel discovery and inventory (data objects, workflows, reports, integrations, users/roles, volumes, data quality).
- Provide phased migration/coexistence approach (where required), cutover/rollback plan, multiple dry runs, reconciliation reports and audit evidence.
- Provide decommissioning and archival plan for Siebel including retention and access to historical records.

Volumetrics:

Total CRM Users: Expected average and peak concurrent user volumes across all CRM user groups including BC/DSA/Fintech etc.	Module wise users provided .
Total number of unique customers of the Bank and the expected	• Total number of unique customers: Approx: 19 Crore (Existing customer base) • Expected annual growth Rate : 6-8%

annual growth rate in the customer base during the contract period.	Active Database Size- Approx 10 TB
The expected lead volume per month, with segmentation across Retail, MSME, Corporate, and Wealth segments.	Total no of leads created per month across all the segments: Approx 1 – 2 Lakh Year on projected data growth: 10%
Expected number of standard dashboards and MIS reports to be configured across modules.	As per the business requirement of the Bank

8. Technical Requirements

- **Headless/Composable architecture:** The CRM must support headless delivery where the user experience can be delivered via Bank-owned apps/portals while consuming CRM capabilities through secure, versioned APIs/events (decoupled UI).
- **API-first and event-first:** All core business objects and processes (customer, interaction, case, lead, task, workflow, knowledge) must be accessible via APIs; publish/subscribe events for key business events for near-real-time orchestration.
- **Open standards and loose coupling:** APIs to conform to OpenAPI; support REST and/or GraphQL where applicable; avoid dependence on proprietary adapters or vendor-only middleware unless explicitly approved by the Bank.
Integration through Bank platforms: Must integrate via Bank's API Gateway/ESB/event bus standards; support Kafka (or equivalent) for event streaming; support OAuth2/JWT and optional mTLS as per Bank security standards.- **In applicable scenarios i.e, the Bank's Core/internal System are already published through the existing API Gateway. However, API published by CRM system must be deployed in accordance with specific business and technical requirements including security requirements applicable to the Bank.**
- **Observability:** Provide end-to-end monitoring for APIs, events and integrations including logs, metrics, tracing, replay/DLQ patterns, and operational dashboards.

- **Configuration-first and upgrade-safe extensibility:** Prefer configuration/low-code; any code extensions must be upgrade-safe, documented, and governed with Bank approval to minimize technical debt and TCO.
- **Security and compliance:** Strong RBAC, maker-checker where needed, audit trails for all changes, data masking for non-production, encryption in transit/at rest, and alignment with regulated-bank compliance expectations.
- **Performance and resilience:** Define measurable response time targets for branch users, concurrency, throughput for service requests and campaigns; HA and DR design with defined RPO/RTO and evidence of DR drills.
- **Cloud support for seismic zones** involves using geographically dispersed data centers, cloud-native disaster recovery (DR) solutions, and high-performance computing (HPC) to ensure data resilience and business continuity against earthquakes.
- **TCO optimization:** Solution must minimize total cost by leveraging Bank-owned analytics/AI framework and integration platforms, avoiding duplicate components, and supporting modular adoption/licensing aligned to Bank rollout phases.

9. Functional Requirements – Common Capabilities

- **Unified 360 view for frontline users:** Single view of customer profile, relationships, products (referenced), interaction history, preferences/consents, service requests, complaints, leads/opportunities and next actions.
- **Service transformation and minimal-click fulfillment:** Redesign and implement service journeys to reduce clicks/steps and enable straight-through processing wherever feasible; guided workflows, smart defaults, and templates for high-volume requests.
- **Service KPIs built-in:** Ability to measure and manage TAT, FCR, rework/reopen rate, repeat contacts, SLA breaches, backlog and productivity across branches, regions and resolver groups.
- **Knowledge management for FCR:** Central knowledge base with authoring, approval, versioning, contextual recommendations, feedback loops, and governance to improve resolution quality and reduce handling time.
- **Omnichannel continuity:** Preserve context across branch, contact center, email, SMS, WhatsApp, web/mobile journeys and chatbot handoffs; unified interaction timeline and consistent routing/ownership.
- **Service-to-sales conversion:** Convert service triggers into sales opportunities (e.g., needs-based prompts, cross-sell offers), with tasking and tracking for relationship managers/branch officials.

- **Sales enablement:** Lead/opportunity/pipeline management, activity tracking, appointment/task management, and configurable playbooks aligned to Bank products and segments.
- Digital enablement: Support integration with Bank digital channels and portals; support self-service initiation and tracking of service requests and cases, with status updates and notifications. **The bidder need to develop/provide self service portals/customer portals for customer /partner facing journeys (approx. 15-20) associated with CRM modules for e.g complaint portal, lead management portals and integration with Bank's digital channels like internet banking, Bob-world and Bank's portals for self –service initiation and tracking of service requests and cases with status updates and notifications.**
- AI/Agentic readiness using Bank framework: CRM must enable Bank-owned agentic AI to assist users (summaries, recommendations, drafting, next-best-action) and optionally execute actions with human-in-loop approvals, full audit trail and telemetry. **The proposed solution should support the integration of customized Bank Agentic AI capabilities**
- Adoption and UX: Role-based UI with personalization, quick actions, keyboard efficiency where applicable, and embedded training/help to drive adoption and operational efficiency.
- Scope also includes providing and/ or customizing the necessary middleware & component to connect/integrate with Avaya / CISCO/IVR/ Contact Centre, CBS and various other applications running across different lines of business of the Bank and its subsidiaries.

2. Implementation and Maintenance of solution:

The implementation of CRM Solution should ensure that it acts as a single repository for all the master data for customer and all the required Bank's applications will be fully integrated with the CRM solution listed below (under point 3) and bidder should provide necessary technical know-how to Bank's team to integrate applications in future.

3. Details of Existing CRM application:

The Bank is presently using Siebel CRM Version IP 16, an Oracle-based application. The CRM system is currently accessed by users across the Branches, Contact Centre, Regional Offices, Zonal Offices and various Business Verticals. The web interfaces/portal for Complaint module, Lead management module for various products, Wealth management are available for the customers to lodge complaint, create leads and tracking status. The Siebel CRM application implemented by the Bank includes several functional modules, such as:

- Marketing and Budgeting
- Complaint /Grievance Management

- Lead Management (Covering Retail Assets and Liabilities, MSME, Large Corporate, Referral DSA, DST, Supply chain finance, Government Business, and Agriculture verticals)
- Wealth Management Services
- Service Module
- Contact Centre Sales

The application has undergone with **customizations** and has been integrated with multiple **internal banking systems and external platforms**. Please refer under point no. 4 for the details .

Brief About Existing Modules and Functionalities:

A) Marketing Campaigns

- ❖ Campaign Management
- ❖ Multi Level Campaigns
- ❖ Budget, Events, Schedules
- ❖ Configure Approval workflows
- ❖ Configure segmentation and Importing / Generating Target Lists
- ❖ Lead Management from Campaign Responses
- ❖ Campaign Reports
- ❖ Configure Campaign Offers
- ❖ Build required outbound interfaces

B) Complaint Management Module

- ❖ Complaint Creation through various channels (Website for the customers, internet banking ,Bobworld, Business correspondents, Branches, Contact Centre, social media, SMS Banking, Whatsapp banking etc.)
- ❖ Integration with third party application DCRS for Debit Card Financial Complaints (DCRS)
- ❖ Complaint Priority (High, Medium and Low).
- ❖ Resolution process of sending financial complaints to IO in case of reopened complaints.
- ❖ Status Tracking of complaint on the web portal.
- ❖ Complaint Forward option and Bulk forward complaints between different departments.
- ❖ Reopen Escalation Functionality – Maximum 2 times allowed.
- ❖ Auto Escalation Emails to Departments, Regions and Zones.
- ❖ Customer Feedback regarding complaint module.
- ❖ Reports and Dashboards for Branches, Regions, Zones and HO users.
- ❖ Integration with internal and external applications like JANSURAKSHA, INGRAM Ministry portal, CPGRAM, for Consumer complaints.

C) Lead Management Module

- ❖ Lead creation process through different sources i.e Online web portal in Bank's website for application of Retail Assets, Liabilities, MSME, AGRI and LCB loans by Existing and Prospective customers.
- ❖ Physical channel based Journey through Branches in CRM application.
- ❖ SMS/Missed call based functionality for the Customers .
- ❖ Integration with internal systems i.e Loan Lifecycle processing system (LLPS) system through End to End STP process for loan processing . On successful submission, SMS/Email intimation is sent to the applicant.
- ❖ Facility to track the status of the loan application online is available in CRM application.
- ❖ Assisted journey to Contact centre in case of drop –offs for further follow up with the customer.
- ❖ Separate views created for Contact Centre and Branches for processing. Views created for Regions, Zones and BCC for Auto Escalation.
- ❖ Bulk upload facility for outbound calls and inbound Calls as part of Contact Centre Sales Module.
- ❖ Campaign, Pre-approved offers for End to End Lead processing through Branches and Contact Centre.
- ❖ Aadhaar Based Authentication for non-customer lead generation and pre-population of data on the basis of Aadhaar details.
- ❖ QR code Feedback
- ❖ Feedback survey module for the users.
- ❖ Online E-OTS module
- ❖ Office Directory for all the users.

D) Wealth Management Module:

- ❖ Integration with Bank's internal systems like Smart Insurance and Investment platform for wealth management module for opportunity creation and tracking.
- ❖ SSO integration with insurance and investment platforms.

E) Service Module- Customer 360 degree and Service Requests

- ❖ Single view of customer relationships. financial and non-financial account status.
- ❖ There are around 25 service requests are available in the current system which are fetched on real time basis. New CRM should have option to customize 50 more service requests as per the Business requirements.
- ❖ 360 degree view on customer's interactions across channels.

F) Sales Module- Contact Centre

- ❖ Inbound and outbound requests-Lead module real time integration with Contact centre like MSME, Retail assets, Retail liabilities etc.

- ❖ Preapproved leads.

G) **CRM Mobile App- Lead Management Module**

- ❖ CRM Mobile app inhouse developed module used for Lead management module for the following products like Retail assets, Liabilities, Wealth management, Credit card with features like lead creation, status tracking and Lead dashboard integrated with CRM application. This app is accessed at field level i.e Relationship managers, Deposit sales managers, and Branches.
- ❖ RM360 mobile app inhouse developed app for corporates integrated with CRM application.
- ❖ **“The proposed solution must be capable of integrating with Bank's in-house mobile applications, including their workflows and required data.”** The solution has to publish and consume API's as well for the integration.

4) Integration with Existing Applications & Systems:

- ❖ **The existing CRM Solution is integrated with various internal and External platforms and multiple API's/interfaces and integrated with min 20 core systems / Banking application**

Proposed CRM Solution:

CRM Modules- The bidder is expected to develop and implement following 5 core modules:.

- A. Complaint Management- Phase II
- B. Marketing & Campaign Management- - Phase II
- C. Service Management with Customer 360°- - Phase I
- D. Lead Management- - Phase I
- E. Sales Management - - Phase I

Apart from the above-mentioned 5 core modules, the following sub modules are part of core modules expected to be implemented:

- Wealth Management
- Data Analytics and Forecasting
- Opportunity Management and Collections Management
- Data Management & Integration with various systems
- Contact Center with IVR integration
- Digital Onboarding—Phase II
- Relationship Banking & RM Toolkit
- Marketing Automation & Journeys
- Knowledge Base & Case Management

- Omnichannel & Self-Service
- Mobile & Field CRM
- Partner & Channel Management
- Reporting & Dashboard

A. Complaint Management:

1.1) Complaint Management

1.1.1) Complaint Creation –

- a) ~~The CRM should be able to integrate with existing Siebel CRM application /Email/SMS system and convert incoming complaints and grievances on email, SMS& Siebel CRM(complaints portal) into SRs/Complaints in CRM and escalation matrix should work for it.~~ The Proposed CRM should be able to provide Complaint management module/query module/ Service Requests (QRC) and convert incoming complaints , external complaints like jansurakhsa, ingram, received from various channels like email, SMS, website, Branch etc into SRs/query/Complaints in CRM and escalation matrix should work for it.
- b) Creation of complaint from Email & SMS by identifying the keywords and sender's registered email id/ registered mobile number.
- c) The solution should be able to identify the sender based on the registered email id/ mobile number and link the complaint to the existing customer.
- d) SMS/Email notification should go to the owners and customers informing creation/status change/closure of complaints
- e) **The solution should be able to publish API and consume API for Complaint management into web service which shall be used by Bank's internal systems/ other systems /external systems to push and pull information and create Complaints in the system**
- f) Capturing all types of complaint from all the sources/ Channels- SMS Banking, Website, Branch, ODR- Internet banking, BOB world, whatsapp banking, E-mail, contact centre, ATM Kiosk etc.. TAT, Status Tracking, Escalation of Complaint as per internal matrix, Internal / External Ombudsman, capturing Resolver comments / resolution, Interim comments, Bounced to Resolver, Forward option, Capturing Feedback, Quality check resolution of complaints etc and allow routing, sentiment analysis based on customer feedback on complaints and tracking of complaints centrally from all sources.

1.1.2) Complaint auto-assignment –

- a) Complaint shall be automatically assigned (based on some rules/matrix which should be configurable)
- b) Post auto-assignment, the solution should be able to notify the owner by way of email and in the notification centre.
- c) Assigned complaint should be visible in the pending queue of owner & group

1.1.3) Complaint Priority –

- a) The solution should be able to prioritize certain type of complaints based on some rules (which should be configurable)
- b) Based on the priority of the complaint, it should appear in the pending list of complaints, i.e. the highest priority complaints will appear on the top followed by others based on priority.

1.1.4) Complaint Status change –

- a) There shall be various stages/status of complaint which will be changed during the course of SR processing.

1.1.5) Complaint Age & Auto Escalation of Complaints -

- a) Every type of complaint should have expected TAT for its closure which the system should display
- b) For every complaint, the solution should be able to calculate the complaint age for every stage/status
- c) If a complaint is lying in a one stage/status for a defined time and is crossing the TAT for the complaint stage, then it should be automatically escalated & notified to next level based on some rules/matrix which should be configurable.

1.1.6) Complaint Execution & Closure-

- d) The complaints shall be manually closed in CRM by the respective owner after the respective procedures
- e) The solution should be able to calculate the TAT of every complaint
- f) On closure of the complaint, it should disappear from the pending queue of the owner & group

B: Campaign Management Module:

Marketing & Campaign Management

2.2.1) Campaigns, Events, Budgets creation -

- a) Campaigns (of all types – mass email, voice, sms & others) should be created from CRM & should be able to link the campaign outcome /response so as to compute ROI of each campaign and conversion rate. **The proposed solution must capable to integrate with Bank's internal systems i.e SMS , voice, Email gateway and other channels.**

b) Incident based campaigns –

- i. **CRM Campaign web service** - The solution should be able to float API/ web service for incident based campaigns where other systems will be able to push data e.g Credit/Debit Card/ Net Banking - fraud management systems should be able to send suspicious transactions details like amount of transaction/ source/ date-time to CRM Campaign web service. This web service/ API should be able to trigger a real time incident based campaign triggering /making outbound calls through Contact Centre Application
- ii. Incident based campaigns - The solution must be able to automatically create real time campaigns for voice/sms/email based on occurrence of some

incident based on some rules (which should be configurable) which results in automatic triggering of Outbound calls/Emails/SMS/Pre-recorded Voice Blast from respective campaign execution systems like contact centre application like for Bills & Collection for recovery/ collection of loan dues/pending Bills, or if Debit/Credit/Ebanking fraud happens then CRM will trigger an outbound call/sms/email through contact centre application or CRM (for email)

- a) The application should have process flows build into it to create Campaigns (of different types/channels), Events, Budgets & Schedules
- b) Create campaigns & events including details such as campaign/event type, campaign/event status, offer expected response, proposed start and end date, actual start and end date
- c) Capture campaign financials details such as costs and expected revenue
- d) Create budgets at central level, zonal level, regional level, branch level
- e) Create campaigns & events at central level, zonal level, regional level, branch level
- f) Associate sales literature such as product brochures to campaigns
- g) The application must be able to support definition of rich text/HTML templates for outbound communication via Email.
- h) Allocate budgets to campaigns & events
- i) Schedule events and campaigns
- j) Able to assign tasks to specific individuals for follow up and task completion
- k) Support workflow based approval of campaign to management for approval
- l) Save campaign as a template which can be reused and easily modified to create similar campaigns
- m) Support quick campaigns with wizard interface for easy creation by individual users to create quick campaigns for their own customers
- n) Implement permission based marketing with opt outs & controlled lists based on DND/ NDNC list
- o) Blend multi-channel campaigns into a unified campaign flow based on marketing Objectives
- p) Support the use of historical campaign data in future campaigns
- q) Support the management of events, road shows & other physical campaigns
- r) Support the usage of social media in launching campaigns with the ability to integrate with the top social networking sites. **The proposed solution must capable to integrate with Bank's social media platforms like face book, twitter, linked in etc.**

Associate target product to campaign & events

2.2.2) Target List -

- a) The solution should be able to import or generate (based on some criteria) invitees list, target list & support data import from external source system
- b) Associate target marketing list of prospects and customers to campaigns & events
- c) Saved target list can be associated with multiple campaigns & events
- d) Support data de-duplication for imported list to define simple rules for duplicate detection i.e. if the same customer is present in multiple occurrences or if the customer already exists then it will not create new customer every time a new list is imported where the customer is present.
- e) Create customer segments based on past responses of prospects i.e. if a customer was part of any campaign and he/she could not be contacted or he/she didn't respond then he will be automatically put in the segment of low-response customer, so that he will be excluded automatically from future campaigns.
- f) Catalog management based on customer segments/behavior

2.2.3) Campaign Execution -

- a) Campaigns can be executed over multiple channels, such as phone, letter, email, advertising and appointments for sales users to follow up or even road show events.
- b) Phone call activities are generated for the relevant target lists and assigned to contact center agents for making the calls.
- c) Appointment activities are generated for the relevant target lists and assigned to sales users for follow up.
- d) Support definition of rules to exclude customers who have been touched in the past n days through a particular channel or for a particular campaign..
- e) Campaigns should execute prioritizing Customer's communication and privacy preferences. If customers indicate preferences such as Do not call or Do not send Bulk Email, 'Not interested to receive promotional emails/SMS, or the customer is registered with DND/NDNC, then the customer will be excluded from campaign execution even though the customer is in the target marketing list.

2.2.4) Campaign response & analysis-

- a) Campaign responses are tracked for users to capture prospect/customer's response if they are interested or not interested in the offer.
- b) Create segments based on past responses of prospects
- c) Campaign responses can be automatically converted into a lead or opportunity and associated with the relevant customer record.

- d) For conversion of lead, information of account, contact and opportunity can be automatically brought over and associated with customer records or new record can be created for prospects
- e) The application should be able to provide Campaign reporting & Performance & Profitability analysis to give the ROI of campaigns, conversion of Leads, activity completion time, responses over various channels.
- f) If a customer has been contacted through various campaigns then it should be tracked. Also the response from the customer should be recordable and link to the campaigns.
- g) Showing active campaigns running against a customer and also showing all the campaigns of which customer was a part and how many times he was contacted for which campaign and what was his response to the communication
- h) Offer management – The solution should be able to save list of offers against each customer on regular basis (list is churned from analytical CRM system) which are customer specific, and it should be able to pop-up offers specific to the customer in real time when the customer profile is opened.

C . Service Management with Customer 360:

3.3.1) Service Management

3.3.2.) Service Request Creation –

- a) The solution should be able to create SRs from Emails & SMS by identifying the keywords and sender's registered email id/ registered mobile number
- b) The solution should be able to identify the sender based on the registered email id/ mobile number and link the SR to the existing customer.
- c) SR import function resulting in auto creation of SRs with auto assignment
- d) The solution should be able to publish API for SR management into web service which will be used by other systems to push information and create SR in system
- e) De-dupe check for same type of SR for the same account of the same customer should be applicable so avoid any anomalies

3.3.3) Service Request Assignment –

- a) SR shall be automatically assigned (based on some rules/matrix which should be configurable)
- b) Post auto-assignment, the solution should be able to notify the owner by way of email and in the notification centre.
- c) The assigned SRs should be visible in the pending queue of the owner & group

3.3.4) SR Priority –

- a) The solution should be able to prioritize certain type of SRs based on some rules (which should be configurable)
- b) Based on the priority of the SR, it should appear in the pending list of SRs, i.e. the highest priority SRs will appear on the top followed by others based on priority
- c) There shall be various stages/status of SR which will be changed during the course of SR processing.

3.3.5) SR Age & Auto Escalation of SR –

- a) Every type of SR should have expected TAT for its closure which the system should display
- b) For every SR, the solution should be able to calculate the SR age for every stage/status
- c) If a SR is lying in a one stage/status for a defined number of time and is crossing the TAT for the SR stage, then it should be automatically escalated & notified to next level based on some rules/matrix which should be configurable.

3.3.6) SR Execution & Closure –

- a) Based on process flow of SR (which should be configurable), some SRs will be auto executed in the source system in real time and some will need **3.3.6)** to be closed manually.
- b) The status of auto executed SRs will change to 'Closed' automatically by the system and the status of manually executed SRs will have to be closed manually in CRM
- c) The solution should be able to calculate the TAT of every SR and display it on the screen for conveying the same to the customer if asked.
- d) On closure of the SR, it should disappear from the pending queue of the owner & group

D. Lead Management Module:

4.2.1) Lead Management

4.2.2) Customer Creation & Lead Creation -

- a) Customer Leads will be created in CRM for new and existing customers. For new customers, first the customer will be created in CRM resulting in creation of CIF in CRM. After that Lead will be created and attached to this customer. For existing customers, leads will be attached to the existing customer's CIF.
- b) Creation of Leads from Emails & SMS by identifying the keywords and sender's registered email id/ registered mobile number.
- c) The solution should be able to identify the sender based on the registered email id/ mobile number and link the lead to the existing customer. If the email id & mobile number doesn't match with anyone in DB, the system should create a new customer and attach the lead to it.
- d) The solution should be able to publish API for Lead management into web service which shall be used by other systems to push information and create Leads in the system
- e) Lead import function resulting in auto creation of Leads with auto assignment
- f) Product shall be attached to each Lead/opportunity.
- g) On the fly De-dupe check for creation of same customer or same type of Lead for the same customer should be applicable to avoid any anomalies. If duplicates customer exist, the system will pop-up the customer details giving the option to

the user to select one of the duplicate or create a new customer. If however the percentage of duplicity is above a threshold, then the system will not allow to create the customer with the same credentials like first/middle/last name, phone number, pan etc.

4.2.3) Lead Assignment-

- a) Lead/Opportunity shall be automatically assigned (based on some rules/matrix which should be configurable)
- b) Post auto-assignment, the solution should be able to notify the owner by way of email and in the notification centre
- c) The assigned leads should be visible in the pending queue of the owner & group
- d) The owner should be able to re-assign the lead to other person in the group in case he is not able to work on the Lead.
- e) The manager should be able to re-assign a Lead to other person in the group.
- f) The Lead/opportunity should be re-assignable/transferable to other group in the same or other region/zone in case the customer desires to avail the product/service in other branch.

4.2.4) Lead Score & Lead Enrichment-

- a) System should be able to impart the score to the leads based on some pre-defined matrix for the product by processing available data or capturing customer response.
- b) Provisions should be there to store the customized formulae and calculate score based on available or captured data.
- c) Provisions to build template (questionnaire) and capture customer provided responses and impart score based on the pre-defined matrix/rules/formulae for each product (which should be configurable) resulting in enrichment of lead to have better understanding of the lead and for checking the eligibility for limit of a product like loan, credit card, overdraft, cash credit etc

4.2.5) Lead Status change -

- a) There shall be various stages/status of Lead/Opportunity which will be changed during the course of Lead/opportunity processing.
- b) Once the stage/status of the Lead is changed to pre-closure or successfully closed, then customer on-boarding will happen and the customer will be created in CBS

4.2.6) Lead Age & Auto Escalation of Lead -

- a) Every type of Lead/opportunity will have expected TAT for its closure which the system should display.
- b) For every lead, the solution should be able to calculate the lead age for every stage/status

- c) If a lead is lying in a one stage/status for a defined number of days and is crossing the TAT for the Lead stage, then it should be automatically escalated & notified to next level based on some rules/matrix which should be configurable.

4.2.6) ~~Lead Execution/Closure, Customer on-boarding & Account Opening –~~

- a) ~~For every lead maturing to successful closure, Customer engagement, on boarding/ registration/ Customer ID creation / account creation in CBS/other source system will have to be triggered from CRM in real time.~~
- b) ~~The registration / account opening form shall be printed out with details & photo of the customer. The customer will only need to sign on the form. Once the form is signed, the signature of the customer will also be captured again and shall be kept online in the customer profile.~~
- c) ~~Customer's PAN number/Aadhaar number shall need to be validated in real time from NSDL/ UIAI.~~
- d) ~~Customer information shall need to be verified (maker/checker concept). During verification, the CRM shall validate the Customer's PAN number from NSDL. Once the all validations are successful and checker has approved the customer/lead, the customer/lead data will be sent to CBS web service / middleware for automatic customer id creation and also for account creation in CBS. The Customer Id and Account number created in CBS will be returned to CRM by CBS or shall be fetched from CBS and attached to the CIF & Lead in CRM.~~
- e) ~~Post account creation in CBS/ source system, the Lead will be closed automatically in CRM~~
- f) ~~CRM should also be able to complete the customer on-boarding and account opening process for the online account opening leads captured from the bank's website or third party websites and also from tab banking facility.~~
- g) ~~Application print, attachments, signature and photo uploading should be present for every customer profile.~~
- h) ~~The solution should be able to calculate the TAT of every lead~~
- i) ~~On closure of the lead, it should disappear from the pending queue of the owner & group~~

E. Sales Management Module:

5.2.1) Sales planning:-

- a) The System should have the ability to define Territory Assignment Rules based on geography, business unit, product line, industry, named accounts, or any other custom attribute, across multiple sales channels.
- b) Solution should have features for sales target planning & forecasting

- c) Ability to define Incentive Compensation plans and assign it to the corresponding sales team member.
- d) Ability to define Monetary and Non - Monetary incentives
- e) The System should be able to offer targeted promotions and personalised recommendations for the products and services.

5.2.2) Sales Management:-

- a) Ability to auto allocate Leads or Opportunities to sales reps or RMs based on Territory
- b) Gamification of the sales management.

5.2.3) Sales Tracking -

- a) Solution should provide seamless interface for tracking sales performance across levels like individual level, branch level, zonal level etc.

F. Data Analytics & Forecasting: -

- a) The solution should provide robust analytics by analysing data for insights into customer behaviour and estimate the likely products that customers may take given the available customer profile and data from multiple sources.

The solution should be able to consume custom analytics (ACOE) of the Bank system. However, the platform should provide foundational analytical capabilities that enable the design, development, and execution of custom analytics tailored to specific business requirements of the Bank.

- b) Based on analytics, cross-sell and upsell opportunities are presented to customers at all touchpoints.
- c) Understanding existing Lead Management Model and other Analytic models and recommend customisation required, if any, in those models for seamless integration.

The solution should be able to use an internal rule engine that is simple to change and test without writing any code, basic application logics and drag-and-drop choices for rule modification.

G. Process Design: -

- Define Business Case for the proposed Platform
- Detailing of use cases, technology process for each workflow - what are the dependencies, what is the process flow, technology integration required.
- Ensure migration of user data from existing source systems to the proposed CRM, consisting of data mapping between the existing Lead Management Model application vs the CRM and transform and load the data into the proposed CRM platform.

H. Training:

- Training to all the faculty members of staff training colleges and IMAGE team under "Train the trainer" concept for further training to the field functionaries for adoption of the platform.
- Refresher Training program on a frequency of 3 months for the updates in the platform. And yearly for next three years on the overall platform.
- Bidder shall organize for training (familiarization) to the Bank's team as follows:
 - Five working days' training to the Bank's Core Team is to be imparted before UAT. The training program may be conducted in 2 batches of 50 officers each.
 - Training to be provided to bank's IT team, Support & Front Office users on 'Train the Trainer' model. A total of 100 officers to be trained in multiple batches.
 - The Bidder must provide comprehensive training (technical and functional separately) to the Bank Staff once a year (5 working days) during the contract period. The training shall be provided as and when required by the Bank.
 - The Training will be carried out onsite at any designated location in India identified by the Bank at the Bank's training centres. The training program may be split into 2 groups – Technical and Trainer level training. The groups may be covered in 2 batches of 20 officers each. The bidders are requested to indicate the optimum number of days / hours required for both Technical and User level training programs onsite.
- The selected bidder should provide User Manual and Technical Documentation both in hard and soft copies to the Bank.
- The training shall be subjected to evaluation by the Bank to ensure that all the components of the comprehensive CRM Solution are covered in the training by the selected bidder.

I. Technical Requirements: Infrastructure, Cloud and other CSP Requirements

1. The proposed CRM Solution shall be configured, deployed On-Cloud under SaaS based model, and managed to meet security, privacy, legal, ethical and compliance requirements of the Bank.
2. Cloud support for seismic zones platform enable replication of critical data across different seismic regions, often using high-availability (HA) setups and multi-region architectures to mitigate risks from natural disasters.
3. CRM Application to be built on an Open Architecture based API enabled Platform to provide a superior digital experience for the users.
4. The platform should provide Omni channel experience to the users of the platform. The platform should be accessible through website (browser agnostic), TABs (Android/ IOS), Mobile Apps (Android/ IOS) etc. The proposed solution should

provide a user-friendly interface with end-state design aligned and signed-off before implementation.

5. The bidder should propose the solution as per Bank's requirements with high availability & secure infrastructure in cloud environment at Data Centre and Disaster Recovery site considering the present as well as annual incremental volumes (for contract period) and the sizing proposed.
6. Bidder should arrive at the sizing by considering data volume, performance requirements, integration needs, scalability, and estimated number of concurrent users till the end of contract period and should provide additional resources at no additional cost to the bank in case the requirements are not met. Also, during the contract period, growth of the bank should be considered and thus, the sizing proposed should have enough computing power, memory, and storage available to accommodate the predicted sizing required.

J. Data Management and Integration:

1. The proposed solution should integrate with
 - CBS and allied applications like Enterprise Fraud Risk Management, Digital Lending Platform, Co-lending platforms, MIS/ Data Warehouse analytics, chatbots, customer service channels like mobile banking, internet banking, ATM etc., as per Bank's requirement. Solution should include pre-built connectors or support integration with commonly used banking applications like CBS, payment gateways, ERP, and analytics platform.
 - Third party applications via Web Services (REST/SOAP/JSON) and ISO communication, SQL queries (Oracle, SQL Server, MySQL DB), file based integration (CSV, XML), API integration and other industry-standard methods as per Bank's requirement.
 - Legacy system interfaces and various mobile/web applications of the Bank, such as HRMS, Business Dashboard etc., through AD and should integrate with Email gateway (SMTP service & Server level Email Authentication), SMS Gateway, WhatsApp, etc., of the Bank through secure API's interfaces.
2. The proposed solution should integrate with Middleware and APIs of Bank as per Bank's requirement. All Application integration should be STP without manual interventions and all information exchange should happen over secured API channels using tokenized parameters for customer data. The proposed solution should include an API management platform with API gateways and API analytics to effectively manage and monitor API usage.

In applicable scenarios i.e, the Bank's Core/internal System, the existing API Gateway may be utilized for exposing and managing APIs, in order to ensure consistency, reuse of established infrastructure, and adherence to enterprise standards.

However, any APIs published by the CRM system must be deployed in accordance with specific business and technical requirements.

3. APIs to adhere to Open API, REST, and GraphQL standards for interoperability and scalability.
4. The API data exchange integrity, non-repudiation and authenticity aspects to be achieved through Digital Signatures. The APIs should not be using Basic Authentication and should incorporate OAuth/JWT Token Authentication.
5. The bidder must provide a comprehensive API catalogue that outlines all available APIs for integration with other systems (e.g., core banking systems, data lake house, in-house applications, third-party applications, etc.). The catalogue should include detailed documentation on API endpoints, usage limits, authentication methods, and data formats.
6. The CRM solution must support event-driven architecture with capability to integrate with Apache Kafka (or equivalent event streaming platforms such as AWS Kinesis) for seamless real-time data synchronization and processing between systems. The solution must be capable of handling asynchronous event notifications and triggers that initiate specific actions, such as updates to customer data or workflow transitions.
7. The solution should adopt an event-sourcing pattern where all significant business events (e.g., customer interactions, support requests) are captured as events in Kafka (or equivalent event streaming platforms). These events should be used to build a reliable and consistent view of customer data, improving the accuracy and timeliness of customer insights.
8. The proposed CRM solution should leverage gRPC (Google Remote Procedure Call) or equivalent technology for high-performance, low-latency communication between microservices and other integrated systems. The use of RPC should ensure that the CRM can handle high-volume of data efficiently, support fast request/response times thereby reducing latency during system interactions, support horizontal scalability and efficient load balancing across microservices, ensuring that the system remains performant even under high demand, particularly during peak traffic periods.
9. The bidder should provide a sandbox environment that allows the bank to test the integrations with internal systems and external partners, ensuring smooth data exchange and validating functionality before full deployment.
10. The selected bidder is responsible for Migration of customer data, existing leads, complaints and service request/case data, Migration strategy, Migration Plan, Pre and Post migration reconciliation and Audit support in the new solution.
11. The proposed solution should have error / run time exception handling mechanism during data import process from Bank's Data Centre to Cloud.
12. Database to support advanced querying capabilities (e.g., JSON for semi structured data)

13. The bidder should ensure robust, consistent and regular back-up and recovery plans are in place. The data & configuration backups are to be taken in fully encrypted mode and should be immutable in nature.
14. Bidder should ensure data retention, masking of data, archiving, destruction / purging of data, sharing of data, encryption of data etc. as per the bank's requirement. The selected bidder should certify for purging all data at all locations including slack in data structures and on the media on Bank's request. The Bank will have the right to audit this practice.
15. As per the Digital Personal Data Protection (DPDP) Rules, 2025, notified by India's Ministry of Electronics and Information Technology (MeitY), establish a comprehensive framework for processing digital personal data, empowering users with rights over their data and requiring strict compliance from fiduciaries regarding consent, data breaches, and child data protection.
16. The Bidder's/Bidder's CSP shall ensure that services offered under SaaS model are enabled with data loss prevention tools / capability to monitor data flow or curtail, if required, to safeguard against unauthorized access or leakage of sensitive customer data.
17. The Bidder shall be responsible for recovery of lost data, restoration and repair of damaged data and the correction of data. The SaaS vendor should ensure data privacy by design in the application and provide data integrity and data security on a continual basis.
18. Bidder to confirm that it acquires no rights or licenses, including without limitation to intellectual property rights or licenses, to use the data for its own purposes by virtue of the transaction.
19. The ownership of the Bank's data shall always reside with the Bank. The Bidder /Bidder's CSP will only act as a custodian of Bank's data. No part of the Bank's data shall be used by the Bidder /Bidder's CSP for any purposes including but not limited to marketing and data mining.
20. The data should be stored within geography of India and all data functions and processing are performed within the boundaries of India. The Primary and Secondary Data Centres of CSP should be physically located in India and should be in different seismic zones before submission of bid. The data should not be transferred outside of country's boundary by any means. Cloud hosting in a Tier 4 Data Center, certified by the Uptime Institute, is strongly preferred.
21. The CSP should be able to provide geographic or IP based restrictions.
22. Bidder /CSP (Cloud Service Provider) should ensure that any data that is stored on the cloud is protected and appropriate policies and controls are put in place to provide data privacy and protection. The CSP should adhere to all laws pertaining to data privacy and protection that are applicable as per GoI, RBI and any other regulators. The CSP should also ensure that necessary enhancements are made

to the services provided whenever there are changes sought either by the regulators or Government of India without any additional cost to the Bank.

K. Cloud Infrastructure:

Bidder should ensure that CSP should be a valid MeitY empanelled Cloud Service Provider or should be able to submit System Audit Report (SAR) for Data Localisation conducted by CERT-IN Empanelled Auditors for Cloud Service Provider with two data centre locations

- 1. The bidder must specify whether the solution is hosted in a single-tenancy or multi-tenancy model (Tenant Isolation Requirement with complying all the guidelines of DPDP, RBI, MeitY and Bank's security guidelines).**
2. The bidder must ensure that robust data isolation / compartmentalization (for multi-tenant environments) and secure purging mechanisms are implemented which comply with the industry best practices and applicable regulatory and statutory requirements, including any updates throughout the contract period.
3. The platform should use Micro-services based architecture using kubernetes or equivalent orchestration for scalability. The solution must utilize Docker or equivalent technology to package microservices, ensuring the solution can be consistently deployed across various environments (development, testing, production). The bidder must provide detailed architecture diagrams of the proposed solution, showing how all components of the system will interact, including microservices, databases, integrations, and third-party services.
4. The CRM solution should support serverless computing options (e.g., AWS Lambda, Azure Functions, etc.), allowing the solution to scale dynamically in response to demand while reducing operational overhead. Platform should have ability to increase concurrent instances based on utilization threshold limit.
5. The CRM should be extensible for future integration with AI-driven chatbots, voice assistants, and other automation tools. The architecture should support easy integration with AI platforms for enhancing customer service through conversational interfaces and automated workflows.
6. The Bidder should host the Platform in High Availability mode, along with DR and a minimum uptime time of 99.90% per month.
7. The response time at server end should be always be less than 200 milli second. During the agreement period, if at any stage, it is found that the Platform provided by the Bidder is not able to give the requisite performance as per the sizing parameters (i.e., up time above 99.90% and response time < 1 seconds), the Bidder shall have to provide additional resources without any additional cost to the Bank.
8. The solution will be implemented in a phased manner with prioritization to Metro and Urban branches initially and then extended to other centres/ branches subsequently. All the modules should be fully functional. 40000 users should be supported by the solution.

9. The CRM Application and Data replication should happen from Primary site to DR site in real time to keep those in sync with a Recovery Time Objective (RTO) of 60 Minutes and near zero RPO (Recovery Point Objective).
10. Bidder to carry out Health Check-up on the application / infrastructure on regular basis (i.e. at least 6 months once) for ensuring that the system meets performance requirements as detailed in the RFP.
11. Bidder, its solution and Bidder's CSP must comply with bank's policies on cloud adoption, cyber security, information technology, information security, etc.,
 - RBI guidelines on Outsourcing of IT Services, Data Storage and handling, Information Technology Governance, Risk, Controls and Assurance Practices, etc.
 - India's IT act and amendments, Security and Data Protection regulations such as proposed Digital Personal Data Protection Bill, any India's statutory and regulatory requirements.
 - Any other IT security/data protection & privacy policies, guidelines, regulations etc issued by Bank, Regulators, Government of India from time to time during the contract period
12. The CSP must ensure that its information and cybersecurity capabilities are continuously updated and adapted to address emerging vulnerabilities and evolving threats, in compliance with industry best practices, regulatory requirements, and the Bank's policies.
13. Bidder should assess the compliance level of SaaS based application vis-à-vis guidelines stipulated by Bank / regulatory / statutory body, through a CERT-IN certified auditors and submit assessment report/ audit certificate to Bank on quarterly basis or as per Bank's requirements.
14. SaaS provider's application & related IT Infrastructure shall be subject to audit by Bank's internal/external auditor or its regulator as and when required at short notice.
15. Undertaking for Cloud and Certificate of Solution/Software being duly signed by OEM to be submitted as part of technical bid.
16. As and when Bank requests, bidders should provide the following certificates/proof from third party vendor/ bidder / CSP providers for their systems:
 - Regular VAPT, API Assessment, customized Source Code (related to Bank) audit certified by a CERT-IN empanelled auditor.
 - A Secure Software Development Lifecycle (Secure SDLC) must be followed by the bidder for all applications throughout their lifecycle, with a security assurance certificate provided accordingly.
 - All security controls of the CSP should be monitored/ audited by bidder/OEM and report of the same to be shared with the bank.

- Regular Hardening of System preferably CIS Benchmark, System & Application Patching to latest release patches and security updates.
 - Adhering to NIST (especially 800-53) and CSF (Cyber Security Framework) standard best practices.
 - Monitoring CERT-IN released advisories and fixing applicable vulnerabilities.
 - Certified for PCI DSS (For Applications wherever Card Data and Transactions are involved).
 - SOC-II and SOC-III Compliance.
 - Perform routine penetration tests and submit the reports to Bank for identifying security vulnerabilities present in the cloud infrastructure.
 - The CRM application should be OWASP and PCI-DSS complaint.
17. The cloud service to be availed by the bidder for Bank shall have the following latest certifications, in addition to MEITY accreditation or System Audit Report (SAR) for Data Localisation conducted by CERT-IN Empanelled Auditors for Cloud Service Provider
18. ISO 27001, ISO 22301 certification
- ISO 27017 (Cloud Security Management Certified)
 - ISO/IEC 27018 (Personal Data in Cloud Certified) or similar certification
 - ISO/IEC 27701 PIM (Privacy Information Management) certified or similar certification
 - ISMS (Information Security Management System)
 - ISAE (International Standard on Assurance Engagements) 3402.
 - Meet the Cloud Security Alliance Cloud Controls Matrix and compliance with CSA Star CCM.
 - RBI and Government of India guidelines and mandates on Cloud Computing GDPR compliance
 - CERT-In guidelines as and when they are released and become applicable
19. Cloud Service Provider's Data Centers should be audited by STQC (Standardisation Testing and Quality Certification) or auditors empanelled by STQC/CERT-In.
20. Bidder to submit a copy of all relevant certifications mandated in this section as part of technical bid.
21. The bidder must have a documented patch management practice in place, ensuring that security patches and upgrades are applied promptly to the product and cloud infrastructure. The bidder must provide a certificate of assurance to the Bank every quarter, confirming that the latest patches have been applied and the infrastructure is secure. Detail on N or N-1 patch status along with mechanism to revert / backup should be stated explicitly.

22. The proposed application must utilize https for secure communication, and the bidder will be responsible for the creation and ongoing maintenance of an SSL certification on the application server.
23. The Bidder /Bidder's CSP to ensure that baseline security configuration of Operating System, Database, Web Server etc. is in accordance with the industry best practices preferably CIS Based benchmark images.
24. ~~The Bidder or Bidder's CSP must ensure the presence of Runtime Application Self-Protection (RASP) or an equivalent control, along with strong data security practices.~~ Data must be encrypted at rest and in transit, using the strongest encryption standards, such as AES-256 for data at rest and TLS 1.2 or higher (preference on TLS 1.3) for data in transit. The CSP must support end-to-end encryption, ensuring data is protected during transmission. Encryption protocol should also be backward compatible. The Bidder must provide detailed information on how data is protected at each stage – in transit, in use, and at rest – specifying the encryption standards, versions, and ciphers used. Necessary encryption tool also to be provided by the bidder. Bidder to provide details on how data is protected in cloud environment at various layers (i.e. perimeter, host/endpoint, VPC/network, database)
25. Cryptographic Controls:
- Hashing algorithms: SHA-256 or higher
 - HMAC algorithms: Any approved hash algorithm with a key length of no less than 128 bits.
 - Digital signature: RSA with a key length of no less than 2048 bits or ECC with a curve size of no less than P-256.
 - Symmetric encryption algorithms: AES with a key length of 256 bits (AES-256)
 - Public key encryption algorithms: RSA with a key length of no less than 2048 bits or ECC with a curve size of no less than P-256.
26. The request and response payload of the information exchanged must be fully encrypted using TLS, leveraging public-key cryptography for key exchange and secure communication
27. The CASB (Cloud Access Security Broker) security controls need to be enforced from cloud standpoint. In case the solution is not covered by CASB, the CSP should offer CWP (Cloud Workload Protection) compatibility and offer points engineering solution. Appropriate security controls/components from the cloud orchestration layer has to be made available by default as per Bank policy/Regulatory Guidelines at no additional cost to the Bank. Bidder to submit Security Architecture diagram to Bank as part of technical bid detailing all the security components.

28. The solution should be capable of intelligent placement for workloads on the cloud setup, so that the load gets distributed dynamically without any manual intervention and get efficient performance.
29. Bidder to regularly conduct and provide results of fault tolerance testing, scalability testing and load balancing testing, every quarter or as per Bank's requirements, validating that the solution is:
- able to recover seamlessly from failures
 - able to scale horizontally (adding resources) and vertically (enhancing existing resources) to handle peak load scenarios without performance degradation.
 - able to provide consistent performance even under high usage scenarios, such as during peak load periods (e.g., festive season banking).
30. Bank will provide network from CSP DC/DR to Bank's DC/DR
- ~~31. Bidder to provide dedicated Leased line from two different service providers from CSP DC and DR sites to Bank DC and DR sites. Bidder to provide link up to Bank's DC and DR router including CPE (Customer Premises Equipment), cross connect, SFP and cable laydown.~~
- ~~32. The link should be of minimum 500Mbps capacity. The successful bidder has to maintain link uptime in line with application uptime of 99.90%.~~
- ~~33. At any point in time, during the contract period, utilization of link should not cross 70%. In case link is utilized more than 70%, bidder to upgrade the link and associated hardware at no additional cost to the Bank.~~
- ~~34. The CRM should support WAN optimization techniques to improve the performance of the application over wide-area networks, particularly for remote branches and users with limited bandwidth. The CRM should seamlessly integrate with Software-Defined WAN (SD-WAN) solution of the Bank for optimized and secure connectivity~~
- ~~35. between bank branches and application, ensuring efficient network resource utilization and failover mechanisms.~~
36. The solution should include Quality of Service (QoS) prioritization features to ensure critical customer transactions and services are prioritized over less time-sensitive activities.
37. All product upgrades should be implemented in DC/DR sites in the cloud without any additional cost to bank. CRM solution should be capable to auto-upgrade at Bank's discretion without affecting any functionality previously available in the application. Successful bidder will be responsible for restoration of all functionalities in case of malfunctioning during application upgradation with no additional cost to the bank.
38. CSP should provide secure repository of the digital certificates etc.
39. Bidder to ensure that data in CRM to be available all time for data export purpose.

40. Bidder to support in deporting/exporting data from cloud due to regulatory/statutory mandates/ Bank's requirements at no additional cost to the bank. Also, Bidder has to specify the mechanism in technical bid document to make sure that the bank's data is erased properly post transition.

41. **Responsibility Matrix:** The responsibilities of bidder are including but not limited to

S. No.	Activity
1	Cloud Services Configuration
2	Identity / Directory Services
3	Application Implementation, Customization & Maintenance
4	Network Controls
5	Regulatory / Statutory Compliances and Certifications
6	Data Portability
7	Cloud Security and Privacy
8	Documentation for proposed solutions and Cloud infrastructure
9	SLA report generation and submission
10	SLA dispute identification and resolution

42. Bidder is responsible for complying with all RFP terms. Bidder to engage OEM and CSP, wherever applicable, for undertaking activities detailed above, without affecting SLA timelines.

43. ~~The Bidder must ensure that the solutions listed below are provided and meets the minimum security standards specified. However, during the contract period, if enhanced security levels or additional solutions are required, due to changes in regulatory, statutory, or Bank policies, the Bidder shall upgrade and implement the necessary security measures at no additional cost to the Bank.~~ The solution must be integrated with SIEM and other security solution of the Bank.

44. Encryption keys which are used for encryption in cloud should support BYOK (Bring Your Own Keys) and use along with KMS (Key management Service). The solution should integrate with Bank's Hardware Security Module (HSM) for secure key management, ensuring that encryption keys are generated, stored, and accessed securely.

45. The encryption keys to be exchanged over a secure channel and the keys must be properly secured using KMS and be accessible to the appropriate application/services on a need to know basis using properly defined IAM (Identity & Access Management) Policies.

46. Ensure encryption key is not hardcoded and are obfuscated to avoid misuse of the same by an adversary having access to code.
47. Ensure the regular rotation of encryption keys and certificates.
48. IAM controls, roles, IAM groups to be configured for all the resources, users etc. based on principle of least privilege and are regularly reviewed. Solution should provide single sign-on capability with ability to validate users with Bank's on-premises Active Directory (AD) with 2FA (Biometric/ OTP based 2FA/Authenticator App based 2FA) Option should rest with the bank to enable/disable the feature as and when required. Bidder/ CSP to submit solution integration document for AD integration.
49. For administration purposes, privileged accounts, user login and for any critical actions ensure MFA is in place as an additional layer of security of the IAM users and roles.
50. Zero Trust security model approach to be ensured.
51. Monitoring and Incident Response
 - a. Bidder to ensure continuous monitoring of application and security audit, events, access to critical data and/or processes, or audit trail generated by SaaS application. Continuous monitoring mechanism shall be put in place to evaluate the operations of the Cloud Services subscribed and implementation & effectiveness of security controls in the Cloud Computing environment.
 - b. Bidder to Implement automated monitoring tools and systems to track the platform's health, uptime, and response times. Bank's Team also to be given login for dashboard access for checking of the audit logs and security events if required.
 - c. Bidder to regularly evaluate the application's performance against benchmarks outlined in the RFP/SLA.
 - d. Bidder /Bidder's CSP to enable detailed logging and auditing of user, process activities & other activities in all resources including when and how data is accessed, privileged accounts, SaaS Administrators, administration actions and authorization logs which may indicate sensitive or privileged actions, to help detect and respond to security incidents.
 - e. Audit trail should be available for all activities, including failed attempts and unsuccessful authentication/ authorization attempts. Audit trails should be made available to the Bank for forensics purpose as and when requested.
 - f. In case of any breach Bidder/Service provider should notify bank and regulators immediately and provide RCA and take appropriate action, remediate, cooperate for Incident Management and help in legal discovery and government intervention.
 - g. Bidder to establish a mechanism for detecting and responding to incidents or anomalies. The CRM solution should incorporate advanced threat detection & analysis and security monitoring tools, such as real-time anomaly detection,

automated intrusion detection, and automated response mechanisms, to mitigate risks associated with cyber threats.

- h. The alerts from CRM Application should be able to integrate with Bank's incident response process by automatically ingesting the alerts/logs offloaded to the Bank's SIEM or IDS solutions.

52. Contracts and Continuity

- a. Bidder to support in deporting/export of data from cloud to on-premises or cloud to cloud migration on termination of contract at no additional cost to the bank. Bidder to handover entire Bank's CRM data along with data dictionary as per Bank's requirements, at the time of deporting data from cloud.
- b. Bidder to ensure secure purge of Bank's data stored on cloud including backups and residual data/metadata (e.g., system logs, audit logs, access logs, search indices) and written confirmation of successful deletion to be submitted by Cloud Service Provider within 15 days from termination of contract.
- c. The CSP should provide access to their IT infrastructure as and when required for audit from security perspective which may also include visits at short notice to ensure Bank's data are not misused and to review IT controls of Cloud Service Provider.

Third parties/partners/Bidder/CSP should also conduct background check, regular security assessments, audits on their suppliers, vendors and other third-party partners as well as employees (third-party risk management program).

53. User Acceptance Test of Software

- a. **The Bank shall conduct User Acceptance Test (UAT) for the Customer Relationship Management Platform to ensure that all the functional requirements are available & functioning as per the Bank's requirement as described inter alia in this RFP and the successful bidder shall support the Bank in the UAT process.**
- b. **The Successful Bidder will be responsible for conducting system integration testing to verify that all system elements have been properly integrated, and that the system performs all its functions.**
- c. **The bidder need to do proper version control, Release Management, secure code review and compliance as per the necessary advisory guidelines from time to time without any additional cost.**
- d. **Successful Bidder will be responsible for setting and maintaining the test environment during the entire period of project implementation and will ensure its configuration and parameterization for conducting the UAT as per bank's policies and in compliance with this RFP's requirements.**
- e. **The Successful Bidder will provide the scenarios for UAT and assist in preparing test cases including the test data to support all the Business scenarios. The Successful Bidder should dedicate resources (from**

Successful Bidder's as well as the OEM's team) to work with the Bank's project team for this purpose.

- f. The Successful Bidder shall assist the Bank in analyzing / comparing the results of testing.
- g. Successful Bidder shall provide adequate resources for troubleshooting during the entire UAT process of the Bank.
- h. The Successful Bidder shall be responsible for maintaining appropriate program change control and version control of the system as well as documentation of UAT and change of configuration and parameterization after making changes in the system.
- i. All errors, bugs identified, enhancements/ modifications required during and after testing will be resolved within the overall timelines for implementation. Sign-off for the same will be obtained from the Bank prior to implementing the work-around, in respect of errors and bugs affecting the functioning of the Bank.
- j. The Successful Bidder will be responsible for using appropriate tools for logging, managing, resolving and tracking issues and its progress, arising out of testing and ensuring that all issues are addressed in a timely manner to the satisfaction of the Bank and as per requirements mentioned in this RFP.
- k. The Bank will accept the developed / customized software only after implementation of the software with successful conduct of acceptance testing by its users, including load and performance test. Software will be considered to be accepted only after the Bank issues an acceptance letter to the successful bidder.
- l. The solution may be audited for risk analysis and security features by the Bank's IS Audit team or a third party appointed by the Bank, if so desired by the Bank. Support is to be provided for fixing such findings.

54. Customization of the Software

- On awarding the contract, the successful bidder should discuss with core users of the Bank to understand the functioning of the existing system and gap analysis. The successful bidder shall prepare a customization document based on the gap analysis and other requirements of the RFP. The successful bidder shall undertake to obtain Bank's approval of the customization documentation and associated project plans before software customization work commences. The customization document should provide the plan in detail, based on the criticality of the requirements

55. Onsite Resources

The selected bidder should provide onsite resources for undertaking activities on 24x7x365 basis during contract period post go-live. However, charges for resources

will be paid from the date of acceptance of the solution of the Bank. However, selected bidder has to ensure that onsite resource should be part of the project implementation team. The cost agreed upon for the resource will be frozen during the contract period.

Onsite resources deployed by the successful bidder will be required to work from Bank. All expenses (travelling/lodging, etc.) shall be borne by the successful bidder.

Bank has the discretion to reduce/ terminate the onsite support as per the requirement with three-month notice period. At the banks' request, the successful bidder is bound to increase the onsite support resource at the cost specified in the price breakup. Bank has the right to interview and reject resources deployed by the Bidder.

Onsite resource to be available on all days (including holidays). In case the resources go on leave/absent, replacements having equivalent or more experience and qualification has to be arranged by the selected bidder to ensure that regular functioning of the solution is not hampered. Bank reserves the right to claim change in resource based on the performance of the resources.

In case, if any of the required onsite technical support engineer(s) is/are not available in office on any particular day / shift, the Bank will be deducting the cost of those resources for the period of their absence.

On request from the Bank, the bidder need to adequately ramp up the onsite support team in order to support the additional journeys / use cases / modules / solutions so developed for the bank. The Bidder needs to bring its own version control tool.

The Support should be for an unlimited number of incidents reported to them and provides a practical solution to resolve the issue. All escalations will be attended / responded-promptly not later than 30 minutes of reporting.

The onsite resource will also be responsible for complete day-to-day activities such as end to end management including attending complaints, incident, security threat, signature updates, daily updates, product related issues, any other issues etc., to the Bank as per SOW/SLA at no extra cost during contract period. Support should include advising & helping the Bank in implementing controls for the risk advised by regulators/Govt. of India.

If the issue requires OEMs technical person's/ product developer's etc., intervention, the selected bidder should take up suitably with the appropriate level at OEM and obtain the solution and implement it for resolution of the issue at no additional cost to be the Bank.

If the analysis of the issue requires log submission, the selected bidder should submit the same for further analysis in consultation with the Bank. However, penalty shall be applicable as per uptime clause.

The on-site support engineers deployed should be conversant with the operations of the proposed platform.

56. Documentation

Detailed documentation (functional and technical) shall be provided to the bank on all the implementation and customization done. Documentation and data dictionary shall be updated and provided to bank after every customization.

The following minimum documentation (hard copy and soft copy) on any proposed software components must be made available in English:

- a) Detailed project plan
- b) Software Requirement Specification document (SRS) and other design documents
- c) Documentation of technical requirements
- d) Documentation of architecture requirements
- e) Mapping of Functionality and specifications document
- f) Development of low level and high-level design documents
- g) Documentation of testing plan, test cases, test scenarios, test scripts, gaps, bugs, fixes, etc. as a part of quality assurance
- h) All documentation including technical, operations, like release notes, license terms, user manuals, training manual, technical manual, standard operating procedures, solution architecture and design, system flow document, data dictionary and other necessary documents etc.
- i) Error tracking and defect resolution documentation process
- j) Statement of Work (SOW), Quality Plan, Test Plan, Requirement traceability Matrix, Design Document, Report Design, Delivery Notes documents, etc.
- k) System configuration documents
- l) System/debugging/diagnostics documents
- m) The Bidder shall also provide the MIS reports as per requirements of the Bank. Any level/ version changes and/or clarification or corrections or modifications in the above-mentioned documentation should be supplied by the bidder to the Bank, free of cost in timely manner.

57. Installation, Maintenance and Support

- a) The solution has to be installed and customized as per bank's requirement by the bidder for the proposed Customer Relationship Management Platform only.
- b) The successful bidder shall
 - Be responsible for studying of existing source systems, data mapping, integration with the Core Banking Solution/ Middleware, other external systems provided under scope of work, maintenance, support and overall management of the project.
 - Supply, install, configure, test, integrate & commission all the necessary software modules with necessary and adequate customization, modification,

patches, upgrades, utilities, tools etc., and maintain the CRM Platform to achieve full functionality as specified in the functional requirements.

- Seamless integration of supplied, customized, developed Customer Relationship Management Platform for Bank to meet the Bank's Functional and Regulatory requirements.
 - On-Site maintenance of Customer Relationship Management Platform and related products with customization, change management, addition of new reports as required and desired by the Bank. Performance tuning of application, necessary and adequate patches, upgrades etc after successful GO-LIVE of phase wise MVP of Customer Relationship Management Platform, inclusive of providing support for day to day functional and technical support to the Bank's team.
 - The test activities should be carried out and vendor should submit all the test reports to the Bank authorities for vetting and approval.
 - To provide complete training on the entire solution with all its components.
 - Maintaining history of all additions, modifications, deletions and parameter changes etc. as Audit Trails and regular reports on the same for inspection and audit.
 - Providing application maintenance for error fix, patch management, upgradation, additions / modifications in the application to cater changes to data sources and/or new reporting requirements.
- c) The successful bidder should study the requirements of the bank including customization and provide a BRD (Business Requirement Document) and Systems Requirement Study (SRS) report to the bank.
- d) The successful bidder has to migrate complete data from existing data sources to the proposed solution.
- e) Bidder will be required to provide root cause analysis for all performance and availability problems that occur. Formal root cause analysis to be delivered within 48 hours of problem occurrence, including:
- a. Explanation of the root cause
 - b. Actions taken to resolve the problem
 - c. Action plan to prevent recurrence, with project plan/tasks required and timing for each major milestone of the correction effort, and identification of Bank's responsibilities in the correction process.
- f) Undertake and assist the bank officials for the following Access Control activities (indicative):
- a. User account Creation/ deletion as per access policy of the organization
 - b. Creating/ modifying/ deleting groups

- c. Administering user rights, roles and passwords of all the relevant subsystems.
- d. Maintaining data access security etc.
- e. Regular submission of various reports for all activities undertaken at periodicities, formats and activities etc. as decided by and at the discretion of Bank.
- g) All installation and configuration reports, documents, diagrams etc., are to be supplied before commissioning.
- h) Compliance to Bank's policies like IT policy, Information Security policy, etc.
- i) All professional services of the vendor required for complete installation, commissioning and maintenance shall be included in the scope of work.
- j) Solution must integrate with the Bank's existing network and security solutions.
- k) The bidder should assist bank in making the solution fault resistant i.e. during the event of any failure (software /hardware /network /etc.), the solution should continue to function seamlessly and no transactions should be lost.
- l) Notify about all the detected software errors, it's impact and correct them in the shortest possible time.
 - The Customer Relationship Management Platform service must be conducted in a manner not compromising the security and integrity of Bank's data.
 - Alerting bank in case of any performance issues
 - Resolution of the issues as per the Service Response and Resolution time for the onsite support services mentioned in this document.
 - The major responsibilities as specified above are indicative only and are not exhaustive in any manner.

58. Functional and Technical Requirements

Note:	
a)	The specifications of proposed CRM system / solution are detailed below. These specifications are only indicative but not exhaustive.
b)	If the bidder feels that certain features offered are superior to what has been specified by the Bank, it shall be highlighted separately. Information regarding any modification required in the proposed solution to meet the intent of the specifications and state-of-the-art technology shall be provided. However, the Bank reserves the right to adopt the modifications /superior features suggested/ offered.
c)	The bidder shall provide all other required equipment's and/or services, whether or not explicitly mentioned in this GeM bid, to ensure the intent of specification, completeness, operability, maintainability and upgradability.

d)	The bidder shall own the responsibility to demonstrate that the solution offered are as per the specification/performance stipulated in this GeM bid and as committed by the bidder either at site or in bidder's work site without any extra cost to the Bank.
----	---

Must-pass (disqualifiers)

The bidder must need to comply all the below mentioned points.

#	Technical and Functional Requirements	Response (Confirmed & Understood)
A.	Transformation Outcomes & Minimal Clicks	
1	Vendor must perform process redesign (not just implement). Identify top 50 journeys and deliver minimal-click fulfilment. Measure impact on TAT, FCR, customer effort proxy, adoption, cross-sell	
2	Instrumentation for journey steps/clicks/time-in-stage; ability to export metrics to analytics.	
B	Headless + Loosely Coupled Architecture	
1	Capabilities must be consumable by bank apps/portals via APIs no functionality locked only to CRM UI.	
2	API-first + event-first; bank gateway/event bus standards; API versioning/backward compatibility idempotency, throttling; no mandatory proprietary middleware.	
C	BYO Analytics + BYO Agentic AI	
1	CRM must support bank's CoE for analytics and agentic use cases summarize, suggest next action, draft replies with human approval and audit	
2	Event feeds + batch extracts secure action APIs AI action logs (who/what/when/why/approval); model/tool agnostic integration.	
D	Observability, Security, DR, TCO	
1	Ops dashboards and audit evidence must be available to business and audit teams.	
2	Correlation IDs, tracing, monitoring, retry/replay, DLQ; SSO, RBAC/ABAC, field-level security, encryption DR (RPO/RTO, drills) portability/exit exports config-first to reduce TCO.	

The bidder should provide their response to the Technical and Functional Requirements by giving the compliance level as explained below. The Response Column is to be mandatorily responded to by the Bidder, for each requirement.

Response: The Bidder is to state in this column that the requirement is 'Confirmed and Understood' i.e. the service will be delivered.

Compliance	Description	Marks
A	Already Available FULLY in the product.	2
B	Customizable	1.5

I. Functional and Technical Requirements (Bidder needs to score at least 75 % marks in technical and functional compliance):

The detailed Functional and technical requirement with marking scheme for each of the feature is as follows:

S.No	Technical and Functional Requirements	Compliance- A/B	Response (Confirmed & Understood)
A.	<u>Complaint Management</u>		
1	Ability to create Service request /Complaint/Raise query for Customers as well as Non-Customers through website, Contact centre, ODR- Internet banking, BOBworld, BC portal, Social media platform, SMS Banking Chatbot, Whatsapp banking, ATM Kiosk etc from various sources, Provisions should be provided to Staff, BC agents, NRI customers apart from customers and Non-customers.		
2	CRM should be able to handle Customer Complaints/ Service requests query including its entire journey i.e. Creation, processing/Resolution, Rejection, Escalation to PNO/IO, Closure in case of complaints/SR's/Query etc.		
3	CRM is to be integrated with Bank's different channels for creation of Complaint/ Service requests/query etc. This will enable Customers to lodge Complaint / service requests/query through Bank's different		

	channels i.e. Website, Debit Card Redressal System (DCRS), Internet Banking, BOB world, Branch, Social Media, Contact Centre, INGRAM, CPGRAM, JANSURAKSHA and various regulatory and Ministry portals etc.		
4	Ability to configure Service Request /Complaints/Query Lifecycle/Workflow.		
5	De-duplication check on Service Request/Complaint/query based on Category or any other fields present in the UI screen.		
6	The solution should be capable to generate Universal ID for each complaint /SR and identify and remove any duplicate complaints generated through various channels such as branch, contact centre, Internet banking mobile banking, website etc		
7	SMS/Email notification should go to the users and customers informing creation/status change/closure of complaints/SR.		
8	Creation of complaint from Email & SMS by identifying the keywords and sender's registered email id/ registered mobile number.		
9	The solution should be able to identify the sender based on the registered email id/ mobile number and link the complaint to the existing customer.		
10	The solution should be able to publish API for Complaint management into web service which shall be used by other systems i.e Bank's internal and third party systems like INGRAM, CPGRAM etc. to push information and create Complaints in the system.		
11	Complaint /Service requests shall be automatically assigned (based on some rules/matrix which should be configurable). Post auto-assignment, the solution should		

	be able to notify the owner by way of email and in the notification centre i.e SMS.		
12	The solution should be able to prioritize certain type of complaints/SR's based on some rules (which should be configurable).		
13	Complaints received from the High visibility channels/VVIPs such as CPGRAM, INGRAM, RBI, MOF and complaints received through email to Managing Director & CEO may be categorized as "High Priority". These Complaints to be shown separately as "High Priority Complaints" on Dashboard for better monitoring. Based on the priority of the complaint, it should appear in the pending list of complaints, i.e. the highest priority complaints will appear on the top followed by others based on priority.		
14	The solution should be capable to process and effectively manages to resolve customer complaints by registration across various channels like email, website, Internet banking, BOBworld, Contact centre, Branch, chatbot, SMS Banking, Whatsapp banking, social media etc.		
15	There shall be various stages/status of complaint which will be changed during the course of Complaint processing/SR's.		
16	SMS/Email notification should go to the users informing the status change/closure of complaints/SR's.		
17.	Every type of complaint /SR's should have expected TAT for its closure which the system should display.		
18.	If a complaint is lying in a one stage/status for a defined time and is crossing the TAT for the complaint stage, then it should be automatically escalated & notified to next level based on some rules/matrix which should be configurable.		
19.	Escalation of Rejected and partially rejected complaints to Internal Ombudsman through		

	PNO user with certain predefined rule so that such complaints can be closed only after IO remarks. The IO can agree and disagree with the rejected Partially Rejected cases and system should have method to implement IO suggestions.		
20.	Assignment of fraud cases to different resolver groups once the investigation is completed by respective HO Division for raising chargeback and closure of complaint .		
21.	The complaints shall be manually or automatically closed in CRM by the respective owner after the respective procedures		
22.	Ability of configuring Holiday Master in Complaint Module for considering the TAT for complaint.		
23.	Ability to generate dynamic reports on service request/Complaints/query & option to export the result set into different formats like excel, pdf etc.		
24.	Maker/Checker functionality in Service Request Processing and query/complaint module.		
25.	Bounced Grievances: are the Grievances which are bounced by the Resolver Group to initiator for requirement of additional details related to Grievance. There should be option available for the Resolver groups.		
26.	Reopening of Grievance: There should be option for the Complainant can re-open his grievance within 15 days from the date of last resolution, maximum of 2 times in its cycle as per our Bank's Grievance Redressal Policy.		
27.	Forwarding Grievances: Bulk Forwarding Option and Single forward should be available for Departments to forward large number of grievances to other resolver group. The same shall be used judiciously.		

	There should be option provided to the resolver groups.		
28.	Auto-Quality Check Resolution of complaints option should be available.		
29.	There should be option for the Resolver to be provided for Interim Resolutions which will be displayed to the customer.		
30.	Ability to send reminder or notification if a case has breached the TAT or any other case.		
31.	The system allows to take down multiple requests for a single customer without re-entering profile data of the customer		
32.	CRM HO user to be given existing functionality for change of Category/ sub categories and “Assigned to verticals/ Department” as per requirement for both Complaint types.		
33.	System have provision to restrict users (depending on user role, processing status, current owner) in editing the complaint data. Depending on the status flag, update option should be available to the appropriate users.		
34.	Dynamic Reporting and Dashboards for Performance assessment and Ranking of Regions/Zones/Branches in Grievance Redressal.		
35.	Various reports to be designed dynamically as per requirement of the Bank and other regulatory guidelines. Monthly, quarterly, Yearly report on complaint as required in Bank/ regulatory format		
36.	Solution should have the functionality of uploading support documents/evidences based upon which the Bank is deciding on the complaint as Decision of IO is based upon the record placed and / or documents required by IO.		
37.	System automatically flags service requests and complaint if already escalated to allow		

	supervisors to see how many were actioned within SLA /TAT .		
38.	Bulk closure, Bulk forwarding, Bulk Resolution option to be provided to resolver groups.		
39.	Solution should have functionality of Integration of CRM with other servers for fetching required evidences/Documents should be there.		
Social Media Complaints			
40.	In case of Social media complaints- Ability to add/integrate custom sources for campaign impressions/source tracking using API's/UTM codes etc.		
41	Analytics: Ability to track and analyze customer interactions, response time, agent performance to improve overall social media response management.		
42	Reporting: Ability to provide platform wise report through real time dashboard, graphics etc. with contents such as tweets and replies, data and count, Complainant Name, Complainant No., Account No. (If applicable), Complainant Profile link, Complaint Type, Complaint Platform, First Time Resolution %, Avg. daily mentions, Top mention/Tweet/Post, Impressions/Click, Website,Engagement, Avg. Likes/Retweets, Demographics segregation of Complaints, Compliments, Unsolicited tweets count,Page/Media views, Conversion Tracking, Social Media Campaign Performance, Social Media Leads Classification and Generation, Employee Tweets, Competitor Analysis etc.		
43	Reporting – Ability to Gather data from various social media channels, web/app news platform and other digital platforms. Tool used must not have any limitations on collection of mentions/keywords data.		

44	Ability to Identify and reach out to key bloggers and influencers.		
45	Periodical reports regarding latest trends/technologies in social media available at bank's disposal for increasing the engagement or suggest the bank to buy /subscribe.		
46	It should also suggest appropriate strategies according to the responses to enhance the bank image and goodwill among public.		
47	Collate/analyze social media, digital marketing trend, theme and rankings of peer's/market standards to identify new insights on real time basis.		
48	Ability to view translation of the comment in vernacular languages other than English or Hindi.		
49	Ability to prioritize posts based on various hashtags/keywords as recommended by bank's social media team.		
50	Ability to capture image mentions across Digital and Social Media.		
51	Ability to publish content/posts on Bank's Social platforms.		
52	Collaboration tool: Ability for multiple agents to collaborate and resolve customer inquiries together.		
53	Guided resolution (macros/checklists/quick actions) for top complaint types interim resolutions visible to customer regulatory evidence pack export out-of-band change handling		
54	Headless case APIs + milestone events; observability for channel/regulatory		

	integrations incl. DLQ/replay structured classification (root cause/resolution codes).		
55	Customer identity resolution (handle → customer/prospect mapping) with consent governed response templates/approvals for sensitive cases; collaboration workflow.		
56	Social ingestion APIs event publishing for social-to-case.		

S.No	Technical and Functional Requirements	Compliance-A/B	Remarks
B.	Marketing Automation & Journeys and Campaign Management		
1	Segmentation and targeting of customer groups: CRM software should be able to segment customers into groups according to a wide range of characteristics, such as demographics (e.g., age, geographic location, job role, industry, company size) and activities (e.g., recent and past purchases, email response rates, social media activity, personal preferences). The information derived should enable us to create a very defined customer profiles and then personalize their marketing messages to target very specific groups of customers. Marketers can also create targeted business-to-business email marketing campaigns, which can increase subscriber numbers, email marketing metrics.		
2	Creation of personalized content: CRM software should provide ability to customize communications to each person contacted. People dislike impersonal marketing messages that begin with generic introductions like “Dear customer.” CRM software should create communications that address potential and current customers by name. CRM can also include the customer’s position and company to truly tailor the message and grab their attention. Having other information about the customer, such as		

	their purchasing history and preferences, as well as notes on previous communications, allows to craft a message tailored to each customer. For example, It could discuss ideas and opportunities, provide useful and helpful information, and guide the conversation to suit a specific customer. This level of personalized content results in increased response rates, more positive brand perception.		
3	Ability to create targeted marketing campaign by segmenting the audience (based on demographics, product interest, and so on) as well as designing messages and offers for each group.		
4	Ability to execute campaigns in Email/SMS/Social Media Channels etc.		
5	Ability to integrate with Social Media Platforms like Facebook, LinkedIn, Instagram, Twitter etc.,		
6	Ability to link campaigns with products		
7	Ability to define campaign financials and measure ROI		
8	Ability to organize a quick campaign by searching customers in CRM or add customer database.		
9	Ability to integrate with bank's existing IVR Solution to run an Outbound Call campaign from CRM. And marking the campaign response in real time mode .		
10	Ability to capture the campaign reach and spread. Ability to track campaign response from the users using a variety of metrics – such as count of e-mail pushed, delivered count, mail opened /attachment opened count, responded count, lead generated etc. Track leads and contacts and tie them to a campaign source, and also tie every source to a campaign dollar		
11	The ability to clone campaigns, recycle campaigns, templates, forms, and other		

	marketing materials for new customers and markets to save cost and efforts.		
12	Ability to convert the campaign response to Lead manually as well as automatically		
13	Campaign level report indicating the KPI's goals and targets reached to be shared via daily automated report/weekly/monthly/quarterly/ annual plan.		
14	Reports of leads generated by social media campaigns		
15	Complete track of all campaigns and submit the post evaluation for each campaign.		
16	Integrated campaign Management: A single place to effectively plan marketing spend, manage all initiatives and campaigns, and analyze performance and results.		
17	Integrated Segmentation Wizard: Application should have the ability to easily add contacts and leads to campaign lists right from within campaigns.		
18	Real-time Marketing Reports and Analytics: Application should provide standard and custom configurable reports and dashboards with graphical presentation on the real time basis. Ex. Performance Analysis of the Campaign, after closure of CAMPAIGN. Analysis on leads generated, Conversion count, conversion %, Achievement in value Terms (based on product) growth from base to the Current date of Analysis etc.		
19	Ability to configure dashboards based on any combination of data set in Campaign Object like campaign activity status, campaign financials, channel effectiveness, and the response trends.		
20	Ability to measure campaign profitability(Branch Wise/Region Wise/Product Wise etc.)		
21	Ability of rescheduling the campaign activity such as mail/SMS, at frequent intervals based on response from campaign execution. E.g.		

	SMS Campaign sent to 50000 customers, out of which 5000 customers positively responded, SMS not delivered to 2500 DND Customers. 2nd level SMS to be scheduled to 42500 baring interested and DND customers.		
22	Ability to provide Standard Campaign Reports for different stages as well as to ability to generate reports by privileged CRM users directly from application GUI based on dynamics search condition.		
Budgeting			
23	Ability to capture Budgeting & Costing part of a Campaign Execution.		
24	Ability to assign sub-budgets for each campaign activity		
25	Ability to add up the sub-budgets of a campaign to identify the total budget allocated for that campaign		
26	Ability to re-budget a campaign by simply changing the link between the campaign and the defined budget		
27	Ability to define expenses for each campaign and associate them with a budget.		
28	Ability to convert a campaign response into a lead or an opportunity with the name of channel as well		
29	Ability to keep a history of campaign responses created for a particular customer and display the history in the newly created campaign response of the customer		
30	Ability to maintain and show the status of all campaigns		
31	Ability to upload customer lists (excel) and prospect lists for Target Marketing List management		
32	Ability to do customer profiling on the key areas such as (products, insurance, credit Card) and then based on customer profiling		

	the engagement approach for each customer can be worked out		
33	Ability for a sales manager, zone manager, or a team manager to monitor activity closure status		
34	Ability to create a central repository to maintain sales information which will act as a Sales Literature in CRM		
35	Plan and manage Marketing Budgets for initiatives		
36	Track costs and expenses incurred as part of Campaigns		
37	Ability to have a main campaign report to compare the performance of different campaigns in terms of sales turnover		
38	Consent & preference mgmt with audit; campaign/content maker-checker + versioning suppression rules attribution standards.		
39	BYO analytics: ingest segments/scores from bank publish response/engagement events headless campaign APIs UTM/event attribution ingestion.		

S.No	Technical and Functional Requirements	Compliance- A/B	Response (Confirmed & Understood)
C.	Service Management with Customer 360°		
1	Consolidated Single Snapshot View to see all the customer relationship by fetching data about the customer from across the platforms such as CBS, Other Allied Systems, MIS/ Data Warehouse/BDL, IVR, email, SMS gateway etc.		
2	Capability to display On Demand data by integrating with other solutions like CBS, SharePoint, intranet site, & Chat Bot etc. via API integration /Middleware/Connect 24.		

3	A single view of complete relationship of the customer/ prospect with the bank with the ability to drill down into the dashboard details. This view should include the following: a) Customer-to-customer relationships: List of related customers (e.g. joint, minor accounts, business accounts, etc.) with ability to view profiles/ portfolios details. b) Customer's portfolio: List of products owned by the customer including (accounts, finances/loans, cards, deposits, investments, etc.). c) Ability to view product details such as (Lien balance, Balance enquiry, Mini Statement, last transactions, payment dates, account statements, interest certificate etc..in downloadable and printed format). d) Cross Sell Indicator: List of products and offers the customer is eligible for based on pre-configured rules e) Customer marketing preferences in terms of SMS, e-mail or any other channel f) Customer anniversaries, and other important dates g) List of Leads (Cross-sell & references) h) List of initiated service requests by the customer with related details and status i) List of pending cases including complaints, inquiries, grievances, Leads etc. with details and respective status j) Status of pending requests/Complaints/Delivery of deliverables for last 3 months or any date range selected by user k) Schedule an Appointment with the customer, Alert generation to specific user on the scheduled date and time		
---	---	--	--

	l) Alert generation on Balance below QAB/MAB, Cheques returned for last 3m or so, KYC Document Expiry Date, Re-KYC due etc. m) Status of Existing Digital Onboarding, WMS and Govt. Business relationship etc. n) To view SMS triggered to customer with Status (Delivered/Failed etc.) during last 1/3/period selected by user. o) Alert generation to user on Credit Limit Expiry, Non Fund Based facilities (BG/LC etc) due to renewal, Expiry in next 3 months etc. (p) Profile (Name, demography, Address, KYC details etc.) (q) (s) Third Party Products and Government Business Schemes (Insurance, Mutual Fund, DEMAT , PMJJY,PMJDY, APY, SSA etc. (t) Cards details like how many cards, debit/credit, closure/ renewal, Pin change options, willingness of new card etc. (u) Channel Services (Net Banking, Mobile Banking,UPI etc.). (v) Customer's channels subscription status (e.g.UPI, Internet Banking, BOBworld, IVR, Omni channels, etc.) . (w) CRM solution should also have the ability to identify the customers and their relationship with others customers in a single click.		
4	Capability to drill down the customer details from 360 View to detailed view screens.		
5	Ability to capture and view Notes/Input/Interactions about the customer		
6	Ability to define Static business rules for presenting cross-sell / up-sell suggestions		

7	Auto-determine Customer Engagement Score based on recent customer interactions with Bank		
8	Display of consolidated account holding value/investment/liability of customer and display it in charts or other graphical formats as per bank's requirement in Customer 360 screen.		
9	Data Capture and Display all customer interactions irrespective of channels of communication (Leads, service request, Complaints, Chat, campaign targeted) in 360 view itself .		
10	Ability to customize the 360 view based on user preferences, department and security access rules		
11	Capability to configure Cross Sell/Upsell option in Customer 360 screen based on logic set by Bank to show as Alert or Pop UP or for push notification /Campaign Activity/ KYC pending etc.		
12	Search Option/Filter options from the Customer Database using any of the customer data field (Advanced Find) & ability to export the result set to different formats like excel, pdf etc.		
13	Capability to show alert/notification as Pop Up on Customer 360 screen for each contact/customer (in 360 View) For any digital journey drop off.		
14	Provision to maintain Customer Segment information with colour coding or categorisation viz. Diamond/Gold/silver or BSBD or non-profitable customer etc which shall be refreshed using the daily data feed to be fetched from CBS.		
15	Capability to generate Customer Profitability Index for each Customer in Customer Database.		

16	Capability to integrate Interactive voice response blast services		
17	Provision for digital KYC Compliance with option to upload the necessary OVD document and capture KYC fields by CRM Users and perform validation based on the document type with maker checker provision.		
18	Audit Trail of Contact Information in Customer 360 which shall be configurable on field wise manner.		
19	Bank should be able to use the Meta data to inform engagement strategies, customer journey steps, communications etc. A Customer 360 view should enable organization to derive value, achieve sustainable competitive advantage, and maximize new customer acquisition opportunities whether in-store or online.		
20	The bidder should provide videos/ documents/ tech support/ chat-bot among others to guide the customers to use & interact with CRM.		
21	Improve the quality of data that feeds data analytics and machine learning initiatives, making downstream decisions more precise.		
22	Ability to have a proper Feedback Mechanism for customers and internal stakeholder. Customer feedback report on customer experience, suggestion for further improvement etc. Feedback management should be integrated with the bank's existing systems on branch-level/administrative level to improve customer experience. The bidder should be able to provide the 360-degree customer feedback mechanism to the customer at the various levels. The system should provide multiple channel to receive the feedback from the customer such as		

	QR code, tickets, SMS, emails, telephone etc. The system should also be customized as per the requirement of the bank.		
23	CRM should be able to identify service requests /complaints made by the same customer for any issue even after complaining through different channels. These are to be categorized as escalations of the same case and further De-duplication check on Service Request.		
24	Bidder has to provide detailed Customer Assessment review and recommendations for mobile/ web platform and submit report with recommendations and suggested solutions. The report will cover the following items such as Performance insights, Community feedback, Customer view, Competitive Benchmarking, User Interactions Impact analysis, New User Acquisition, Login Experience, Feature experience, Ease of use, Wireframe analysis, New feature Ideas, Improving UI Accessibility, Improving user adoption through UX etc.		
25	Bidder should extract/load Data from all Source systems to a custom dashboard as per the requirement of our bank in the portal for the bank, the dashboard developed is not limited to: The admin module/dashboard of the solution provided to the bank should have real-time analytics on various metrics like Stage wise applications, TAT (within, outside the bounds, escalated, etc.), product wise, loan quantum wise, risk profile wise, STP/non STP, Customer Life Time Value Calculation etc. The reports thus generated should be downloadable / exportable.		

26	The system should have capability to interface with Bank's existing analytics/MIS/ DATA WAREHOUSE /BDL platform for seamless flow of data.		
27	Plugin/Interface to integrate with Social Media Platforms (Facebook, Twitter, Instagram etc.) from Customer 360.		
28	The system should have the capability of deduplication of leads received in the system from all sources. The logic to be defined in co-ordination with the Bank team.		
29	System to capture various service requests for Cheque book, debit card, internet banking ,UPI, BOB world, Balance enquiry, Lien balance, Quarterly and Monthly balance,Account statement, Ministatement, Interest certificate, in downloadable and printable format and also to keep track of these deliverables in the CRM even for the newly opened account . Email to be sent to the customers on Interest certificate, Ministatement, Balance enquiry etc.		
30	CTI Integration for auto-pop up of customer profile/360 degree view in CRM on every incoming/outgoing call & incoming email & web chat alert on Avaya/CISCO.		
31	Option to create lead & service request from Customer 360 screen . List of pending cases including complaints, inquiries, grievances etc. with details.		
32	All Interactions & inbound/outbound communications from various channels including email/sms..		

33	View of transactions done through various Channels		
34	Provision for graphical representation of customer profile completeness with provision to provide access to user for capturing additional customer data		
35	Log view for customer interactions across all channels		
36	Ability to create new related contact directly from customer 360 view		
37	Provision for digital KYC Compliance with option to upload the necessary OVD document and capture KYC fields by CRM Users and perform validation based on the document type with maker checker provision		
38	Capability to create prospects with minimal information and also to convert prospects to customer.		
39	Providing unified view of Customer 360 in Mobile Client		
40	Capability to show the leads/cases/campaign details of a customer in 360 view.		
41	Maker/Checker functionality in Customer Screen for data capture of Customer Fields with option to enable/disable the functionality field wise		
42	Option to modify specific customer fields and attach documents in different formats (like pdf, docx, jpg, png etc.) in Customer 360 View.		
43	Data quality check is in-built into the system and data governance is part of this module		

44	CRM as system of engagement (CBS/MDM as system of record unless stated) unified interaction timeline minimal-click SR fulfilment for top journeys service-to-sales triggers with attribution.		
45	Headless 360 APIs event ingestion from core systems and publishing to analytics row/field security reconciliation hooks for key fields.		

S.No	Technical and Functional Requirements	Compliance- A/B	Response (Confirmed & Understood)
D.	Lead Management:		
1	Ability to generate leads for ETB and prospective non-Customers.		
2	Lead Capturing-CRM platform should be able to ensure that every lead is automatically fed into the Lead system from current source such as existing bank applications, web site, Chatbot, internet banking, mobile banking, Retail assets, Liabilities, whole sale banking, Government Business, Social Media, Supply chain Finance, DSA and DST, Business correspondent portal, Credit card, Demat, MSME, AGRI, Wealth Management, SMS, Missed calls and social media (such as Facebook, twitter etc.) among other sources and preventing prospects from falling through the cracks. The ability to quickly import leads from offline sources.		
3	Lead module products integration with Contact centre which includes drop off leads and redirection to Branches based on the disposition and sub disposition type selected by the Contact centre based on customer due diligence.		

4	Ability to onboard the customer through Omni Channel/ Digital Lending Platform with seamless integration.		
5	Auto-response management: Automatically send personalized responses to Web site inquiries		
6	Ability to incorporate Lead Generation (LG) and Lead Conversion (LC) concept in the Lead Management Module		
7	Ability to auto assign leads based on business rules or configuration on Product Wise /Category/Customer Group wise/disposition/sub disposition etc.		
8	End User De-duplication: Option to configure deduplication check on lead creation End User De-duplication using business logic shared by the Bank based on any field in Lead Object in configurable mode.		
9	Ability to generate and push lead notification to CRM users (Lead Owner/Generator, Lead Converter/Supervisor) at various stages i.e from sourcing to processing based on workflow through SMS, Email Channel on real time basis.		
10	Ability to generate SMS/Email notification to customer on lead creation, lead closure and on different stages of lead process based on lead workflow configuration.		
11	Ability to configure Lead TAT Escalation based on Product Category.		
12	Ability to attach documents by CRM users for any lead generation.		
13	Ability to show customer interactions (happening from different channels like Email, SMS, Chat, Website, IVR) of a lead		

	in a single view of Lead Screen to bring an Omni Channel Experience.		
14	Ability to create Lead Lifecycle/ Workflow based on Product or any other field in lead entity.		
15	Ability of auto-closure of Leads by integrating with different subsystems like CBS, Third Party Applications in real time and batch mode of integration after reaching the end date.		
16	Differentiator to identify a lead is closed manually by any CRM user or auto closed by the software.		
17	Ability to do End-to-end tracking of leads captured through various channels viz email, SMS, Missed calls, Mobile / Internet Banking, branch, social media and third-party partners etc. using any of the lead identifiers such as Lead ID, Customer ID, Mobile Phone, Email etc.		
18	Email Integration Capability for Lead Creation with Mailbox . Lead Integration capability with SMS Gateway.		
19	Lead Email Tracking ability & mailbox folder tracking option for lead generation		
20	Ability to generate dynamic reports and Dashboards on lead module & option to export the result set into different formats like docx, pdf etc		
21	Ability to do text mining and NLP processing for processing leads getting created through Email Channel.		
22	Ability to configure lead visibility based on User Role/Organization Hierarchy or Team wise.		

23	The proposed CRM solution should have Deal module with various stages such as win-lose analysis, competitive analysis, etc., and detailed reports should be available at each stage as per Bank's requirement		
24	Maker/Checker functionality in Lead Processing in configurable mode based on product.		
25	Ability to attach and download documents by CRM users in any flow.		
26	Ability for bulk import of leads from feed file/excel file by privileged CRM users from GUI.		
27	Availability of Document Repository for Lead Module to be available for CRM users like executives/officers with keyword-based content tagging and search ability		
28	Platform should have strong file level validation controls for size, type, and content. Files to be scanned for any malicious content through an antivirus.		
29	The file store locations need to be secured. Standard cryptographic controls to be supported.		
30	Suitable provision to Share & engage the leads with another team without change of ownership. Suitable permissions to EDIT/VIEW provision will also be required to initiate them on a need basis.		
31	Lead nurturing seeks to educate and demonstrate the value of the product/services through: A. Inbound Marketing— blogging, social media updates, social media engagement, premium content (eBooks, info-graphics,		

	videos, webinars), calls-to-action, landing pages etc. B. Demand Generation— Channels like paid search (PPC), social media ads, native ads, email marketing, direct mail, print ads, media ads etc. can be used to get relevant leads for your business.		
32	Lead Enrichment: Once lead enter in our system it needs to be enriched so that it will be easy for bank employees to decide the viability of the loan. It can be done through collecting and presenting existing information such as Credit score, payment history etc. about the customer among other things.		
33	Lead scoring functionality: Ability to mark scoring on leads generated for Customer/Non Customers. For example, leads scoring logic can be based on CUSTOMER PROFITABILITY INDEX/Customer Worth, Transaction history, Internal Rating, vintage criteria etc. for customers and for the Non Customers it can be based on previous interactions, on AI inputs, income criteria/profession/line of business, based on any field inputs etc.		
34	Ability to provide system generated Next Best Action prompt on leads based on ML/AI triggers, previous interactions, lead scoring , etc.		
35	Ability to convert a Lead into a Customer without reentering the customer information captured during the prospecting stage		
36	The entire lead generation process should be under scrutiny by CRM to ensure that it is as effective as possible in bringing new leads, converting them into customers and retaining them overtime. Different		

	analytics tools can be used to optimize each step in the process and make strategic decisions to improve results		
37	Lead Campaign Mapping: The ability to track every lead back to a specific marketing campaign		
38	Availability of Document Repository for Lead Module to be available for CRM user's like call centre agents/branch staff/sales executives with key word based content tagging and search ability.		
39	Ability to set lead ownership based on product basis, or in Round Robin pattern if multiple users are available in a team with option to configure the logic in application by Sales Team		
40	Availability of Audit trails to identify all the modifications (in field level and data level) done in a lead.		
41	Ability to differentiate between Existing and New Customers, business canvassed and generated automated reports.		
42	Lead Life cycle defining in admin console, Purging out and taking back up of old leads after pre decided time period by Admin.		
43	TAT based escalation matrix for follow-up and conversion of leads.		
44	Activity Management & Tracking: Provision to set up different tasks such as, phone call, appointments, meetings, e-mail etc. Further to this, facility to modify the status of the all the pending activities like meeting/appointment etc.		

45	Data quality check is in-built into the system and data governance is part of this module.		
46	Incorporation of drop off leads from various channels through real time integration with DLP/LLPS/Website/Mobile Banking/Internet Banking .		
47	Admin view with permissions for User Management and access, customization of workflows/ rules/ escalations and bulk upload features		
48.	Visual representation of journey life cycle with stages and functionality to click and view the actions/communications/proposed steps at any stage of the lead.		
49.	The CRM functionality on the mobile interface must include capabilities such as: • Assign tasks • Easily manage and enter account information • Add and organize contacts • Schedule meetings • Transmit meeting notes or details at the point of contact • Assign follow up activities • Track existing or new opportunities • Request approvals		
50	Lead SLA + time-to-first-action; dedupe + merge lead quality scoring; accept bank lead scoring/NBA service-to-lead conversion		
51	Headless lead APIs + lead milestone events integration hooks for		

	portals/partners score provenance storage.		
--	--	--	--

S.No	Technical and Functional Requirements	Compliance- A/B	Response (Confirmed & Understood)
E.	Sales Management:		
1	Ability to maintain individuals or corporate prospects or potential target customers lists.		
2	Ability to convert a Prospect into a Customer without re-entering the customer information captured during the prospecting stage		
3	Ability to monitor neglected/archived leads based on activity history of a lead.		
4	Ability to set and track leads expiry based on pre configured criteria for different products and segments		
5	Ability to monitor leads performance and SLA and configure escalation matrix for each type of leads		
6	Ability to control and notify about duplicate leads based on pre-configurations		
7	Ability to capture an opportunity with estimated revenue and closure date		
8	Ability to provide a consolidated dashboard to get an overview of the targets against actuals. This should be multi level (e.g. overall, per team, individual, etc.)		
9	Ability to provide a sales performance report based on criteria such as product-wise, revenue-wise etc. The report should display the sales performance details such as the status (won, lost, rejected), turnaround time, etc.		

10	Ability to provide dashboard to User, Branch Manager, Regional Manager, Zone Manager or any others to show the sales performance of each User/RM in their respective branch.		
11	Ability to provide dashboard to Product Manager to show the sales performance of each product as organization level.		
12	Ability to retrieve a product's actual sale volume from the 'Actual Revenue' figure of that product's Opportunity.		
13	Pre-approved and customised offers and cross sell opportunities using analytics based on Customer behaviour, spend analysis, existing holding pattern.		
14	Ability to track sales through call centres/ IVR with real time tracking options and reports .		
15	Agent wise sales progress reports at contact centres		
16	Auto follow up reminders for Field functionaries and system generated reminders for interested customers		
17	Ability to customise reporting structure based on sales/product type.		
18	Stage playbooks with mandatory actions/fields audit trail for stage/value/close date service-to-sales measurement dashboards.		
19	Opportunity APIs + events embed sales actions into portals/apps audit logging and versioned workflow rules.		

S.No	Technical and Functional Requirements	Compliance- A/B	Response (Confirmed & Understood)
F.	Mobile & Field CRM:		

1	System should have the provision to support Sales & Activity Management on mobility solutions.		
2	The proposed solution must provide CRM data and functionality to mobile workforce anywhere through browser based mobile first solution as well as a native mobile application.		
3	Mobile solution should support GPS tracking of the field workforce with ability to checking for meetings.		
4	The proposed solution must enable mobile users to not only view CRM data but also with online update capability.		
5	The CRM functionality on the mobile interface must be familiar and easy to use.		
6	The CRM functionality on the mobile interface must include capabilities such as: • Assign tasks • Easily manage and enter account information • Add and organize contacts • Schedule meetings • Transmit meeting notes or details at the point of contact • Assign follow up activities • Track existing or new opportunities • Request approvals		
7	The mobile device access of CRM data must be controlled by the CRM system and provides access and relevant data to authorized individuals only.		
8	User Profile Maintenance (Add/Delete/Modify/Enable/Disable ec.), Assigning specific Rights, Activity Log shall be stored, generated as and when required.		
9	Generation of Resolverwise Reports, Dashboards, Resolution Performance,		

	Quality of resolution, Trends under specific Category/Sub-Category etc.		
10	Option to upload pre-approved leads in Bulk by any business vertical		
11	Chatbot facility between the workforce for any knowledge gaining/query/information/ sharing of information etc.		
12	Integration with Lead products like Retail assets, liabilities, WMS, Credit card, Demat, AGRI, MSME and Corporate products like BCMS, Supply chain finance, International Business etc. with realtime data flow.		
13	Offline mode for core actions minimal-click field capture secure evidence upload where relevant.		
14	MDM integration, device binding, encryption, remote wipe sync conflict handling APIs/events for mobile flows observability on sync.		

S.No	Technical and Functional Requirements	Compliance- A/B	Response (Confirmed & Understood)
G.	Contact Center with IVR integration:		
1	Integration and accessibility to Bank's existing/new Call Centre.		
2	Ability to integrate with the IVR system and provide the agent desktop functionality which includes popping up a CRM screen while receiving incoming call and dialling in customer number		
3	Ability to search for a customer or prospect using demographics information and to populate the existing customer's details on the call screen.		

4	Ability for call center agents to capture service requests, and to associate each service request category with a queue/department, to which the service request will be escalated to for fulfilment in the back end systems.		
5	Ability to capture leads from incoming calls and assign those to appropriate queues.		
6	Ability to capture leads, opportunities, or campaign responses during outbound calls.		
7	Ability to find all dispositions captured for a specific caller.		
8	Ability to find all dispositions captured by a specific call center user.		
9	Ability to capture tasks that needs to be completed after calls.		
10	The proposed solution should provide features for handling General enquiries, Account based enquiries and requests, Card related services for all types of customers of the bank.		
11	Role based access to be provided to Outsourced Agents (Inbound and Outbound), Team Leads and other officials at Call Centre. The roles should be defined in the Admin console. The CRM should be made available to outsourced Call Centre Agents as per the discretion of the Bank.		
12	The proposed solution should provide Location and contact details of Bank Branches, ATM, kiosks and any other business units of the Bank in search option.		
13	Ability to provide access to collection management module.		
14	Analysis of complaints logged through contact center or available in Bank's CRM.		

15	Ability to capture dispositions of callers, Call Centre Agents and tasks to be completed for requests		
16	Context handover from IVR/chatbot to agent KB-assisted service for FCR wrap-up templates and disposition governance		
17	APIs/events for call interactions transcript references correlation IDs from telephony → CRM monitoring for integration and queue health.		
S.No	Technical and Functional Requirements	Compliance- A/B	Remarks
H.	Reporting and Dashboards		
1	Ability to easily build role based dashboards without any need for programming or software release.		
2	Ability to generate SLA reports at staff/ department level and consolidated level to measure deviations and monitor bank performance indexes		
3	Ability to generate reports on different levels as per the defined user/department structure.		
4	The system should have a capability to provide an integrated reporting tool for new reports to be created as required. The tool should enable the Business users to create dynamic reports i.e generate report by selecting fields of choice as required		
5	The system should have a capability to provide a comprehensive reports for various modules and activities in CRM.		
6	The system should have a capability to make changes to existing reports by end users and should not require major effort from IT department or customization from the service provider.		

7	The system should have a capability to restrict access based on users' roles and authorization. For example, the leads generated by the East zone should be available with the channel head/ regional head of eastern zone. This report should not be visible to the same channel head of South zone. However the channel head of PAN Country will be able to view all the reports.		
8	The system should have a capability to export (& download) reports to other formats such as Excel, CSV and PDF format.		
9	The system should have a capability to schedule reports to various business users at desired frequency such as daily, weekly, monthly, quarterly, yearly. Admin user should have provision to re-schedule/change the frequency as well.		
10	The system should have a capability to allow users to choose a date and time range for which the data can be extracted. There can be restriction on the date range depending on the volume of data.		
11	The system should have a capability of wizard-based report builder for the users.		
12	System should have ability to track changed data and audit trail (i.e., essentially, a log of all action data).		
13	System should have the capability to conduct a drill down within the report.		
14	System should have filter criteria on all the columns present in the report table. That means if Lead generation report contains, branch name, Lead sourced by, Lead source date, Customer Name, Customer Contact number etc. then there should be a filtering criteria against each of the columns available on the report.		

15	System should have ability for reports to be viewable on the screen, in hard-copy format, or available via the web (if security has been allowed to do this for the specific report(s)).		
16	Lead Details reports (Country wise, Zone wise, Region wise, Branch wise, Contact center wise, product wise, line of business wise, sales channel wise, Person wise etc.)		
17	Sales conversion report (Country wise, Zone wise, Region wise, Branch wise, Contact center wise, product wise, line of business wise, sales channel wise, Person wise etc.)		
18	TAT report for SRs and complaints (Country wise, Zone wise, Region wise, Branch wise, Contact center wise, product wise, line of business wise, sales channel wise, Person wise etc.)		
19	Report on total number of open/ in-process/ closed inquiries, complaints, service requests.		
20	Overall response time and average response time (Branch wise, Contact center wise, product wise, line of business wise, sales channel wise, person wise)		
21	System should have the provision to track the performance of business team on following but not limited to: period wise, person wise, customer category wise		
22	System should have the provision to support pre-configured lead related reports such as total Leads, Channel wise Leads, Customer category wise Leads etc.		
23	System should have the provision to provide the managers with dashboards that provide them an overview of their team's performance.		

24	System should have ability to e-mail report from within the tool.		
25	System should provide an option to drag and drop the parameters in the user interface of the reporting page and generate customized reports as per the business requirements.		
26	KPI dashboards TAT, FCR, reopen, backlog aging adoption, conversion/cross-sell regulatory report scheduling.		
27	Governed exports + streaming events to bank analytics row-level security operational dashboards (latency, errors, DLQ, API health).		
Activity / Collaboration (Teams integration etc.)			
S.No	Functionalities		
1	Ability to schedule regular meetings with customers based on segment. For example CRM schedules meetings every three months with corporate customers revenue higher than 50 million Euro		
2	Ability to capture meeting notes in CRM		
3	Ability to show contact History Log and meeting notes		
4	History of relationship/client interactions		
5	Ability to capture opportunities identified during the meeting		
6	Ability to assign opportunities based on lead assignment rules		
7	Ability to generate follow up tasks for meeting action items		
8	Ability to recommend actions/products form AI.		
9	View new or pending tasks/activities		

10	Create a new task or receive a task from other user		
11	Alert on overdue tasks or nearing completion date Appoint and transfer task onto other users		
12	Appoint and transfer task onto other users		
13	Ability to complete/reject multiple tasks at once		
14	Ability to complete tasks with single click without opening the task		
15	KYC Expiry Alerts - System should generate an alert when a KYC is close the expiry.		
16	KYC Renewal - System should allows the RM to initiate a KYC renewal process.		
17	Task SLA + escalation delegation rules auditable reassignment minimal-click creation of tasks from any module.		
18	Headless activity APIs event publishing for task lifecycle integration with bank collaboration standards audit logs.		

S.No	Technical and Functional Requirements	Compliance- A/B	Response (Confirmed & Understood)
I.	Opportunity Management		
1	Opportunity tracking: Manage all information and customer interactions related to a sales deal in one place (opportunity value, status, activities, competitors, partners, etc.).		
2	Lead-opportunity mapping: Automated Conversion of leads to opportunities and track every opportunity back to a specific lead (and hence campaign).		

3	Opportunity scoring functionality: Ability to give scoring on the opportunity. The logic can be developed with the concurrence of the bank.		
4	Multiple dynamic opportunity page layouts: Set up different opportunity page layouts to manage different sales situations (e.g. product vs. services opportunity; enterprise vs. small business opportunity).		
5	Opportunity stage history: Maintain history of deal progress change in value and close probability through the sales cycle		
6	Automatic Opportunity Update Reminders: Sales Manager and/or team member can set scheduled Email reminders to keep opportunity information current.		
7	Similar Opportunities - provide ability for user to look up similar opportunities using a variety of search criteria		
8	Product Catalogues: Map the different products to the prospect customer to convert the opportunity to a sale.		
9	Stage governance + loss reason codes pipeline hygiene alerts (stale/no next step) attribution of origin (service vs proactive)		
10	Opportunity events; headless APIs audit logs rule engine with versioning.		
J) Collection Management			
1	Payment Processing: The system should have the capability to process and track customer payments, including credit card, loan, wire transfer, and clearing house transactions etc. The system should also have the ability to allocate payments to specific accounts and reconcile payments against invoices.		

2	Payment Collections: The system should be able to automate the collection process, including sending reminders and overdue notices to customers, alerts for loan recovery, etc. The system should also have the ability to initiate manual collections activities, such as phone calls, emails, FOS (Feet on the street) services etc.		
3	Payment Dispute Management: The system should have the ability to manage payment disputes, including tracking the dispute, resolving the dispute, and updating the customer account accordingly.		
4	Payment Recovery: The system should have the ability to initiate recovery activities, including wage garnishment, legal action, and other methods to recover past-due amounts.		
5	Reporting and Analytics: The system should provide real-time reporting and analytics on payment and collection activities, including aging reports, payment trends, and performance metrics. The system should also allow for customizable reports and dashboards.		
6	Customer Segmentation: The system should have the ability to segment customers using ML-AI based on customer meta data with the bank such as payment history, payment behavior, highrisk/low risk customers and other relevant factors. This segmentation should further be processed using ML-AI to prioritize which customer need attention such as chances of default in payment of the installment etc.		

7	Clarify boundary CRM tracks cases/tasks/comms core collections ledger remains in bank system compliance controls on contact attempts/consent.		
8	APIs/events to collections platform immutable audit templates governance evidence uploads with repository integration.		

S.No	Technical and Functional Requirements	Compliance- A/B	Response (Confirmed & Understood)
K)	Data Analytics and Forecasting		
1	Should have in-built and customizable Analytical Machine Learning (ML) models for Segmenting the customers, Market Basket Analysis, Customer lifetime value (CLV), Customer Profile, Customer behavioral Study. Option to drill down to various levels HO/CO/RO/upto Branch.		
2	Should be capable of integrating with Bank's existing ML models. Should be capable of integrating with any analytical solution used for ML modelling. The AI/ML should evolve over time by adding more and more data points/inputs to the algorithm and improve the current banking processes.		
3	Should have modules for Customer engagement and Customer Hyper personalization - Preferred time & Channel.		
4	Should have capability to provide Analytical insights to customers about his		

	profile and suggesting Goal based Upsell/ Cross sell offers to him.		
5	Should be capable of seamlessly integrating ML generated Leads data to campaign module and flow of feedback from campaign to ML models for completion of ML operations life cycle.		
6	Should have overall Communication to customers management module.		
7	Should be capable of having various use cases and scenarios to improve customer satisfaction and customer retention.		
8	Should be capable of categorizing the customers based on risk of churn.		
9	Should be capable of seamlessly integrating data from various modules within the CRM solution.		
10	Capability to convert conversation (From Call center) into a transcript for Text mining models.		
11	Automatically generate follow-up tasks and activities at different stages of business processes.		
12	Deliver proactive alerts to key executives/managers in the system via email, and/or SMS intimating the pending approvals.		
13	Make BYO analytics mandatory KPIs and forecasting outputs must be exportable human-in-loop for automated actions.		
14	Standard data contracts (events + batch extracts) metadata/lineage hooks score/version provenance A/B testing hooks via bank tooling.		

S.No	Technical and Functional Requirements	Compliance- A/B	Response (Confirmed & Understood)
------	---------------------------------------	-----------------	-----------------------------------

L)	Relationship Banking & RM Toolkit		
1	Use cases for targeting customers may be defined by the Bank from time to time on the basis of ongoing campaigns.		
2	Proposed CRM platform should assist the Relationship manager to cater the wealth management process. We are envisaging broad scope as far as functionality of the package is concerned. The package should enable the Bank in profiling the customers on the basis of financial need, lifestyle, risk profiling etc. and define out the propensity for cross selling/upselling of the various products. It should have the capacity to client mapping as per the profiling. The system should decide the eligibility of the customer and evaluate their need/potential.		
3	Proposed CRM platform should assist user in increasing the fee income business by providing Wealth management services to eligible segment.		
4	Proposed CRM platform should support Relationship manager in acquiring, nurturing, growing and strengthening relationship within the affluent and HNI segment of customers in order to meet Business objectives.		
5	Proposed CRM Platform should facilitate Users to focus on increasing the Total Relationship Value (TRV) and Assets Under Management (AUM) of customers as per the Business objectives, Customer Life Time Value.		
6	Proposed CRM Platform should enable users to make Marketing Decisions on the		

	basis of Customer Lifetime Value of customers. CLTV to be calculated by CRM.		
7	Proposed CRM Platform should facilitate Role definition/ assignment for Relationship Manager.		
8	Proposed CRM platform should have option to monitor the performance of Relationship manager and provide 360 degree MIS.		
9	Ability to Cross sell a range of Investment and Insurance products to customers in order to meet their Financial planning objectives.		
10	Platform should assist in growth of CASA portfolio of the customer, Cross selling mortgages, Credit Cards and drive channel migration and ensure acquisition of more customers from the same household.		
11	CRM package should enable Relationship Management for HNI & ultra HNI customers.		
12	Platform should assist user for Zero error service and building of trust in managing the wealth of the customers.		
13	Platform should facilitate User to do the financial need analysis and risk profiling for the customers with respect to their portfolio periodically		
14	Platform should facilitate User to enlighten customers, branches regarding mutual funds insurance & other investment avenues to increase the wealth of customers.		
15	The package should facilitate User for Cross selling and Up selling of Banks products and services.		

16	The package should facilitate User for designing sales targets based on the period wise, region wise, product wise and comply with overall Business and Marketing Strategy and targets.		
17	Facilitate User for devising engagement strategy for generating revenue.		
18	Facilitate User for the revenue generation through Cross selling using all Bank's touch points including digital payment solutions.		
19	Facilitate user to assign the cross selling targets and measure the penetration as designed by the Bank		
20	Manage, train the workforce employed for cross selling of the Bank product and services and conduct marketing campaigns across Branches.		
21	Facilitate coordinates with retail liabilities section, digital and social media, call center and other key stake holders that facilitate the cross-selling business.		
22	Facilitate User for follow up for conversion of Leads generated.		
23	Relationship Management in CRM package should include features such as portfolio tracking, asset allocation, performance reporting and portfolio rebalancing.		
24	The package should have analytical tools for financial planning, risk management and portfolio analysis.		
25	CRM platform should be capable of facilitating the on boarding of customer's account opening process from lead/opportunity management and manage operations of on boarding		

	of liability products by integrating with the existing systems of the Bank viz. e-KYC, customer profiling, etc		
26	RM cockpit portfolio + service issues + next tasks + cross-sell prompts service-to-sales integration governance for customer communications		
27	Headless RM APIs event publishing for RM activities role/field security audit of communications and recommendations.		

S.No	Technical and Functional Requirements	Compliance- A/B	Response (Confirmed & Understood)
L)	Omnichannel & Self-Service		
1	Unified service + sales journeys across channels (Branch, Contact Centre, Web, Mobile, Messaging, Email/SMS, Social where applicable)		
2	Single customer interaction timeline (touchpoints, SR/cases, communications, offers).		
3	Customer self-service: raise SR/complaint/query, upload docs, track status, interim updates.		
4	Assisted service for staff with guided workflows for top journeys (minimal clicks).		
5	Context-preserving handoff between channels (digital/chat → agent/branch).		
6	Configurable routing/priority by segment/product/geo/VIP/language/channel/SLA.		
7	Notifications management (templates, multilingual, preferences/consent, opt-in/out)..		
8	Service-to-sales conversion: create lead/opportunity from service triggers + follow-ups.		
9	Proactive service triggers from events (e.g., KYC expiry, disputes) to tasks/alerts		

10	Digital deflection via KB before case creation.		
11	Headless APIs for all key actions (create/update/track SR/case, upload docs, comms, handoff).		
12	Event publishing for milestones (created/assigned/escalated/resolved/reopened)..		
13	Integration through bank-approved API gateway/ESB/event bus; no mandatory vendor middleware.		
14	Observability: correlation IDs, monitoring dashboards, retry/replay, DLQ.		
15	Security: SSO, RBAC/ABAC, encryption, consent enforcement, immutable audit logs.		
16	Performance & resilience: response-time SLAs, DR, RPO/RTO, capacity benchmarks.		
17	Embeddable UI components (widgets/SDK) for portals/apps without logic duplication.		

S.No	Technical and Functional Requirements	Compliance- A/B	Response (Confirmed & Understood)
L)	Partner & Channel Management (BC / Third-Party Workforce / Partners)		
1	Partner entity management (BC/DSA/partners) with hierarchy, agreements, validity dates.		
2	Partner onboarding workflow incl. approvals, due diligence checkpoints, document capture.		
3	Partner user mapping to branches/regions/products and permitted actions.		
4	Role-based partner access to allowed journeys with field-level restrictions.		

5	Partner lead/referral management (capture → qualify → assign → outcome) with attribution.		
6	SLA-based servicing for partner-raised cases + escalations + communications.		
7	Compliance controls: consent/disclosures/restricted actions + audit evidence..		
8	Partner performance dashboards (leads, conversions, TAT, quality).		
9	Incentive/commission support as feed to bank system (no mandatory calculation in CRM).		
10	Secure partner access via headless APIs and/or partner portal integration with throttling.		
11	Authentication/authorisation integration with bank identity controls + MFA policy.		
12	Data segregation (partner sees only permitted data; tenant-like controls)..		
13	Immutable audit logs for partner actions/data access/docs/comms; export evidence.		
14	Event publishing for partner actions (lead created, referral accepted, case raised).		
15	API versioning/backward compatibility for partner integrations.		

S.No	Technical and Functional Requirements	Compliance- A/B	Response (Confirmed & Understood)
L)	Knowledge Base & Case Management		
1	End-to-end case lifecycle (create/assign/work/interim/resolve-reject/close/reopen/escalate).		
2	Configurable workflows + SLA/TAT by case type and stage; holiday calendar; auto escalation.		
3	Queue-based handling with prioritization, skills-based routing, supervisor controls.		
4	Mandatory classification (root cause/resolution codes) and templates.		

5	Evidence/attachments with role-based access + integration to document repositories.		
6	Knowledge Base lifecycle (create/review/approve/publish/retire), versioning, ownership.		
7	Knowledge-assisted case handling: surface articles/checklists; link article usage to outcomes..		
8	Minimal-click fulfillment: guided resolution steps, macros/quick actions, reusable checklists.		
9	Regulatory handling support (tagging, separate SLA, evidence packs, reporting)		
10	Knowledge deflection in self-service channels prior to case creation.		
11	Service-to-sales triggers: create leads from service interactions with context.		
12	Headless case APIs (create/update/assign/escalate/close/reopen), comms, attachments, search .		
13	Event model for case milestones + KB updates (publish/update/retire).		
14	Full-text search for KB/cases with role-based filtering; multilingual support as required.		
15	Observability: workflow audit trail, integration traceability, SLA breach analytics dashboards.		
16	Security/compliance: immutable audit logs, retention, PII masking non-prod, encryption.		
17	BYO Agentic AI hooks: suggest resolution/draft replies/summarize with human approval + audit.		

Request for Proposal (RFP) for Selection of Vendor for Supply, Implementation, and Maintenance of Customer Relationship Management (CRM) Solution on Subscription (SaaS) Model.

RFP Reference: GEM/2026/B/7188106 dated 03rd February 2026

			Prebid Query Responses of Request for Proposal (RFP) for Selection of Vendor for Supply, Implementation, and Maintenance of Customer Relationship Management (CRM) Solution on Subscription (SaaS) Model. RFP Reference: GEM/2026/B/7188106 dated 03rd February 2026		
Sr no	Page #	Point / Section #	Clarification point as stated in the tender document	Comment / Section / Deviations	Bank Response
1	88	5. Annexure 12	CRM must be able to leverage the Bank's Agentic AI framework and guardrails for use cases such as agent assist, auto-summarization, next-best-action, intelligent routing and guided service-to-sales prompts.	Which Agentic AI framework is been used by bank currently? Does CRM AI capabilities shall be used or Bank's Agentic framework shall be integrated with CRM?	As per RFP and Addendum
2	90	10. Annexure 12	Service transformation and minimal-click fulfillment: Redesign and implement service journeys to reduce clicks/steps and enable straight-through processing wherever feasible; guided workflows, smart	What are different types of apps and portals that are being used by bank for CRM to be integrated for User Interface	Please refer RFP and addendum for the list of applications/portals used by bank
3	NA	General		Does vendor need to include a Siebel SME for Discovery & Design Phase or will it be provided by the Bank?	Migration is part of the scope of the bidder. Bank will provide necessary support by
4	95-96	A) 1.1.1 f) Comp	Capturing all types of complaint from all the sources/ Channels- SMS Banking, Website, Branch, ODR- Internet banking, BOB world, whatsapp banking, E-mail, contact centre, ATM Kiosk etc.. TAT, Status Tracking, Escalation of Complaint as per internal matrix, Internal / External Ombudsman, capturing Resolver comments / resolution, Interim comments, Bounced to Resolver, Forward option, Capturing Feedback, Quality check resolution of complaints etc and allow routing, sentiment analysis based on customer feedback on complaints and	Does the Bank expect Salesforce to automatically ingest complaints from: Email SMS WhatsApp BobWorld Internet Banking ATM/Kiosk Social Media or will it through Bank's channel gateways?	In order to have a single repository of all the Grievances for Lodgment, Resolution, effective Monitoring, Tracking of Grievances (Digital and Non Digital), Grievance module is used .The complaints to be ingested from various Bank's source channels like website- in house customer portal/self

5	95-96	A) 1.1.1 f) Comp	Capturing all types of complaint from all the sources/ Channels- SMS Banking, Website, Branch, ODR- Internet banking, BOB world, whatsapp banking, E-mail, contact centre, ATM Kiosk etc.. TAT, Status Tracking, Escalation of Complaint as per internal matrix, Internal / External Ombudsman, capturing Resolver comments / resolution, Interim comments, Bounced to Resolver, Forward option, Capturing Feedback, Quality check resolution of complaints etc and allow routing, sentiment analysis based on customer feedback on complaints and tracking of complaints centrally from all sources.	RFP expects sentiment scoring; confirm whether Bank wants: Salesforce Einstein sentiment? OR an external AI engine the CRM must consume?	As per the RFP scope. The clause itself is self-explanatory.
---	-------	------------------	--	--	---

6	101	D. Lead Management Module	Customer Leads will be created in CRM for new and existing customers. For new customers, first the customer will be created in CRM resulting in creation of CIF in CRM. After that Lead will be created and attached to this customer. For existing customers, leads will be attached to the existing customer's CIF. b) Creation of Leads from Emails & SMS by identifying the keywords and sender's registered email id/ registered mobile number. c) The solution should be able to identify the sender based on the registered email id/ mobile number and link the lead to the existing customer. If the email id & mobile number doesn't match with anyone in DB, the system should create a new customer and attach the lead to it. d) The solution should be able to publish API for Lead management into web service which shall be used by other systems to push information and create Leads in the system e) Lead import function resulting in auto creation of Leads with auto assignment f) Product shall be attached to each Lead/opportunity. g) On the fly De-dupe check for creation of same	Lead Sources Clarify all lead entry points: Website SMS/Missed Call Branch Contact Center BobWorld Aadhaar-based pull	The proposed solution capable to capture the leads from various Bank's source channels like Bank's website lead portal from the customers, SMS/Missed calls, Branch,contact center,Bobworld, Internet banking, Business correspondent portal, mobile app etc . through API integration.The proposed CRM solution should be capable to provide/publish API's and consume API's for the integration from source channels as well for Lead management into web service which shall be used by Bank's internal/external/third party system to push information and create Leads in the system .
---	-----	---------------------------	---	---	--

7	98-100	B: Campaign Management Module:	2.2.3) Campaign Execution - a) Campaigns can be executed over multiple channels, such as phone, letter, email, advertising and appointments for sales users to follow up or even road show events. b) Phone call activities are generated for the relevant target lists and assigned to contact center agents for making the calls. c) Appointment activities are generated for the relevant target lists and assigned to sales users for follow up. d) Support definition of rules to exclude customers who have been touched in the past n days through a particular channel or for a particular campaign.. e) Campaigns should execute prioritizing Customer's communication and privacy preferences. If customers indicate preferences such as Do not call or Do not send Bulk Email, 'Not interested to receive promotional emails/SMS, or the customer is registered with DND/NDNC, then the customer will be excluded from campaign execution even though the customer is in the target marketing list.	For outbound channel orchestration, please provide preference for SMS gateway Email gateway Outbound dialer WhatsApp	The proposed CRM Solution should be able to integrate with Bank's internal systems like SMS gateway, Email gateway, outbound dialer and whats app etc. as per the RFP scope
8	90	10. Technincal requirements	Knowledge management for FCR: Central knowledge base with authoring, approval, versioning, contextual recommendations, feedback loops, and governance to improve resolution quality and	Will Bank provide existing KB? Number of articles? Approval hierarchy?	As per RFP and addendum
9	157	13. Contact Center with IVR integration:	Ability to provide access to collection management m	Is Collection Management Module to be integrated with CRM or functionality to be built in CRM? If yes, please provide details	The proposed solution must integrate with Bank's collection management

10	89	7. Annexure 12 – Siebel CRM Migration	. Siebel CRM Migration • Perform Siebel discovery and inventory (data objects, workflows, reports, integrations, users/roles, volumes, data quality). • Provide phased migration/coexistence approach (where required), cutover/rollback plan, multiple dry runs, reconciliation reports and audit evidence. • Provide decommissioning and archival plan for Siebel including retention and access to historical records.	Please confirm total volume of Siebel data to be migrated for: Customer 360 objects Leads, Opportunities Service Requests Complaints (including CPGRAM, JAN SURAKSHA, INGRAM) Wealth, Campaigns, Contact Centre logs	Refer RFP for volumetrics.
11	88	7. Annexure 12 – Siebel CRM Migration	Provide decommissioning and archival plan for Siebel including retention and access to historical records.	Are there archival rules for Siebel?	The details will be shared to successful bidder.
12	88	7. Annexure 12 – Siebel CRM Migration	• Perform Siebel discovery and inventory (data objects, workflows, reports, integrations, users/roles, volumes, data quality). • Provide phased migration/coexistence approach (where required), cutover/rollback plan, multiple dry runs, reconciliation reports and audit evidence. • Provide decommissioning and archival plan for Siebel including retention and access to historical records.	What is the quality/consistency expected in pre-migration cleansing? Is Data Quality Management, de-dupe, normalization part of vendor responsibility?	Yes- vendor responsibility. The data migration is part of the RFP scope by the bidder.
13	87	Annexure 12 – Migration	Scope Overview The scope of work shall include procurement (subscription/license), implementation, configuration, integration, migration, and ongoing support services for the selected enterprise CRM platform (leading market solutions or equivalent)	Is there a mandated cutover window (weekend / overnight)? Should Siebel & new CRM run in parallel coexistence for any duration?	It will be decided by the Bank.

14	87	Annexure 12 – Migration	Scope Overview The scope of work shall include procurement (subscription/license), implementation, configuration, integration, migration, and ongoing support services for the selected enterprise CRM platform (leading market solutions or equivalent)	Is there any ETL tool available from bank for Data Migration?	The data migration is part of the RFP scope by the bidder.
15	136	2./ C- Service Management with customer 360	Capability to display On Demand data by integrating with other solutions like CBS, SharePoint, intranet site, & Chat Bot etc. via API integration /Middleware/Connect 24.	Is there a middleware being used currently? If yes, please provide details	The details will be shared with successful bidder.
16	88	3./ Annexure 12 – Architecture and Integration Principles	• Loosely coupled, composable architecture: CRM to act primarily as a system of engagement and orchestration. Authoritative “systems of record” (e.g., Core Banking, lending, payments) remain in Bank platforms; CRM maintains only necessary interaction/context data. • API-first and event-first: all integrations through versioned, documented APIs and asynchronous events. Avoid proprietary point-to-point integrations. • Packaged business capabilities (PBC) / modular design: capabilities to be delivered as reusable modules/services that can be composed and recomposed as business needs change. • Integration patterns must support omnichannel continuity (preserve interaction context across voice and digital) and minimize customer effort by orchestrating multiple backend systems until the customer outcome is fulfilled. • Provide full integration inventory, target-state integration architecture, data flows, sequencing and error-handling design; include non-functional requirements (latency, throughput, resilience).	Please provide a complete interface catalogue with: Number of interfaces/touchpoints per system for receiving & sending data Total No. of APIs Message formats (XML/JSON/ISO/CSV) Trigger types (real-time / batch / event driving) Volume & concurrency Clarify whether vendor must build both inbound/outbound APIs, or only consume Bank APIs	Please refer RFP and addendum for the details. The proposed CRM solution should be capable to provide/publish inbound and outbound API's and consume API's as well .

17	106	3./ J. Data Management and Integration:	3. APIs to adhere to Open API, REST, and GraphQL standards for interoperability and scalability.	Please confirm Bank's preferred integration pattern: - REST APIs - GraphQL - gRPC - Kafka events	As per the RFP scope. The clause itself is self-explanatory.
18	106	3./ J. Data Management and	3. APIs to adhere to Open API, REST, and GraphQL standards for interoperability and scalability.	We understand that 256 bit encryption is needed, Is there any other encryption required by the bank for encryption?	As per the RFP scope. The clause itself is self-explanatory.
19	107	6./ J. Data Management and Integration	The CRM solution must support event-driven architecture with capability to integrate with Apache Kafka (or equivalent event streaming platforms such as AWS Kinesis) for seamless real-time data synchronization and processing between systems. The solution must be capable of handling asynchronous event notifications and triggers that initiate specific actions, such as updates to customer data or workflow transitions.	Does Bank already use Kafka clusters? Should CRM publish events directly or via middleware?	As per RFP scope
20	94	H. / Brief About Existing Modules and Functionalities:	H) Integration with Existing Applications & Systems: ❖ The existing CRM Solution is integrated with various internal and External platforms and multiple API's/interfaces and some of the core systems has been listed below:	Is any CTI solution approved? AVAYA / CISCO / Fusion? Is CRM expected to support: - Screen pop, - Omni-channel routing, - Call disposition, - Auto-dialer, - Integrated agent scripting? What is the expected concurrency of Contact Center agents?	The proposed solution should integrate with Bank's CTI solution. Concurrency details - Please refer RFP and addendum.
21	64	A. Eligibility Criteria Compliance	The solution should have been hosted in a public cloud with a single tenancy architecture for scheduled commercial banks in India for a minimum of three years	Please confirm whether Single Tenancy is mandatory or Multi-Tenancy acceptable with strong isolation?	as per RFP and addendum

22	105-113	3.1 Deployment Architecture	Bidder, its solution and Bidder's CSP must comply with bank's policies on cloud adoption, cyber security, information technology, information security, etc., • RBI guidelines on Outsourcing of IT Services, Data Storage and handling, Information Technology Governance, Risk, Controls and Assurance Practices, etc. • India's IT act and amendments, Security and Data Protection regulations such as proposed Digital Personal Data Protection Bill, any India's statutory and regulatory requirements. • Any other IT security/data protection & privacy policies, guidelines, regulations etc issued by Bank, Regulators, Government of India from time to time during the contract period 12. The CSP must ensure that its information and cybersecurity capabilities are continuously updated and adapted to address emerging vulnerabilities and evolving threats, in compliance with industry best practices, regulatory requirements, and the Bank's policies.	Please clarify whether CSP selection is Bidder's responsibility or Bank-centric (e.g., AWS/Azure/GCP)?	No change
----	---------	-----------------------------------	---	--	-----------

23	105-113	3.1 Deployment Architecture	I. Technical Requirements: Infrastructure, Cloud and other CSP Requirements 19. The ownership of the Bank's data shall always reside with the Bank. The Bidder /Bidder's CSP will only act as a custodian of Bank's data. No part of the Bank's data shall be used by the Bidder /Bidder's CSP for any purposes including but not limited to marketing and data mining. 20. The data should be stored within geography of India and all data functions and processing are performed within the boundaries of India. The Primary and Secondary Data Centres of CSP should be physically located in India and should be in different seismic zones before submission of bid. The data should not be transferred outside of country's boundary by any means. Cloud hosting in a Tier 4 Data Center, certified by the Uptime Institute, is strongly preferred. 21. The CSP should be able to provide geographic or IP based restrictions. 22. Bidder /CSP (Cloud Service Provider) should ensure that any data that is stored on the cloud is protected and appropriate policies and controls are put in place to provide data privacy and protection. The CSP should adhere to all laws pertaining to data privacy and protection that are applicable as per Gol, RBI and any other regulators. The CSP should also ensure that necessary enhancements are made	Please confirm if Bank already has: - VPN / MPLS / Leased Line to CSP - Cloud Security Posture Management (CSPM) - SIEM integration standards	No change
24	95-97	4.1 Complaint Management	Capturing all types of complaint from all the sources/ Channels- SMS Banking, Website, Branch, ODR- Internet banking, BOB world, whatsapp banking, E-mail, contact centre, ATM Kiosk etc.. TAT, Status Tracking, Escalation of Complaint as per internal matrix, Internal / External Ombudsman, capturing Resolver comments / resolution, Interim comments, Bounced to Resolver, Forward option, Capturing Feedback, Quality check resolution of complaints etc and allow routing, sentiment analysis based on customer feedback on	Does Bank want auto sentiment analysis for complaint text?	Repeated

25	95-97	4.1 Complaint Management	1.1.2) Complaint auto-assignment – a) Complaint shall be automatically assigned (based on some rules/matrix which should be configurable) b) Post auto-assignment, the solution should be able to notify the owner by way of email and in the notification centre c) Assigned complaint should be visible in the pending queue of owner & group	Will Bank provide rules for: - Priority assignment - Auto-escalation - Routing matrix	Auto-escalation, routing matrix and priority assignment to be configurable in the proposed solution based on rules/matrix defined by the Bank's requirement.
26	124	4.1 Complaint Management	CRM is to be integrated with Bank's different channels for creation of Complaint/ Service requests/query etc. This will enable Customers to lodge Complaint / service requests/query through Bank's different channels i.e. Website, Debit Card Redressal System (DCRS), Internet Banking, BOB world, Branch, Social Media, Contact Centre, INGRAM,CPGRAM , JANSURAKSHA and various regulatory and Ministry portals etc.	Do we need to integrate CPGRAM, INGRAM, JANSURAKSHA via API or file?	The Proposed CRM should be able to provide Complaint management module and convert incoming complaints , external complaints like jansuraksha, ingram,- Ministry portal etc into SRs/Complaints /query in CRM through API integration. The proposed CRM solution should be capable to provide/publish API's and consume API's for the integration.
27	146	4.1 Complaint Management	Ability of auto-closure of Leads by integrating with different subsystems like CBS, Third Party Applications in real time and batch mode of integration after reaching the end date.	Should CRM auto-close complaints through CBS integration or only manually	As per the RFP scope. The clause itself is self-explanatory.

28	95-97	4.1 Complaint Management	A. Complaint Management: 1.1) Complaint Management 1.1.1) Complaint Creation – a) The CRM should be able to integrate with existing Siebel CRM application /Email/SMS system and convert incoming complaints and grievances on email, SMS& Siebel CRM(complaints portal) into SRs/Complaints in CRM and escalation matrix should work for it.	Will Siebel CRM integration still exist for Complaint Management?	The Proposed CRM should be able to provide Complaint management module/query module/ Service Requests (QRC) and convert incoming complaints , external complaints like jansurakhsa, ingram,- Ministry portal received from various channels like email, SMS, website, Branch, internet banking, bobworld etc into SRs/Complaints in CRM and escalation matrix should work for it. The existing Siebel CRM application will be sunset.
29	100-101	C . Service Management with Customer 360:	C . Service Management with Customer 360: 3.3.1) Service Management 3.3.2.) Service Request Creation – a) The solution should be able to create SRs from Emails & SMS by identifying the keywords and sender's registered email id/ registered mobile number b) The solution should be able to identify the sender based on the registered email id/ mobile number and link the SR to the existing customer. c) SR import function resulting in auto creation of SRs with auto assignment d) The solution should be able to publish API for SR management into web service which will be used by other systems to push information and create SR in system e) De-dupe check for same type of SR for the same account of the same customer should be applicable so avoid any anomalies	Please provide examples of SR types and new SRs	Please refer RFP scope.

30	101-104	4.3 Lead Management & Sales	c) Customer's PAN number/Aadhaar number shall need to be validated in real time from NSDL/ UIAI.	Aadhaar-based journeys require UIDAI integration – will Bank arrange V-VAPT certification for Aadhaar vault?	As per RFP and Addendum
31	101-104	4.3 Lead Management & Sales	4.2.4) Lead Score & Lead Enrichment- a) System should be able to impart the score to the leads based on some pre-defined matrix for the product by processing available data or capturing customer response. b) Provisions should be there to store the customized formulae and calculate score based on available or captured data. c) Provisions to build template (questionnaire) and capture customer provided responses and impart score based on the pre-defined matrix/rules/formulae for each product (which should be configurable) resulting in enrichment of lead to have better understanding of the lead and for checking the eligibility for limit of a product like loan, credit card, overdraft, cash credit etc	Lead scoring – will Bank provide scoring models or vendor is expected to define?	The proposed solution should be able to impart the score to the leads based on some pre-defined matrix for the products by processing available data or capturing customer response as per the RFP scope. The matrix/rules to be configurable in the proposed application. Provisions should be there to store the customized formulae and calculate score based on available or captured data in the proposed solution.

32	104	F. Data Analytics & Forecasting: -	F. Data Analytics & Forecasting: - a) The solution should provide robust analytics by analysing data for insights into customer behaviour and estimate the likely products that customers may take given the available customer profile and data from multiple sources b) Based on analytics, cross-sell and upsell opportunities are presented to customers at all touchpoints. c) Understanding existing Lead Management Model and other Analytic models and recommend customisation required, if any, in those models for seamless integration. The solution should be able to use an internal rule engine that is simple to change and test without writing any code, basic application logics and drag and-drop choices for rule modification.	What analytics platform does Bank use? (Cloudera / Azure / GCP / In-house).	The details will be shared with successful bidder.
33	104	F. Data Analytics & Forecasting: -	F. Data Analytics & Forecasting: - a) The solution should provide robust analytics by analysing data for insights into customer behaviour and estimate the likely products that customers may take given the available customer profile and data from multiple sources b) Based on analytics, cross-sell and upsell opportunities are presented to customers at all touchpoints. c) Understanding existing Lead Management Model and other Analytic models and recommend customisation required, if any, in those models for seamless integration. The solution should be able to use an internal rule engine that is simple to change and test without writing any code, basic application logics and drag and-drop choices for rule modification.	Will next-best-actions be provided by Bank's AI CoE, or should CRM deliver its own engine?	As per RFP and Addendum

34	111	18.K. Cloud Infra	18. ISO 27001, ISO 22301 certification • ISO 27017 (Cloud Security Management Certified) • ISO/IEC 27018 (Personal Data in Cloud Certified) or similar certification • ISO/IEC 27701 PIM (Privacy Information Management) certified or similar certification • ISMS (Information Security Management System) • ISAE (International Standard on Assurance Engagements) 3402. • Meet the Cloud Security Alliance Cloud Controls Matrix and compliance with CSA Star CCM. • RBI and Government of India guidelines and mandates on Cloud Computing GDPR compliance • CERT-In guidelines as and when they are released and become applicable	Please confirm CSP compliance expectations: - ISO 27017, 27018 - PCI-DSS (required only if card data touched?)	No change
35	115	43. K. Cloud Infra	Encryption keys which are used for encryption in cloud should support BYOK (Bring Your Own Keys) and use along with KMS (Key management Service). The solution should integrate with Bank's Hardware Security Module (HSM) for secure key management, ensuring that encryption keys are	Does Bank require BYOK/HSM integration for encryption keys?	The proposed solution should support BYOK (Bring Your Own Keys) and use along with KMS (Key management Service).
36	108-115	27. K. Cloud Infra	The CASB (Cloud Access Security Broker) security controls need to be enforced from cloud standpoint. In case the solution is not covered by CASB, the CSP should offer CWP (Cloud Workload Protection) compatibility and offer points engineering solution. Appropriate security controls/components from the cloud orchestration layer has to be made available by default as per Bank policy/Regulatory Guidelines at no additional cost to the Bank. Bidder to submit Security Architecture diagram to Bank as part of technical bid detailing all the security components.	CASB/CWP—will Bank provide or Bidder must procure?	No change

37	110	16. K. Cloud Infr	As and when Bank requests, bidders should provide the following certificates/proof from third party vendor/ bidder / CSP providers for their systems: • Regular VAPT, API Assessment, customized Source Code (related to Bank) audit certified by a CERT-IN empanelled auditor. • A Secure Software Development Lifecycle (Secure SDLC) must be followed by the bidder for all applications throughout their lifecycle, with a security assurance certificate provided accordingly.	What is the expected frequency for: - VAPT - Secure SDLC compliance checks	As per the Bank's policy and guidelines.
38	113	31. K. Cloud Infr	The link should be of minimum 500Mbps capacity. The successful bidder has to maintain link uptime in line with application uptime of 99.90%.	Who will provision 500 Mbps leased line from CSP to Bank DC/DR—Bidder or Bank? If utilization exceeds 70%, upgrade is vendor's responsibility—need clarity on expected peak transactions per hour.	As per RFP and addendum
39	95	Proposed CRM S	Apart from the above-mentioned 5 core modules, the following sub modules are part of core modules expected to be implemented: • Wealth Management • Data Analytics and Forecasting • Opportunity Management and Collections Management • Data Management & Integration with various systems • Contact Center with IVR integration • Digital Onboarding • Relationship Banking & RM Toolkit • Marketing Automation & Journeys • Knowledge Base & Case Management • Omnichannel & Self-Service • Mobile & Field CRM • Partner & Channel Management • Reporting & Dashboard	Please provide details and complete flow for Digital Onboarding	The details will be shared with successful bidder.
40	NA	General		Will Bank's customers also need to have access to a self-service portal or that needs to be integrated with an existing system?	As per RFP and addendum

41	118	54. Onsite Reso	The selected bidder should provide onsite resources for undertaking activities on 24x7x365 basis during contract period post go-live. However, charges for resources will be paid from the date of acceptance of the solution of the Bank. However, selected bidder has to ensure that onsite resource should be part of the project implementation team. The cost agreed upon for the resource will be frozen during the contract period. Onsite resources deployed by the successful bidder will be required to work from Bank. All expenses (travelling/lodging, etc.) shall be borne by the successful bidder.	Is there a mandatory requirement for 24x7 onsite support immediately from Go-Live or after full rollout?	For implementation, vendor need to size the resources according to the RFP scope. Post implementation support, resource requirement will be obtained as per the per resource cost provided by the bidder.
42	13	1.11 Ownership	The bidder shall procure and provide a non-exclusive, non-transferable, perpetual licenses to the Bank for the solution to be provided as a part of this project. The Licenses for the solution should not be restricted to use case. The Bank can use the solution at any of its overseas branches / offices and	In suscriotion model, license cannot be perpetual in nature.The Lience of the appointed CRM will belong to bank for contract period of 5 yrs. Requesting you to remove "perpetual"	as per RFP and addendum

43	64	C .Experience &	Bidder should have implemented at least 3 modules out of 6 proposed modules* in one or more Scheduled Commercial Bank in India, having minimum 1,500 branches as on date of RFP, with minimum of 5,000 licensed users on CRM Platform. e.g. Sales Management Module implemented at “X” Bank, Lead Management Module & Service Management Module implemented at “Y” Bank will be considered as implementation of 3 modules. The platform should be in use /live as on date of published RFP and should be in operation for minimum of 6 months. *Proposed Solution should include following Module 1. Lead Management 2. Campaign Management 3. Sales Management 4. Service Management and customer 360 degree 5. Complaint management 6.Contact centre with IVR integration	and relax the mentioned eligibility point, as these specific conditions do not influence the quality or experience of CRM implementation by the bidder. We assure the Bank that all essential technical and delivery capabilities for this CRM project are fully covered. We seek your support and favorable consideration - Bidder should have implemented at least 3 modules out of 6 proposed modules* in one or more Scheduled Commercial Bank in India, having minimum 1,000 branches as on date of RFP, with minimum of 2,000 licensed users on CRM Platform. e.g. Sales Management Module implemented at “X” Bank, Lead Management Module & Service Management Module implemented at “Y” Bank will be considered as implementation of 3 modules. The platform should be in use /live as on date of published RFP and should be in operation for minimum of 6 months. *Proposed Solution should include following Module 1. Lead Management 2. Campaign Management	as per RFP and addendum
44	64	C .Experience &	Evidence for the same to be submitted like Purchase Order / Work Order / Contract Agreement and Customer Credential clearly indicating the scope and duration	Evidence for the same to be submitted like Purchase Order / Work Order / Contract Agreement and Customer Credential clearly indicating the scope and duration or Customer Email	as per RFP and Addendum
45	87–88	Annexure 12 – Scope Overview	CRM must support multiple modules including Service, Lead, Campaign, Sales, Wealth, Knowledge, Mobile, Omnichannel.	Request Bank to clarify which modules are <i>mandatory in Phase-1</i> and which modules can be delivered in later phases to align effort and cost.	Please Refer RFP and addendum for the details.

46	95	1.1 – Complaint Creation	Creation of complaints from Email/SMS/Siebel/website and all channels.	Please confirm the full list of complaint-source channels required on Day-1 and provide expected daily volume to size routing & ingestion.	Please refer RFP for volumetrics. The details will be shared to successful bidder.
47	95	1.1.1 – Complaint Creation Rules	CRM to identify sender based on registered email/mobile and link to customer.	Request clarity on whether multi-language email/SMS parsing and fuzzy-matching for name/mobile mismatch is required.	Yes
48	96	1.1.2 – Auto-Assignment	Complaints should auto-assign based on rule matrix.	Please share Bank's expected routing criteria (product, branch, geography, vertical, language, priority, skills).	Auto assign of complaints to be configurable in the proposed solution based on the rule matrix defined by the Bank's requirement. Details will be provided to the selected bidder.
49	96	1.1.3 – Complaint Priority	Solution should prioritize certain complaint types based on rules.	Request detailed priority matrix/parameters to align rule configuration.	Priority matrix of complaints to be configurable in the proposed solution based on the rule matrix defined by the Bank's requirement. Details will be provided to the selected bidder.
50	96	1.1.5 – Complaint Age & Auto-Escalation	Auto-escalation on TAT breach with rule-based escalations.	Please confirm escalation levels (Branch → Region → Zone → HO) and whether rules vary by product or complaint category.	Auto escalation with rule based escalations to be configurable in the proposed solution as per Bank's requirement.
51	97	1.1.6 – Complaint Closure	Manual closure by owner; TAT to be calculated.	Clarify whether reopening of complaints resets the SLA clock or continues original TAT for accurate SLA configuration.	Resets SLA clock
52	97–98	2.2.1 – Campaign Management	Support for mass email, voice, SMS, social campaigns.	Request Bank to clarify which channels CRM must <i>execute natively</i> vs via Bank's existing Contact Centre/SMS gateway.	As per RFP and addendum
53	97	2.2.1 (b) – Incident-Based Campaigns	Real-time incident-based campaigns via web service/API.	Please confirm the list of source systems that will push incident triggers and the payload/fields expected.	As per the RFP scope. The details will be shared with successful bidder.

54	97	2.2.1 (g) – HTML Templates	Ability to define rich text/HTML templates.	Clarify if multilingual and right-to-left language templates are required.	As per Bank's requirement
55	98	2.2.2 – Target List	Import or generate customer target lists for campaigns.	Does Bank expect CRM to perform segmentation in-built, or will segments be received from the Bank's Analytics/Data Lake?	As per the Bank's requirement the approach will be decided. The solution should be capable to support both the approaches.
56	90	Customer 360° View	Single 360° view of customer, relationships, interactions, SRs, complaints, leads.	Request list of mandatory data attributes for 360° view to plan integration scope (profile, KYC, accounts, loans, consents, etc.).	The details will be shared with successful bidder.
57	90	Omnichannel Continuity	Preserve customer context across branch, CC, email, WhatsApp, web/mobile.	Please clarify whether a single interaction ID must continue across all channels and whether SLA ownership changes on channel switch.	As per the RFP scope.
58	89–90	API-First Architecture	All core business objects must be API-enabled (lead, SR, complaint).	Please confirm required API count for Day-1 and whether API specs will be provided by Bank.	The details will be shared with successful bidder.
59	92–93	Lead Creation (multiple sources)	Leads created from portal, branches, SMS/misled call, campaigns, drop-offs.	Clarify deduplication logic (mobile/PAN/Aadhaar/email), fuzzy match needs, and merge vs block rules.	As per the RFP scope.
60	92	LLPS STP Integration	End-to-end loan processing with LLPS system through STP.	Please confirm if LLPS APIs will be provided and expected turnaround time for STP processing.	The details will be shared with successful bidder.
61	93	Feedback & Survey	Feedback surveys via QR code, user surveys, drop-off follow-ups.	Request confirmation whether CRM must host survey engine internally or integrate with Bank-owned survey system.	As per the Bank's requirement the approach will be decided. The solution should be capable to support both the approaches.
62	94	Mobile CRM (RM360/Field App)	In-house CRM mobile app integrated with Siebel for leads & status.	Clarify mandatory field functionalities (geo-location, offline access, visit reports, lead creation, document upload).	The details will be shared with successful bidder.
63	94	Integration with Internal/Extern	CRM integrated with CBS, LLPS, DCRS, WMS, Baroda Connect, Bob World, etc.	Request a detailed list of APIs (REST/SOAP), volumes, and authentication method (OAuth2, JWT, mTLS) for each integration.	Refer RFP scope for volumetrics and solution to support authentication

64	95	5 Core Modules (A–E)	Complaint, Campaign, Service 360, Lead, Sales to be developed.	Request confirmation whether all five modules must be delivered in Phase-1 (6 months) or follow delivery roadmap from page-9.	Please refer RFP scope.
65	88	KPI & Adoption Framework	Define KPIs such as TAT, FCR, repeat contacts, conversion, pipeline hygiene.	Clarify whether Bank will provide KPI definitions/thresholds or expects vendor to propose baseline + target KPIs.	As per RFP and addendum
66	89	Analytics & Forecasting	CRM to integrate with Bank's Analytics/AI Centre of Excellence.	Clarify expected frequency/mode of data exchange (real-time events vs batch).	The solution should support both the approaches as per the Bank's requirement. The details will be shared with successful bidder.
67	88	Knowledge Management	Knowledge base with authoring, approval, versioning, contextual surfacing.	Confirm whether knowledge articles must support multi-language & attachments with RBAC restrictions.	As per the RFP scope.
68	94	Contact Center with IVR (Optional)	Contact center integration listed as "optional" in modules.	Please confirm if IVR/CTI integration is optional for commercial evaluation or required in later rollout phases.	In later phase.
69	87–89	Siebel CRM Migration	Discovery, coexistence, migration, archival.	Please clarify if Bank expects 100% feature parity with Siebel or redesigned/improved flows with reduced clicks & STP-first design.	As per the RFP scope.
70	50	4.23 d (Limitation of Liability)	Under no circumstances Bank of Baroda shall be liable to the Service Provider for direct, indirect, incidental, consequential, special or exemplary damages arising from termination of this Agreement, even if Bank of Baroda has been advised of the possibility of such damages, such as, but not limited to, loss of revenue or anticipated profits or lost business.	Under no circumstances either party Bank of Baroda shall be liable to the Service Provider for direct, indirect, incidental, consequential, special or exemplary damages arising from termination of this Agreement, even if Bank of Baroda has been advised of the possibility of such damages, such as, but not limited to, loss of revenue or anticipated profits or lost	No change
71	176	Annexure 13 Service Levels - Penalty Clauses	The SLA charges (Other than Actual loss / penalty) will be subject to an overall cap of 10% of the Quarterly Charges and thereafter, Bank has the discretion to cancel the contract. The actual loss / penalty if applied by the Bank to the bidder will fall under the overall cap as per the Limitation of Liability clause of the RFP / Agreement.	The SLA charges (Other than Actual loss / penalty) will be subject to an overall cap of 5% 10% of the Quarterly Charges and thereafter, Bank has the discretion to cancel the contract. The actual loss / penalty if applied by the Bank to the bidder will fall under the overall cap as per the Limitation of Liability clause of the RFP	No change

72	214	38 Consequences of Cancellation of Order	In case of order cancellation, any payments made by the Bank to the Service provider would necessarily have to be returned to the Bank with interest @ 15% per annum. Further the Service provider would also be required to compensate the Bank for any direct loss incurred by the Bank due to cancellation of the contract and any additional expenditure to be incurred by the Bank to appoint any other SP. This is after repaying the original amount paid.	In case of order cancellation, any payments made by the Bank to the Service provider would necessarily have to be returned to the Bank with interest @ 15% per annum. Further the Service provider would also be required to compensate the Bank for any direct loss incurred by the Bank due to cancellation of the contract and any additional expenditure to be incurred by the Bank to appoint any other SP subject to the cost of the cancelled order. This is after repaying the original amount paid.	No change
73		Annex-02 64 Eligibility Criteria	Solution should have been hosted in a public cloud with a single-tenancy architecture for scheduled commercial banks in India for a minimum of three years	Request bank to allow public cloud with multi-tenancy architecture hosting too	As per the RFP and addendum
74		Annex-12 Project 88 Scope	4. Data, Knowledge and Analytics: Support multimodal/structured and unstructured data references (notes, attachments, call/chat transcripts) with retention and privacy controls.	Can you please elaborate that Data Lake house would send unstructured data also to CRM which needs to be mapped or stored against CRM objects like Customer, Account, Contact, Case etc. Please	The clause itself is self explanatory.
75		Annex-12 Project 88 Scope	5. Agentic AI Readiness: CRM must be able to leverage the Bank's Agentic AI framework and guardrails for use cases such as agent assist, auto-summarization, next-best-action, intelligent routing and guided service-to-sales prompts	Please confirm our understanding that CRM acts as an AI-agnostic engagement layer that securely orchestrates the Bank's Agentic AI framework, enforces human-in-the-loop controls, and provides journey-level telemetry and governance while preserving core CRM continuity.	As per RFP and addendum
76		Annex-12 Project 88 Scope	5. Agentic AI Readiness: CRM must be able to leverage the Bank's Agentic AI framework and guardrails for use cases such as agent assist, auto-summarization, next-best-action, intelligent routing and guided service-to-sales prompts	Can you please provide more details about Bank's Agentic AI solution that includes about the solution, whether it is on-prem or cloud based and its details, how many agents it has and what are they etc.	As per RFP and addendum
77		Annex-12 Project 94 Scope	G) CRM Mobile App- Lead Management Module: CRM Mobile app inhouse developed module used for Lead management module for the following products like Retail assets, Liabilities, Wealth management, Credit card with features like lead creation, status tracking and Lead dashboard integrated with CRM application. This app is	Since CRM mobile app is to be accessed at field also, is it require Offline facility. If yes how many data size or fields or modules requires internal device level persistence.	As per RFP and addendum
78		Annex-12 Project 96 Scope	d)SMS/Email notification should go to the owners and customers informing creation/status change/closure of complaints	For triggering notifications to customers through SMS/Whatsapp/Emails, does bank expects its email/sms/whatsapp gateways to be leveraged or integrated or bidder to bring that facility. Also provides daily volumetrics for each of these based on current data.	The proposed CRM solution should be capable to integrate with Bank's SMS gateway and Email communication. The volumetrics as per the requirements.

79	103	4.2.6) Lead Execution/Closure, Customer onboarding & Account Opening	b) The registration / account opening form shall be printed out with details & photo of the customer. The customer will only need to sign on the form. Once the form is signed, the signature of the customer will also be captured again and shall be kept online in the customer	(1) How many number of customer onboarding per month on an average (2) Do you need DocuSign kind of digital signing for customer to sign on the form	As per RFP and addendum
80	103	4.2.6) Lead Execution/Closure, Customer onboarding & Account Opening	c) Customer's PAN number/Aadhaar number shall need to be validated in real time from NSDL/ UIAI	Does BOB already has the contract or API access for these regulatory APIs or do we need to account its cost	As per RFP and addendum
81	104	F. Data Analytics & Forecasting	a) The solution should provide robust analytics by analysing data for insights into customer behaviour and estimate the likely products that customers may take given the available customer profile and data from	(1) May we know what is the Analytical solution BOB already have (2) Whether bidder can propose alternate analytical solution	The proposed solution must capable to integrate with Bank's internal systems .
82	113	K. Cloud Infrastructure	30. Bidder to provide dedicated Leased line from two different service providers from CSP DC and DR sites to Bank DC and DR sites. Bidder to provide link up to Bank's DC and DR router including CPE (Customer Premises Equipment), cross connect, SFP and cable laydown.	(1) Does BOB has existing AWS Landing zone (2) Do you want dedicated leased line for API access from CRM to bank DC & DR or even entire web/mobile access too	As per RFP and addendum
83	109	K. Cloud Infrastructure	9. The CRM Application and Data replication should happen from Primary site to DR site in real time to keep those in sync with a Recovery Time Objective (RTO) of 60 Minutes and near zero RPO (Recovery Point Objective).	Typically these are not applicable for multi-tenant as already multi-tenancy has 3 levels of redundancies. Request relaxation for this for multi-tenancy deployment	No change
84	115	K. Cloud Infrastructure	10 API Gateway in case of SaaS hosting APIs for consumption for the Bank	Does Bank wants this API GW from bidder to be on-prem or can be hosted in separate public cloud	As per RFP and addendum
85	88	Annexure 12 – Project Scope	Customer 360 and interaction history to be assembled from Bank systems with a clear data ownership model and data quality controls.	Can you help us with the total number of customer profiles BOB holds and how many sources from where these profile data will be ingested? What percentage of your customer's profile data is updated daily?	Please refer RFP scope.
86	92	Annexure 12 - Project Scope	A. Marketing Campaigns - Multi-level Campaign	Can you please elaborate if you are asking for a parent and multiple child campaigns under the	Yes - Both
87	92	Annexure 12 - Project Scope	A. Marketing Campaigns - Budget	Are we only considering the budget for digital campaigns or both digital and offline marketing campaigns as well	Both
88	92	Annexure 12 - Project Scope	A. Marketing Campaigns - Configure Campaign Offers	We assume that the campaign offers relevant to a particular set of segment will be defined by BOB or do you wish to have a offer recommendation from the system for the campaign	Both

89	97	B: Campaign Management Module:	Campaigns (of all types – mass email, voice, sms & others) should be created from CRM & should be able to link the campaign outcome /response so as to compute ROI of each campaign and conversion rate.	Do you want us to bring the channels OR integrate with existing vendors Please provide us following 1) Emails Per year 2) Emails with attachments per year 3) Promotional SMS Per year 4) Promotional and Service Whatsapp Per year	As per RFP and addendum. The details will be shared with successful bidder.
90	97	B: Campaign Management Module: b) Incident based campaigns	The solution should be able to float API/ web service for incident based campaigns where other systems will be able to push data e.g Credit/Debit Card/ Net Banking - fraud management systems should be able to send suspicious transactions details like amount of transaction/	Can you please specify what are all the systems from which we need to ingest data to create a customer 360 and in case we need to export data output to any 3rd party system, which are those as well.	As per the RFP scope.
91	98	2.2.2 Target List	Create customer segments based on past responses of prospects i.e. if a customer was part of any campaign and he/she could not be contacted or he/she didn't respond then he will be automatically put in the segment of lowresponse customer, so that he will be excluded automatically from future campaigns.	How many customer segments you currently have OR envision ? What will be standard refresh frequency of these segments ? How many daily campaigns are we envisioning.	The details will be shared with successful bidder.
92	98	B: Campaign Management Module - b) Incident based campaigns	Support the use of historical campaign data in future campaigns	How much historical data you would be ingested in the platform, can you please provide with some volume metrics	The details will be shared to successful bidder.
93	98	B: Campaign Management Module - b) Incident based campaigns	The solution should be able to float API/ web service for incident based campaigns where other systems will be able to push data e.g Credit/Debit Card/ Net Banking - fraud management systems should be able to send suspicious transactions details like amount of	Does the Bank expect real-time event-triggered marketing journeys (ex: transaction-based triggers), and if so, what is the acceptable trigger latency (seconds/minutes/hours)?	Both
94	102	D. Lead Management Module - 4.2.4) Lead Score & Lead Enrichment	System should be able to impart the score to the leads based on some pre-defined matrix for the product by processing available data or capturing customer response. b) Provisions should be there to store the customized formulae and calculate score based on available or	Do you have predictive model built today ? If yes, where are those models built (eg - SageMaker) What is total size of historical data do we have to build a new propensity model on platform	Yes. The details will be shared to successful bidder.
95	132	B. Marketing Automation & Journeys and Campaign Management	Ability to execute campaigns in Email/SMS/Social Media Channels etc.	Which are social handles and channels does BOB wants to execute campaigns, can you please specify like Facebook, Twitter, LinkedIn Instagram etc.	The proposed solution should integrate with Bank's social media channels like facebook, twitter etc.
96	133	B. Marketing Automation & Journeys and Campaign Management	Reports of leads generated by social media Campaigns	Does BOB will use the Social Channel generated lead form or they want the tech partner to provide the capability of lead form generation and the link will be embedded in the social channels?	The bidder should provide capability of lead form generation.

97	105	Technical Requirements: Infrastructure, Cloud and other CSP	CRM Application to be built on an Open Architecture based API enabled Platform to provide a superior digital experience for the users.	Does the BOB already have any existing middleware systems for API integrations? If yes, can you please specify the use case here	The proposed solution should capable to integrate with Bank's middleware systems as per the RFP scope. The details will be shared with successful bidder.
98	145	D. Lead Management	End User De-duplication: Option to configure deduplication check on lead creation End User De-duplication using business logic	How many leads do we receive per year ? How many total leads do we want to ingest as part of migration	Please refer RFP for volumetrics.
99	165	K. Data Analytics & Forecasting	Learning (ML) models for Segmenting the customers	Does BOB already have any AI or Predictive models for segmentation? Is yes, do we need to use the existing models or its the need for the platform provider to create those models? How many models are we considering? What is inference frequency - Daily, weekly, monthly	Yes.The proposed solution should capable to integrate with Bank's existing models as per the RFP scope.
100	140	C. Service Management with Customer 360°	16. Capability to integrate Interactive voice response blast services	We understand that CRM to be integrated with IVR and it will share mp3 audio and will share its transcripts and intelligence like what was discussed etc. These details to be displayed in Customer 360 screen. Please confirm our understanding	As per the RFP scope.
101	143	C. Service Management with Customer 360°	33 View of transactions done through various Channels	While bank intent wouldnt repeat or respective channel account statement, approximately how many transactions from each of the account (SB, CASA, wealth, lending etc.) in customer 360. Typically we have seen last 5 transactions in CRM. Please clarify	As per the RFP scope.
102	143	C. Service Management with Customer 360°	37. Provision for digital KYC Compliance with option to upload the necessary OVD document and capture KYC fields by CRM Users and perform validation based on the document type with maker checker provision	Please clarify that what validations are you expecting. Like extracting KYC docs content using OCR and validate against regulatory APIs here ?	As per RFP and addendum
103	147	D.Lead Management	19. Lead Email Tracking ability & mailbox folder tracking option for lead generation	Can you please explain in detail what do you mean by mailbox folder tracking option for lead	The bidder need to size their solution based on the scope
104	149	D.Lead Management	36 The entire lead generation process should be under scrutiny by CRM to ensure that it is as effective as possible in bringing new leads, converting them into customers and retaining them overtime. Different analytics tools can be used to optimize each step in the process and make	While we can understand first part of requirement, request your eloboration of the 2nd sentence where the analytical tools to optimize each step, how this can be achieved or correlate to lead management	The bidder need to size their solution based on the scope provided in the RFP and addendum
105	106	J.Data Management and Integration:	2.The proposed solution should include an API management platform with API gateways and API analytics to effectively manage and monitor API usage	Is the bank evaluating new CRM-specific API platforms, or will they leverage their existing API management system?	As per RFP and addendum

106	106	J.Data Management and Integration:	2.The proposed solution should include an API management platform with API gateways and API analytics to effectively manage and monitor API usage	Please confirm if Hybrid deployment strategy can be allowed - the Management plane being hosted on vendor managed public cloud and execution plane (API gateway & ESB) being completed hosted on Bank private DC. This architecture also makes sure that the transactional /PII data is always processed locally within Bank private DC.	As per RFP and addendum
107	106	J.Data Management and Integration:	2.The proposed solution should include an API management platform with API gateways and API analytics to effectively manage and monitor API usage	Considering its hybrid deployment for CRM-specific API platform , the hardware and software components required by the API platform would be provided by the Bank eg (Infra,WAF,OS,DB,NLB	As per RFP and addendum
108	109	K.Cloud Infrastructre:	The CRM Application and Data replication should happen from Primary site to DR site in real time to keep those in sync with a Recovery Time Objective (RTO) of 60 Minutes and near zero RPO (Recovery Point Objective).	We would like the bank to confirm their DC/DR strategy; our current assumption is that an Active/Passive model is required.	As per the RFP
109	94	H.Integration with Existing Applications & Systems:	The existing CRM Solution is integrated with various internal and External platforms and multiple API's/interfaces and some of the core systems has been listed below	Request Bank to confirm if there are any other application internal or external other than the listed ones?	As per RFP and addendum
110	94	H.Integration with Existing Applications & Systems:	The existing CRM Solution is integrated with various internal and External platforms and multiple API's/interfaces and some of the core systems has been listed below	Request Bank to provide estimated traffic volumes for the APIs and integrations between the CRM and the listed applications. To assist with capacity planning, please provide these metrics in any of the following formats: Transactions Per Second (TPS) (Peak and Average) Requests Per Day Requests Per Month	As per RFP and Addendum
111	89	7.Siebel CRM Migration		Could the Bank specify the total number of APIs and integrations currently developed and active for the Siebel CRM system?	Please refer RFP scope.
112	89	6. Security, Compliance and Governance	Establish CRM governance structure, change control, release management and environment strategy (dev/test/UAT/pre-prod/prod) aligned to Bank standards.	Request bank to confirm the environment strategy for Non-prod , we assume that UAT would be at 50% capacity of Prod without HA and pre-pro would be 50% with HA for the API management	As per the Bank's requirement.
113	92	C) Lead Management Module	Lead creation process through different sources i.e Online web portal in Bank's website for application of Retail Assets,Liabilities, MSME,AGRI and LCB loans by Existing	Please advise on the following: a) How many number of new leads per day / month b) What is your lead coversion %	Please refer RFP for volumetrics.
114	92	B) Complaint Management Module	Complaint Creation through various channels (Website for the customers, internet banking ,Bobworld, Business correspondents, Branches, Contact Centre, social media,	Please advise on the following: a) How many number of new complaints/Inquiries/Service requests per day /	Please refer RFP for volumetrics.
115	93	E) Service Module- Customer 360 degree and Service Requests	Single view of customer relationships. financial and non-financial account status.	Please advise on the following: a) What would be the volume or customer base as on date b) How much % YoY increase we can envisage on customer base.	Please refer RFP for volumetrics.

116	64	Annexure 02 /Evaluation Terms /Eligibility Criteria	Bidder should have implemented at least 3 modules out of 6 proposed modules* in one or more Scheduled Commercial Bank in India, having minimum 1,500 branches as on date of RFP, with minimum of 5,000 licensed users on CRM Platform. e.g. Sales Management Module implemented at “X” Bank, Lead Management Module & Service Management Module implemented at “Y” Bank will be considered as implementation of 3 modules. The platform should be in use /live as on date of published RFP and should be in operation for minimum of 6 months.	Request change to (Option 1) OEM product should have at least 3 modules implemented out of 6 proposed modules* in one or more Commercial Bank in India, having minimum 1,500 branches as on date of RFP, with minimum 5,000 licensed users on CRM Platform. e.g. Sales Management Module implemented at “X” Bank, Lead Management Module & Service Management Module implemented at “Y” Bank will be considered as implementation of 3 modules. The platform should be in use /live as on date of published RFP and should be in operation for minimum of 6 months. Request change to (Option 2) " Bidder should have implemented at least 3 modules out of 6 proposed modules* in one or more Commercial Banks globally, having minimum 1,000 branches as on date of RFP, with minimum of 3,000 licensed users on CRM Platform. e.g. Sales Management Module implemented at “X” Bank, Lead Management Module & Service Management Module implemented at “Y” Bank will be considered as implementation of 3 modules. The platform should be in use /live as on date	As per RFP and addendum
117	10	Delivery /Penalties	In case the individual phase wise deadlines are not met then the Vendor will have to pay penalty to Bank of Baroda @ 0.5% of particular phase implementation cost inclusive of all taxes, duties, levies etc., per week or part thereof, for late implementation beyond due date of implementation, to a maximum of 10%. If delay exceeds two weeks from due date of	This 0.5% penalty is only against implementation cost for the respective phase and not Total project cost. Pls confirm	No change

118			Bidder should have implemented at least 3 modules out of 6 proposed modules* in one or more Scheduled Commercial Bank in India, having minimum 1,500 branches as on date of RFP, with minimum of 5,000 licensed users on CRM Platform. e.g. Sales Management Module implemented at “X” Bank, Lead Management Module & Service Management Module implemented at “Y” Bank will be considered as implementation of 3 modules. The platform should be in use /live as on date of published RFP and should be in operation for minimum of 6 months. Support required : Evidence for the same to be submitted like Purchase Order / Work Order / Contract Agreement and Customer Credential clearly indicating the scope and duration	Request you to change Support required to <i>Evidence of contract agreement and customer credential</i> via a Bidder Legal document clearly mentioning client and scope (calling out modules implemented)	As per RFP and addendum
119	18	Sec 2; B. Technical Bid evaluation (Stage 2)	The Scheduled Banks should have at least -1500- branches.	This condition can be removed given many banks are Digital first banks now operating <100 number of branches	As per RFP and addendum
120	18	Sec 2; B. Technical Bid evaluation (Stage 2)	The Bidder should have experience of implementing CRM Modules for which scoring will be done as given below	Please advise on the calculation of the break-up Need clarity on how the individual marks add up to max score of 25 as indicated in the	As per RFP and addendum
121	18	Sec 2; B. Technical Bid evaluation (Stage 2)	Compliance with regulatory and Gov. regulation & master direction, (DPDP) & Security	Please provide any reference website/article that we will have comply to	As per RFP and addendum

122	18	Sec 2; B. Technical Bid evaluation (Stage 2)	Implementation of bidder all 6 module* of proposed CRM solution by themselves in -3- Scheduled Commercial Bank out of which one should be in India.	Option 1 Implementation of all 6 module* of proposed CRM solution using proposed OEM product in -3- Scheduled Commercial Bank out of which one should be in India Option 2 Implementation of all 6 module* of proposed CRM solution by themselves in -3- Scheduled Commercial banks globally	As per RFP and addendum
123	11	Payment Terms / License Cost	75% of the licence fee shall be payable upon Go-Live acceptance, evidenced by an Acceptance Form duly signed and stamped by the Bank's authorized Project Manager and the Bidder's authorized representative	Ideally OEMs expect the fees to be paid upfront when license usage starts for Development phase. Can this payment be staggered (At start of Dev / UAT/ Golive)	As per RFP and addendum
124	124	A.1	Ability to create Service request /Complaint/Raise query for Customers as well as Non-Customers through website, Contact centre, ODR- Internet banking, BOBworld, BC portal, Social media platform, SMS Banking Chatbot, Whatsapp banking, ATM Kiosk etc from various sources, Provisions should be provided to Staff, BC agents, NRI customers apart from customers and Non-customers.	1) Need approx volume of case/service requests to be received by BoB per day. 2) Name all the outbound channels to be connected with the customer service portal.	1. The details will be shared to successful bidder. 2. The clause itself is self explanatory.
125		A.2	CRM is to be integrated with Bank's different channels for creation of Complaint/ Service requests/query etc. This will enable Customers to lodge Complaint / service requests/query through Bank's different channels i.e. Website, Debit Card Redressal System (DCRS), Internet Banking, BOB world, Branch, Social Media, Contact Centre, INGRAM,CPGRAM , JANSURAKSHA and various regulatory and Ministry portals etc.	1) Need API details of the core systems, OpenAPI framework specifications of the core systems at disposal. 2) What kind of authentication mechanisms is needed for connecting to these systems?	The proposed solution capable to build and consume API's for the integration with Bank's internal/third party/external systems. As per the RFP scope, the bidder has to size their solution.

126		A.19	Escalation of Rejected and partially rejected complaints to Internal Ombudsman through PNO user with certain predefined rule so that such complaints can be closed only after IO Request for Proposal for Selection of Vendor for Supply, Implementation, and Maintenance of Customer Relationship Management (CRM) Solution on Subscription (SaaS) Model Bank of Baroda Confidential Page 127 of 222 remarks. The IO can	Need clarity on the number and types of personas involved and number of hierarchy levels for complaints closure	The details will be shared with successful bidder.
127		A.20	Assignment of fraud cases to different resolver groups once the investigation is completed by respective HO Division for raising chargeback and	Need clarity on the number and types of personas involved and number of hierarchy levels for complaints closure	The details will be shared with successful bidder.
128		C2	Capability to display On Demand data by integrating with other solutions like CBS, SharePoint, intranet site, & Chat Bot etc. via API integration /Middleware/Connect 24.	Pls advise on the middleware to be considered for integrations Pls confirm if Bank will provide this	The proposed solution must capable to integrate with Bank's middleware system.
129	170	C16	Capability to integrate Interactive voice response blast services	Pls provide list of IVRs to integrate with CRM solution	The proposed solution should capable to integrate with
130	145	2	Lead Capturing-CRM platform should be able to ensure that every lead is automatically fed into the Lead system from current source such as existing bank Request for Proposal for Selection of Vendor for Supply, Implementation, and Maintenance of Customer Relationship Management (CRM) Solution on Subscription (SaaS) Model applications, web site, Chatbot, internet banking, mobile banking, Retail assets, Liabilities, whole sale banking, Government Business, Social Media, Supply chain Finance, DSA and DST, Business correspondent portal, Credit card, Demat, MSME, AGRI, Wealth Management, SMS, Missed calls and social media (such as Facebook,	Need integration touchpoint details of all CBS for lead capture.	The clause itself is self explanatory.
131	148	27	Availability of Document Repository for Lead Module to be available for CRM users like executives/officers with keyword-based content	Please confirm if Bank would want us to include DMS (Data Management Solution) for Document storage and retrieval	The proposed solution should be capable to integrate with Bank's Document
132	148	28	Platform should have strong file level validation controls for size, type, and content. Files to be scanned for any malicious content through an	Please confirm if Bank would want us to include DMS (Data Management Solution) for Document storage and retrieval	The proposed solution should be capable to integrate with Bank's Document
133	131	57 (Functional and Technical requirements	Marketing Automation & Journeys and Campaign Management	what is the total email send per month	Please refer RFP for volumetrics

134	64	Eligibility Criteria - Experience & Support Infrastructure	Bidder should have implemented at least 3 modules out of 6 proposed modules* in one or more Scheduled Commercial Bank in India, having minimum 1,500 branches as on date of RFP, with minimum of 5,000 licensed users on CRM Platform. e.g. Sales Management Module implemented at “X” Bank, Lead Management Module & Service Management Module implemented at “Y” Bank will be considered as implementation of 3 modules. The platform should be in use /live as on date of published RFP and should be in operation for minimum of 6 months. *Proposed Solution should include following Module 1. Lead Management 2. Campaign Management 3. Sales Management 4. Service Management and customer 360 degree 5. Complaint management 6.Contact centre with IVR integration	Requesting OEM/ Bidder experience for wider participation and amend the following clause. Bidder/ OEM should have implemented at least 3 modules out of 6 proposed modules* in one or more Scheduled Commercial Bank in India, having minimum 1,500 branches as on date of RFP, with minimum of 5,000 licensed users on CRM Platform. e.g. Sales Management Module implemented at “X” Bank, Lead Management Module & Service Management Module implemented at “Y” Bank will be considered as implementation of 3 modules. The platform should be in use /live as on date of published RFP and should be in operation for minimum of 6 months. *Proposed Solution should include following Module 1. Lead Management 2. Campaign Management 3. Sales Management 4. Service Management and customer 360 degree 5. Complaint management 6.Contact centre with IVR integration	As per the RFP and addendum
135		General		Kindly confirm whether consortium/JV participation is permitted in this RFP. In case consortium is currently not allowed, we request the authority to kindly consider permitting consortium participation to enable broader technical capability and stronger	As per the RFP and addendum

136	50	4.23 Limitation of Liability	b) However, Service Provider's liability in case of claims against the Bank resulting from Willful Misconduct or Gross Negligence of Service Provider, its employees and Subcontractors or from infringement of patents, trademarks, copyrights or such other Intellectual Property Rights or breach of confidentiality obligations shall be unlimited.	Requesting you to cap the liability to TCV.	No change
137	p.10	Delay penalties	Penalty @0.5% of the particular phase implementation cost per week or part, capped at 10%.	Please confirm: (a) whether 'implementation cost' excludes license/support; (b) whether partial acceptance of a module within a phase avoids LD for that accepted module; (c) whether bank-side delays pause LD.	No change
138	p.10	Order cancellation trigger	If delay exceeds two weeks from due date of implementation, Bank reserves right to cancel the entire order.	Request a defined cure period and escalation steps before cancellation; please confirm if cure can be mutually agreed in writing.	No change
139	Sec 1.3, p.8	Implied scope	Any service not explicitly excluded is deemed included at no additional cost.	To avoid ambiguity, please publish an 'included vs excluded' catalog	No change
140	Sec 1.9, p.11-13	Adoption criteria	Payments (license and implementation) contingent on 'successful adoption plan sign-off'.	Please define adoption KPIs per module (e.g., % active users, SLA adherence, process compliance), measurement window and sign-off authority.	As per RFP and addendum
141	p.109 - Sec 8	User volumes	RFP references large user base (e.g., up to ~40,000 users in annexures).	Please confirm total named and concurrent users at steady state and provide role mix (branch users, contact center users, RM, supervisors, back office, service agents) for	Please refer RFP for volumetrics
142	p.172, point#16	Performance benchmarks	Performance and resilience requirements to be defined with measurable targets.	Please share target response times, concurrency and throughput for key journeys (service request, complaint, lead conversion, search) and the performance sign-off	As per RFP and addendum
143	p.89-90	Headless delivery	CRM must support headless/composable; user experience may be delivered via Bank-owned apps consuming CRM APIs.	Please specify which channels will use Bank-owned UI (e.g., branch portal, RM mobile, customer self-service) vs native CRM UI; provide channel-wise split.	The proposed solution should support all bank's owned apps/ portals as per the RFP scope. The bidder has to size
144	p.114	Security stack ownership	Controls like WAF, DLP, CASB, RASP, SIEM integration referenced.	Please clarify which security controls are Bank-provided vs vendor-provided, integration methods, and change windows for deploying controls on CRM endpoints.	As per the RFP scope, bidder should meet the minimum security standards as specified.

145	p.213	Incident response	Security incident governance and reporting referenced.	Please confirm security incident notification SLA (mentions ~30 minutes), the joint RACI for containment/forensics/regulator reporting, and customer comms.	As per the RFP scope, bidder should meets the minimum security standards as specified.
146	p.105-107, 122-123	API & event standards	API-first/event-first; Open API, REST/GraphQL; Kafka/event bus via Bank gateway; OAuth2/JWT/mTLS.	Please share API standards (OpenAPI version), auth patterns, rate limits, message schemas, error codes, and sandbox access timelines.	The clause itself is self explanatory.
147	p.91	CTI/IVR	Integration with Avaya/Cisco/IVR; contact center (optional).	Please confirm what are the CTI platforms to be considered for integration with versions, features expected (screen-pop, click-to-dial, wrap-up). Any CTI platform related changes will be performed by respective CTI vendor. Please	The proposed solution should integrate with Bank's CTI solution.
148	p.94-95, 142-145, 172	Integration inventory	Multiple upstream/downstream systems listed (CBS, LLPS, DCRS, HRMS, DWH/Lakehouse, Fraud, Cards, Internet/Mobile, gate-ways, social).	Kindly provide the complete integration inventory with direction, payloads, SLAs, expected volumes and non-functional requirements per interface.	The inventory details will be shared with successful bidder.
149	p.89	Co-existence with Siebel	Siebel discovery, phased migration/coexistence/cutover/rollback; reconciliation and audit evidence required.	Will there be a parallel run with Siebel? If yes, define system-of-engagement vs system-of-record per journey, reconciliation reports, and cutover criteria.	It will be decided by the Bank based on the project implementation by the bidder.
150	p.107	Migration scope	migration of customer, interactions, cases/complaints, SRs, leads/opportunities; archival plan for Siebel.	Please confirm data domains and lookback period to be migrated, Do we need to include attachments and knowledge articles?	The entire data migration is part of the RFP scope by the bidder. Please refer RFP and
151	p. 92	Banking	Lead creation process through different sources i.e Online web portal in Bank's website for application of Retail Assets	Our assumption is that all the configurations/workflows are for retail banking only and not for corporate banking.	The bidder should size their solution as per the Bank's requirements.
152	p.89	Archival plan	Provide decommissioning and archival plan for Siebel including retention and access to historical	Are we pushing all the data from existing Siebel application to Data lake?	Please refer RFP.
153	p.90	Functional Requirements – Common Capabilities	Unified 360 view for frontline users:	Wherever data is not available in CRM, bank can provide the APIs to pull data from data lake or other external systems to consume by CX. Please confirm.	The solution should capable to publish and consume API's for the integration with Bank's internal systems and bidder has to size their solution accordingly.
154	p.93	Wealth Management	Integration with Bank's internal systems like Smart Insurance	Could you please elaborate more on functionalities required for wealth management from CRM integration stand point?	The details will be shared with successful bidder.

155	p.92	Complaint Management Module	Complaint creation from various channels	The changes to the source like website, sms/whatsapp banking, social media, external systems will be the responsibility of bank for complaint creation. CRM can provide the APIs for this. Please confirm.	The solution should be capable to publish and consume API's for integration with Bank's internal/external/third party systems.
156	p.92	Complaint Management Module	Integration with external applications like JANSURAKSHA, INGRAM Ministry portal, CPGRAM, for Consumer complaints	Our assumption is that bank will facilitate the changes in external applications to consume CRM API if it is pulled from external systems.	The solution should be capable to publish and consume API's for integration with Bank's
157	p.92	Complaint Management Module	Customer Feedback regarding complaint module.	In existing world, are we sending any surveys to get customer feedback? What is the current survey system used for this? If there is no survey system, did bank expect bidder to bring survey tool also along with CRM?	The proposed Solution capable to provide auto sentiment analysis based on customer feedback/survey on complaint module received centrally from all sources like
158	p.92	Complaint Management Module	Status Tracking of complaint on the web portal.	Which web portal to be used for this? Is this the customer self service portal which is part of the CRM proposal?	Bank's Customer web portal of complaint module. The proposed solution must
159	p.92	Lead Management Module		How many different product LOBs are present in the bank?	The details will be shared with successful bidder.
160	p.93	Lead Management Module	Integration with internal systems i.e Loan Lifecycle processing system (LLPS) system through End to End STP process for loan processing	The loan processing will happen in LLPS system. CRM requirement is to create the entry in LLPS and track the status. The actual processing will happen in LLPS only. Please	As per the RFP scope.
161	p.93	Lead Management Module	Online E-OTS module	Does this mean an integration from CRM to this portal?	The proposed solution must provide and be capable to develop self service portal for
162	p.93	Lead Management Module	Office Directory for all the users	The organization hierarchy for a bank (Human resources) can be different from sales or service organization within CRM system. Is office directory means human resources hierarchy of the bank?	yes.
163	p.94	Integration with Existing Applications & Systems:	CBS - domestic & international	Do we have international customers? Do we have multi currency setup in Siebel system?	CBS is also one of the core system for CRM integration.
164	p.95	Collections Management		Could you please elaborate more on functionalities required for collections management from CRM stand point?	The details will be shared with successful bidder.

165	p.95	Digital Onboarding		Our assumption is that customer onboarding happens in other systems since it involves a lot of processes and manual approvals. CRM will help to initiate the process and track the status. Please confirm.	As per the RFP scope.
166	p.98	Campaign Management Module	Support the usage of social media in launching campaigns with the ability to integrate with the top social networking sites		As per RFP and addendum
167	p.103	Lead Management Module	The registration / account opening form shall be printed out with details & photo of the customer. The customer will only need to sign on the form. Once the form is signed, the signature of the customer will also be captured again and shall be		As per RFP and addendum
168	p.103	Lead Management Module	Customer's PAN number/Aadhaar number shall need to be validated in real time from NSDL/ UIAI.		As per RFP and addendum
169		Data Migration		The assumption is that bank will provide the required data in csv format in the bidder provided format to upload in CRM system.	The data migration is part of the RFP scope by the bidder using best possible approach.
170		Middleware		What is the existing Middleware system used by bank?	The details will be shared with successful bidder.
171		Data Migration		The assumption is that bank will provide SFTP server as part of any to and fro data movements between on-prem and cloud?	The data migration is part of the RFP scope by the bidder using best possible approach.
172	p.125	Complaint Management Module	SMS/Email notification should go to the users	Bank will have SMS aggregators for which API can be called to send SMS from CRM system. Please confirm.	The proposed solution should be able to integrate with Bank's internal system- SMS gateway
173	p.131 - 134	Marketing Automation & Journeys and Campaign Management		Kindly confirm if bank would provide SMS gateway? Also, please provide the volume of SMS that will be send on monthly/annual basis and any yearly increment on same?	The proposed solution should be able to integrate with Bank's internal system- SMS gateway. Please refer RFP for
174	p.131 - 134	Marketing Automation & Journeys and Campaign Management		Please provide the volume of Emails that will be send on monthly/annual basis and any yearly increment on same?	Please refer RFP for volumetrics

175	p.131 - 134	Marketing Automation & Journeys and Campaign Management		Do bank have a centralized content / document management solution in place?	The Proposed solution should capable to integrate with Bank's internal systems.
176	p.131 - 134	Marketing Automation & Journeys and Campaign Management		Do bank have promotional, Transactional and utility/service campaigns? Please provide the volume of communications.	Yes. The details will be shared to successful bidder.
177	p.131 - 134	Marketing Automation & Journeys and Campaign Management		Will the bank provide creative assets for campaigns, or is the vendor expected to design them?	As per Bank's requirement
178	p.131 - 134	Marketing Automation & Journeys and Campaign Management		Are there any constraints w.r.to PII or SPII data in bringing to cloud?	As per the Bank policy governed by the regulatory guidelines
179	p.131 - 134	Marketing Automation & Journeys and Campaign Management		What DB technology platform is used for source systems/data lake (Oracle/Hadoop/DB2 etc)	The details will be shared with successful bidder.
180	p.131 - 134	Marketing Automation & Journeys and Campaign Management		What is the current Max volume for Customer data and avg. annual growth rate in volume	Please refer RFP for volumetrics
181	p.131 - 134	Marketing Automation & Journeys and Campaign Management		Do you have existing gateway integration/service aggregators for SMS or WhatsApp	The proposed solution should integrate with Bank's internal systems.
182	p.131 - 134	Marketing Automation & Journeys and Campaign Management		How many real-time campaigns are considered in scope	As per Bank's requirement

183	p.131 - 134	Marketing Automation & Journeys and Campaign Management		How many campaigns are scheduled/run daily/weekly/monthly	As per Bank's requirement
184	p.131 - 134	Marketing Automation & Journeys and Campaign Management		Do you have any existing campaigns that need to be migrated to the new platform? If yes, How many?	The details will be shared with successful bidder.
185	p.131 - 134	Marketing Automation & Journeys and Campaign Management		What is the current peak audience size in existing campaigns	As per the RFP scope
186	p.131 - 134	Marketing Automation & Journeys and Campaign Management		What systems/tools are currently used for Analytics and Campaign metrics measurement	The Proposed solution should capable to integrate with Bank's internal systems.
187	Annexure 12, 87–90	Marketing Automation & Campaign Mgmt		Which outbound channels (Email, SMS etc...) are expected at Phase-2 go-live, and what are the monthly send volumes and peak concurrency? full list will help ?	Please refer RFP for volumetrics
188	88–89	Marketing Automation & Campaign Mgmt	Event-first architecture	Please share the list of customer events (Onboarding, EMI, Dormancy, Product usage, Complaint stages etc.) and the required latency (real-time vs batch) for journey orchestration.	The details will be shared with successful bidder.
189	89–90	Marketing Automation & Campaign Mgmt	Security, DPDP 2025	What is the golden source of consent, and must the marketing system perform write-back for opt-ins/opt-outs?	No change
190	87–90	Marketing Automation & Campaign Mgmt	360, data ownership	Which identifier governs eligibility (CIF, Customer ID, Prospect ID)? What dedupe logic do you currently enforce?	The details will be shared with successful bidder.
191	131	Marketing Automation & Campaign	templates, personalization, cloning	Do you require dynamic content (offers, product tiles) and multilingual templates (email/SMS/WhatsApp)?	As per the RFP scope

192	131	Marketing Automation & Campaign Mgmt	MarTech Integrations to Retain	Besides CBS, IVR/CTI and Data Lakehouse, list any incumbent messaging gateways (SMS/email/WhatsApp), social ad platforms, customer survey/NPS tools, mobile app push provider, tag manager/CDP/MA currently in use and whether they must be retained or replaced in the target state.	As per the RFP scope.
193	89–90	Marketing Automation & Campaign Mgmt	Security & DPDP, Data governance	The RFP requires India-only storage and strong encryption.whether field-level encryption is required for PII inside campaign systems and masked in non-prod.	As per the RFP scope.
194	89	7	Provide decommissioning and archival plan for Siebel including retention and access to historical records.	Is the current infrastrucutre used for Siebel On Prem? Is it expected that the historical data in Siebel will be archived to another DB within the Bank's network? What type of access to historical data is expected? Is a UI also needed to access historical data? Will there be role based access control also needed to access historical data? Is the expectation to only provide the archival plan or implement it as well?	UI needed to access historical data and view access to be provided to the users. Regarding current infrastructure of existing application please refer RFP scope.The data migration is the part of the scope of the bidder.
195	107	10	The selected bidder is responsible for Migration of customer data, existing leads,complaints and service request/case data, Migration strategy, Migration Plan, Pre and Post migration reconciliation and Audit support in the new solution.	What are the approximate volume of data for the following which will need to be migrated to the new application? Customers (Retail customers, Corporate customers) Financial Accounts Leads Opportunities Service Request/Cases Attachments (across all entities)	Please refer RFP for volumetrics.
196	120	56. d	The successful bidder has to migrate complete data from existing data sources to the proposed solution.	Apart from Siebel which other data sources is being referred here? Please clarify the source and the entity that needs to be migrated from these sources	The data migration is part of the RFP scope by the bidder from the existing CRM application.

197	122	57.B.2	API-first + event-first; bank gateway/event bus standards; API versioning/backward compatibility idempotency, throttling; no mandatory proprietary middleware.	Is the expectation that we should not propose any middleware as part of solution? Does Bank have any existing middleware/Events based framework which has to be leveraged? Please clarify.	The proposed solution should be capable to integrate with Bank's middleware.
198	157	H.4	The system should have a capability to provide an integrated reporting tool for new reports to be created as required. The tool should enable the Business users to create dynamic reports i.e generate report by selecting fields of choice as required	Is there an existing reporting tool that data must be integrated or we can propose new reporting tool? Should the CRM data be loaded to existing reporting data warehouse too even if we propose a reporting tool of our own?	As per the RFP scope.
199	171	L.3	Customer self-service: raise SR/complaint/query, upload docs, track status, internal updates.	Is there an existing customer portal which will be integrated with the new CRM or we are supposed to propose a new customer portal	As per RFP and addendum
200	172	L.2	Partner onboarding workflow incl. approvals, due diligence checkpoints, document capture	Is it expected that prospective partners register using a separate portal which should be part of the solution?	The proposed solution must be capable to integrate with Bank's internal system
201	18	2. Evaluation process B. Technical Bid Evaluation (Stage 2)	The Bidder should have experience of implementing CRM Modules for which scoring will be done as given below 1 Implementation of bidder all 6 module* of proposed CRM solution by themselves in -3- Scheduled Commercial Bank out of which one should be in India. - 15 2 Implementation of bidder by themselves at least 5 modules out of 6 proposed modules* in -3- Scheduled Commercial Bank out of which one should be in India. - 10 3 Implementation of bidder by themselves at least 4 modules out of 6 proposed modules* in -3- Scheduled Commercial Bank out of which one should be in India. - 5 4 Implementation of bidder by themselves at least 3 modules out of 6 proposed modules in -3- Scheduled Commercial Bank out of which one should be in India. - 3	The Bidder/OEM should have experience of implementing CRM Modules for which scoring will be done as given below 1 Implementation of bidder all 6 module* of proposed CRM solution by themselves in -3- Scheduled Commercial Bank out of which one should be in India. - 15 2 Implementation of bidder by themselves at least 5 modules out of 6 proposed modules* in -3- Scheduled Commercial Bank out of which one should be in India. - 10 3 Implementation of bidder by themselves at least 4 modules out of 6 proposed modules* in -3- Scheduled Commercial Bank out of which one should be in India. - 5 4 Implementation of bidder by themselves at least 3 modules out of 6 proposed modules in -3- Scheduled Commercial Bank out of which one should be in India. - 3	As per RFP and addendum

202	64 and 65	Annexure 02 – Evaluation Terms A. Eligibility Criteria Compliance	Bidder should have implemented at least 3 modules out of 6 proposed modules* in one or more Scheduled Commercial Bank in India, having minimum 1,500 branches as on date of RFP, with minimum of 5,000 licensed users on CRM Platform. e.g. Sales Management Module implemented at “X” Bank, Lead Management Module & Service Management Module implemented at “Y” Bank will be considered as implementation of 3 modules. The platform should be in use /live as on date of published RFP and should be in operation for minimum of 6 months. *Proposed Solution should include following Module 1. Lead Management 2. Campaign Management 3. Sales Management 4. Service Management and customer 360 degree 5. Complaint management 6. Contact centre with IVR integration	Bidder/OEM should have implemented at least 3 modules out of 6 proposed modules* in one or more Scheduled Commercial Bank in India, having minimum 1,000 branches as on date of RFP, with minimum of 1,000 licensed users on CRM Platform. e.g. Sales Management Module implemented at “X” Bank, Lead Management Module & Service Management Module implemented at “Y” Bank will be considered as implementation of 3 modules. The platform should be in use /live as on date of published RFP and should be in operation for minimum of 6 months. *Proposed Solution should include following Module 1. Lead Management 2. Campaign Management 3. Sales Management 4. Service Management and customer 360 degree 5. Complaint management 6. Contact centre with IVR integration	As per RFP and addendum
203	9	1.5 Disaster Recovery Mechanism	The bidder needs to submit the technical architecture relating to data replication between primary and secondary site	Requesting BoB, to remove this clause as this is not relevant for a SaaS service	As per RFP and addendum
204	14	1.11 Ownership, Grant and	(i) to copy the Software that operates on server systems to support the users of the Bank	Requesting BoB, to remove this clause as this is not relevant for a SaaS service	As per RFP and addendum

205	14	Delivery	C. To work as interface: (i) to work with other Application Software packages at the Bank as interface; (ii) to allow other application software packages at the Bank to work as interfaces to the Software. If such interfacing requires any modification or change to the Platform, such modification or change has to be carried out by the Bidder free of any additional License charge or fees or expenses	Requesting BoB, to remove this clause as this is not relevant for a SaaS service, and this may be discussed with your Partner. But OEM is not liable to change the core product	As per RFP and addendum
206	15	1.12 Escrow Mechanism	The Bank and the successful bidder shall agree to appoint an escrow agent to provide escrow mechanism for the deposit of the source code for the software product supplied / procured by the Bidder to the Bank in order to protect its interests in	Requesting BoB, to remove this clause as this is not relevant for a SaaS service	As per RFP and addendum
207	16	1.13 Audit	All Bidder records with respect to any matters covered in this RFP shall be made available to auditors and or inspecting officials of the Bank and/or Reserve Bank of India and/or any regulatory authority, at any time during normal business hours, as often as the Bank deems necessary, to audit, examine, and make excerpts or transcripts of all relevant data. Said records are subject to	Our Organization DPA(Data Processing Agreement) grants audit rights to the customer and/or their auditors, subject to prior formal notice. Audits cannot be conducted at any time, as they require advance planning, coordination, and internal management by Our Organization. Requesting BoB, to remove this clause as this	No change
208	18	2. Evaluation process	Compliance with regulatory and Gov. regulation & Master direction , Data Privacy (DPDP) & Security	Master direction: It has been withdrawn and no longer relevant https://website.rbi.org.in/web/rbi/-/notifications/master-direction-on-outsourcing-of-information-technology-	As per RFP and addendum
209	25	3.1 General Terms and conditions	i) Standards: All standards to be followed will adhere to Bureau of Indian Standards (BIS) specifications or other acceptable standards (IS 17802:2021)	Our Organization SaaS aligns with multiple global standards such as NIST, ISO, and SOC standards. Hence, requesting BoB to remove	No change

210	54		The Service provider shall ensure that it is complying with all the directions and clauses as stated in the said circulars: a) RBI/2023-24/102 DoS.CO.CSITEG/SEC.1/31.01.015/2023-24 dated 10.04.2023 regarding Master Direction on Outsourcing of Information Technology Services b) RBI/2023-24/107	Note: The Master Direction on IT Outsourcing has been withdrawn, hence no more applicable https://website.rbi.org.in/web/rbi/-/notifications/master-direction-on-outsourcing-of-information-technology-	As per RFP and addendum
211	59	Annexure 01 – Guidelines for submission details and E-tendering	Letter of Undertaking from Bidder and OEM/ OSD on Compliance to RBI Master Direction on Outsourcing of IT Services RBI/2022-23/xx DoS.CO.CSITEG/SEC.xx/31.01.015/2022-23 Dated 23rd June 2022	N/A - The Master Direction on IT Outsourcing has been withdrawn, hence no longer applicable https://website.rbi.org.in/web/rbi/-/notifications/master-direction-on-outsourcing-of-information-technology-services-12486 Requesting BoB to remove this clause	As per RFP and addendum
212	62	Annexure 02 – Evaluation Terms	The solution should have been hosted in a public cloud with a single-tenancy architecture for scheduled commercial banks in India for a minimum of three years	Our Organisation SaaS services run on (OCI), which, like other public cloud platforms, operates in a multi-tenant model. However, Our Organisation SaaS uses customer-specific pods, application instances, databases, encryption keys etc. to logically separate each customer's data and workloads. This approach ensures strong isolation and security while following standard cloud best practices. Hence requesting BoB to remove this single tenancy clause	As per RFP and addendum
213	89	Annexure 12 – Project Scope	According to Digital Personal Data Protection (DPDP) Rules, 2025, Establish a comprehensive framework for processing digital personal data, empowering users with rights over their data and requiring strict compliance from fiduciaries regarding consent, data breaches, and child data protection	Requesting bank for further clarity and relaxation on the clause	No change

214	105	Technical Requirements: Infrastructure, Cloud and other CSP Requirements	1. The proposed CRM Solution shall be configured, deployed On-Cloud under SaaS based model, and managed to meet security, privacy, legal, ethical and compliance requirements of the Bank.	Will need clarity on the Compliance requirements of the Bank	The proposed solution should meet RBI, MEITY and Bank internal compliance.
215	108		22. Bidder /CSP (Cloud Service Provider) should ensure that any data that is stored on the cloud is protected and appropriate policies and controls are put in place to provide data privacy and protection. The CSP should adhere to all laws pertaining to data privacy and protection that are applicable as per Gol, RBI and any other regulators. The CSP should also ensure that necessary enhancements are made to the services provided whenever there are	Requesting bank for further clarity and relaxation on the clause	The proposed solution should meet RBI,GOI, MEITY and Bank internal compliance.
216	108		15. As per the Digital Personal Data Protection (DPDP) Rules , 2025, notified by India's Ministry of Electronics and Information Technology (MeitY), establish a comprehensive framework for processing digital personal data, empowering users with rights over their data and requiring strict compliance from	Requesting bank for further clarity and relaxation on the clause	No change
217	109		3. The platform should use Micro-services based architecture using kubernetes or equivalent orchestration for scalability. The solution must utilize Docker or equivalent technology to package microservices, ensuring the solution can be consistently deployed across various environments (development, testing, production). The bidder must provide detailed architecture diagrams of the proposed solution, showing how all components of	This is not relevant for a Service offered under a subscription based SaaS model with SLAs and managed by the CSP. Requesting BoB to remove this clause	As per RFP and addendum
218	109		7. The response time at server end should be always be less than 200 milli second . During the agreement period, if at any stage, it is found that the Platform provided by the Bidder is not able to give the requisite performance as per the sizing parameters (i.e., up time above 99.90% and response time < 1 seconds), the Bidder shall have to provide additional	Request the bank to provide more clarity on this requirement	No change

219	110		13. Bidder should assess the compliance level of SaaS based application vis-à-vis guidelines stipulated by Bank / regulatory / statutory body, through a CERT-IN certified auditors and submit assessment report/ audit certificate to Bank on quarterly basis or as per Bank's requirements	Oracle provides the third-party SOC reports on an annual basis which satisfies the need of our other public sector / Banking customers. Requesting BoB to rmeove this clause	No change
220	110		11. Bidder, its solution and Bidder's CSP must comply with bank's policies on cloud adoption, cyber security, information technology, information security, etc., • RBI guidelines on Outsourcing of IT Services, Data Storage and handling, Information Technology Governance, Risk, Controls and Assurance Practices, etc. • India's IT act and amendments, Security and Data Protection regulations such as proposed Digital Personal Data Protection Bill, any India's statutory and regulatory requirements. • Any other IT security/data protection & privacy policies, guidelines, regulations etc issued by Bank, Regulators, Government of India from time to time during the contract period	This will need more detailed discussion on understanding Bank's cloud adoption policies	No change
221	110		13. Bidder should assess the compliance level of SaaS based application vis-à-vis guidelines stipulated by Bank / regulatory / statutory body, through a CERT-IN certified auditors and submit assessment report/ audit certificate to Bank on quarterly basis or as per Bank's requirements.	Our Organisation provides the third-party SOC reports on an annual basis which satisfies the need of our other public sector / Banking customers. Requesting BoB to rmeove this clause	No change

222	110		16. As and when Bank requests, bidders should provide the following certificates/proof from third party vendor/ bidder / CSP providers for their systems: • Regular VAPT, API Assessment, customized Source Code (related to Bank) audit certified by a CERT-IN empanelled auditor. • A Secure Software Development Lifecycle (Secure SDLC) must be followed by the bidder for all applications throughout their lifecycle, with a security assurance certificate provided accordingly. • All security controls of the CSP should be monitored/ audited by bidder/OEM and report of the same to be shared with the bank. • Regular Hardening of System preferably CIS Benchmark, System & Application Patching to latest release patches and security updates. • Adhering to NIST (especially 800-53) and CSF (Cyber Security Framework) standard best practices. • Monitoring CERT-IN released advisories and fixing applicable vulnerabilities.	Our Organisation continuously monitors relevant security advisories and manages vulnerabilities in accordance with its global security and patch management processes. However, Oracle does not commit to tracking or remediating advisories issued by any specific external agency on a one-to-one basis; remediation is addressed based on risk assessment, applicability to the service, and Oracle's standard update cycle. Requesting BoB to remove this clause	No change
223	111		21. The bidder must have a documented patch management practice in place, ensuring that security patches and upgrades are applied promptly to the product and cloud infrastructure. The bidder must provide a certificate of assurance to the Bank every quarter, confirming that the latest patches have been applied and the infrastructure is secure.	Requesting BoB to remove this clause	No change

224	111		18. ISO 27001, ISO 22301 certification • ISO 27017 (Cloud Security Management Certified) • ISO/IEC 27018 (Personal Data in Cloud Certified) or similar certification • ISO/IEC 27701 PIM (Privacy Information Management) certified or similar certification • ISMS (Information Security Management System) • ISAE (International Standard on Assurance Engagements) 3402. • Meet the Cloud Security Alliance Cloud Controls Matrix and compliance with CSA Star CCM • RBI and Government of India guidelines and mandates on Cloud Computing GDPR compliance • CERT-In guidelines as and when they are released and become applicable	Our Organisation SaaS is aligned with CSA Star, ISO 27001, 27017, 27108, 27701, ISMS (ISO 27001 implemented on ISO 27002). Further, Oracle CRM and Service aligns with ISAE 3401 for SOC 1. - RBI & Government of India Guidelines: The Master Direction on IT Outsourcing has been withdrawn, hence no more applicable https://website.rbi.org.in/web/rbi/-/notifications/master-direction-on-outsourcing-of-information-technology-services-12486 - CERT-In Guidelines as and when they are released and become applicable: Oracle SaaS follows the Oracle corporate security practices Requesting BoB to remove these two above clauses	No change
225	112		24. The Bidder or Bidder's CSP must ensure the presence of Runtime Application Self-Protection (RASP) or an equivalent control, along with strong data security practices.	Could you elaborate on this and specifically mention which runtime application self-protection is being referred here?	No change
226	112		27. The CASB (Cloud Access Security Broker) security controls need to be enforced from cloud standpoint. In case the solution is not covered by CASB, the CSP should offer CWP (Cloud Workload Protection) compatibility and offer points engineering solution. Appropriate security controls/components from the cloud orchestration layer has to be made available by default as per Bank policy/Regulatory Guidelines at no additional cost to the Bank. Bidder to submit Security Architecture diagram to Bank as part of technical bid detailing all the security components.	Our Organisation SaaS is secured using a defense-in-depth architecture with multiple layered controls. While a CASB is not used within the managed SaaS environment, native security controls such as perimeter security, network monitoring, and vulnerability scanning provide equivalent protection. These controls collectively enable continuous threat detection and risk mitigation in line with industry-recognized cloud security practices. Requesting BoB to remove this clause	No change

227	112		29. Bidder to regularly conduct and provide results of fault tolerance testing, scalability testing and load balancing testing, every quarter or as per Bank's requirements, validating that the solution is: - o able to recover seamlessly from failures - o able to scale horizontally (adding resources) and vertically (enhancing existing resources) to handle peak load scenarios without performance degradation. - o able to provide consistent performance even under high usage scenarios, such as during peak load	As a CSP-managed SaaS service, fault tolerance, scalability, and load-balancing testing are performed as part of Our Organisation standard platform operations, not on a customer-specific or quarterly basis. These capabilities are contractually assured through defined SLAs such as uptime, RPO, and RTO commitments. Requesting BoB to remove this clause	No change
228	113		30. Bidder to provide dedicated Leased line from two different service providers from CSP DC and DR sites to Bank DC and DR sites. Bidder to provide link up to Bank's DC and DR router including CPE (Customer Premises Equipment), cross connect, SFP and cable laydown. 31. The link should be of minimum 500Mbps capacity. The successful bidder has to maintain link uptime in line with application uptime of 99.90%. 32. At any point in time, during the contract period, utilization of link should not cross 70%. In case link is utilized more than 70%, bidder to upgrade the link and associated hardware at no additional cost to the Bank.	Customer's connectivity to SaaS services, are over the internet on TLS 1.3 encrypted network. As the Bank is looking for a dedicated private connectivity, the Bank can opt for Oracle FastConnect SKU which facilitates private connectivity between our DC and customer's DC/corporate offices.	Repeated
229	114			Use of dedicated DLP tool, File Integrity monitoring, API Gateway are not used for	No change
230	115		b. Bidder to Implement automated monitoring tools and systems to track the platform's health, uptime, and response times. Bank's Team also to be given login for dashboard access for checking of the audit logs and security events if required	This is not a relevant ask for a SaaS service where CSP is managing the infra. Requesting BoB to remove this clause	No change

231	116	51. Contracts and Continuity	a. Bidder to support in deporting/export of data from cloud to on-premises or cloud to cloud migration on termination of contract at no additional cost to the bank. Bidder to handover entire Bank's CRM data along with data dictionary as per Bank's requirements, at the time of deporting data from cloud. c. The CSP should provide access to their IT infrastructure as and when required for audit from security perspective which may also include visits at short notice to ensure Bank's data are not misused and to review IT controls of Cloud Service Provider.	Our Organisation DPA(Data Processing Agreement) grants audit rights to the customer and/or their auditors, subject to prior formal notice. Audits cannot be conducted at any time, as they require advance planning, coordination, and internal management by Our Organisation. Requesting BoB, to remove this clause as this needs formal prior notice	No change
232	176	Penalty due to application downtime		We offer: • 10%: < 99.9% but > 99.5% • 15%: <= 99.5% but > 99.0% • 25%: <= 99.0% but > 95.0% • 100%: <= 95.0% in the applicable calendar month Requesting BoB to remove the clause	No change
233	187		We hereby agree to comply with the Information and cyber security controls as per Bank's and Regulatory Authorities IT Security Guidelines on an ongoing basis and regulatory / legal guidelines and directives related to SP / outsourcing issued by regulators / legal entities from time to time. The SP shall provide access to the regulators, legal authorities, Bank and Bank appointed auditors for on-site/off-site supervision.	We maintains a comprehensive, regulator-aligned information and cyber security framework that is continuously updated to address evolving regulatory and legal requirements. Our SaaS services operate under mature internal security controls, governed by global policies, secure-by-design architecture, and continuous monitoring. Our organization is independently audited and holds internationally recognized certifications (such as ISO/IEC 27001, SOC 1/2, and related standards), demonstrating ongoing compliance. These controls collectively ensure sustained alignment Requesting BoB to remove this clause	No change

234	189	2. IT Risk Management	2.3 The SP shall be subjected to the annual IT audit / Technology risk assessment process by an independent professional agency as approved by	Requesting bank for further clarity and relaxation on the clause	No change
235	195	Annexure 21 – SERVICE LEVEL AND NON-DISCLOSURE AGREEMENT FORMAT	The solutions shall be designed in such a way that they cover all the divisions of the Bank's Data Centre i.e., Domestic, Foreign territories and its RRBs, associates, subsidiaries, having separate networks & all separate network segments of each. Bank at its discretion, may use and/or procure (any/all) solution / hardware and its licenses as per the same quoted rates for its RRBs, associates, subsidiaries upon arising the requirements for them	Customer's connectivity to SaaS services, are over the internet on TLS 1.3 encrypted network. Customer connects to the SaaS over this secure network. Requesting BoB to remove this clause	No change
236	211	29. INFORMATION OWNERSHIP	All information processed, stored, or transmitted by Service provider equipment belongs to the Bank. By having the responsibility to maintain the equipment, the Service provider does not acquire implicit access rights to the information or rights to redistribute the information. The Service provider understands that civil, criminal, or administrative	This is a very broad statement and is prone to interpretation. Requesting BoB to remove this clause	No change
237	213	35. Incident Response and Management	any cybersecurity incident. They must have written incident response procedures including the roles of staff/outsourced staff handling such incidents; Response strategies shall consider readiness to meet various incident scenarios based on situational awareness and potential/post impact, consistent communication and coordination with stakeholders, including specifically the bank, during response. Service provider shall report all cyber incidents to the Bank immediately upon detection (if applicable).	Our Organisation follows a structured incident response process that ensures timely containment, impact assessment, and verified information collection before external communication. Accordingly, We contractually commits to a 24-hour notification timeline for confirmed security breaches, which aligns with industry best practices and enables clear, accurate, and actionable disclosure.	No change

238	213	36. IT Risk Management	The Service Provider shall assist the Bank in adhering to compliance guidelines of the regulatory authorities and facilitate Bank from time to time. The Service Provider shall conform to the security practices and procedures laid down in the Information Technology Act 2000 as amended by the information Technology (Amendment) Act 2008 (IT Act and IT Amendment Act) and the information Technology (Reasonable Security Practices and	Requesting bank for further clarity and relaxation on the clause	No change
239	220	Annexure 20 – Software Bill of Materials (SBOM)	All the software supplied to the Bank or developed for the Bank must be accompanied by a complete SBOM. The SBOM of the software supplied to the Bank or developed for the Bank must include the data fields mentioned below. In addition, the Software OEM/Owner/Vendor must ensure that:	This is not a relevant ask for a SaaS service managed by Our Organisation. Requesting BoB to remove this clause	No change
240	Page 64	Eligibility Criteria	Bidder should have implemented at least 3 modules out of 6 proposed modules* in one or more Scheduled Commercial Bank in India, having minimum 1,500 branches as on date of RFP, with minimum of 5,000 licensed users on CRM Platform.	Request bank to change this clause to: Bidder/OEM should have implemented at least 3 modules out of 6 proposed modules* in one or more Scheduled Commercial Bank in India, having minimum 500 branches as on date of RFP, with minimum of 2,500 licensed users on	As per RFP and addendum
241	Page 13 /	1.11 Ownership, Grant and Delivery	1.11 Ownership, Grant and Delivery The bidder shall procure and provide a non-exclusive, non-transferable, perpetual licenses to the Bank for the solution to be provided as a part of this project. The Licenses for the solution should not be restricted to use case. The Bank can use the solution at any of its overseas branches / offices and locations and present & future RRBs without restriction and use of software by service providers on behalf of the Bank would be considered as use thereof	Request bank to share further clarity on the license modality.	As per RFP and addendum

242	Page 18	Scoring Criteria :	Scoring Criteria : The Bidder should have experience of implementing CRM Modules for which scoring will be done as given below Implementation of bidder all 6 module* of proposed CRM solution by themselves in -3- Scheduled	Total Marks mentioned is 25 points whereas the highest mark attainable is 15. Request to clarify.	As per RFP and addendum
243	8 of 222	1.3 - Project Scope	Section says : Considering the enormity of the assignment, any service which forms a part of the Project Scope that is not explicitly mentioned in scope of work as excluded would form part of this RFP, and the Bidder is expected to provide the same at no additional cost to the Bank. The Bidder needs to consider and envisage all the services that would be required in the Scope and ensure the same is delivered to the Bank. The Bank will not accept any plea of the Bidder at a later date for omission of services on the pretext that the same was not explicitly mentioned in the RFP	While the Bidder understands the intent of the clause to ensure completeness of delivery, it is practically difficult to take responsibility for services that are not documented or reasonably inferable from the stated scope. Request the Bank to confirm that the Bidder's responsibility shall be limited to services explicitly mentioned in the RFP or those reasonably required to fulfil the documented scope, and that any materially new requirements will be addressed via a formal change request.	As per RFP and addendum
244	9 of 222	1.5	RFP says : Bank is already using inhouse apps for DSA, RMs and also having 3rd party integration with different modules. The same need to be migrated within above mentioned timelines. The solution as per the required scope needs to be rolled out as per the delivery timelines mentioned above.	Want to know if the Bank intends to keep the inhouse Apps for DSA / RM or the Bank is open to look at Apps that comes OOTB (Out of the Box) with the CRM product	The proposed solution capable to integrate with Bank's inhouse mobile apps.
245	88 of 222	Annexure 12/ Scope	Section 3 says: PCB / Modular design.	Can you please elaborate on the statement of "Reuseable modules that can be composed and recomposed"	As per the RFP scope.

246	88 of 222	Annexure 12/ S	Section 4 says : Support multimodal/structured and unstructured data references (notes, attachments, call/chat transcripts) with retention and privacy controls.	Need more clarity on this	The clause itself is self explanatory
247	88 of 222	Annexure 12/ S	RFP says " CRM must be able to leverage the Bank's Agentic AI framework and guardrails for use cases such as agent assist, auto-summarization, next-best-action, intelligent routing and guided service-to-sales prompts." .	Need more clarity on this. The proposed CRM already comes with a Agentic AI framework . So will the Bank be fine with leveraging the OOTB Agentic AI framework ?	As per RFP and addendum
248	88 of 222	Annexure 12/ S	Point 2 mentions Phased Migration / coexistence of Siebel.	Has there been any decision or whether Bank will continue with Siebel and Siebel will co-exist in the TO BE Architecture OR the Bank wants to Sunset Siebel application	Its bank discretion
249	88 of 222	Annexure 12/ S	Point 4 about Data, Knowledge and Analytics : The section speaks of Knowledge management capability for agents and branch staff (knowledge capture, curation, contextual surfacing, and governance) to support consistent resolutions and faster FCR.	Want to know if the Bank has a repository of KM articles and whether the scope includes migrating the entire repository to the new CRM	As per RFP and addendum
250	90 of 222	Annexure 12/ S	RFP speaks of : AI/Agentic readiness using Bank framework: CRM must enable Bank-owned agentic AI to assist users (summaries, recommendations, drafting, next-best-action) and optionally execute actions with human-in-loop approvals, full audit trail and telemetry.	Can you elaborate on the Bank's own Agentic AI framework ? Also is the Bank open to look at the Agentic AI framework that the CRM will provide OOTB ?	As per RFP and addendum

251		Count of Users		Can you please share some high-level details on the following: 1) Approximate number of Sales users, Collection users and others who will use the CRM application for Lead and Opportunity Management, Collection management and so on. 2) Approximate number of users from the Service, Contact Center, and Grievance teams who will use the proposed CRM for service-related functionalities. Also a high level count of SR's/Incidents that are created on a monthly basis across all channels 3) Approximate total number of bank customers (this will help in estimating marketing communication volumes). 4) Number of Partners and Channel users who are not bank employees but work on behalf of the bank (excluding DSAs of BOB). 5) Approximate number of campaigns executed per month and the estimated volume of communications	Please refer RFP for volumetrics
252	Page 14	1.11 Ownership, Grant and	(i) to copy the Software that operates on server systems to support the users of the Bank	Could you elaborate on which software to be copied in the context of a SaaS service deployed on Oracle's public cloud OCI?	As per RFP and addendum
253	Page 14	1.11 Ownership, Grant and Delivery	C. To work as interface: (i) to work with other Application Software packages at the Bank as interface; (ii) to allow other application software packages at the Bank to work as interfaces to the Software. If such interfacing requires any modification or change to the Platform, such modification or change has to be carried out by the Bidder free of any additional License charge or fees or expenses	For a SaaS service with built-in modules and existing APIs, if additional interfaces are required for system integration, the core SaaS will not be modified. Instead, any required changes or new APIs would be handled by the customer's System Integrator or Partner. Is this assumption correct?	As per RFP and addendum

254	Page 14	1.11 Ownership, Grant and Delivery	D. The grant of license by the Bidder herein shall be for processing the internal business of the Bank or its permitted affiliates and does not, without limitation, include the rights to reverse engineer, reverse compile or otherwise arrive at the source code of the Software nor does it include the rights to sell, lease, license, sublicense or otherwise	Could you clarify if this is applicable for a SaaS where the underlying source code is Oracle's intellectual property?	As per RFP and addendum
255	Page 15	1.12 Escrow Mechanism	The Bank and the successful bidder shall agree to appoint an escrow agent to provide escrow mechanism for the deposit of the source code for the software product supplied / procured by the Bidder to the Bank in order to protect its interests in	Is this relevant for a SaaS service, where the source code is the intellectual property of the SaaS provider?	As per the RFP and addendum
256	Page 133	1.13 Audit	32. At any point in time, during the contract period, utilization of link should not cross 70%. In case link is utilized more than 70%, bidder to upgrade the link and associated hardware at no additional cost to the	N/A for SaaS - Could you confirm!	As per RFP and addendum
257	Page 133	K. Cloud Infrastructure	33. The CRM should support WAN optimization techniques to improve the performance of the application over wide-area networks, particularly for remote branches and users with limited bandwidth. The CRM should seamlessly integrate with Software-Defined WAN (SD-WAN) solution of the Bank for optimized and secure connectivity 34. between bank branches and application,	N/A for SaaS - Could you confirm!	As per RFP and addendum
258	Page 112		24. The Bidder or Bidder's CSP must ensure the presence of Runtime Application Self-Protection (RASP) or an equivalent control, along with strong data security practices.	could you elaborate on the specific RASP capabilities?	As per RFP and addendum
259	9	1.5 Disaster Recovery Mechanism	The bidder needs to submit the technical architecture relating to data replication between primary and secondary site	Requesting BoB, to remove this clause as this is not relevant for a SaaS service	The bidder should submit the technical architecture.
260	14	1.11 Ownership, Grant and	(i) to copy the Software that operates on server systems to support the users of the Bank	Requesting BoB, to remove this clause as this is not relevant for a SaaS service	As per the RFP and addendum

261	14	Delivery	C. To work as interface: (i) to work with other Application Software packages at the Bank as interface; (ii) to allow other application software packages at the Bank to work as interfaces to the Software. If such interfacing requires any modification or change to the Platform, such modification or change has to be carried out by the Bidder free of any additional License charge or fees or expenses	Requesting BoB, to remove this clause as this is not relevant for a SaaS service, and this may be discussed with your Partner. But OEM is not liable to change the core product	As per the RFP and addendum
262	15	1.12 Escrow Mechanism	The Bank and the successful bidder shall agree to appoint an escrow agent to provide escrow mechanism for the deposit of the source code for the software product supplied / procured by the Bidder to the Bank in order to protect its interests in	Requesting BoB, to remove this clause as this is not relevant for a SaaS service	As per the RFP and addendum
263	16	1.13 Audit	All Bidder records with respect to any matters covered in this RFP shall be made available to auditors and or inspecting officials of the Bank and/or Reserve Bank of India and/or any regulatory authority, at any time during normal business hours, as often as the Bank deems necessary, to audit, examine, and make excerpts or transcripts of all relevant data. Said records are subject to	Our Organization DPA(Data Processing Agreement) grants audit rights to the customer and/or their auditors, subject to prior formal notice. Audits cannot be conducted at any time, as they require advance planning, coordination, and internal management by Our Organization. Requesting BoB, to remove this clause as this	As per the RFP and addendum
264	18	2. Evaluation process	Compliance with regulatory and Gov. regulation & Master direction , Data Privacy (DPDP) & Security	Master direction: It has been withdrawn and no longer relevant https://website.rbi.org.in/web/rbi/-/notifications/master-direction-on-outsourcing-of-information-technology-	As per the RFP and addendum
265	25	3.1 General Terms and conditions	i) Standards: All standards to be followed will adhere to Bureau of Indian Standards (BIS) specifications or other acceptable standards (IS 17802:2021)	Our Organization SaaS aligns with multiple global standards such as NIST, ISO, and SOC standards. Hence, requesting BoB to remove	As per the RFP and addendum

266	54		The Service provider shall ensure that it is complying with all the directions and clauses as stated in the said circulars: a) RBI/2023-24/102 DoS.CO.CSITEG/SEC.1/31.01.015/2023-24 dated 10.04.2023 regarding Master Direction on Outsourcing of Information Technology Services b) RBI/2023-24/107	Note: The Master Direction on IT Outsourcing has been withdrawn, hence no more applicable https://website.rbi.org.in/web/rbi/-/notifications/master-direction-on-outsourcing-of-information-technology-	As per the RFP and addendum
267	59	Annexure 01 – Guidelines for submission details and E-tendering	Letter of Undertaking from Bidder and OEM/ OSD on Compliance to RBI Master Direction on Outsourcing of IT Services RBI/2022-23/xx DoS.CO.CSITEG/SEC.xx/31.01.015/2022-23 Dated 23rd June 2022	N/A - The Master Direction on IT Outsourcing has been withdrawn, hence no longer applicable https://website.rbi.org.in/web/rbi/-/notifications/master-direction-on-outsourcing-of-information-technology-services-12486 Requesting BoB to remove this clause	As per the RFP and addendum
268	62	Annexure 02 – Evaluation Terms	The solution should have been hosted in a public cloud with a single-tenancy architecture for scheduled commercial banks in India for a minimum of three years	Our Organisation SaaS services run on (OCI), which, like other public cloud platforms, operates in a multi-tenant model. However, Our Organisation SaaS uses customer-specific pods, application instances, databases, encryption keys etc. to logically separate each customer's data and workloads. This approach ensures strong isolation and security while following standard cloud best practices. Hence requesting BoB to remove this single tenancy clause	As per the RFP and addendum
269	89	Annexure 12 – Project Scope	According to Digital Personal Data Protection (DPDP) Rules, 2025, Establish a comprehensive framework for processing digital personal data, empowering users with rights over their data and requiring strict compliance from fiduciaries regarding consent, data breaches, and child data protection	Requesting bank for further clarity and relaxation on the clause	As per RFP and addendum

270	105	Technical Requirements: Infrastructure, Cloud and other CSP Requirements	1. The proposed CRM Solution shall be configured, deployed On-Cloud under SaaS based model, and managed to meet security, privacy, legal, ethical and compliance requirements of the Bank.	Will need clarity on the Compliance requirements of the Bank	As per RFP and addendum
271	108		22. Bidder /CSP (Cloud Service Provider) should ensure that any data that is stored on the cloud is protected and appropriate policies and controls are put in place to provide data privacy and protection. The CSP should adhere to all laws pertaining to data privacy and protection that are applicable as per Gol, RBI and any other regulators. The CSP should also ensure that necessary enhancements are made to the services provided whenever there are	Requesting bank for further clarity and relaxation on the clause	As per RFP and addendum
272	108		15. As per the Digital Personal Data Protection (DPDP) Rules , 2025, notified by India's Ministry of Electronics and Information Technology (MeitY), establish a comprehensive framework for processing digital personal data, empowering users with rights over their data and requiring strict compliance from	Requesting bank for further clarity and relaxation on the clause	As per RFP and addendum
273	109		3. The platform should use Micro-services based architecture using kubernetes or equivalent orchestration for scalability. The solution must utilize Docker or equivalent technology to package microservices, ensuring the solution can be consistently deployed across various environments (development, testing, production). The bidder must provide detailed architecture diagrams of the proposed solution, showing how all components of	This is not relevant for a Service offered under a subscription based SaaS model with SLAs and managed by the CSP. Requesting BoB to remove this clause	As per RFP and addendum
274	109		7. The response time at server end should be always be less than 200 milli second . During the agreement period, if at any stage, it is found that the Platform provided by the Bidder is not able to give the requisite performance as per the sizing parameters (i.e., up time above 99.90% and response time < 1 seconds), the Bidder shall have to provide additional	Request the bank to provide more clarity on this requirement	As per RFP and addendum

275	110		13. Bidder should assess the compliance level of SaaS based application vis-à-vis guidelines stipulated by Bank / regulatory / statutory body, through a CERT-IN certified auditors and submit assessment report/ audit certificate to Bank on quarterly basis or as per Bank's requirements	Oracle provides the third-party SOC reports on an annual basis which satisfies the need of our other public sector / Banking customers. Requesting BoB to rmeove this clause	As per RFP and addendum
276	110		11. Bidder, its solution and Bidder's CSP must comply with bank's policies on cloud adoption, cyber security, information technology, information security, etc., • RBI guidelines on Outsourcing of IT Services, Data Storage and handling, Information Technology Governance, Risk, Controls and Assurance Practices, etc. • India's IT act and amendments, Security and Data Protection regulations such as proposed Digital Personal Data Protection Bill, any India's statutory and regulatory requirements. • Any other IT security/data protection & privacy policies, guidelines, regulations etc issued by Bank, Regulators, Government of India from time to time during the contract period	This will need more detailed discussion on understanding Bank's cloud adoption policies	As per RFP and addendum
277	110		13. Bidder should assess the compliance level of SaaS based application vis-à-vis guidelines stipulated by Bank / regulatory / statutory body, through a CERT-IN certified auditors and submit assessment report/ audit certificate to Bank on quarterly basis or as per Bank's requirements.	Our Organisation provides the third-party SOC reports on an annual basis which satisfies the need of our other public sector / Banking customers. Requesting BoB to rmeove this clause	As per RFP and addendum

278	110		16. As and when Bank requests, bidders should provide the following certificates/proof from third party vendor/ bidder / CSP providers for their systems: • Regular VAPT, API Assessment, customized Source Code (related to Bank) audit certified by a CERT-IN empanelled auditor. • A Secure Software Development Lifecycle (Secure SDLC) must be followed by the bidder for all applications throughout their lifecycle, with a security assurance certificate provided accordingly. • All security controls of the CSP should be monitored/ audited by bidder/OEM and report of the same to be shared with the bank. • Regular Hardening of System preferably CIS Benchmark, System & Application Patching to latest release patches and security updates. • Adhering to NIST (especially 800-53) and CSF (Cyber Security Framework) standard best practices. • Monitoring CERT-IN released advisories and fixing applicable vulnerabilities.	Our Organisation continuously monitors relevant security advisories and manages vulnerabilities in accordance with its global security and patch management processes. However, Oracle does not commit to tracking or remediating advisories issued by any specific external agency on a one-to-one basis; remediation is addressed based on risk assessment, applicability to the service, and Oracle's standard update cycle. Requesting BoB to remove this clause	As per RFP and addendum
279	111		21. The bidder must have a documented patch management practice in place, ensuring that security patches and upgrades are applied promptly to the product and cloud infrastructure. The bidder must provide a certificate of assurance to the Bank every quarter, confirming that the latest patches have been applied and the infrastructure is secure.	Requesting BoB to remove this clause	As per RFP and addendum

280	111		18. ISO 27001, ISO 22301 certification • ISO 27017 (Cloud Security Management Certified) • ISO/IEC 27018 (Personal Data in Cloud Certified) or similar certification • ISO/IEC 27701 PIM (Privacy Information Management) certified or similar certification • ISMS (Information Security Management System) • ISAE (International Standard on Assurance Engagements) 3402. • Meet the Cloud Security Alliance Cloud Controls Matrix and compliance with CSA Star CCM • RBI and Government of India guidelines and mandates on Cloud Computing GDPR compliance • CERT-In guidelines as and when they are released and become applicable	Our Organisation SaaS is aligned with CSA Star, ISO 27001, 27017, 27108, 27701, ISMS (ISO 27001 implemented on ISO 27002). Further, Oracle CRM and Service aligns with ISAE 3401 for SOC 1. - RBI & Government of India Guidelines: The Master Direction on IT Outsourcing has been withdrawn, hence no more applicable https://website.rbi.org.in/web/rbi/-/notifications/master-direction-on-outsourcing-of-information-technology-services-12486 - CERT-In Guidelines as and when they are released and become applicable: Oracle SaaS follows the Oracle corporate security practices Requesting BoB to remove these two above clauses	As per RFP and addendum
281	112		24. The Bidder or Bidder's CSP must ensure the presence of Runtime Application Self-Protection (RASP) or an equivalent control, along with strong data security practices.	Could you elaborate on this and specifically mention which runtime application self-protection is being referred here?	As per RFP and addendum
282	112		27. The CASB (Cloud Access Security Broker) security controls need to be enforced from cloud standpoint. In case the solution is not covered by CASB, the CSP should offer CWP (Cloud Workload Protection) compatibility and offer points engineering solution. Appropriate security controls/components from the cloud orchestration layer has to be made available by default as per Bank policy/Regulatory Guidelines at no additional cost to the Bank. Bidder to submit Security Architecture diagram to Bank as part of technical bid detailing all the security components.	Our Organisation SaaS is secured using a defense-in-depth architecture with multiple layered controls. While a CASB is not used within the managed SaaS environment, native security controls such as perimeter security, network monitoring, and vulnerability scanning provide equivalent protection. These controls collectively enable continuous threat detection and risk mitigation in line with industry-recognized cloud security practices. Requesting BoB to remove this clause	As per RFP and addendum

283	112		29. Bidder to regularly conduct and provide results of fault tolerance testing, scalability testing and load balancing testing, every quarter or as per Bank's requirements, validating that the solution is: - o able to recover seamlessly from failures - o able to scale horizontally (adding resources) and vertically (enhancing existing resources) to handle peak load scenarios without performance degradation. - o able to provide consistent performance even under high usage scenarios, such as during peak load	As a CSP-managed SaaS service, fault tolerance, scalability, and load-balancing testing are performed as part of Our Organisation standard platform operations, not on a customer-specific or quarterly basis. These capabilities are contractually assured through defined SLAs such as uptime, RPO, and RTO commitments. Requesting BoB to remove this clause	As per RFP and addendum
284	113		30. Bidder to provide dedicated Leased line from two different service providers from CSP DC and DR sites to Bank DC and DR sites. Bidder to provide link up to Bank's DC and DR router including CPE (Customer Premises Equipment), cross connect, SFP and cable laydown. 31. The link should be of minimum 500Mbps capacity. The successful bidder has to maintain link uptime in line with application uptime of 99.90%. 32. At any point in time, during the contract period, utilization of link should not cross 70%. In case link is utilized more than 70%, bidder to upgrade the link and associated hardware at no additional cost to the Bank.	Customer's connectivity to SaaS services, are over the internet on TLS 1.3 encrypted network. As the Bank is looking for a dedicated private connectivity, the Bank can opt for Oracle FastConnect SKU which facilitates private connectivity between our DC and customer's DC/corporate offices.	As per RFP and addendum
285	115		b. Bidder to Implement automated monitoring tools and systems to track the platform's health, uptime, and response times. Bank's Team also to be given login for dashboard access for checking of the audit logs and security events if required	This is not a relevant ask for a SaaS service where CSP is managing the infra. Requesting BoB to remove this clause	As per RFP and addendum

286	116	51. Contracts and Continuity	a. Bidder to support in deporting/export of data from cloud to on-premises or cloud to cloud migration on termination of contract at no additional cost to the bank. Bidder to handover entire Bank's CRM data along with data dictionary as per Bank's requirements, at the time of deporting data from cloud. c. The CSP should provide access to their IT infrastructure as and when required for audit from security perspective which may also include visits at short notice to ensure Bank's data are not misused and to review IT controls of Cloud Service Provider.	Our Organisation DPA(Data Processing Agreement) grants audit rights to the customer and/or their auditors, subject to prior formal notice. Audits cannot be conducted at any time, as they require advance planning, coordination, and internal management by Our Organisation. Requesting BoB, to remove this clause as this needs formal prior notice	As per RFP and addendum
287	176	Penalty due to application downtime		We offer: • 10%: < 99.9% but > 99.5% • 15%: <= 99.5% but > 99.0% • 25%: <= 99.0% but > 95.0% • 100%: <= 95.0% in the applicable calendar month Requesting BoB to remove the clause	As per the RFP and addendum
288	187		We hereby agree to comply with the Information and cyber security controls as per Bank's and Regulatory Authorities IT Security Guidelines on an ongoing basis and regulatory / legal guidelines and directives related to SP / outsourcing issued by regulators / legal entities from time to time. The SP shall provide access to the regulators, legal authorities, Bank and Bank appointed auditors for on-site/off-site supervision.	We maintains a comprehensive, regulator-aligned information and cyber security framework that is continuously updated to address evolving regulatory and legal requirements. Our SaaS services operate under mature internal security controls, governed by global policies, secure-by-design architecture, and continuous monitoring. Our organization is independently audited and holds internationally recognized certifications (such as ISO/IEC 27001, SOC 1/2, and related standards), demonstrating ongoing compliance. These controls collectively ensure sustained alignment Requesting BoB to remove this clause	As per the RFP and addendum

289	189	2. IT Risk Management	2.3 The SP shall be subjected to the annual IT audit / Technology risk assessment process by an independent professional agency as approved by	Requesting bank for further clarity and relaxation on the clause	As per the RFP and addendum
290	195	Annexure 21 – SERVICE LEVEL AND NON-DISCLOSURE AGREEMENT FORMAT	The solutions shall be designed in such a way that they cover all the divisions of the Bank's Data Centre i.e., Domestic, Foreign territories and its RRBs, associates, subsidiaries, having separate networks & all separate network segments of each. Bank at its discretion, may use and/or procure (any/all) solution / hardware and its licenses as per the same quoted rates for its RRBs, associates, subsidiaries upon arising the requirements for them	Customer's connectivity to SaaS services, are over the internet on TLS 1.3 encrypted network. Customer connects to the SaaS over this secure network. Requesting BoB to remove this clause	As per the RFP and addendum
291	211	29. INFORMATION OWNERSHIP	All information processed, stored, or transmitted by Service provider equipment belongs to the Bank. By having the responsibility to maintain the equipment, the Service provider does not acquire implicit access rights to the information or rights to redistribute the information. The Service provider understands that civil, criminal, or administrative	This is a very broad statement and is prone to interpretation. Requesting BoB to remove this clause	As per the RFP and addendum
292	213	35. Incident Response and Management	any cybersecurity incident. They must have written incident response procedures including the roles of staff/outsourced staff handling such incidents; Response strategies shall consider readiness to meet various incident scenarios based on situational awareness and potential/post impact, consistent communication and coordination with stakeholders, including specifically the bank, during response. Service provider shall report all cyber incidents to the Bank immediately upon detection (if applicable).	Our Organisation follows a structured incident response process that ensures timely containment, impact assessment, and verified information collection before external communication. Accordingly, We contractually commits to a 24-hour notification timeline for confirmed security breaches, which aligns with industry best practices and enables clear, accurate, and actionable disclosure.	As per the RFP and addendum

293	213	36. IT Risk Management	The Service Provider shall assist the Bank in adhering to compliance guidelines of the regulatory authorities and facilitate Bank from time to time. The Service Provider shall conform to the security practices and procedures laid down in the Information Technology Act 2000 as amended by the information Technology (Amendment) Act 2008 (IT Act and IT Amendment Act) and the information Technology (Reasonable Security Practices and	Requesting bank for further clarity and relaxation on the clause	As per the RFP and addendum
294	220	Annexure 20 – Software Bill of Materials (SBOM)	All the software supplied to the Bank or developed for the Bank must be accompanied by a complete SBOM. The SBOM of the software supplied to the Bank or developed for the Bank must include the data fields mentioned below. In addition, the Software OEM/Owner/Vendor must ensure that:	This is not a relevant ask for a SaaS service managed by Our Organisation. Requesting BoB to remove this clause	As per the RFP and addendum
295	Page 64	Eligibility Criteria	Bidder should have implemented at least 3 modules out of 6 proposed modules* in one or more Scheduled Commercial Bank in India, having minimum 1,500 branches as on date of RFP, with minimum of 5,000 licensed users on CRM Platform.	Request bank to change this clause to: Bidder/OEM should have implemented at least 3 modules out of 6 proposed modules* in one or more Scheduled Commercial Bank in India, having minimum 500 branches as on date of RFP, with minimum of 2,500 licensed users on	As per the RFP and addendum
296	Page 13 /	1.11 Ownership, Grant and Delivery	1.11 Ownership, Grant and Delivery The bidder shall procure and provide a non-exclusive, non-transferable, perpetual licenses to the Bank for the solution to be provided as a part of this project. The Licenses for the solution should not be restricted to use case. The Bank can use the solution at any of its overseas branches / offices and locations and present & future RRBs without restriction and use of software by service providers on behalf of the Bank would be considered as use thereof	Request bank to share further clarity on the license modality.	As per the RFP and addendum

297	Page 18	Scoring Criteria :	Scoring Criteria : The Bidder should have experience of implementing CRM Modules for which scoring will be done as given below Implementation of bidder all 6 module* of proposed CRM solution by themselves in -3- Scheduled	Total Marks mentioned is 25 points whereas the highest mark attainable is 15. Request to clarify.	As per the RFP and addendum
298	8 of 222	1.3 - Project Scope	Section says : Considering the enormity of the assignment, any service which forms a part of the Project Scope that is not explicitly mentioned in scope of work as excluded would form part of this RFP, and the Bidder is expected to provide the same at no additional cost to the Bank. The Bidder needs to consider and envisage all the services that would be required in the Scope and ensure the same is delivered to the Bank. The Bank will not accept any plea of the Bidder at a later date for omission of services on the pretext that the same was not explicitly mentioned in the RFP	While the Bidder understands the intent of the clause to ensure completeness of delivery, it is practically difficult to take responsibility for services that are not documented or reasonably inferable from the stated scope. Request the Bank to confirm that the Bidder's responsibility shall be limited to services explicitly mentioned in the RFP or those reasonably required to fulfil the documented scope, and that any materially new requirements will be addressed via a formal change request.	As per the RFP and addendum
299	9 of 222	1.5	RFP says : Bank is already using inhouse apps for DSA, RMs and also having 3rd party integration with different modules. The same need to be migrated within above mentioned timelines. The solution as per the required scope needs to be rolled out as per the delivery timelines mentioned above.	Want to know if the Bank intends to keep the inhouse Apps for DSA / RM or the Bank is open to look at Apps that comes OOTB (Out of the Box) with the CRM product	As per RFP and addendum
300	88 of 222	Annexure 12/ Scope	Section 3 says: PCB / Modular design.	Can you please elaborate on the statement of "Reuseable modules that can be composed and recomposed"	As per the RFP scope.

301	88 of 222	Annexure 12/ S	Section 4 says : Support multimodal/structured and unstructured data references (notes, attachments, call/chat transcripts) with retention and privacy controls.	Need more clarity on this	The clause itself is self explanatory
302	88 of 222	Annexure 12/ S	RFP says " CRM must be able to leverage the Bank's Agentic AI framework and guardrails for use cases such as agent assist, auto-summarization, next-best-action, intelligent routing and guided service-to-sales prompts." .	Need more clarity on this. The proposed CRM already comes with a Agentic AI framework . So will the Bank be fine with leveraging the OOTB Agentic AI framework ?	As per RFP and addendum
303	88 of 222	Annexure 12/ S	Point 2 mentions Phased Migration / coexistence of Siebel.	Has there been any decision or whether Bank will continue with Siebel and Siebel will co-exist in the TO BE Architecture OR the Bank wants to Sunset Siebel application	Its bank discretion
304	88 of 222	Annexure 12/ S	Point 4 about Data, Knowledge and Analytics : The section speaks of Knowledge management capability for agents and branch staff (knowledge capture, curation, contextual surfacing, and governance) to support consistent resolutions and faster FCR.	Want to know if the Bank has a repository of KM articles and whether the scope includes migrating the entire repository to the new CRM	As per RFP and addendum
305	90 of 222	Annexure 12/ S	RFP speaks of : AI/Agentic readiness using Bank framework: CRM must enable Bank-owned agentic AI to assist users (summaries, recommendations, drafting, next-best-action) and optionally execute actions with human-in-loop approvals, full audit trail and telemetry.	Can you elaborate on the Bank's own Agentic AI framework ? Also is the Bank open to look at the Agentic AI framework that the CRM will provide OOTB ?	As per RFP and addendum

306		Count of Users		Can you please share some high-level details on the following: 1) Approximate number of Sales users, Collection users and others who will use the CRM application for Lead and Opportunity Management, Collection management and so on. 2) Approximate number of users from the Service, Contact Center, and Grievance teams who will use the proposed CRM for service-related functionalities. Also a high level count of SR's/Incidents that are created on a monthly basis across all channels 3) Approximate total number of bank customers (this will help in estimating marketing communication volumes). 4) Number of Partners and Channel users who are not bank employees but work on behalf of the bank (excluding DSAs of BOB). 5) Approximate number of campaigns executed per month and the estimated volume of communications	As per RFP and addendum
307	Page 14	1.11 Ownership, Grant and	(i) to copy the Software that operates on server systems to support the users of the Bank	Could you elaborate on which software to be copied in the context of a SaaS service deployed on Oracle's public cloud OCI?	As per RFP and addendum
308	Page 14	1.11 Ownership, Grant and Delivery	C. To work as interface: (i) to work with other Application Software packages at the Bank as interface; (ii) to allow other application software packages at the Bank to work as interfaces to the Software. If such interfacing requires any modification or change to the Platform, such modification or change has to be carried out by the Bidder free of any additional License charge or fees or expenses	For a SaaS service with built-in modules and existing APIs, if additional interfaces are required for system integration, the core SaaS will not be modified. Instead, any required changes or new APIs would be handled by the customer's System Integrator or Partner. Is this assumption correct?	As per RFP and addendum

309	Page 14	1.11 Ownership, Grant and Delivery	D. The grant of license by the Bidder herein shall be for processing the internal business of the Bank or its permitted affiliates and does not, without limitation, include the rights to reverse engineer, reverse compile or otherwise arrive at the source code of the Software nor does it include the rights to sell, lease, license, sublicense or otherwise	Could you clarify if this is applicable for a SaaS where the underlying source code is Oracle's intellectual property?	As per RFP and addendum
310	Page 15	1.12 Escrow Mechanism	The Bank and the successful bidder shall agree to appoint an escrow agent to provide escrow mechanism for the deposit of the source code for the software product supplied / procured by the Bidder to the Bank in order to protect its interests in	Is this relevant for a SaaS service, where the source code is the intellectual property of the SaaS provider?	As per the RFP and addendum
311	Page 133	1.13 Audit	32. At any point in time, during the contract period, utilization of link should not cross 70%. In case link is utilized more than 70%, bidder to upgrade the link and associated hardware at no additional cost to the	N/A for SaaS - Could you confirm!	As per RFP and addendum
312	Page 133	K. Cloud Infrastructure	33. The CRM should support WAN optimization techniques to improve the performance of the application over wide-area networks, particularly for remote branches and users with limited bandwidth. The CRM should seamlessly integrate with Software-Defined WAN (SD-WAN) solution of the Bank for optimized and secure connectivity 34. between bank branches and application,	N/A for SaaS - Could you confirm!	As per RFP and addendum
313	Page 112		24. The Bidder or Bidder's CSP must ensure the presence of Runtime Application Self-Protection (RASP) or an equivalent control, along with strong data security practices.	could you elaborate on the specific RASP capabilities?	As per RFP and addendum
314	64	Point # 4	The solution should have been hosted in a public cloud with a single-tenancy architecture for scheduled commercial banks in India for a minimum of three years	The Point # 5 states the the sould be live for 6 months however this point #4 states the it shold be live for 3 year. Can you please clarify what should be considered '6 months' or ' 3 years'?	As per the RFP and addendum
315	64	Point # 5	The platform should be in use /live as on date of published RFP and should be in operation for minimum of 6 months.	The Point # 4 states the the sould be live for 3 years however this point #5 states the it shold be live for 6 months. Can you please clarify what should be considered '6 months' or ' 3 years'?	As per the RFP and addendum

316	13	1.11	The bidder shall procure and provide a non-exclusive, non-transferable, perpetual licenses to the Bank for the solution to be provided as a part of this project	The requested model is subscription based (SaaS) and licenses are applicable till the agreement period. The paragraph states 'perpetual licenses' which is contrary to the subscription model. Please confirm if subscription based licensing model is okay for the bank.	As per RFP and addendum
317	88	3. Bullet # 4	Integration patterns must support omnichannel continuity (preserve interaction context across voice and digital) and minimize customer effort by orchestrating multiple backend systems until	Please list channels.	Please refer RFP scope.
318	88	5. Bullet # 1	CRM must be able to leverage the Bank's Agentic AI framework and guardrails for use cases such as agent assist, auto-summarization, next-best-action, intelligent routing and guided service-to-sales prompts.	Please provide the information about the Banks' Agentic AI framework. Please name the technology and provider.	As per RFP and addendum
319	91	Bullet # 2	Digital enablement: Support integration with Bank digital channels and portals; support self-service initiation and tracking of service requests and cases, with status updates and	Please list the Digital Channels.	As per RFP and addendum
320	93	Bullet # 11	Online E-OTS module	Please explain, what is E-OTS module, what does it do?	The details will be shared with successful bidder.
321	93	F) Bullet # 1	Inbound and outbound requests-Lead module real time integration with Contact centre like MSME, Retail assets, Retail liabilities etc.	Which contact centre technology is being used?	The details will be shared with successful bidder.
322	94	Bullet # 1	CRM Mobile app inhouse developed module used for Lead management module for the following products like Retail assets, Liabilities, Wealth management, Credit card with features like lead creation, status tracking and Lead dashboard integrated with CRM application. This app is accessed at field level i.e	Are you expecting to replace the Lead Management Mobile App with the new proposed solution?	As per RFP and addendum
323	94	Bullet # 2	RM360 mobile app inhouse developed app for corporates integrated with CRM application.	Are you expecting to replace the RM360 Mobile App with the new proposed	As per RFP and addendum

324	95	A.1.1.1.a)	The CRM should be able to integrate with existing Siebel CRM application /Email/SMS system and convert incoming complaints and grievances on email, SMS& Siebel CRM(complaints portal) into SRs/Complaints in	Please elaborate if Siebel will be replaced with the new CRM or the proposed CRM should co-exist/integrate with Siebel. If co-exist, then what all functionalities will be integrated with Siebel?	It's bank discretion.
325	98	2.2.1.r	Support the usage of social media in launching campaigns with the ability to integrate with the	Please provide the Social Media tool and what all channels included.	As per RFP and addendum
326	103	4.2.6.b)	The registration / account opening form shall be printed out with details & photo of the customer. The customer will only need to sign on the form. Once the form is signed, the signature of the customer will also be captured	Please elaborate, how customer photo and signature will be capture? Will the form be prited first than capture the signature on the paper form or on the digital form/sign.	As per RFP and addendum
327	General		Please share the following volumetic:	1. Total CRM Users: 2. Total Number of Sales Users: 3. Total Number of Service Users: 4. Number of total Marketing users: 5. Number of Total Leads created per month: 6. Number of total Complaints created per month: (Please provide, channel wise split also). 7. Number of total service requests created per month (excluding complaints): 8. Total number of Campaigns per month:	Please refer RFP for volumetrics
328	18	2	The Bidder should have experience of implementing CRM Modules for which scoring will be done as given below	Please consider "Bidder or OEM" instead of only Bidder	As per RFP and addendum
329	18	2	The Bidder should have experience of implementing CRM Modules 3- Scheduled Commercial Banks.	Please conside NBFCs along with Scheduled Commercial Banks. Please reduce the criteria to 500 Branches and 3000 users.	As per RFP and addendum
330	2	Date	Last Date of Submission of RFP Response - 24th Feb 2026	Cosidering the large scope, complexity of the project and need of the list of the compliance documents. Please provide min. 3 weeks of extention to the submission date.	As per RFP and addendum
331	15	1.12	The Bank and the successful bidder shall agree to appoint an escrow agent to provide escrow mechanism for the deposit of the source code for the software product supplied / procured by the Bidder to the Bank in order to	Request you to remove this clause as Cloud based CRM OEM do not provide such option of depositing source code to escrow mechanism for the deposit of the source code for the software product	As per RFP and addendum

332	11	1.9	1) 75% of the licence fee shall be payable upon Go-Live acceptance, evidenced by an Acceptance Form duly signed and stamped by the Bank's authorized Project Manager and the Bidder's authorized representative 2) The remaining 25% of the licence fee shall be payable upon successful adoption of the module, measured against mutually agreed adoption criteria and KPIs, including (where applicable) demonstrable improvement in service TAT and other business KPIs defined for that functional module.	OEM Licenses to be paid upfront for cloud solutions, please consider to pay the License fees yearly upfront. Also, please provide relaxation on the Service delivery and implementation fees.	As per RFP and addendum
333	18	2	Please confirm the scoring criteria - with in the table it says Max 15 marks. Out side the table it says max. 25	Please provide the consistent scoring criteria	As per RFP and addendum
334	9	1.5 Delivery	Time Lines provided : Phase-1 : 6 Months Phase 2: 9 Months	Considering headless solution and its related complexities, can these be updated as below : Phase-1 : 9 Months Phase-2 : 12 Months	No change

335	64	Annexure 02 – Evaluation Terms	Bidder should have implemented at least 3 modules out of 6 proposed modules* in one or more Scheduled Commercial Bank in India, having minimum 1,500 branches as on date of RFP, with minimum of 5,000 licensed users on CRM Platform. e.g. Sales Management Module implemented at “X” Bank, Lead Management Module & Service Management Module implemented at “Y” Bank will be considered as implementation of 3 modules. The platform should be in use /live as on date of published RFP and should be in operation for minimum of 6 months. *Proposed Solution should include following Module 1. Lead Management 2. Campaign Management 3. Sales Management 4. Service Management and customer 360 degree 5. Complaint management 6.Contact centre with IVR integration	Can we request the following change on the criteria? “Bidder or OEM should have implemented at least 3 modules (out of the 6) in at least three distinct customer implementations, with minimum one of those implementations being a scheduled-commercial bank BFSI including Banks, NBFCs, insurance etc. globally in India- (500 branches, ≥ 3000 licensed users, live ≥ 6 months).” e.g. Sales Management Module implemented at “X” Bank, Lead Management Module & Service Management Module implemented at “Y” Bank will be considered as implementation of 3 modules. The platform should be in use /live as on date of published RFP and should be in operation for minimum of 6 months. *Proposed Solution should include following Module 1. Lead Management 2. Campaign Management 3. Sales Management 4. Service Management and customer 360 degree 5. Complaint management 6.Contact centre with IVR integration	As per RFP and addendum
336	89	2 → 9. Technical Re	Integrations must use Bank API Gateway/ESB/event bus; Kafka supported; OAuth2/JWT; optional mTLS.	What are the Bank’s current landscape, standard tools/products for API Gateway, ESB, and event bus/Kafka?	As per RFP and addendum
337	89	Architecture & Int	Bank expects integration inventory with data flows and error-handling design.	Can Bank share the final Phase-1 and Phase-2 integration list (system-wise) and mark each as real-time / batch / event?	Please refer RFP for the integration list. The proposed solution capable to integrate with bank's core and sub domain systems . For the integration, the solution has to publish API's and consume API's as well .
338	89	Technical Requirem	Monitoring required for APIs/events/integrations incl. logs/metrics/tracing and DLQ/replay.	For how long do logs need to be retained, and do logs need to sync with Bank’s SIEM tool?	As per the RFP scope.

339	49	21 – Cyber Security	Ongoing compliance and annual IT audit/tech risk assessment expected.	How often will Bank run VAPT/API security testing, and what support is expected from the vendor each time?	As per the RFP Scope.
340	89	2 → 7. Siebel CRM	Migration requires discovery, dry runs, reconciliation reports, and audit evidence.	What are the approximate data volumes to migrate from Siebel (customers, cases, leads, interactions, attachments)?	Please refer RFP for volumetrics.
341	89	2 → 7. Siebel CRM	Coexistence approach is mentioned “where required.”	Will Siebel and the new CRM run in parallel? If yes, which data needs sync during the overlap?	Its bank discretion
342	93	ure 12 → Service M	Current system has ~25 service requests; new CRM should allow 50 more service requests.	Which service requests are in Phase-1, and for each SR is it view-only or does it need update/writeback/STP?	As per the RFP scope. The details will be shared with successful bidder.
343	90	ical Requirements	Strong RBAC, maker-checker where needed, audit trails, masking for non-production.	What are the key user roles/hierarchy, and which actions must have maker-checker and audit trail?	The details will be shared with successful bidder.
344	9	- Disaster Recovery	DR capability required; replication architecture must be submitted.	What are the target RPO and RTO expected by the Bank?	As per the RFP scope.
345	9	- Disaster Recovery	Replication architecture between sites required.	Does DR replication include CRM database + attachments + knowledge/search indexes, or only database?	As per the RFP scope.
346	10	.7 – Technical Bid	Coverage required for operational resilience, availability, BCP, observability.	What is the Bank’s expected BCP/DR testing frequency and evidence?	As per the RFP scope.
347	89	2 → 9. Technical Re	OAuth2/JWT and optional mTLS are mentioned for integrations.	Is mTLS mandatory for all integrations or only for selected systems (e.g., CBS)?	As per RFP scope
348	89	Technical Requirem	Replay/DLQ patterns are required.	Who will own DLQ monitoring and replay operations—Bank or vendor support team?	As per the RFP scope.
349	90	. Technical Require	RBAC, maker-checker, audit trails, masking, encryption required.	Which actions specifically require maker-checker (config/admin changes vs business operations)?	As per RFP scope
350	13	10 – Additional Re	Vendor must close VAPT observations.	Does remediation include only CRM product vulnerabilities or also integration components developed under this project?	Both
351	52	.27 – Data storage	Vendor must not store/share data outside Bank infrastructure; RBI data in India.	In SaaS model, does “Bank infrastructure” mean only BoB-owned tenant or is vendor’s India-hosted tenant acceptable?	The clause itself is self explanatory.
352	88	4. Data, Knowledge	Customer 360 assembled from Bank systems; CRM stores interaction/context data.	Which system is the system of record for customer master—CBS/MDM or CRM?	As per the RFP scope.
353	88	4. Data, Knowledge	CRM supports unstructured notes/attachments/transcripts.	Will attachments/transcripts be stored in CRM or referenced from Bank storage? What are expected volumes and sizes?	The solution should support as per the RFP scope.
354	88	4. Data, Knowledge	CRM must integrate with Data Lakehouse / Analytics CoE.	What is the mode for analytics integration—real-time API, batch, or events?	As per the RFP scope.
355	88	12 → 5. Agentic AI	CRM must leverage Bank agentic AI framework.	Are AI features in scope now, or only readiness? If in scope, which Phase and which use cases?	As per RFP and addendum
356	89	2 → 7. Siebel CRM	Discovery, inventory, phased migration, rollback, reconciliation required.	What are the approximate migration volumes for customers, interactions, complaints, leads, attachments?	Please refer RFP for volumetrics

357	89	2 → 7. Siebel CRM	Migration requires reconciliation reports and audit evidence.	Is reconciliation expected at record-count level or field-level?	As per RFP scope
358	89	2 → 7. Siebel CRM	Coexistence approach mentioned.	Will Siebel and CRM run in parallel? Which entities need syncing?	Its bank discretion
359	89	2 → 7. Siebel CRM	Archival plan required with access to historical records.	Should new CRM provide search/reporting on archived data, or is an external archive acceptable?	Yes
360	90	Technical Requirement	Response time, throughput, concurrency required.	What are expected peak concurrent users and peak daily volumes for SR, leads, complaints, campaigns?	Please refer RFP for volumetrics
361	90	Technical Requirement	Branch user performance expectations.	What is the expected p95 response time for key CRM screens?	The details will be shared with successful bidder
362	91	12 → Common Call Center	Omnichannel continuity across all channels.	Which channels require context stitching in Phase-1 vs Phase-2?	The details will be shared with successful bidder
363	91	Figure 12 → Digital enablement	Self-service initiation and SR tracking.	Is the vendor expected to build customer-facing UI or only provide APIs?	As per RFP and addendum
364	91	Figure 12 → Service triggers	Service triggers convert to sales opportunities.	Are triggers provided by analytics or must CRM configure rules? Approx how many?	Both
365	91	Figure 12 → Contact center	Integration with Avaya/CISCO/IVR required.	Which CTI use cases are mandatory: screen pop, auto-case creation, call disposition?	The details will be shared with successful bidder.
366	93	Figure 12 → Service Migration	25 existing SRs; 50 customizable SRs.	For Phase-1, which SRs are view-only vs STP/writeback?	The details will be shared with successful bidder.
367	92–93	Figure 12 → Lead Management	Multi-source lead creation, STP loan integration.	How many lead journeys require STP in Phase-1, and for which products?	The details will be shared with successful bidder.
368	92	Figure 12 → Lead Management	Bulk upload for outbound/inbound lists.	Is bulk upload needed in Phase-1, and what is expected daily file volume?	Please refer RFP for volumetrics. Bulk upload functionality is a part of the RFP scope.
369	94	Figure 12 → Integration	Fraud system triggers alerts; campaigns may trigger outbound calls.	What are expected peak fraud event volumes per hour and required CRM response time?	The details will be shared with successful bidder.
370	95	Figure 12 → Complaints	Complaints can originate from email/SMS.	What are expected complaint volumes per channel and mandatory payload fields?	Please refer RFP for volumetrics. The payload details will be shared with successful bidder.
371	96	Figure 12 → Complaints	Auto-assignment of complaints.	Approx how many routing rules and resolver groups are needed?	The details will be shared with successful bidder.
372	96	Figure 12 → Complaints	SLA TAT and auto-escalation required.	Are SLAs measured in business or calendar hours, and does SLA pause during customer-pending states?	The details will be shared with successful bidder.
373	95–96	Figure 12 → Complaints	Complaint APIs for other systems.	Which operations must APIs support: create, update, status, attachment upload, bulk create?	As per the RFP scope, the proposed solution has to publish API's and consume API's as well .
374	97	Figure 12 → Campaigns	Campaigns for SMS/email/voice; ROI linkage.	How should response be tracked—delivery/open/click vs lead creation vs conversion?	As per the RFP scope.

375	97	2 → Incident-based	Real-time incident-based campaigns.	Is this required in Phase-2? Expected monthly volumes?	Yes. As per the RFP scope.
376	97–98	ire 12 → Campaign	HTML templates and approval workflows supported.	How many template types and approval levels are expected?	The details will be shared to successful bidder.
377	98	ire 12 → Campaign	DND/NDNC controls required.	Will Bank supply central DND/NDNC list, or must CRM maintain it?	CRM can maintain as per Bank's Requirement.
378	113	Technical Requirements – Network	Vendor must provide leased lines from two ISPs.	Should vendor include procurement and recurring cost, or only manage circuits?	As per RFP and addendum
379	113	Requirements – Co	Link utilization must not cross 70%.	Should utilization be measured via monthly peak, 95th percentile, or average?	As per RFP and addendum
380	113	uirements – WAN,	WAN optimization + SD-WAN + QoS required.	Are these expected via CRM capability or via network layer only, and what integration is required?	As per RFP and addendum
381	109	Point#7	The response time at server end should be always be less than 200 milli second.	Is it EPT or API response time?	No change
382	113	Point#30	Bidder to provide dedicated Leased line from two different service providers from CSP DC and DR sites to Bank DC and DR sites. Bidder to provide link up to Bank's DC and DR router including CPE	Please confirm whether the leased line infrastructure (including last-mile connectivity and CPE up to the Bank's DC/DR router) is expected to be owned and managed by the OEM, or if it is to be provided by the bidder/service providers.	As per RFP and addendum
383	90	support for seismic	Cloud support for seismic zones platform enable replication of critical data across different seismic regions, often using high-availability (HA) setups and multi-region architectures to mitigate risks from natural disasters	Please note that this is a dependency on OEM	DR should be in different Seismic Zone. For other details, please refer RFP and Addendum.
384	178	wing terms and co	It is the responsibility of the Bidder to change or upgrade the licenses for ensuring the compliance to statutory, regulatory guidelines from RBI, TRAI, IRDA, NPCI, IBA etc.	Product life cycle/end of life is managed by OEM nit bu service providers	Primary bidder is responsible for managing all the solutions proposed.
385	116	cts and Continuity	The CSP should provide access to their IT infrastructure as and when required for audit from security perspective which may also include visits at short notice to ensure Bank's data are not misused and to review IT controls of Cloud Service Provider.	It's dependency on OEM. infra is not managed by the Bidder/Service provider	No change

386	9 & 19	1.5 Delivery	R1 -6 Month :Service Management with Customer 360° (QRC), Lead Management, Sales Management R2 -9 Months: Complaint Management, Campaign Managemnt, Marketing Budgeting and all other functionalities *Proposed Solution should include following Module 1. Lead Management, 2. Campaign Management, 3. Sales Management, 4. Service Management and customer 360 degree 5. Complaint management, 6.Contact centre with IVR integration	The module names are not consistent	No change
387	64	Annex-02 Eligibility Criteria	Solution should have been hosted in a public cloud with a single-tenancy architecture for scheduled commercial banks in India for a minimum of three years	Request bank to allow public cloud with multi-tenancy architecture hosting too	As per RFP and addendum
388	64	Annex-02 Eligibility Criteria	Bidder should have implemented at least 3 modules out of 6 proposed modules* in one or more Scheduled Commercial Bank in India, having minimum 1,500 branches as on date of RFP with minimum of 5,000	Can you please make this to Bidder/ OEM should have implemented at least 3 modules of 6 proposed modules.....	As per RFP and addendum
389	88	Annex-12 Project	4. Data, Knowledge and Analytics: Support multimodal/structured and unstructured data references (notes, attachments, call/chat transcripts) with retention and privacy controls.	Can you please eloborate that Data Lake house would send unstructured data also to CRM which needs to be mapped or stored against CRM objects like Customer, Account, Contact, Case etc. Please	The clause itself is self explanatory.
390	88	Annex-12 Project	5. Agentic AI Readiness: CRM must be able to leverage the Bank's Agentic AI framework and guardrails for use cases such as agent assist, auto-summarization, next-best-action, intelligent routing and guided service-to-sales prompts	Please confirm our understanding that CRM acts as an AI-agnostic engagement layer that securely orchestrates the Bank's Agentic AI framework, enforces human-in-the-loop controls, and provides journey-level telemetry and governance while preserving core CRM continuity.	As per RFP and addendum
391	88	Annex-12 Project	5. Agentic AI Readiness: CRM must be able to leverage the Bank's Agentic AI framework and guardrails for use cases such as agent assist, auto-summarization, next-best-action, intelligent routing and guided service-to-sales prompts	Can you please provide more details about Bank's Agentic AI solution that includes about the solution, whether it is on-prem or cloud based and its details, how many agents it has and what are they etc.	As per RFP and addendum
392	94	Annex-12 Project	G) CRM Mobile App- Lead Management Module: CRM Mobile app inhouse developed module used for Lead management module for the following products like Retail assets, Liabilities, Wealth management, Credit card with features like lead creation, status tracking and Lead dashboard integrated with CRM application. This app is	Since CRM mobile app is to be accessed at field also, is it require Offline facility. If yes how many data size or fields or modules requires internal device level persistence.	As per RFP and addendum.

393	96	Annex-12 Project	d)SMS/Email notification should go to the owners and customers informing creation/status change/closure of complaints	For triggering notifications to customers through SMS/Whatsapp/Emails, does bank expects its email/sms/whatsapp gateways to be leveraged or integrated or bidder to bring that facility. Also provides daily volumetrics for each of these based on current data.	The proposed solution capable to integrate with Bank's internal systems. Please refer RFP for volumetrics.
394	103	4.2.6) Lead Execu	b) The registration / account opening form shall be printed out with details & photo of the customer. The customer will only need to sign on the form. Once the form is signed, the signature of the customer will also be	(1) How many number of customer onboarding per month on an average (2) Do you need DocuSign kind of digital signing for customer to sign on the form	As per RFP and addendum
395	103	4.2.6) Lead Execu	c) Customer's PAN number/Aadhaar number shall need to be validated in real timefrom NSDL/ UIAI	Does BOB already has the contract or API access for these regulatory APIs or do we need to account its cost	As per RFP and addendum
396	104	F. Data Analytics &	a) The solution should provide robust analytics by analysing data for insights into customer behaviour and estimate the likely products that customers may take given the available customer profile and data from	(1) May we know what is the Analytical solution BOB already have (2) Whether bidder can propose alternate analytical solution	As per RFP and addendum
397	113	K. Cloud Infrastru	30. Bidder to provide dedicated Leased line from two different service providers from CSP DC and DR sites to Bank DC and DR sites. Bidder to provide link up to Bank's DC and DR router including CPE (Customer Premises Equipment), cross connect, SFP and cable laydown.	(1) Does BOB has existing AWS Landing zone (2) Do you want dedicated leased line for API access from CRM to bank DC & DR or even entire web/mobile access too	As per RFP and addendum
398	109	K. Cloud Infrastru	9. The CRM Application and Data replication should happen from Primary site to DR site in real time to keep those in sync with a Recovery Time Objective (RTO) of 60 Minutes and near zero RPO (Recovery Point Objective).	Typically these are not applicable for multi-tenant as already multi-tenancy has 3 levels of redundancies. Request relaxation for this for multi-tenancy deployment	No change
399	115	K. Cloud Infrastru	10 API Gateway in case of SaaS hosting APIs for consumption for the Bank	Does Bank wants this API GW from bidder to be on-prem or can be hosted in separate public cloud	As per the RFP
400	88	Annexure 12 – Pro	Customer 360 and interaction history to be assembled from Bank systems with a clear data ownership model and data quality controls.	Can you help us with the total number of customer profiles BOB holds and how many sources from where these profile data will be ingested? What percentage of your customer's profile data is updated daily?	The details will be shared with successful bidder.
401	92	Annexure 12 - Pro	A. Marketing Campaigns - Multi-level Campaign	Can you please elaborate if you are asking for a parent and multiple child campaigns under the	Yes - Both
402	92	Annexure 12 - Pro	A. Marketing Campaigns - Budget	Are we only considering the budget for digital campaigns or both digital and offline marketing campaigns as well	Both
403	92	Annexure 12 - Pro	A. Marketing Campaigns - Configure Campaign Offers	We assume that the campaign offers relevant to a particular set of segment will be defined by BOB or do you wish to have a offer recommendation from the system for the campaign	Both

404	97	B: Campaign Man	Campaigns (of all types – mass email, voice, sms & others) should be created from CRM & should be able to link the campaign outcome /response so as to compute ROI of each campaign and conversion rate.	Do you want us to bring the channels OR integrate with existing vendors Please provide us following 1) Emails Per year 2) Emails with attachments per year 3) Promotional SMS Per year 4) Promotional and Service Whatsapp Per year	Please refer RFP for volumetrics
405	97	B: Campaign Man	The solution should be able to float API/ web service for incident based campaigns where other systems will be able to push data e.g Credit/Debit Card/ Net Banking - fraud management systems should be able to send suspicious transactions details like amount of transaction/	Can you please specify what are all the systems from which we need to ingest data to create a customer 360 and in case we need to export data output to any 3rd party system, which are those as well.	The details will be shared to successful bidder.
406	98	2.2.2 Target List	Create customer segments based on past responses of prospects i.e. if a customer was part of any campaign and he/she could not be contacted or he/she didn't respond then he will be automatically put in the segment of lowresponse customer, so that he will be excluded automatically from future campaigns.	How many customer segments you currently have OR envision ? What will be standard refresh frequency of these segments ? How many daily campaigns are we envisioning.	The details will be shared with successful bidder.
407	98	B: Cam[aign Mana	Support the use of historical campaign data in future campaigns	How much historical data you would be ingested in the platform, can you please provide with some volume metrics	The details will be shared to successful bidder.
408	98	B: Cam[aign Mana	The solution should be able to float API/ web service for incident based campaigns where other systems will be able to push data e.g Credit/Debit Card/ Net Banking - fraud management systems should be able to send suspicious transactions details like amount of	Can you please help with the amount or percentage of data to be ingested on real time basis or in batches ? How much will be actively consumed for marketing campaigns	As per RFP scope
409	102	D. Lead Managem	System should be able to impart the score to the leads based on some pre-defined matrix for the product by processing available data or capturing customer response. b) Provisions should be there to store the customized formulae and calculate score based on available or	Do you have predictive model built today ? If yes, where are those models built (eg - SageMaker) What is total size of historical data do we have to build a new propensity model on platform	Yes. The details will be shared to successful bidder.
410	132	B. Marketing Auto	Ability to execute campaigns in Email/SMS/Social Media Channels etc.	Which are social handles and channels does BOB wants to execute campaigns, can you please specify like Facebook, Twitter, LinkedIn Instagram etc.	The proposed solution should integrate with Bank's social media channels like facebook,
411	133	B. Marketing Auto	Reports of leads generated by social media Campaigns	Does BOB will use the Social Channel generated lead form or they want the tech partner to provide the capability of lead form generation and the link will be embedded in the social channels?	Both
412	105	Technical Require	CRM Application to be built on an Open Architecture based API enabled Platform to provide a superior digital experience for the users.	Does the BOB already have any existing middleware systems or ETL tools for data ingestion? If yes, can you please specify. Salesforce have OOTB connectors for Informatica	The proposed solution should be able to integrate with Bank's ETL/middleware systems for data ingestion.

413	145	D. Lead Management	End User De-duplication: Option to configure deduplication check on lead creation End User De-duplication using business logic	How many leads do we receive per year ? How many total leads do we want to ingest as part of migration	Please refer RFP for volumetrics
414	165	K. Data Analytics	Learning (ML) models for Segmenting the customers	Does BOB already have any AI or Predictive models for segmentation? Is yes, do we need to use the existing models or its the need for the platform provider to create those models? How many models are we considering? What is inference frequency - Daily, weekly, monthly	The proposed solution should be able to integrate with Bank's internal systems. The frequency details will be shared with successful bidder.
415	140	C. Service Management	16. Capability to integrate Interactive voice response blast services	We understand that CRM to be integrated with IVR and it will share mp3 audio and will share its transcripts and intelligence like what was discussed etc. These details to be displayed in Customer 360 screen. Please confirm our understanding	As per the RFP scope.
416	143	C. Service Management	33 View of transactions done through various Channels	While bank intent wouldnt repeat of respective channel account statement, approximately how many transactions from each of the account (SB, CASA, wealth, lending etc.) in customer 360. Typically we have seen last 5 transactions in CRM. Please clarify	As per the RFP scope.
417	143	C. Service Management	37. Provision for digital KYC Compliance with option to upload the necessary OVD document and capture KYC fields by CRM Users and perform validation based on the document type with maker checker provision	Please clarify that what validations are you expecting. Like extracting KYC docs content using OCR and validate against regulatory APIs here ?	As per the RFP scope.
418	147	D. Lead Management	19. Lead Email Tracking ability & mailbox folder tracking option for lead generation	Can you please explain in detail what do you mean by mailbox folder tracking option for lead	As per the RFP scope.
419	149	D. Lead Management	36 The entire lead generation process should be under scrutiny by CRM to ensure that it is as effective as possible in bringing new leads, converting them into customers and retaining them overtime. Different analytics tools can be used to optimize each step in the process and make	While we can understand first part of requirement, request your elaboration of the 2nd sentence where the analytical tools to optimize each step, how this can be achieved or correlate to lead management	The bidder need to size their solution based on the scope provided in the RFP and addendum
420	106	J. Data Management	2. The proposed solution should include an API management platform with API gateways and API analytics to effectively manage and monitor API usage	Is the bank evaluating new CRM-specific API platforms, or will they leverage their existing API management system?	As per RFP and addendum
421	106	J. Data Management	2. The proposed solution should include an API management platform with API gateways and API analytics to effectively manage and monitor API usage	Please confirm if Hybrid deployment strategy can be allowed - the Management plane being hosted on vendor managed public cloud and execution plane (API gateway & ESB) being completed hosted on Bank private DC. This architecture also makes sure that the transactional /PII data is always processed locally within Bank private DC.	As per RFP and addendum

422	106	J.Data Management	2.The proposed solution should include an API management platform with API gateways and API analytics to effectively manage and monitor API usage	Considering its hybrid deployment for CRM-specific API platform , the hardware and software components required by the API platform would be provided by the Bank eg (Infra,WAF,OS,DB,NLB	As per RFP and addendum
423	109	K.Cloud Infrastructure	The CRM Application and Data replication should happen from Primary site to DR site in real time to keep those in sync with a Recovery Time Objective (RTO) of 60 Minutes and near zero RPO (Recovery Point Objective)	We would like the bank to confirm their DC/DR strategy; our current assumption is that an Active/Passive model is required.	No change
424	94	H.Integration with	The existing CRM Solution is integrated with various internal and External platforms and multiple API's/interfaces and some of the core systems has been listed below	Request Bank to confirm if there are any other application internal or external other than the listed ones?	The RFP listed some of the core systems. The proposed solution must capable to integrate with Bank's core systems and all sub-domain systems of the bank as per requirements. The solution has to publish and consume API's for the integration .
425	94	H.Integration with	The existing CRM Solution is integrated with various internal and External platforms and multiple API's/interfaces and some of the core systems has been listed below	Request Bank to provide estimated traffic volumes for the APIs and integrations between the CRM and the listed applications. To assist with capacity planning, please provide these metrics in any of the following formats: Transactions Per Second (TPS) (Peak and Average) Requests Per Day Requests Per Month	Please refer RFP for volumetrics.
426	89	7.Siebel CRM Migration		Could the Bank specify the total number of APIs and integrations currently developed and active for the Siebel CRM system?	Please refer RFP for volumetrics
427	89	6. Security, Comp	Establish CRM governance structure, change control, release management and environment strategy (dev/test/UAT/pre-prod/prod) aligned to Bank standards.	Request bank to confirm the environment strategy for Non-prod , we assume that UAT would be at 50% capacity of Prod without HA and pre-pro would be 50% with HA for the API management	As per the Bank standards.
428	92	C) Lead Management	Lead creation process through different sources i.e Online web portal in Bank's website for application of Retail Assets,Liabilities, MSME,AGRI and LCB loans by Existing and Prospective customers	Please advise on the following: a) How many number of new leads per day / month b) What is your lead coversion %	Please refer RFP for volumetrics
429	92	B) Complaint Mar	Complaint Creation through various channels (Website for the customers, internet banking ,Bobworld, Business correspondents, Branches, Contact Centre, social media SMS Banking Whatsapp banking etc)	Please advise on the following: a) How many number of new complaints/Inquiries/Service requests per day / month	Please refer RFP for volumetrics

430	93	E) Service Module	Single view of customer relationships. financial and non-financial account status.	Please advise on the following: a) What would be the volume or customer base as on date b) How much % YoY increase we can envisage on customer base.	Please refer RFP for volumetrics
431	154	F) Mobile & Field	11 Chatbot facility between the workforce for any knowledge gaining / query / information / sharing of information etc.	Please clarify whether bidder to provide chatbot itself or collaboration tool to interact between workforce, because in the RFP in other places it was given that CRM to integrate with Chatbot	The proposed solution capable to integrate with Bank's internal systems.
432	154	F) Mobile & Field	13) Offline mode for core actions minimal-click field capture secure evidence upload where relevant.	Can you please name the functionalities that require to be in offline or do you want entire field crm to be offline enabled	The bidder has to size their solution as per the RFP scope.
433	156	G) Contact Center	9) Ability to capture tasks that needs to be completed after calls.	We understand that tasks to be created manually post call and CRM to facilitate. If no will Bank provide transcripts & tasks description from IVR API	The bidder has to size their solution as per the RFP scope.
434	160	H) Reporting and	27) Governed exports + streaming events to bank analytics row-level security operational dashboards	Can you please elaborate more for better understanding.	The bidder has to size their solution as per the RFP scope.
435	15	1.12 Escrow Mech	The Bank and the successful bidder shall agree to appoint an escrow agent to provide escrow mechanism for the deposit of the source code for the software product supplied / procured by the Bidder to the Bank in order to protect its interests in an eventual situation. In case of a disagreement between the Bank and the Bidder regarding appointment of an escrow agent, the Bank shall appoint an escrow agent in its entire discretion which shall be final and binding on the Bidder. The Bank and the Bidder shall enter into a tripartite escrow agreement with the designated escrow agent, which will set out, inter alia, the events of the release of the source code and the obligations of the escrow agent. Costs for the Escrow will be borne by the Bidder. As a part of the escrow arrangement, the final selected bidder is also expected to provide a detailed code documentation	The proposed solution is a proprietary multi-tenant SaaS platform, and as such, the source code is confidential and cannot be shared. However, any custom code developed on the platform by the customer remain the intellectual property of the customer and escort may not be necessary given the Bank's ownership of the customer code. However, Bank can enter into an escrow agreement with the bidder specifically for the custom-developed components if required. We request the clause be amended to reflect accordingly.	As per RFP and addendum
436	165	K) Data Analytics	2) Should be capable of integrating with Bank's existing ML models. Should be capable of integrating with any analytical solution used for ML modelling. The AI/ML should evolve over time by adding more and more data points/inputs to the algorithm and improve the current banking processes.	Can you please elaborate about your existing models. Do you want us to consume your models through APIs ?	The details will be shared with successful bidder.
437	169	L) Relationship Ba	17 Facilitate User for devising engagement strategy for generating revenue.	Can you please elaborate this requirement in bit more detail to understand better	The details will be shared with successful bidder

438	172	L) Partner & Chan	Partner entity management (BC/DSA/partners) with hierarchy, agreements, validity dates.	How many external users or partners going to use partner mgmt portal. How many times they would login by month	The bidder has to size their solution as per the RFP scope.
439	8	- Project Overvi	the vendor must also agree to all our terms & conditions mentioned under this RFP.	Please confirm if this is no-deviation RFP for all legal, penalty, operational clauses.	No change
440	10	1.5 - Delivery	at rate of 0.5% of particular phase implementation cost inclusive of all taxes, duties, levies etc., per week or part thereof, for late implementation beyond due date of implementation, to a maximum	Does the maximum 10% refer to 10% of particular phase ?	No change
441	10	1.5 - Delivery	If delay exceeds two weeks from due date of implementation, Bank of Baroda reserves the right	Please confirm if this can be relaxed or removed	No change
442	12	1.9 (C) - Payment Terms [Integration Charges (Contract	100% of payment on actual no. of successful integrations	As per financial format in Pg 180, there is no row for quoting integration charges. How will the payment for integrations be done in that case ?	No change
443	81	Annexure 07 – Letter of Undertaking from the bidder	10. We confirm that we are not owned or controlled by any director, or key managerial personnel, or approver of the Bank, or their relatives.	Deloitte being a Partnership firm, it is not possible to confirm this criteria as there are plenty of partners. Given the size and scale of operations of our firm, it will not be possible for us to confirm compliance to this clause. Hence, requesting removal of this clause.	No Change
444	87	Annexure 12 – Project	2. Business Outcomes and KPI Management Adoption KPIs and sustained adoption plan (pre-go-live to post-go-live)	Does this refer to adoption by Bank officials ? If yes, then adoption of the implemented solution should be Bank's responsibility. Or Is our responsibility restricted to providing adoption KPI and adoption plan ?	As per RFP and addendum

445	88	ure 12 – Project	5. Agentic AI Readiness	Please propose the following set of assumption wherein we are providing GenAI services: 1) Given the nature of the LLMs and AI tools, Deloitte won't take any responsibility of Gen AI IPR breach once the product is handed over to Client. It is expected that Client uses appropriate "human-in-the-loop" review is carried out on any outputs from Generative AI tools to ensure a suitable quality to be used, 2) AI Systems are subject to hallucinations, which can be caused by a variety of factors outside of Deloitte's control. 3) Incomplete or inaccurate prompts may affect the accuracy and completeness of the output. 4) Deloitte, in its advisory role, cannot necessarily assess the accuracy, completeness, and appropriateness of training data to the same degree as a client can with respect to its own business needs.	As per RFP and addendum
446	97	nt Module (b) In	i. CRM Campaign web service - Contact Centre Application	Is there an existing contact centre application/ tool ? if yes, will the same be leveraged ? if not, will one such application/ tool has to be provided by bidder ?	The proposed solution must capable to integrate with Bank's internal systems as per the RFP scope.

447	109	K. Cloud Infrastructure	8..... prioritization to Metro and Urban branches initially and then extended to other centres/ branches subsequently.	1) The implementation has to be done for how many branches ? 2) Earlier in the document (refer Timeline for Go-Live, Pg 9), the phased manner (Phase 1 & Phase 2) has been described depending on the modules for Go-Live. However in this section, the phased manner has been described as the prioritization to Metro and Urban branches. Please provide clarity in this regard.	The bidder need to size their solution based on the scope provided in the RFP and addendum
448	110	Cloud Infrastructure	16. audit certified by a CERT-IN empanelled auditor.	1) Does this mean that the security certification by CERT IN empanelled auditor will be bidder's responsibility ? Will a bidder have to bear the cost for the same ? 2) AT what frequency will this security audit to be done ?	As per RFP scope

449	111	Cloud Infrastruct	18. ISO 27001, ISO 22301 certification • ISO 27017 (Cloud Security Management Certified) • ISO/IEC 27018 (Personal Data in Cloud Certified) or similar certification • ISO/IEC 27701 PIM (Privacy Information Management) certified or similar certification • ISMS (Information Security Management System) • ISAE (International Standard on Assurance Engagements) 3402. • Meet the Cloud Security Alliance Cloud Controls Matrix and compliance with CSA Star CCM. • RBI and Government of India guidelines and mandates on Cloud Computing GDPR compliance • CERT-In guidelines as and when they are released and become applicable	Will cost of all these certifications has to be added in the commercials being submitted by bidder?	No change
-----	-----	-------------------	--	---	-----------

450	113	Cloud Infrastructure	30. Bidder to provide dedicated Leased line from two different service providers from CSP DC and DR sites to Bank DC and DR sites. Bidder to provide link up to Bank's DC and DR router including CPE (Customer Premises Equipment), cross connect, SFP and cable laydown. 31. The link should be of minimum 500Mbps capacity. The successful bidder has to maintain link uptime in line with application uptime of 99.90%. 32. At any point in time, during the contract period, utilization of link should not cross 70%. In case link is utilized more than 70%, bidder to upgrade the link and associated hardware at no additional cost to the Bank.	Please relax uptime to 99.5%. Is it acceptable to BoB?	As per RFP and addendum
451	118	Onsite Resource	The Support should be for an unlimited number of incidents reported to them and provides a practical solution to resolve the issue. All escalations will be attended / responded-promptly not later than 30 minutes of reporting.	1) "unlimited number of incidents" is an open ended statement. Can you please share current volume of the incidents for last 12 months on monthly basis. 2) Is there any ticketing tool currently ? - If yes, will the same be leveraged by bidder	The details will be shared with successful bidder
452	121	On, Maintenance	l) Correct them in the shortest possible time	What does it mean by "shortest possible time" ? Can you please provide quantifiable number.	As per SLA.
453	122	IT and Technical	Must Pass (Disqualifiers): A..... Identify top 50 journeys and deliver minimal-click fulfilment.	Will only top 50 journeys to be implemented in the proposed CRM solution ? Can you please provide the total expected journeys.	As per the RFP scope.
454	175	Annexure 13 – Service Levels and Service Credits	 penalty of Rs. 25,000/- per hour shall be charged for non-conformance exceeding the restoration time defined for Severity – 1, 2 & 3 on the aforementioned table.	Please provide if these penalties can be reduced. If yes, please provide how much max. reduction is acceptable to BoB.	No change
455	176	Penalty related to onsite resources	delay in deployment/replacement of resource for 1 month or more, 10% of the monthly charges payable for total engineers will be deducted as penalty every month. Penalty will be deducted from Next Pending	What is the penalty capping for penalty under this head ?	No Change

456	176	Penalty related to onsite resources	In case, if any of the required onsite technical support engineer(s) is/are not available in office on any particular day, the Bank will be deducting the cost of those resources for the period of their absence	What is the penalty capping for penalty under this head ?	No change
457	180	Annexure 15–Commercial Bid	5) Contact Centre integration cost	Will the cost of all infrastructure associated with the contact centre be borne by bidder?	No change
458	12	B. Implementation and Integration Cost (OTC) / Phase I & Phase II	50% of Implementation Cost plus applicable tax (wherever applicable) after UAT Sign off of phase 1 items of scope of work as mentioned in delivery section. UAT Sign Off should be sealed and signed by both Bank’s identified Project Manager and the bidder’s representative • 25% of Implementation Cost plus applicable tax (wherever applicable) after Implementation, Customization & Go-Live acceptance of phase 1 items of scope of work as mentioned in delivery section. Go-Live acceptance, evidenced should be sealed and signed by both Bank’s identified Project Manager & bidder’s representative • 25% of Implementation Cost plus applicable tax (wherever applicable) after successful adoption plan signoff of Phase 1 from the Bank. successful adoption plan signoff in the form of Final Acceptance should be signed by both Bank’s identified Project Manager & bidder’s representative	Can we request the following change on the criteria? The following payment schedule aligned with key project stages: * Contract Signing – 10% * Requirements Sign-off – 10% * Business Process Design Completion – 10% * Development, Campaign Design, and Integrations – 25% * User Acceptance Testing (UAT) Completion – 35% * Go-Live – 10%	As per RFP and addendum

459	10	1.5 Delivery	In case the individual phase wise deadlines are not met then the Vendor will have to pay penalty to Bank of Baroda @ 0.5% of particular phase implementation cost inclusive of all taxes, duties, levies etc., per week or part thereof, for late implementation beyond due date of implementation, to a maximum of 10%. If delay exceeds two weeks from due date of implementation, Bank of Baroda reserves the right to cancel the entire order.	Can we request the following change on the criteria? In case the individual phase wise deadlines are not met then the Vendor will have to pay penalty to Bank of Baroda @ 0.5% of particular phase implementation cost inclusive of all taxes, duties, levies etc., per week or part thereof, for late implementation beyond due date of implementation, to a maximum of 10% 5%. If delay exceeds two four weeks from due date of implementation, Bank of Baroda reserves the	No change
460	12		12 Search Option/Filter options from the Customer Database using any of the customer data field (Advanced Find) & ability to export the result set to different formats like excel, pdf etc.	Should the advanced search allow cross-object criteria (e.g., accounts + interactions + campaign responses) or only single-object fields for export?	As per the RFP scope
461	17		17 Provision for digital KYC Compliance with option to upload the necessary OVD document and capture KYC fields by CRM Users and perform validation based on the document type with maker checker provision.	Should KYC document validation and approval be fully automated with system checks, or is manual verification by a checker required for all uploads	As per RFP and addendum
462	20		20 The bidder should provide videos/ documents/ tech support/ chat-bot among others to guide the customers to use & interact with CRM.	Should the guidance content be hosted inside Fusion, or is it acceptable to link to external portals and chatbots for training and support	The proposed solution should be able to integrate with internal systems like chatbot and internal portals.

463	30		30. Bidder to provide dedicated Leased line from two different service providers from CSP DC and DR sites to Bank DC and DR sites. Bidder to provide link up to Bank's DC and DR router including CPE (Customer Premises Equipment), cross connect, SFP and cable laydown. 31. The link should be of minimum 500Mbps capacity. The successful bidder has to maintain link uptime in line with application uptime of 99.90%.	Multi-tenant Cloud Infrastructure – Oracle SaaS runs on Oracle Cloud Infrastructure (OCI), a globally distributed, highly resilient data-center network. Bandwidth, latency and availability are engineered to exceed 99.9 % uptime without any on-premise circuit provisioning. Built-in Security & Compliance – All traffic between the customer site and Oracle SaaS is protected by TLS 1.2+ encryption. Oracle also offers Oracle FastConnect (private-link) and VPN Connect as optional, dedicated-path connections if the bank prefers a non-public route. Elastic Scaling & Performance Guarantees – Oracle's cloud platform automatically scales compute and network resources to meet peak loads, guaranteeing the throughput specified in the RFP (X Mbps) under all conditions. Service-Level Agreements – Oracle provides a 99.95 % application-level SLA for SaaS services, together with detailed incident-response and restoration times. Network-level SLAs (e.g., FastConnect) are the responsibility of the customer's telecom provider, which aligns with standard cloud-first contracts. Zero Hardware Footprint – As a pure SaaS	As per RFP and addendum
-----	----	--	---	---	-------------------------

464		1.5. Delivery	Customer Relationship Management (CRM) Solution must be implemented as per project scope within -15- months in totality from the date of placing of purchase order by the Bank. Bank has planned to implement the complete solution in phases. The implementation timeline for each phase is as follows: Phases Module Name Time required for the activity 1 Service Management with Customer 360° (QRC) 6 Month Lead Management Sales Management 2 Complaint Management 9 Months Campaign Management Marketing Budgeting and all other functionalities as per scope *Bank	Proposed revised schedule Phase Modules to be delivered Duration Phase 1 Campaign Management & Marketing Budgeting (plus any prerequisite data-setup) 6 months Phase 2 Service Management + Customer 360°, Lead Management, Sales Management, Complaint Management, and all remaining scope items 9 months Total – 15 months (unchanged overall duration) Why this re-sequencing adds value Reason Benefit Immediate marketing ROI – Campaign Management and budgeting are often the first levers the Bank uses to drive new product acquisition and cross-sell. Getting them live in the first six months yields measurable revenue impact early in the contract.	No change
465	13	1.10 Additional Requirement	The price payable to the bidder shall be inclusive of carrying out any modifications changes / upgrades to the application and other software or equipment that is required to be made in order to comply with any statutory or regulatory requirements or any industry-	Any modification changes/ upgrades which comes after design finalization should come as change request with additional costs	no change
466	145	D. Lead Management:	5 Auto-response management: Automatically send personalized responses to Web site inquiries	Any Chatbot available in Website ?	Yes.
467		Budgeting		What is the system used for BPM / approval process?	The details will be shared with successful bidder.
468		Partner Management		Do partners need to have access to create and manage Leads and Opportunities	Yes.As per Bank's requirement

469		L) Partner & Channel Management (BC / Third-Party Workforce / Partners)	9 Incentive/commission support as feed to bank system (no mandatory calculation in CRM).	Can you please provide the details about incentive or commission-related data should CRM provide to the bank's incentive system	The details will be shared with successful bidder.
470	13	1.11 Ownership, Grant and Delivery	The bidder shall procure and provide a non-exclusive, non-transferable, perpetual licenses to the Bank for the solution to be provided as a part of this project.	License would be SaaS Cloud subscription based. Can we request the following change in criteria? The bidder shall procure and provide a non-exclusive, non-transferable, perpetual licenses SaaS Cloud subscription based license to the Bank for the solution to be	As per RFP and addendum
471	16	1.13 Audit	All Bidder records with respect to any matters covered in this RFP shall be made available to auditors and or inspecting officials of the Bank and/or Reserve Bank of India and/or any regulatory authority, at any time during normal business hours, as often as the Bank deems necessary, to audit, examine, and make excerpts or transcripts of all relevant data. Said records are subject to examination	Our Organization DPA(Data Processing Agreement) grants audit rights to the customer and/or their auditors, subject to prior formal notice. Audits cannot be conducted at any time, as they require advance planning, coordination, and internal management by Our Organization. Requesting BoB, to remove this clause as this needs formal prior notice	No Change
472	18	2. Evaluation process	Compliance with regulatory and Gov. regulation & Master direction , Data Privacy (DPDP) & Security	Master direction: It has been withdrawn and no longer relevant https://website.rbi.org.in/web/rbi/-/notifications/master-direction-on-outsourcing-of-information-technology-services-12486	No Change
473	25	3.1 General Terms and conditions	i) Standards: All standards to be followed will adhere to Bureau of Indian Standards (BIS) specifications or other acceptable standards (IS 17802:2021)	Our Organization SaaS aligns with multiple global standards such as NIST, ISO, and SOC standards. Hence, requesting BoB to remove	No Change

474	54		The Service provider shall ensure that it is complying with all the directions and clauses as stated in the said circulars: a) RBI/2023-24/102 DoS.CO.CSITEG/SEC.1/31.01.015/2023-24 dated 10.04.2023 regarding Master Direction on Outsourcing of Information Technology Services b) RBI/2023-24/107 DoS.CO.CSITEG/SEC.7/31.01.015/2023-24 dated 07.11.2023 regarding Master Direction on Information Technology Governance, Risk, Controls and Assurance Practices	Note: The Master Direction on IT Outsourcing has been withdrawn, hence no more applicable https://website.rbi.org.in/web/rbi/-/notifications/master-direction-on-outsourcing-of-information-technology-services-12486	No Change
475	59	Annexure 01 – Guidelines for submission details and E-tendering	Letter of Undertaking from Bidder and OEM/ OSD on Compliance to RBI Master Direction on Outsourcing of IT Services RBI/2022-23/xx DoS.CO.CSITEG/SEC.xx/31.01.015/2022-23 Dated 23rd June 2022	N/A - The Master Direction on IT Outsourcing has been withdrawn, hence no longer applicable https://website.rbi.org.in/web/rbi/-/notifications/master-direction-on-outsourcing-of-information-technology-services-12486 Requesting BoB to remove this clause	No Change
476	89	Annexure 12 – Project Scope	According to Digital Personal Data Protection (DPDP) Rules, 2025, Establish a comprehensive framework for processing digital personal data, empowering users with rights over their data and requiring strict compliance from fiduciaries regarding consent, data breaches, and child data protection	Requesting bank for further clarity and relaxation on the clause	As per RFP and addendum
477	105	Technical Requirements: Infrastructure, Cloud and other CSP Requirements	1. The proposed CRM Solution shall be configured, deployed On-Cloud under SaaS based model, and managed to meet security, privacy, legal, ethical and compliance requirements of the Bank.	Will need clarity on the Compliance requirements of the Bank	As per RFP and addendum

478	108		15. As per the Digital Personal Data Protection (DPDP) Rules , 2025, notified by India's Ministry of Electronics and Information Technology (MeitY), establish a comprehensive framework for processing digital personal data, empowering users with rights over their data and requiring strict compliance from fiduciaries regarding consent, data breaches, and child data protection	Requesting bank for further clarity and relaxation on the clause	As per RFP and addendum
479	109		3. The platform should use Micro-services based architecture using kubernetes or equivalent orchestration for scalability. The solution must utilize Docker or equivalent technology to package microservices, ensuring the solution can be consistently deployed across various environments (development, testing, production). The bidder must provide detailed architecture diagrams of the proposed solution, showing how all components of the system will interact, including microservices, databases, integrations, and third-party services.	If the product doesn't offer microservices based architecture, is the bank expecting a custom developed microservices based containerized platform leveraging only the core CRM engine OR This is not relevant for a Service offered under a subscription based SaaS model with SLAs and managed by the CSP. Requesting BoB to remove this clause	As per RFP and addendum
480	109		7. The response time at server end should be always be less than 200 milli second . During the agreement period, if at any stage, it is found that the Platform provided by the Bidder is not able to give the requisite performance as per the sizing parameters (i.e., up time above 99.90% and response time < 1 seconds), the Bidder shall have to provide additional resources without any additional cost to the Bank	Request the bank to provide more clarity on this requirement	No change

481	110		13. Bidder should assess the compliance level of SaaS based application vis-à-vis guidelines stipulated by Bank / regulatory / statutory body, through a CERT-IN certified auditors and submit assessment report/ audit certificate to Bank on quarterly basis or as per Bank's requirements	Oracle provides the third-party SOC reports on an annual basis which satisfies the need of our other public sector / Banking customers. Requesting BoB to rmeove this clause	No change
482	110		11. Bidder, its solution and Bidder's CSP must comply with bank's policies on cloud adoption, cyber security, information technology, information security, etc., • RBI guidelines on Outsourcing of IT Services, Data Storage and handling, Information Technology Governance, Risk, Controls and Assurance Practices, etc. • India's IT act and amendments, Security and Data Protection regulations such as proposed Digital Personal Data Protection Bill, any India's statutory and regulatory requirements. • Any other IT security/data protection & privacy policies, guidelines, regulations etc issued by Bank, Regulators, Government of India from time to time during the contract period	This will need more detailed discussion on understanding Bank's cloud adoption policies	No change

483	110	16. As and when Bank requests, bidders should provide the following certificates/proof from third party vendor/ bidder / CSP providers for their systems: • Regular VAPT, API Assessment, customized Source Code (related to Bank) audit certified by a CERT-IN empanelled auditor. • A Secure Software Development Lifecycle (Secure SDLC) must be followed by the bidder for all applications throughout their lifecycle, with a security assurance certificate provided accordingly. • All security controls of the CSP should be monitored/ audited by bidder/OEM and report of the same to be shared with the bank. • Regular Hardening of System preferably CIS Benchmark, System & Application Patching to latest release patches and security updates. • Adhering to NIST (especially 800-53) and CSF (Cyber Security Framework) standard best practices. • Monitoring CERT-IN released advisories and fixing applicable vulnerabilities.	Our Organisation continuously monitors relevant security advisories and manages vulnerabilities in accordance with its global security and patch management processes. However, Oracle does not commit to tracking or remediating advisories issued by any specific external agency on a one-to-one basis; remediation is addressed based on risk assessment, applicability to the service, and Oracle's standard update cycle. Requesting BoB to remove this clause	No change
484	111	21. The bidder must have a documented patch management practice in place, ensuring that security patches and upgrades are applied promptly to the product and cloud infrastructure. The bidder must provide a certificate of assurance to the Bank every quarter, confirming that the latest patches have been applied and the infrastructure is secure. Detail on N or N-1 patch status along with mechanism to revert / backup should be stated explicitly	Requesting BoB to remove this clause	No change

485	111		18. ISO 27001, ISO 22301 certification • ISO 27017 (Cloud Security Management Certified) • ISO/IEC 27018 (Personal Data in Cloud Certified) or similar certification • ISO/IEC 27701 PIM (Privacy Information Management) certified or similar certification • ISMS (Information Security Management System) • ISAE (International Standard on Assurance Engagements) 3402. • Meet the Cloud Security Alliance Cloud Controls Matrix and compliance with CSA Star CCM • RBI and Government of India guidelines and mandates on Cloud Computing GDPR compliance • CERT-In guidelines as and when they are released and become applicable	Our Organisation SaaS is aligned with CSA Star, ISO 27001, 27017, 27108, 27701, ISMS (ISO 27001 implemented on ISO 27002). Further, Oracle CRM and Service aligns with ISAE 3401 for SOC 1. - RBI & Government of India Guidelines: The Master Direction on IT Outsourcing has been withdrawn, hence no more applicable https://website.rbi.org.in/web/rbi/-/notifications/master-direction-on-outsourcing-of-information-technology-services-12486 - CERT-In Guidelines as and when they are released and become applicable: Oracle SaaS follows the Oracle corporate security practices Requesting BoB to remove these two above clauses	No change
486	112		24. The Bidder or Bidder's CSP must ensure the presence of Runtime Application Self-Protection (RASP) or an equivalent control, along with strong data security practices.	Could you elaborate on this and specifically mention which runtime application self-protection is being referred here?	As per RFP and addendum

487	112		27. The CASB (Cloud Access Security Broker) security controls need to be enforced from cloud standpoint. In case the solution is not covered by CASB, the CSP should offer CWP (Cloud Workload Protection) compatibility and offer points engineering solution. Appropriate security controls/components from the cloud orchestration layer has to be made available by default as per Bank policy/Regulatory Guidelines at no additional cost to the Bank. Bidder to submit Security Architecture diagram to Bank as part of technical bid detailing all the security components.	Our Organisation SaaS is secured using a defense-in-depth architecture with multiple layered controls. While a CASB is not used within the managed SaaS environment, native security controls such as perimeter security, network monitoring, and vulnerability scanning provide equivalent protection. These controls collectively enable continuous threat detection and risk mitigation in line with industry-recognized cloud security practices. Requesting BoB to remove this clause	No change
488	112		29. Bidder to regularly conduct and provide results of fault tolerance testing, scalability testing and load balancing testing, every quarter or as per Bank's requirements, validating that the solution is: - o able to recover seamlessly from failures - o able to scale horizontally (adding resources) and vertically (enhancing existing resources) to handle peak load scenarios without performance degradation. - o able to provide consistent performance even under high usage scenarios, such as during peak load periods (e.g., festive season banking).	As a CSP-managed SaaS service, fault tolerance, scalability, and load-balancing testing are performed as part of Our Organisation standard platform operations, not on a customer-specific or quarterly basis. These capabilities are contractually assured through defined SLAs such as uptime, RPO, and RTO commitments. Requesting BoB to remove this clause	No change
489	114			Use of dedicated DLP tool, File Integrity monitoring, API Gateway are not used for SaaS	As per the RFP scope.
490	115		b. Bidder to Implement automated monitoring tools and systems to track the platform's health, uptime, and response times. Bank's Team also to be given login for dashboard access for checking of the audit logs and security events if required	This is not a relevant ask for a SaaS service where CSP is managing the infra. Requesting BoB to remove this clause	No change

491	116	51. Contracts and Continuity	a. Bidder to support in deporting/export of data from cloud to on-premises or cloud to cloud migration on termination of contract at no additional cost to the bank. Bidder to handover entire Bank's CRM data along with data dictionary as per Bank's requirements, at the time of deporting data from cloud. c. The CSP should provide access to their IT infrastructure as and when required for audit from security perspective which may also include visits at short notice to ensure Bank's data are not misused and to review IT controls of Cloud Service Provider.	Our Organisation DPA(Data Processing Agreement) grants audit rights to the customer and/or their auditors, subject to prior formal notice. Audits cannot be conducted at any time, as they require advance planning, coordination, and internal management by Our Organisation. Requesting BoB, to remove this clause as this needs formal prior notice	No change
492	176	Penalty due to application downtime		We offer: • 10%: < 99.9% but > 99.5% • 15%: <= 99.5% but > 99.0% • 25%: <= 99.0% but > 95.0% • 100%: <= 95.0% in the applicable calendar month Requesting BoB to remove the clause	No change
493	187		We hereby agree to comply with the Information and cyber security controls as per Bank's and Regulatory Authorities IT Security Guidelines on an ongoing basis and regulatory / legal guidelines and directives related to SP / outsourcing issued by regulators / legal entities from time to time. The SP shall provide access to the regulators, legal authorities, Bank and Bank appointed auditors for on-site/off-site supervision.	We maintains a comprehensive, regulator-aligned information and cyber security framework that is continuously updated to address evolving regulatory and legal requirements. Our SaaS services operate under mature internal security controls, governed by global policies, secure-by-design architecture, and continuous monitoring. Our organization is independently audited and holds internationally recognized certifications (such as ISO/IEC 27001, SOC 1/2, and related standards), demonstrating ongoing compliance. These controls collectively ensure sustained alignment Requesting BoB to remove this clause	No Change

494	211	29. INFORMATION OWNERSHIP	All information processed , stored, or transmitted by Service provider equipment belongs to the Bank . By having the responsibility to maintain the equipment, the Service provider does not acquire implicit access rights to the information or rights to redistribute the information. The Service provider understands that civil, criminal, or administrative penalties may apply	This is a very broad statement and is prone to interpretation. Requesting BoB to remove this clause	No Change
495	213	35. Incident Response and Management	any cybersecurity incident. They must have written incident response procedures including the roles of staff/outsourced staff handling such incidents; Response strategies shall consider readiness to meet various incident scenarios based on situational awareness and potential/post impact, consistent communication and coordination with stakeholders, including specifically the bank, during response. Service provider shall report all cyber incidents to	Our Organisation follows a structured incident response process that ensures timely containment, impact assessment, and verified information collection before external communication. Accordingly, We contractually commits to a 24-hour notification timeline for confirmed security breaches, which aligns with industry best practices and enables clear, accurate, and actionable disclosure	No Change
496	213	36. IT Risk Management	The Service Provider shall assist the Bank in adhering to compliance guidelines of the regulatory authorities and facilitate Bank from time to time. The Service Provider shall conform to the security practices and procedures laid down in the Information Technology Act 2000 as amended by the information Technology (Amendment) Act 2008 (IT Act and IT Amendment Act) and the information Technology (Reasonable Security Practices and Procedures and Sensitive	Requesting bank for further clarity and relaxation on the clause	No Change
497	220	Annexure 20 – Software Bill of Materials (SBOM)	All the software supplied to the Bank or developed for the Bank must be accompanied by a complete SBOM. The SBOM of the software supplied to the Bank or developed for the Bank must include the data fields mentioned below. In addition, the Software OEM/Owner/Vendor must ensure that:	This is not a relevant ask for a SaaS service managed by Our Organisation. Requesting BoB to remove this clause	No Change

498	Page 64	Eligibility Criteria	Bidder should have implemented at least 3 modules out of 6 proposed modules* in one or more Scheduled Commercial Bank in India, having minimum 1,500 branches as on date of RFP, with minimum of 5,000 licensed users on CRM Platform.	Request bank to change this clause to: Bidder/OEM should have implemented at least 3 modules out of 6 proposed modules* in one or more Scheduled Commercial Bank in India, having minimum 500 branches as on date of RFP, with minimum of 2,500 licensed users on	As per RFP and addendum
499	Page 13 /	1.11 Ownership, Grant and Delivery	1.11 Ownership, Grant and Delivery The bidder shall procure and provide a non-exclusive, non-transferable, perpetual licenses to the Bank for the solution to be provided as a part of this project. The Licenses for the solution should not be restricted to use case. The Bank can use the solution at any of its overseas branches / offices and locations and present & future RRBs without restriction and use of software by service providers on behalf of the Bank would be considered as use thereof	Request bank to share further clarity on the license modality.	As per RFP and addendum
500	8 of 222	1.3 - Project Scope	Section says : Considering the enormity of the assignment, any service which forms a part of the Project Scope that is not explicitly mentioned in scope of work as excluded would form part of this RFP, and the Bidder is expected to provide the same at no additional cost to the Bank. The Bidder needs to consider and envisage all the services that would be required in the Scope and ensure the same is delivered to the Bank. The Bank will not accept any plea of the Bidder at a later date for omission of services on the pretext that the same was not explicitly mentioned in the RFP	While the Bidder understands the intent of the clause to ensure completeness of delivery, it is practically difficult to take responsibility for services that are not documented or reasonably inferable from the stated scope. Request the Bank to confirm that the Bidder's responsibility shall be limited to services explicitly mentioned in the RFP or those reasonably required to fulfil the documented scope, and that any materially new requirements will be addressed via a formal change request.	No Change

501	9 of 222	1.5	RFP says : Bank is already using inhouse apps for DSA, RMs and also having 3rd party integration with different modules. The same need to be migrated within above mentioned timelines. The solution as per the required scope needs to be rolled out as per the delivery timelines mentioned above	Want to know if the Bank intends to keep the inhouse Apps for DSA / RM or the Bank is open to look at Apps that comes OOTB (Out of the Box) with the CRM product	As per RFP and addendum
502	88 of 222	Annexure 12/ Sc	Section 3 says: PCB / Modular design.	Can you please elaborate on the statement of "Reuseable modules that can be composed and recomposed"	As per the RFP scope
503	88 of 222	Annexure 12/ Sc	RFP says " CRM must be able to leverage the Bank's Agentic AI framework and guardrails for use cases such as agent assist, auto-summarization, next-best-action, intelligent routing and guided service-to-sales prompts.".	Need more clarity on this. The proposed CRM already comes with a Agentic AI framework . So will the Bank be fine with leveraging the OOTB Agentic AI framework ?	As per RFP and addendum
504	88 of 222	Annexure 12/ Sc	Point 2 mentions Phased Migration / coexistence of Siebel.	Has there been any decision or whether Bank will continue with Siebel and Siebel will co-exist in the TO BE Architecture OR the Bank wants to <u>Sunset Siebel application</u>	Its bank discretion
505	88 of 222	Annexure 12/ Sc	Point 4 about Data, Knowledge and Analytics : The section speaks of Knowledge management capability for agents and branch staff (knowledge capture, curation, contextual surfacing, and governance) to support consistent resolutions and faster FCR	Want to know if the Bank has a repository of KM articles and whether the scope includes migrating the entire repository to the new CRM	As per RFP and addendum

506		Count of Users		Can you please share some high-level details on the following: 1) Approximate number of Sales users, Collection users and others who will use the CRM application for Lead and Opportunity Management, Collection management and so on. 2) Approximate number of users from the Service, Contact Center, and Grievance teams who will use the proposed CRM for service-related functionalities. Also a high level count of SR's/Incidents that are created on a monthly basis across all channels 3) Approximate total number of bank customers (this will help in estimating marketing communication volumes). 4) Number of Partners and Channel users who are not bank employees but work on behalf of the bank (excluding DSAs of BOB). 5) Approximate number of campaigns executed per month and the estimated volume of	Please refer RFP for volumetrics
507	90 of 222	Annexure 12/ Sc	RFP speaks of : AI/Agentic readiness using Bank framework: CRM must enable Bank-owned agentic AI to assist users (summaries, recommendations, drafting, next-best-action) and optionally execute actions with human-in-loop approvals, full audit trail and telemetry	Can you elaborate on the Bank's own Agentic AI framework ? Also is the Bank open to look at the Agentic AI framework that the CRM will provide OOTB ?	As per RFP and addendum
508	9	1.5 Disaster Recovery Mechanism	The bidder needs to submit the technical architecture relating to data replication between primary and secondary site	Requesting BoB, to remove this clause as this is not relevant for a SaaS service	No Change

509	14	1.11 Ownership, Grant and Delivery	C. To work as interface: (i) to work with other Application Software packages at the Bank as interface; (ii) to allow other application software packages at the Bank to work as interfaces to the Software. If such interfacing requires any modification or change to the Platform, such modification or change has to be carried out by the	Requesting BoB, to remove this clause as this is not relevant for a SaaS service, and this may be discussed with your Partner. But OEM is not liable to change the core product	as per RFP and addendum
510	62	Annexure 02 – Evaluation Terms	The solution should have been hosted in a public cloud with a single-tenancy architecture for scheduled commercial banks in India for a minimum of three years	Our Organisation SaaS services run on (OCI), which, like other public cloud platforms, operates in a multi-tenant model. However, Our Organisation SaaS uses customer-specific pods, application instances, databases, encryption keys etc. to logically separate each customer's data and workloads. This approach ensures strong isolation and security while following standard cloud best practices. Hence requesting BoB to remove this single tenancy clause	As per RFP and addendum
511	108		22. Bidder /CSP (Cloud Service Provider) should ensure that any data that is stored on the cloud is protected and appropriate policies and controls are put in place to provide data privacy and protection. The CSP should adhere to all laws pertaining to data privacy and protection that are applicable as per Gol, RBI and any other regulators. The CSP should also ensure that necessary enhancements are made to the services provided whenever there are changes sought either by the regulators or Government of India without any additional cost to the Bank	Requesting bank for further clarity and relaxation on the clause	As per RFP and addendum
512	189	2. IT Risk Management	2.3 The SP shall be subjected to the annual IT audit / Technology risk assessment process by an independent professional agency as approved by the	Requesting bank for further clarity and relaxation on the clause	No change

513	195	Annexure 21 – SERVICE LEVEL AND NON-DISCLOSURE AGREEMENT FORMAT	The solutions shall be designed in such a way that they cover all the divisions of the Bank's Data Centre i.e., Domestic, Foreign territories and its RRBs, associates, subsidiaries, having separate networks & all separate network segments of each . Bank at its discretion, may use and/or procure (any/all) solution / hardware and its licenses as per the same quoted rates for its RRBs, associates, subsidiaries upon arising the requirements for them	Customer's connectivity to SaaS services, are over the internet on TLS 1.3 encrypted network. Customer connects to the SaaS over this secure network. Requesting BoB to remove this clause	No change
514	Page 18	Scoring Criteria :	Scoring Criteria : The Bidder should have experience of implementing CRM Modules for which scoring will be done as given below Implementation of bidder all 6 module* of proposed CRM solution by themselves in -3- Scheduled	Total Marks mentioned is 25 points whereas the highest mark attainable is 15. Request to clarify.	No change
515	113		30. Bidder to provide dedicated Leased line from two different service providers from CSP DC and DR sites to Bank DC and DR sites . Bidder to provide link up to Bank's DC and DR router including CPE (Customer Premises Equipment), cross connect, SFP and cable laydown. 31. The link should be of minimum 500Mbps capacity . The successful bidder has to maintain link uptime in line with application uptime of 99.90%. 32. At any point in time, during the contract period, utilization of link should not cross 70%. In case link is utilized more than 70%, bidder to upgrade the link and associated hardware at no additional cost to the Bank.	Customer's connectivity to SaaS services, are over the internet on TLS 1.3 encrypted network. As the Bank is looking for a dedicated private connectivity , the Bank can opt for Oracle FastConnect SKU which facilitates private connectivity between our DC and customer's DC/corporate offices.	As per RFP and addendum
516	Page 14	1.11 Ownership, Grant and	(i) to copy the Software that operates on server systems to support the users of the Bank	Could you elaborate on which software to be copied in the context of a SaaS service deployed on Oracle's public cloud OCI?	As per RFP and addendum

517	Page 14	1.11 Ownership, Grant and Delivery	C. To work as interface: (i) to work with other Application Software packages at the Bank as interface; (ii) to allow other application software packages at the Bank to work as interfaces to the Software. If such interfacing requires any modification or change to the Platform, such modification or change has to be carried out by the Bidder free of any additional License charge or fees or expenses	For a SaaS service with built-in modules and existing APIs, if additional interfaces are required for system integration, the core SaaS will not be modified. Instead, any required changes or new APIs would be handled by the customer's System Integrator or Partner. Is this assumption correct?	As per RFP and addendum
518	Page 14	1.11 Ownership, Grant and Delivery	D. The grant of license by the Bidder herein shall be for processing the internal business of the Bank or its permitted affiliates and does not, without limitation, include the rights to reverse engineer, reverse compile or otherwise arrive at the source code of the Software nor does it include the rights to sell, lease, license, sublicense or otherwise transfer, convey or alienate	Could you clarify if this is applicable for a SaaS where the underlying source code is Oracle's intellectual property?	As per RFP and addendum
519	Page 133	1.13 Audit	32. At any point in time, during the contract period, utilization of link should not cross 70%. In case link is utilized more than 70%, bidder to upgrade the link and associated hardware at no additional cost to the Bank	N/A for SaaS - Could you confirm!	As per RFP and addendum
520	Page 133	K. Cloud Infrastructure	33. The CRM should support WAN optimization techniques to improve the performance of the application over wide-area networks, particularly for remote branches and users with limited bandwidth. The CRM should seamlessly integrate with Software-Defined WAN (SD-WAN) solution of the Bank for optimized and secure connectivity 24. between bank branches and application, ensuring	N/A for SaaS - Could you confirm!	As per RFP and addendum
521	Page 112		24. The Bidder or Bidder's CSP must ensure the presence of Runtime Application Self-Protection (RASP) or an equivalent control, along with strong data security practices.	could you elaborate on the specific RASP capabilities?	As per RFP and addendum
522	15	1.12 Escrow Mechanism	The Bank and the successful bidder shall agree to appoint an escrow agent to provide escrow mechanism for the deposit of the source code for the software product supplied / procured by the Bidder to the Bank in order to protect its interests in an	Requesting BoB, to remove this clause as this is not relevant for a SaaS service	As per RFP and addendum

523	Page 8	1.3 Project Scope	Considering the enormity of the assignment, any service which forms a part of the Project Scope that is not explicitly mentioned in scope of work as excluded would form part of this RFP, and the Bidder is expected to provide the same at no	Please consider finalizing the scope of work/ requirement for each module during the discovery and design phase in order to avoid any conflicts later	No Change
524	Page 9	1.6 Contract period	The contract will be deemed completed only when all the items and services contracted by the Bank are provided in good condition, implemented, tested and accepted along with the associated documentation provided to Bank's employees; as per the requirements of the contract executed between the Bank and the Bidder. The Bank will have the right to renegotiate these prices at the end of the contract period.	Could you please clarify on re-negotiating the prices at Contract end period ?	No Change
525	Page 16	1.13 Audit	Compliance with best security practices may be monitored periodically by computer security audits / Information Security Audits performed by or on behalf of the Bank. These audits may include, but are not limited to, a review of access and authorization procedures, backup and recovery procedures, network security controls and program change controls. The Bidder must provide the Bank access	Which parameters are being considered for Auditing purpose now and what tools are being used to monitor the performance ?	No Change
526	Page 178	Annexure 13 – Service Levels and Service Credits	d. There shall be no escalation for prices during the currency of 5 years contract period and any extension thereof. Bid submitted with an adjustable price quotation will be treated as non-responsive and will be rejected.. e. It is the responsibility of the Bidder to change or upgrade the licenses for ensuring the compliance to statutory, regulatory guidelines from RBI, TRAI, IRDA, NPCI, IBA etc. at no extra cost to the Bank.	For the duration of project implementation and support, fixed pricing can be done. Any additional requirements will go through the change management process and will be evaluated accordingly. Licensing will be determined and processed along with the OEM.	No Change

527	2	[A] Important Dates: Last Date of Submission of RFP Response (Closing Date)	24th February 2026 at 3.00 PM	Considering the vast and comprehensive scope of the RFP, we request the Bank to please grant us at least 3 weeks of extension to bid submission till 17th Marxh 2026	No Change
528	6	I. Technical Requirements: Infrastructure, Cloud and other CSP Requirements	Cloud support for seismic zones platform enable replication of critical data across different seismic regions, often using high-availability (HA) setups and multi-region architectures to mitigate risks from natural disasters.	Kindly confirm if having the DR site in a geographically separate location (e.g., >200 km apart) is acceptable even if within the same broad seismic zone.	DR should be in different Seismic Zone. For other details, please refer RFP and Addendum.
529	11	1.9 Payment Terms	75% of the licence fee shall be payable upon Go-Live acceptance, evidenced by an Acceptance Form duly signed and stamped by the Bank's authorized Project Manager and the Bidder's authorized representative	As the proposed CRM is a SaaS-based solution, licence consumption is based on the number of users provisioned at the time of deployment. We request the Bank to align the licence fee payment with the actual deployment of licences across Development, UAT, and Go-Live phases, given that full licence provisioning is typically required at Go-Live.	As per RFP and addendum
530	13	1.11 Ownership, Grant and Delivery	The bidder shall procure and provide a non-exclusive, non-transferable, perpetual licenses to the Bank for the solution to be provided as a part of this project. The Licenses for the solution should not be restricted	Does Bank of Baroda allow joint venture between professional services firm and OEM provider	As per RFP and addendum
531	13	1.11 Ownership, Grant and Delivery	The bidder shall procure and provide a non-exclusive, non-transferable, perpetual licenses to the Bank for the solution to be provided as a part of this project. The Licenses for the solution should not be restricted to use case	The RFP specifies the CRM solution will be delivered as a SaaS offering, and SaaS models typically do not provide for perpetual licensing. Request the Bank to kindly remove the reference to perpetual licenses as that is	As per RFP and addendum
532	17	2. Evaluation process B. Technical Bid Evaluation (Stage 2)	Implementation of bidder all 6 module* of proposed CRM solution by themselves in -3- Scheduled Commercial Bank out of which one should be in India	We request the Bank to please amend the clause as below: "Implementation of bidder/OEM all 6 module* of proposed CRM solution in -3- Scheduled Commercial Bank out of which one should be in	As per RFP and addendum
533	17	2. Evaluation process B. Technical Bid Evaluation (Stage 2)	Implementation of bidder all 6 module* of proposed CRM solution by themselves in -3- Scheduled Commercial Bank out of which one should be in India	We request the Bank to please amend the clause as below: "Implementation of bidder/OEM all 6 module* of proposed CRM solution in -3- Scheduled Commercial Bank out of which one should be in	As per RFP and addendum
534	63	Cloud Infrastruc	The proposed CRM should support a subscription (SaaS) model, hosted on cloud infrastructure compliant with RBI and MeitY guidelines (for India) with DR setup.	Please confirm if SaaS platform in India regions (e.g. Mumbai, Chennai) are acceptable for hosting, and whether MeitY empanelment suffices or if sovereign cloud is required.	As per RFP and addendum

535	64	Annexure 02 – Evaluation Terms A. Eligibility Criteria Compliance Sr No. C2d	The solution should have been hosted in a public cloud with a single tenancy architecture for scheduled commercial banks in India for a minimum of three years	We request the Bank to please consider multi-tenancy architecture in private cloud as the current clause disallows any CRM deployments on any of the major Hyperscalers in the market and only one local solution may fit the clause.	As per RFP and addendum
536	89	Siebel data migration	Phased data migration	Request the Bank to share the count of customer records, leads, service cases, and how many years of history need to be	Please refer RFP for volumetrics
537	89	Siebel data migration	Phased data migration	Please confirm if the historical leads and cases be stored as Archived data instead of live data	As per Bank's policy governed by regulatory
538	89	Siebel data migration	Phased data migration	We request the Bank to please enlighten us as to how during any transition phase, how will data entered in one system be reflected in the	The data migration is the scope of the bidder.
539	89	Siebel data migration	Phased data migration	Please clarify the expected coexistence period between Siebel and new CRM	At Bank discretion
540	91	Details of Existing CRM	The Bank is presently using Siebel CRM Version IP 16, an Oracle-based application. T	Please confirm whether Siebel CRM is hosted on-premises or cloud	Please refer RFP.
541	91	Details of Existing CRM application:	The Bank is presently using Siebel CRM Version IP 16, an Oracle-based application. T	Please confirm whether secure integration with the new CRM over the internet is acceptable during transition.	It will be decided by the bank considering the security aspects,.
542	92	Complaints Management	Complaint Creation through various channels (Website for the customers, internet banking ,Bobworld, Business correspondents, Branches, Contact Centre, social media, SMS Banking,	Please share expected daily/monthly complaint volumes and STP vs non-STP journey breakdown by channel (e.g. SMS, WhatsApp, ATM, IVR, Email).	Please refer RFP for volumetrics
543	97	B: Campaign Ma	Campaigns (of all types – mass email, voice, sms & others) should be created from CRM & should be able to link the campaign outcome /response so as to compute ROI of each campaign and conversion rate.	Kindly clarify if CRM solution will be integrated with banks vendor for SMS, Voice and other channels via Gateway	As per RFP and addendum
544	104	Data analytics & Forecasting	Understanding existing Lead Management Model and other Analytic models and recommend customisation required, if any, in those models for seamless	Kindly clarify if bank is using any BI tool currently	The proposed solution capable to integrate with Bank's internal systems.
545	104	Data analytics & Forecasting	Understanding existing Lead Management Model and other Analytic models and recommend customisation required, if any, in those models for seamless	We request the Bank to please share the current forecasting models in use at the Bank	The details will be shared with successful bidder
546	109	K. Cloud Infrastructure:	The solution will be implemented in a phased manner with prioritization to Metro and Urban branches initially and then extended to other centres/ branches subsequently. All the modules should be fully functional. 40000 users should be supported by the solution.	We request the Bank to please segregate the license requirement as per the module, viz. Lead Management, Campaign Management, Sales Management, Service Management and customer 360 degree, Complaint management, and Contact centre with IVR integration. As not all Marketing and Campaign users will use the Sales or Service Modules, or vice-versa, we request the license requirement to be	As per RFP and addendum

547	112	K. Cloud Infrastructure	29. Bidder to regularly conduct and provide results of fault tolerance testing, scalability testing and load balancing testing, every quarter or as per Bank's requirements, validating that the solution is: - able to scale horizontally (adding resources) and vertically (enhancing existing resources) to handle peak load scenarios without performance degradation. - able to provide consistent performance even under	Please share the expected peak load and performance criteria. Specifically: Peak concurrent users (e.g., during working hours, how many of the ~40k users might be online simultaneously).	Please refer RFP for the details
548	112	K. Cloud Infrastructure	29. Bidder to regularly conduct and provide results of fault tolerance testing, scalability testing and load balancing testing, every quarter or as per Bank's requirements, validating that the solution is: - able to scale horizontally (adding resources) and vertically (enhancing existing resources) to handle peak load scenarios without performance degradation. - able to provide consistent performance even under	Please share the expected peak load and performance criteria. Specifically: Throughput volumes: estimated daily/monthly number of leads, service requests, and interactions (emails, calls) to be handled by the CRM.	Please refer RFP for the details,
549	112	K. Cloud Infrastructure	29. Bidder to regularly conduct and provide results of fault tolerance testing, scalability testing and load balancing testing, every quarter or as per Bank's requirements, validating that the solution is: - able to scale horizontally (adding resources) and vertically (enhancing existing resources) to handle peak load scenarios without performance degradation. - able to provide consistent performance even under	Please share the expected peak load and performance criteria. Specifically: Any specific response time targets for user actions (for branch users or call center agents).	Please refer RFP for details.
550	113	K. Cloud Infrastructure:	Bidder to provide dedicated Leased line from two different service providers from CSP DC and DR sites to Bank DC and DR sites. Bidder to provide link up to Bank's DC and DR router including CPE (Customer Premises Equipment), cross connect, SFP and cable laydown.	Since the solution will be SaaS based solution, this point is not warranted, kindly confirm if this can be exempted	As per RFP and addendum
551	113	K. Cloud Infrastructure:	The link should be of minimum 500Mbps capacity. The successful bidder has to maintain link uptime in line with application uptime of 99.90%.	Since the solution will be SaaS based solution, this point is not warranted, kindly confirm if this can be exempted	As per RFP and addendum
552	113	K. Cloud Infrastructure:	At any point in time, during the contract period, utilization of link should not cross 70%. In case link is utilized more than 70%, bidder to upgrade the link and associated hardware at no additional cost to the	Since the solution will be SaaS based solution, this point is not warranted, kindly confirm if this can be exempted	As per RFP and addendum

553	113	K. Cloud Infrastructure:	The CRM should support WAN optimization techniques to improve the performance of the application over wide-area networks, particularly for remote branches and users with limited bandwidth. The CRM should seamlessly integrate with Software-Defined WAN (SD-WAN) solution of the Bank for optimized and secure connectivit between bank	Since the solution will be SaaS based solution, this point is not warranted, kindly confirm if this can be exempted	As per RFP and addendum
554	129	57 / 40	Social Media Complaints	Please confirm if the Bank has Social Media Engagement tool or the bidder is expected to quote for the same	The proposed solution capable to integrate with Bank's internal systems.
555	137	C. Service Management with Customer 360°	List of products	We request the bank to please provide the list of products that are being supported by current Siebel CRM system.	Please refer RFP.
556	137	C. Service Management with Customer 360°	List of products	We request the Bank to please share the mix in terms of Retail, SME, Corporate and Wealth as all the LoBs are mentioned.	As per the RFP scope.
557	155	G.Contact center with IVR Integration,	Ability to integrate with the IVR system and provide the agent desktop functionality which includes popping up a CRM screen while receiving incoming	We request the Bank to please clarify the CTI platform in use (Avaya, Cisco, etc.), and whether it is on-premises or cloud-based	The details will be shared with successful bidder
558	155	G.Contact center with IVR Integration,	Ability to integrate with the IVR system and provide the agent desktop functionality which includes popping up a CRM screen while receiving incoming	We request the Bank to please share the daily avg volume of the callcenter.	Please refer RFP for volumetrics
559	155	G.Contact center with IVR Integration,	Ability to integrate with the IVR system and provide the agent desktop functionality which includes popping up a CRM screen while receiving incoming	We request the Bank to please clarify if the Bidder has to migrate call log/call recordings from the provider to CRM.	As per the RFP scope, the bidder should size their solution.
560	9	1.5 Delivery		You have mentioned the Customer Relationship Management (CRM) Solution must be implemented as per project scope within -15- months in totality from the date of placing of purchase order by the Bank. Can the Bidder propose revised timeline based on the scope of work	No change
561	10	1.5 Payment Terms		You have mentioned 75% of the license fee to be paid up-on go live acceptance. Please confirm if this is related to Phase 1 Go live or Phase 2 go live.	As per RFP and addendum

562	10	1.5 Payment Terms		You have mentioned the remaining 25% of the license fee to be paid upon successful adoption of the module. Since there are 2 go live plans with different modules, please elaborate the payment plan with respect to Module delivery and adoption	As per RFP and addendum
563	10	1.5 Payment Terms		We request you consider 100% of the payment of license fee In the beginning of the Implementation	As per RFP and addendum
564	12	1.5 Payment Terms(Implementation & Integration Cost)		You have mentioned 50% Implementation cost to be paid after UAT, 25% after go-live assistance and 25% after successful adoption plan signoff. We request you to consider to revise the payment plan to be paid during different milestones such as Team mobilization, Requirement signoff, Design sign off, Development completion, Release of UAT and	As per RFP and addendum
565	12	1.5 Payment Terms(Implementation & Integration Cost)		In the payment terms for each phase, you have mentioned 25% implementation cost after successful adoption plan signoff in the form of Final Acceptance. Kindly elaborate the successful adoption criteria.	As per RFP and addendum
566	12	Integration charges(Contract center)		Can you elaborate what you mean by Integration charges and what is the expectation from the Bidder	As per RFP and addendum
567	12	Customization charges		You have mentioned about the customization charges, please clarify if this is separate from the Implementation cost. Also is this related to 500 man-days of effort as mentioned in Annexure 15-Commercial Bid	As per RFP and addendum
568	15	1.12(Escrow Mechanism)		The RFP states the source code must be deposited under escrow, but in SAAS model the Bidder may not own the platforms base code, what is expected from the Bidder on the Escrow arrangement. Please elaborate	As per RFP and addendum
569	15	1.12(Escrow Mechanism)		You have mentioned the cost for the Escrow will be borne by the Bidder, Please elaborate what are the cost components and	As per RFP and addendum

570	15	1.12(Escrow Mechanism)		You have mentioned the selected bidder to provide detailed code documentation, Please clarify the expectation on the code documentation from the Bidder.	As per RFP and addendum
571	16	1.13(Audit)		We would need to understand detailed requirements related to Audit. Please provide	No change
572	18	2(Scoring criteria)		You have asked for minimum 6/5/4/3 modules of the proposed CRM solution implemented with scheduled commercial banks. Please clarify if all the modules are implemented with a single Bank or the modules were implemented across multiple	As per RFP and addendum
573	18	2(Scoring criteria)		You have mentioned the Scheduled Banks should have at least 1500 branches, Request you provide flexibility on the number of branches for scheduled commercial banks in	As per RFP and addendum
574	64	Eligibility Criteria		You have mentioned "The solution should have been hosted in public cloud with Single tenant architecture' for scheduled commercial banks. Please confirm if Single tenant architecture is a mandate or you can consider multi tenant platform architecture	As per RFP and addendum
575	64	Eligibility Criteria		Bidder should have implemented at least 3 modules out of 6 proposed modules in one or more scheduled commercial banks in India having 1500 branches and 5000 licensed users. a. Kindly request you to consider at least one module out of the 6 proposed modules and flexibility on the number of Branches instead of 1500 to meet the eligibility criteria	As per RFP and addendum
576	2	Last date of RFP submission		We request you to consider 3 weeks of extension for the submission of the RFP	As per RFP and addendum
577	94	H) Integration with Existing Applications & Systems:		IVR is not listed in the list of integrations. Which IVR system is being currently used? Please clarify whether Contact Center with IVR integration is optional or mandatory for Phase-1	It's listed in the core module section. To be implemented as per the RFP scope in later phase. Please refer RFP scope

578	94	H) Integration with Existing Applications & Systems:		Are Wealth Management, Partner & Channel Management, and Collections Management all required in the initial rollout or can be planned in a phased manner?	Please refer RFP and addendum for phase wise details.
579		E) Service Module- Customer 360 degree and Service		It is mentioned that new system should have ability to design 50 more service requests - Does this mean that total 75 service requests are to be designed or is this just an upper cap of the service requests?	The bidder should size their solution as per the RFP scope .
580	92, 95	B) Complaint Management Module A. Complaint Management:		The assumption is that the customer-facing portals and mobile apps are already available and only to be upgraded for tracking of statuses of the service request. The upgrade or revamping of the portals in not part of the scope of this RFP. Kindly correct if this assumption is incorrect.	As per RFP and addendum
581	89	Annexure 12 – Siebel CRM Migration		Kindly provide data volume details to be migrated from Siebel? Customers Contacts Products Complaints/Service Requests Leads Interactions/Activities Emails Attachments	Please refer RFP and addendum for volumetrics
582	89	Annexure 12 – Siebel CRM Migration		Is historical data migration required for all objects like Leads, cases, Activities, campaigns, etc. or is there a cap on the historical data required to be migrated?	The entire data migration is the scope of the bidder.
583	106	J. Data Management and		Which middleware is currently available in the bank?	The details will be shared with successful bidder
584	88	5. Agentic AI Readiness		What exactly is meant by Bank's Agentic AI framework? Can you elaborate? Is this built internally or built in collaboration with some agentic platform?	As per RFP and addendum

585	88	5. Agentic AI Readiness		Is the expectation to only integrate with internal Agentic AI or can the bidder build models using the AI framework available within the CRM platform?	As per RFP and addendum
586	88	5. Agentic AI Readiness		Any prioritization of AI specific use cases like summarization, replies, next best actions, service agents, etc.	As per RFP and addendum
587	87	Annexure 12 – Scope of Work		Can you kindly review and confirm the list of the business units to which the scope of this implementation caters to? Retail Assets Liabilities MSME Large corporates DSA DST Supply Chain Govt business Agriculture Wealth management	As per the RFP scope. Please refer RFP.
588	87	Annexure 12 – Scope of Work		Can you kindly provide different types of roles of the users who would be the users of CRM along with the current number of users across each role?	The details will be shared with successful bidder
589	111	Regular VAPT, API Assessment, customized Source Code (related to Bank) audit certified by a CERT-IN		Assumption is that the vendor for VAPT, API assessment, wt.. Will be empaneled by the bank and the bidder is not responsible for the same. Kindly confirm?	No change
590	111			Can you confirm on the frequency of these security audits?	As per the Bank's requirement.
591	9	1.5. Delivery		Is there a flexibility to move the modules within the phases depending on the nature of the work during the project planning or are these modules fixed?	No change

592	9	1.5. Delivery		Is the rollout strategy defined? Would the roll out be done across all business units for common modules or would that be defined	No change
593	89	7. Siebel CRM Migration		What is the volume of data migration to the new CRM solution from your existing Siebel CRM application or any other application. Please elaborate the objects and volumetrics	Please refer RFP for volumetrics
594	89	7. Siebel CRM Migration		What is the BOB plan and timeline for the decommissioning/phasing out Siebel CRM	It will be decided by the bank on the successful
595	89	7. Siebel CRM Migration		What is the BOB policy on archival and data retention	As per the Bank's requirement.
596	92	C) Lead Management Module		Physical channel based Journey through Branches in CRM application. Is this referencing to Assisted journey through bank	As per the RFP scope.
597	93	C) Lead Management Module		Please elaborate on the current functionality with respect to SMS/Missed call based functionality for the Customers	The details will be shared with successful bidder
598	93	C) Lead Management Module		Please let us know the details of LLPS and how it is currently integrated for STP loan	The details will be shared with successful bidder
599	93	G) CRM Mobile App- Lead Management Module		Please provide details of "CRM Mobile app" which is developed in-house and used for Lead management for - Retail assets, Liabilities, Wealth management, Credit card with features like lead creation, status tracking and Lead dashboard.	The details will be shared with successful bidder
600	93	G) CRM Mobile App- Lead Management Module		How is the in-house Mobile app accessed at field level if there is network or offline issues	The details will be shared with successful bidder
601	93	G) CRM Mobile App- Lead Management Module		Please provide details of RM360 mobile app which is developed in-house for corporates which is required to be integrated with to be CRM application.	The details will be shared with successful bidder
602	92	B) Complaint Management Module		Can you please elaborate more on text mining and NLP scope for processing the queries received through channels mentioned.	As per RFP scope
603	90	10. Functional Requirements – Common Capabilities - Knowledge management		How many Existing/New Knowledge articles present/required? Who is the audience responsible for the creation, approval, and maintenance of this knowledge articles.	As per RFP and addendum

604	90	10. Functional Requirements – Common Capabilities - Knowledge management		Is regional language support for knowledge articles expected and part of the scope?	As per RFP scope
605	126	14. The solution should be capable to process and effectively manages to resolve customer complaints by registration across various channels like email, website, Internet banking, BOBworld, Contact center, Branch, chatbot, SMS Banking,		What is the expected volume or functionality needed for Bot sessions? What is the specific type of support being offered (P1, P2, P3)?	Please refer RFP for volumetrics .specific type of support being offered- As per the RFP scope.
606	132	5. Ability to integrate with social media platform		what is the expectation from the integration? Is it to run custom audience campaigns or tracking social responses?	The proposed solution must capable to integrate with Bank's social media platform. The details is as part of the
607	133	9. IVR integration for outbound		which IVR solution is being used at the bank? Real time response will depend upon the APIs provided by the IVR solution as well	The proposed solution must capable to integrate with Bank's internal system.
608	134	17 Integrated segmentation Wizard		Kindly elaborate the requirement	The details will be shared with successful bidder
609	135	23 budgeting & costing part		Kindly elaborate the requirement	The details will be shared with successful bidder

610	9	1.5 Disaster Recovery Mechanism	The bidder needs to submit the technical architecture relating to data replication between primary and secondary site	Requesting BoB, to remove this clause as this is not relevant for a SaaS service	No change
611	14	1.11 Ownership, Grant and Delivery	(i) to copy the Software that operates on server systems to support the users of the Bank	Requesting BoB, to remove this clause as this is not relevant for a SaaS service	As per Addendum
612	14		C. To work as interface: (i) to work with other Application Software packages at the Bank as interface; (ii) to allow other application software packages at the Bank to work as interfaces to the Software. If such interfacing requires any modification or change to the Platform, such modification or change has to be carried out by the Bidder free of any additional License charge or fees or expenses	Requesting BoB, to remove this clause as this is not relevant for a SaaS service, and this may be discussed with your Partner. But OEM is not liable to change the core product	As per Addendum
613	15	1.12 Escrow Mechanism	The Bank and the successful bidder shall agree to appoint an escrow agent to provide escrow mechanism for the deposit of the source code for the software product supplied / procured by the Bidder to the Bank in order to protect its interests in	Requesting BoB, to remove this clause as this is not relevant for a SaaS service	As per Addendum
614	16	1.13 Audit	All Bidder records with respect to any matters covered in this RFP shall be made available to auditors and or inspecting officials of the Bank and/or Reserve Bank of India and/or any regulatory authority, at any time during normal business hours, as often as the Bank deems necessary, to audit, examine, and make excerpts or transcripts of all relevant data. Said records are subject to	Our Organization DPA(Data Processing Agreement) grants audit rights to the customer and/or their auditors, subject to prior formal notice. Audits cannot be conducted at any time, as they require advance planning, coordination, and internal management by Our Organization. Requesting BoB, to remove this clause as this	No change
615	18	2. Evaluation process	Compliance with regulatory and Gov. regulation & Master direction , Data Privacy (DPDP) & Security	Master direction: It has been withdrawn and no longer relevant https://website.rbi.org.in/web/rbi/-/notifications/master-direction-on-outsourcing-of-information-technology-	As per Addendum
616	25	3.1 General Terms and conditions	i) Standards: All standards to be followed will adhere to Bureau of Indian Standards (BIS) specifications or other acceptable standards (IS 17802:2021)	Our Organization SaaS aligns with multiple global standards such as NIST, ISO, and SOC standards. Hence, requesting BoB to remove	No change

617	54		The Service provider shall ensure that it is complying with all the directions and clauses as stated in the said circulars: a) RBI/2023-24/102 DoS.CO.CSITEG/SEC.1/31.01.015/2023-24 dated 10.04.2023 regarding Master Direction on Outsourcing of Information Technology Services b) RBI/2023-24/107	Note: The Master Direction on IT Outsourcing has been withdrawn, hence no more applicable https://website.rbi.org.in/web/rbi/-/notifications/master-direction-on-outsourcing-of-information-technology-	As per Addendum
618	59	Annexure 01 – Guidelines for submission details and E-tendering	Letter of Undertaking from Bidder and OEM/ OSD on Compliance to RBI Master Direction on Outsourcing of IT Services RBI/2022-23/xx DoS.CO.CSITEG/SEC.xx/31.01.015/2022-23 Dated 23rd June 2022	N/A - The Master Direction on IT Outsourcing has been withdrawn, hence no longer applicable https://website.rbi.org.in/web/rbi/-/notifications/master-direction-on-outsourcing-of-information-technology-services-12486 Requesting BoB to remove this clause	As per Addendum
619	62	Annexure 02 – Evaluation Terms	The solution should have been hosted in a public cloud with a single-tenancy architecture for scheduled commercial banks in India for a minimum of three years	Our Organisation SaaS services run on (OCI), which, like other public cloud platforms, operates in a multi-tenant model. However, Our Organisation SaaS uses customer-specific pods, application instances, databases, encryption keys etc. to logically separate each customer's data and workloads. This approach ensures strong isolation and security while following standard cloud best practices. Hence requesting BoB to remove this single tenancy clause	As per Addendum
620	89	Annexure 12 – Project Scope	According to Digital Personal Data Protection (DPDP) Rules, 2025, Establish a comprehensive framework for processing digital personal data, empowering users with rights over their data and requiring strict compliance from fiduciaries regarding consent, data breaches, and child data protection	Requesting bank for further clarity and relaxation on the clause	No change

621	105	Technical Requirements: Infrastructure, Cloud and other CSP Requirements	1. The proposed CRM Solution shall be configured, deployed On-Cloud under SaaS based model, and managed to meet security, privacy, legal, ethical and compliance requirements of the Bank.	Will need clarity on the Compliance requirements of the Bank	No change
622	108		22. Bidder /CSP (Cloud Service Provider) should ensure that any data that is stored on the cloud is protected and appropriate policies and controls are put in place to provide data privacy and protection. The CSP should adhere to all laws pertaining to data privacy and protection that are applicable as per Gol, RBI and any other regulators. The CSP should also ensure that necessary enhancements are made to the services provided whenever there are	Requesting bank for further clarity and relaxation on the clause	No change
623	108		15. As per the Digital Personal Data Protection (DPDP) Rules , 2025, notified by India's Ministry of Electronics and Information Technology (MeitY), establish a comprehensive framework for processing digital personal data, empowering users with rights over their data and requiring strict compliance from	Requesting bank for further clarity and relaxation on the clause	No change
624	109		3. The platform should use Micro-services based architecture using kubernetes or equivalent orchestration for scalability. The solution must utilize Docker or equivalent technology to package microservices, ensuring the solution can be consistently deployed across various environments (development, testing, production). The bidder must provide detailed architecture diagrams of the proposed solution, showing how all components of	This is not relevant for a Service offered under a subscription based SaaS model with SLAs and managed by the CSP. Requesting BoB to remove this clause	No change
625	109		7. The response time at server end should be always be less than 200 milli second . During the agreement period, if at any stage, it is found that the Platform provided by the Bidder is not able to give the requisite performance as per the sizing parameters (i.e., up time above 99.90% and response time < 1 seconds), the Bidder shall have to provide additional	Request the bank to provide more clarity on this requirement	No change

626	110		13. Bidder should assess the compliance level of SaaS based application vis-à-vis guidelines stipulated by Bank / regulatory / statutory body, through a CERT-IN certified auditors and submit assessment report/ audit certificate to Bank on quarterly basis or as per Bank's requirements	Oracle provides the third-party SOC reports on an annual basis which satisfies the need of our other public sector / Banking customers. Requesting BoB to rmeove this clause	No change
627	110		11. Bidder, its solution and Bidder's CSP must comply with bank's policies on cloud adoption, cyber security, information technology, information security, etc., • RBI guidelines on Outsourcing of IT Services, Data Storage and handling, Information Technology Governance, Risk, Controls and Assurance Practices, etc. • India's IT act and amendments, Security and Data Protection regulations such as proposed Digital Personal Data Protection Bill, any India's statutory and regulatory requirements. • Any other IT security/data protection & privacy policies, guidelines, regulations etc issued by Bank, Regulators, Government of India from time to time during the contract period	This will need more detailed discussion on understanding Bank's cloud adoption policies	No change
628	110		13. Bidder should assess the compliance level of SaaS based application vis-à-vis guidelines stipulated by Bank / regulatory / statutory body, through a CERT-IN certified auditors and submit assessment report/ audit certificate to Bank on quarterly basis or as per Bank's requirements.	Our Organisation provides the third-party SOC reports on an annual basis which satisfies the need of our other public sector / Banking customers. Requesting BoB to rmeove this clause	No change

629	110		16. As and when Bank requests, bidders should provide the following certificates/proof from third party vendor/ bidder / CSP providers for their systems: • Regular VAPT, API Assessment, customized Source Code (related to Bank) audit certified by a CERT-IN empanelled auditor. • A Secure Software Development Lifecycle (Secure SDLC) must be followed by the bidder for all applications throughout their lifecycle, with a security assurance certificate provided accordingly. • All security controls of the CSP should be monitored/ audited by bidder/OEM and report of the same to be shared with the bank. • Regular Hardening of System preferably CIS Benchmark, System & Application Patching to latest release patches and security updates. • Adhering to NIST (especially 800-53) and CSF (Cyber Security Framework) standard best practices. • Monitoring CERT-IN released advisories and fixing applicable vulnerabilities.	Our Organisation continuously monitors relevant security advisories and manages vulnerabilities in accordance with its global security and patch management processes. However, Oracle does not commit to tracking or remediating advisories issued by any specific external agency on a one-to-one basis; remediation is addressed based on risk assessment, applicability to the service, and Oracle's standard update cycle. Requesting BoB to remove this clause	No change
630	111		21. The bidder must have a documented patch management practice in place, ensuring that security patches and upgrades are applied promptly to the product and cloud infrastructure. The bidder must provide a certificate of assurance to the Bank every quarter, confirming that the latest patches have been applied and the infrastructure is secure.	Requesting BoB to remove this clause	No change

631	111		18. ISO 27001, ISO 22301 certification • ISO 27017 (Cloud Security Management Certified) • ISO/IEC 27018 (Personal Data in Cloud Certified) or similar certification • ISO/IEC 27701 PIM (Privacy Information Management) certified or similar certification • ISMS (Information Security Management System) • ISAE (International Standard on Assurance Engagements) 3402. • Meet the Cloud Security Alliance Cloud Controls Matrix and compliance with CSA Star CCM • RBI and Government of India guidelines and mandates on Cloud Computing GDPR compliance • CERT-In guidelines as and when they are released and become applicable	Our Organisation SaaS is aligned with CSA Star, ISO 27001, 27017, 27108, 27701, ISMS (ISO 27001 implemented on ISO 27002). Further, Oracle CRM and Service aligns with ISAE 3401 for SOC 1. - RBI & Government of India Guidelines: The Master Direction on IT Outsourcing has been withdrawn, hence no more applicable https://website.rbi.org.in/web/rbi/-/notifications/master-direction-on-outsourcing-of-information-technology-services-12486 - CERT-In Guidelines as and when they are released and become applicable: Oracle SaaS follows the Oracle corporate security practices Requesting BoB to remove these two above clauses	No change
632	112		24. The Bidder or Bidder's CSP must ensure the presence of Runtime Application Self-Protection (RASP) or an equivalent control, along with strong data security practices.	Could you elaborate on this and specifically mention which runtime application self-protection is being referred here?	As per RFP and addendum
633	112		27. The CASB (Cloud Access Security Broker) security controls need to be enforced from cloud standpoint. In case the solution is not covered by CASB, the CSP should offer CWP (Cloud Workload Protection) compatibility and offer points engineering solution. Appropriate security controls/components from the cloud orchestration layer has to be made available by default as per Bank policy/Regulatory Guidelines at no additional cost to the Bank. Bidder to submit Security Architecture diagram to Bank as part of technical bid detailing all the security components.	Our Organisation SaaS is secured using a defense-in-depth architecture with multiple layered controls. While a CASB is not used within the managed SaaS environment, native security controls such as perimeter security, network monitoring, and vulnerability scanning provide equivalent protection. These controls collectively enable continuous threat detection and risk mitigation in line with industry-recognized cloud security practices. Requesting BoB to remove this clause	No change

634	112		29. Bidder to regularly conduct and provide results of fault tolerance testing, scalability testing and load balancing testing, every quarter or as per Bank's requirements, validating that the solution is: - o able to recover seamlessly from failures - o able to scale horizontally (adding resources) and vertically (enhancing existing resources) to handle peak load scenarios without performance degradation. - o able to provide consistent performance even under high usage scenarios, such as during peak load	As a CSP-managed SaaS service, fault tolerance, scalability, and load-balancing testing are performed as part of Our Organisation standard platform operations, not on a customer-specific or quarterly basis. These capabilities are contractually assured through defined SLAs such as uptime, RPO, and RTO commitments. Requesting BoB to remove this clause	No change
635	113		30. Bidder to provide dedicated Leased line from two different service providers from CSP DC and DR sites to Bank DC and DR sites. Bidder to provide link up to Bank's DC and DR router including CPE (Customer Premises Equipment), cross connect, SFP and cable laydown. 31. The link should be of minimum 500Mbps capacity. The successful bidder has to maintain link uptime in line with application uptime of 99.90%. 32. At any point in time, during the contract period, utilization of link should not cross 70%. In case link is utilized more than 70%, bidder to upgrade the link and associated hardware at no additional cost to the Bank.	Customer's connectivity to SaaS services, are over the internet on TLS 1.3 encrypted network. As the Bank is looking for a dedicated private connectivity, the Bank can opt for Oracle FastConnect SKU which facilitates private connectivity between our DC and customer's DC/corporate offices.	As per RFP and addendum
636	114			Use of dedicated DLP tool, File Integrity monitoring, API Gateway are not used for	As per RFP and addendum
637	115		b. Bidder to Implement automated monitoring tools and systems to track the platform's health, uptime, and response times. Bank's Team also to be given login for dashboard access for checking of the audit logs and security events if required	This is not a relevant ask for a SaaS service where CSP is managing the infra. Requesting BoB to remove this clause	No change

638	116	51. Contracts and Continuity	a. Bidder to support in deporting/export of data from cloud to on-premises or cloud to cloud migration on termination of contract at no additional cost to the bank. Bidder to handover entire Bank's CRM data along with data dictionary as per Bank's requirements, at the time of deporting data from cloud. c. The CSP should provide access to their IT infrastructure as and when required for audit from security perspective which may also include visits at short notice to ensure Bank's data are not misused and to review IT controls of Cloud Service Provider.	Our Organisation DPA(Data Processing Agreement) grants audit rights to the customer and/or their auditors, subject to prior formal notice. Audits cannot be conducted at any time, as they require advance planning, coordination, and internal management by Our Organisation. Requesting BoB, to remove this clause as this needs formal prior notice	No change
639	176	Penalty due to application downtime		We offer: • 10%: < 99.9% but > 99.5% • 15%: <= 99.5% but > 99.0% • 25%: <= 99.0% but > 95.0% • 100%: <= 95.0% in the applicable calendar month Requesting BoB to remove the clause	No change
640	187		We hereby agree to comply with the Information and cyber security controls as per Bank's and Regulatory Authorities IT Security Guidelines on an ongoing basis and regulatory / legal guidelines and directives related to SP / outsourcing issued by regulators / legal entities from time to time. The SP shall provide access to the regulators, legal authorities, Bank and Bank appointed auditors for on-site/off-site supervision.	We maintains a comprehensive, regulator-aligned information and cyber security framework that is continuously updated to address evolving regulatory and legal requirements. Our SaaS services operate under mature internal security controls, governed by global policies, secure-by-design architecture, and continuous monitoring. Our organization is independently audited and holds internationally recognized certifications (such as ISO/IEC 27001, SOC 1/2, and related standards), demonstrating ongoing compliance. These controls collectively ensure sustained alignment Requesting BoB to remove this clause	no change

641	189	2. IT Risk Management	2.3 The SP shall be subjected to the annual IT audit / Technology risk assessment process by an independent professional agency as approved by	Requesting bank for further clarity and relaxation on the clause	no change
642	195	Annexure 21 – SERVICE LEVEL AND NON-DISCLOSURE AGREEMENT FORMAT	The solutions shall be designed in such a way that they cover all the divisions of the Bank's Data Centre i.e., Domestic, Foreign territories and its RRBs, associates, subsidiaries, having separate networks & all separate network segments of each. Bank at its discretion, may use and/or procure (any/all) solution / hardware and its licenses as per the same quoted rates for its RRBs, associates, subsidiaries upon arising the requirements for them	Customer's connectivity to SaaS services, are over the internet on TLS 1.3 encrypted network. Customer connects to the SaaS over this secure network. Requesting BoB to remove this clause	no change
643	211	29. INFORMATION OWNERSHIP	All information processed, stored, or transmitted by Service provider equipment belongs to the Bank. By having the responsibility to maintain the equipment, the Service provider does not acquire implicit access rights to the information or rights to redistribute the information. The Service provider understands that civil, criminal, or administrative	This is a very broad statement and is prone to interpretation. Requesting BoB to remove this clause	no change
644	213	35. Incident Response and Management	any cybersecurity incident. They must have written incident response procedures including the roles of staff/outsourced staff handling such incidents; Response strategies shall consider readiness to meet various incident scenarios based on situational awareness and potential/post impact, consistent communication and coordination with stakeholders, including specifically the bank, during response. Service provider shall report all cyber incidents to the Bank immediately upon detection (if applicable).	Our Organisation follows a structured incident response process that ensures timely containment, impact assessment, and verified information collection before external communication. Accordingly, We contractually commits to a 24-hour notification timeline for confirmed security breaches, which aligns with industry best practices and enables clear, accurate, and actionable disclosure.	no change

645	213	36. IT Risk Management	The Service Provider shall assist the Bank in adhering to compliance guidelines of the regulatory authorities and facilitate Bank from time to time. The Service Provider shall conform to the security practices and procedures laid down in the Information Technology Act 2000 as amended by the information Technology (Amendment) Act 2008 (IT Act and IT Amendment Act) and the information Technology (Reasonable Security Practices and	Requesting bank for further clarity and relaxation on the clause	no change
646	220	Annexure 20 – Software Bill of Materials (SBOM)	All the software supplied to the Bank or developed for the Bank must be accompanied by a complete SBOM. The SBOM of the software supplied to the Bank or developed for the Bank must include the data fields mentioned below. In addition, the Software OEM/Owner/Vendor must ensure that:	This is not a relevant ask for a SaaS service managed by Our Organisation. Requesting BoB to remove this clause	no change
647	Page 64	Eligibility Criteria	Bidder should have implemented at least 3 modules out of 6 proposed modules* in one or more Scheduled Commercial Bank in India, having minimum 1,500 branches as on date of RFP, with minimum of 5,000 licensed users on CRM Platform.	Request bank to change this clause to: Bidder/OEM should have implemented at least 3 modules out of 6 proposed modules* in one or more Scheduled Commercial Bank in India, having minimum 500 branches as on date of RFP, with minimum of 2,500 licensed users on	As per Addendum
648	Page 13 /	1.11 Ownership, Grant and Delivery	1.11 Ownership, Grant and Delivery The bidder shall procure and provide a non-exclusive, non-transferable, perpetual licenses to the Bank for the solution to be provided as a part of this project. The Licenses for the solution should not be restricted to use case. The Bank can use the solution at any of its overseas branches / offices and locations and present & future RRBs without restriction and use of software by service providers on behalf of the Bank would be considered as use thereof	Request bank to share further clarity on the license modality.	As per Addendum

649	Page 18	Scoring Criteria :	Scoring Criteria : The Bidder should have experience of implementing CRM Modules for which scoring will be done as given below Implementation of bidder all 6 module* of proposed CRM solution by themselves in -3- Scheduled	Total Marks mentioned is 25 points whereas the highest mark attainable is 15. Request to clarify.	As per Addendum
650	8 of 222	1.3 - Project Scope	Section says : Considering the enormity of the assignment, any service which forms a part of the Project Scope that is not explicitly mentioned in scope of work as excluded would form part of this RFP, and the Bidder is expected to provide the same at no additional cost to the Bank. The Bidder needs to consider and envisage all the services that would be required in the Scope and ensure the same is delivered to the Bank. The Bank will not accept any plea of the Bidder at a later date for omission of services on the pretext that the same was not explicitly mentioned in the RFP	While the Bidder understands the intent of the clause to ensure completeness of delivery, it is practically difficult to take responsibility for services that are not documented or reasonably inferable from the stated scope. Request the Bank to confirm that the Bidder's responsibility shall be limited to services explicitly mentioned in the RFP or those reasonably required to fulfil the documented scope, and that any materially new requirements will be addressed via a formal change request.	As per Addendum
651	9 of 222	1.5	RFP says : Bank is already using inhouse apps for DSA, RMs and also having 3rd party integration with different modules. The same need to be migrated within above mentioned timelines. The solution as per the required scope needs to be rolled out as per the delivery timelines mentioned above.	Want to know if the Bank intends to keep the inhouse Apps for DSA / RM or the Bank is open to look at Apps that comes OOTB (Out of the Box) with the CRM product	As per RFP and addendum
652	88 of 222	Annexure 12/ Scope	Section 3 says: PCB / Modular design.	Can you please elaborate on the statement of "Reuseable modules that can be composed and recomposed"	As per the RFP scope

653	88 of 222	Annexure 12/ S	Section 4 says : Support multimodal/structured and unstructured data references (notes, attachments, call/chat transcripts) with retention and privacy controls.	Need more clarity on this	As per the RFP scope
654	88 of 222	Annexure 12/ S	RFP says " CRM must be able to leverage the Bank's Agentic AI framework and guardrails for use cases such as agent assist, auto-summarization, next-best-action, intelligent routing and guided service-to-sales prompts." .	Need more clarity on this. The proposed CRM already comes with a Agentic AI framework . So will the Bank be fine with leveraging the OOTB Agentic AI framework ?	As per RFP and addendum
655	88 of 222	Annexure 12/ S	Point 2 mentions Phased Migration / coexistence of Siebel.	Has there been any decision or whether Bank will continue with Siebel and Siebel will co-exist in the TO BE Architecture OR the Bank wants to Sunset Siebel application	It's bank discretion.
656	88 of 222	Annexure 12/ S	Point 4 about Data, Knowledge and Analytics : The section speaks of Knowledge management capability for agents and branch staff (knowledge capture, curation, contextual surfacing, and governance) to support consistent resolutions and faster FCR.	Want to know if the Bank has a repository of KM articles and whether the scope includes migrating the entire repository to the new CRM	Bidder may require to create additonal process and artifacts to support the requirements of the RFP
657	90 of 222	Annexure 12/ S	RFP speaks of : AI/Agentic readiness using Bank framework: CRM must enable Bank-owned agentic AI to assist users (summaries, recommendations, drafting, next-best-action) and optionally execute actions with human-in-loop approvals, full audit trail and telemetry.	Can you elaborate on the Bank's own Agentic AI framework ? Also is the Bank open to look at the Agentic AI framework that the CRM will provide OOTB ?	As per RFP and addendum

658		Count of Users		Can you please share some high-level details on the following: 1) Approximate number of Sales users, Collection users and others who will use the CRM application for Lead and Opportunity Management, Collection management and so on. 2) Approximate number of users from the Service, Contact Center, and Grievance teams who will use the proposed CRM for service-related functionalities. Also a high level count of SR's/Incidents that are created on a monthly basis across all channels 3) Approximate total number of bank customers (this will help in estimating marketing communication volumes). 4) Number of Partners and Channel users who are not bank employees but work on behalf of the bank (excluding DSAs of BOB). 5) Approximate number of campaigns executed per month and the estimated volume of communications	As per RFP and addendum
659	Page 14	1.11 Ownership, Grant and	(i) to copy the Software that operates on server systems to support the users of the Bank	Could you elaborate on which software to be copied in the context of a SaaS service deployed on Oracle's public cloud OCI?	As per RFP and addendum
660	Page 14	1.11 Ownership, Grant and Delivery	C. To work as interface: (i) to work with other Application Software packages at the Bank as interface; (ii) to allow other application software packages at the Bank to work as interfaces to the Software. If such interfacing requires any modification or change to the Platform, such modification or change has to be carried out by the Bidder free of any additional License charge or fees or expenses	For a SaaS service with built-in modules and existing APIs, if additional interfaces are required for system integration, the core SaaS will not be modified. Instead, any required changes or new APIs would be handled by the customer's System Integrator or Partner. Is this assumption correct?	As per RFP and addendum

661	Page 14	1.11 Ownership, Grant and Delivery	D. The grant of license by the Bidder herein shall be for processing the internal business of the Bank or its permitted affiliates and does not, without limitation, include the rights to reverse engineer, reverse compile or otherwise arrive at the source code of the Software nor does it include the rights to sell, lease, license, sublicense or otherwise	Could you clarify if this is applicable for a SaaS where the underlying source code is Oracle's intellectual property?	As per RFP and addendum
662	Page 15	1.12 Escrow Mechanism	The Bank and the successful bidder shall agree to appoint an escrow agent to provide escrow mechanism for the deposit of the source code for the software product supplied / procured by the Bidder to the Bank in order to protect its interests in	Is this relevant for a SaaS service, where the source code is the intellectual property of the SaaS provider?	As per addendum
663	Page 133	1.13 Audit	32. At any point in time, during the contract period, utilization of link should not cross 70%. In case link is utilized more than 70%, bidder to upgrade the link and associated hardware at no additional cost to the	N/A for SaaS - Could you confirm!	As per RFP and addendum
664	Page 133	K. Cloud Infrastructure	33. The CRM should support WAN optimization techniques to improve the performance of the application over wide-area networks, particularly for remote branches and users with limited bandwidth. The CRM should seamlessly integrate with Software-Defined WAN (SD-WAN) solution of the Bank for optimized and secure connectivity 34. between bank branches and application,	N/A for SaaS - Could you confirm!	As per RFP and addendum
667	Page 112		24. The Bidder or Bidder's CSP must ensure the presence of Runtime Application Self-Protection (RASP) or an equivalent control, along with strong data security practices.	could you elaborate on the specific RASP capabilities?	As per RFP and addendum
668	7	1.2 Project overview	The Bank is presently using Siebel CRM Version IP 16, an Oracle-based application. Now Bank want to select a vendor for procurement and implementation of a modern CRM solution in a cloud-based SaaS model.	Can you indicate volume of data to be migrated to the new CRM : - Customers - Contacts - Service Requests - Leads	Please refer RFP for volumetrics
669	7		Data Analytics and Forecasting	Please share use cases related to Sales forecasting	The details will be shared with successful bidder
670	7		Wealth Management	Please share use cases related to Wealth management	The details will be shared with successful bidder

671	7		Omnichannel & Self-Service	Which channels the bank plans to integrate with the CRM application Which set of users would access the application through self service and what is volume of such users ?	The bidder should size their solution as per the RFP scope and Bank's requirements. The details will be shared to successful bidder. Please refer RFP for volumetrics.
672	7		Contact Center with IVR integration	Which is this contact center application and its version ?	The details will be shared with successful bidder
673		2. Evaluation process - B. Technical Bid Evaluation (Stage 2)	Implementation of bidder all 6 module* of proposed CRM solution by themselves in -3- Scheduled Commercial Bank out of which one should be in India.	Can this qualification criteria include experience from Partner as well ?	As per addendum
674	11	1.9 / A	75% of the licence fee shall be payable upon Go-Live acceptance, evidenced by an Acceptance Form duly signed and stamped by the Bank's authorized Project Manager and the Bidder's authorized representative		As per RFP and addendum
			b.The remaining 25% of the licence fee shall be payable upon successful adoption of the module, measured against mutually agreed adoption criteria and KPIs, including Request for Proposal for Selection of Vendor for Supply,		As per RFP and addendum
675	18	2	The Bidder should have experience of implementing CRM Modules for which scoring will be done	Suggestion : To Changed to OEM / Bidder	As per RFP and addendum
676	64	Annexure 02 / C/	The solution should have been hosted in a public cloud with a single-tenancy architecture for scheduled commercial banks in India for a minimum	Suggestion : To incorporate Multi-Tenancy as mentioned in pg 109 pt1	As per RFP and addendum
677	64	Annexure 02 / C/	Bidder should have implemented at least 3 modules out of 6 proposed modules* in one or more Scheduled Commercial Bank in India, having minimum 1,500 branches as on date of RFP, with	Suggestion : To Changed to OEM / Bidder and also reduce the number of branches to 800 and minimum license to 3500.	As per RFP and addendum
678	89	Annexure 07	Siebel CRM Migration	What is the database size of Customer data Migration of Siebel. Can historical leads and cases be stored as Archived data instead of	Please refer RFP for volumetrics. As per Bank's requirement.
679	97	3/B	Campaigns (of all types – mass email, voice, sms & others) should be created from CRM &	Comment : Shall we assume bidder will integrated with banks vendor for SMS, Voice and other channels via Gateway	As per RFP and addendum

680	104	3/F	Data Analytics & Forecasting	Does Bank has any BI tool	The proposed solution must capable to integrate with
681	113	3/K/30	Bidder to provide dedicated Leased line from two different service providers from CSP DC and DR sites to Bank DC and DR sites. Bidder to provide link up to Bank's DC and DR router including CPE (Customer Premises Equipment), cross connect, SFP and cable laydown.	Deviation : Since this is SAAS implementation the mentioned point is not warranted	As per RFP and addendum
682	113	3/K/31	The link should be of minimum 500Mbps capacity. The successful bidder has to maintain link uptime in line with application uptime of 99.90%.	Deviation : Since this is SAAS implementation the mentioned point is not warranted	As per RFP and addendum
683	113	3/K/32	At any point in time, during the contract period, utilization of link should not cross 70%. In case link is utilized more than 70%, bidder to upgrade the link and associated hardware at no additional cost to the	Deviation : Since this is SAAS implementation the mentioned point is not warranted	As per RFP and addendum
684	113	3/K/33	The CRM should support WAN optimization techniques to improve the performance of the application over wide-area networks, particularly for remote branches and users with limited bandwidth. The CRM should seamlessly integrate with Software-Defined WAN (SD-WAN) solution of the Bank for optimized and secure connectivit between bank branches and application, ensuring efficient network	Deviation : Since this is SAAS implementation the mentioned point is not warranted	As per RFP and addendum
685	129	57 / 40	Social Media Complaints	Does Bank has Social Media Engagement tool or expected bidder to provide	The proposed solution must capable to integrate with
686	180	Annexure 15	Commercial Bid	Comment : Please provide Bifurcation of Sales Users, Service Users, Number of Customers	Please refer RFP for volumetrics
687	12	1.9/B	B. Implementation and Integration Cost (OTC)	Can the implimentation cost be 20% at the start of the project, 20% at phase 1 UAT, 15% at Phase 1 go-live, 20% at phase 2 UAT and 15% at Phase 2 Go live and 10% Post Hyper	As per RFP and addendum
688	7	Project overview	What is the commercial treatment of "Optional"? Does the Bank want this quoted separately, and will the decision to include/exclude it be made before contract award? Will not quoting this disqualify the bidder?	We assume "Optional" means the Bank may choose not to procure this module. Our bid will include a separate, clearly marked price for this item, and the main TCO will be calculated without it unless instructed otherwise.	optional item is included in TCO, but its Bank discretion to avail the optional item during the contract period

689	8	Project Scope	This clause represents unlimited scope and significant risk. Could the Bank confirm that any requirement not explicitly detailed in Annexure 12 or the RFP will be handled via a formal Change Control Process and may be chargeable?	We assume our proposal and pricing are based only on the requirements explicitly stated in the RFP and its Annexures. Any future requirement will be considered a Change Request and will be scoped and priced separately.	No change
690	8	Timeline	Is there any flexibility regarding the sequencing of modules?	Please refer RFP and addendum for the phase wise	
691	9	1.5. Delivery	Please define "migrated". Does this mean data migration, functional replication, or re-integration? Please provide a definitive list of these applications, their functions, technical documentation (APIs), and the specific scope of work for each.	We assume "migrated" means re-establishing integration points from these existing applications to the new CRM using their available, documented APIs. It does not include modifying, enhancing, or re-platforming these external applications.	As per RFP and addendum
692	11	Payment Terms	Payment linked to "adoption" is a major risk as it depends heavily on the Bank's internal change management. Please provide the proposed adoption criteria and KPIs. Will these be finalized and agreed upon <i>before</i> contract signing?	We assume "successful adoption" criteria will be mutually agreed upon before contract signing and will be based on objective, controllable metrics like system availability and completion of user training, not on subjective business outcomes or user sentiment.	no change
693	13	Ownership, Grant and Delivery	The RFP is for a "Subscription (SaaS) Model," which is fundamentally different from a "perpetual license." Please clarify if the Bank requires a SaaS subscription or a one-time perpetual license.	We assume this is a boilerplate error and that the core requirement is for a Subscription (SaaS) model as stated in the project title. Our bid is based on a subscription fee model, not a perpetual license.	As per RFP and addendum
694	15	Escrow Mechanism	Source code escrow is not standard for multi-tenant SaaS platforms. Would the Bank accept an alternative that achieves the goal of business continuity, such as a robust DR plan, service continuity guarantees, and a data escrow/transition plan?	We assume the intent is business continuity. Our proposal will include a comprehensive Business Continuity and Data Transition plan in lieu of source code escrow, which is standard practice for enterprise SaaS solutions.	As per RFP and addendum

695	18	Evaluation parametere	1. Implementation of bidder all 6 module* of proposed CRM solution by themselves in -3- Scheduled Commercial Bank out of which one should be in 2. Implementation of bidder by themselves at least 5 modules out of 6 proposed modules* in -3- Scheduled Commercial Bank out of which one should be in India 10 3.Implementation of bidder by themselves at least 4 modules out of 6 proposed modules* in -3- Scheduled Commercial Bank out of which one should be in India 5 4. Implementation of bidder by themselves at least 3 modules out	Request to change this to 1 schedule commercial banks and 2/3 BFSI	As per the RFP and addendum
696	18	Evaluation process, B. Technical Bid Evaluation	For the experience criteria, does "implementation... in -3- Scheduled Commercial Bank" mean all 6 modules must be implemented in each of the 3 banks, or can the collective experience across 3 different banks cover the 6 modules?	We assume the experience of implementing the required modules can be demonstrated across different qualifying banks (e.g., Module 1 at Bank A, Module 2 at Bank B, etc.), as long as each bank meets the specified criteria.	As per the RFP and addendum
697	44	Effect of termination	Data export is standard, but "reverse migration... as per bank format/process" could imply significant custom development. Please define the expected format and process. Is this a simple data export (e.g., CSV, JSON), or a complex transformation and loading process into a new	We assume "reverse migration" means providing a complete export of the Bank's data in a standard, machine-readable format (e.g., CSV files). Any data transformation or loading into a new system will be a separate, chargeable	The data migration is part of the RFP scope of the bidder. Please refer RFP.

698	64	Annexure 02 – Eligibility Criteria	Please clarify if this must be demonstrated by a single project/reference or can be met across multiple client references.	We assume the experience of implementing the required modules can be demonstrated across different qualifying banks (e.g., Module 1 at Bank A, Module 2 at Bank B, etc.), as long as each bank meets the specified criteria.	As per RFP and addendum
699	65	Annexure 02 – Eligibility Criteria	Local Office Presence: The RFP requires support staff in Mumbai and Hyderabad. We have offices in both cities. Would it be acceptable for our support team to work in a hybrid model or from another location in exceptional cases? Please confirm if a written commitment is sufficient.	Assumption: The Bank will accept an undertaking and allow a hybrid model or support from another location/team, provided that coverage is maintained in both Mumbai and Hyderabad.	As per RFP and addendum
700	87	End-to-End Transformation Services	Please confirm the Bank's governance structure, including nominated Business Process Owners (BPOs) with approval authority, and the expected duration of the initial blueprinting phase before implementation.	A mandatory, separately priced Phase 0: Discovery & Design will cover blueprinting, process redesign, and alignment. Implementation timelines depend entirely on timely BPO sign-off. Bank will provide empowered SMEs and decision-makers.	The details will be shared with successful bidder.
701	87	End-to-End Transformation Services	Is the Bank expecting the implementation partner to lead the business process consulting and redesign effort from scratch, or has the Bank already completed a significant portion of this "To-Be" process mapping?		In Bank, Business process is already in place.
702	87	End-to-End Transformation Services	Please provide target KPIs for key journeys (2-3 examples of the "high-volume service requests and sales journeys" it wishes to prioritize for redesign e.g., TAT reduction, FCR improvement). This will help in understanding the complexity.	Phase 0 will establish baseline metrics and jointly define target KPIs. No pre-commitment to KPI improvements without baseline validation.	The details will be shared with successful bidder

703	87	End-to-End Transformation Services	Please provide an approximate number of distinct user roles that will require unique experiences/int		The details will be shared with successful bidder
704	87	End-to-End Transformation Services	How many guided workflows are required for MVP, and what level of complexity is expected in script		The details will be shared with successful bidder
705	87	End-to-End Transformation Services	Could the bank clarify its definition of the boundary between "low-code" and "pro-code". Also confirm acceptance of governed custom code extensions when configuration cannot meet requirements.	Configuration will be prioritized; upgrade-safe, documented custom code extensions will be used where necessary and approved.	As per the RFP scope, the bidder should size their solution.
706	87	Business Outcomes and KPI Management	Does the Bank have a mandated enterprise BI platform (e.g., Microsoft Power BI , Tableau) that is the standard for rendering all operational dashboards? If so, should our solution's role be to provide a clean, optimized data model/data mart for this BI tool to consume, or is the expectation for the CRM to provide the entire visualization and dashboarding capability natively within its own UI?	We will assume that the Bank has an existing enterprise license for Microsoft Power BI and prefers it as the standard for all new BI and analytics dashboards.	The proposed solution should capable to integration with Bank's internal systems. However, the solution should have basic capability.

707	87	Business Outcomes and KPI Management	The term "quality metrics" is important but broad. Beyond standard usage metrics (e.g., logins, records created), are there specific quality or process adherence metrics the Bank is keen on tracking from day one? For example: Percentage completeness of mandatory fields in a Customer 360 profile?	Our solution will include a dedicated Adoption & Quality Dashboard. If no specific metrics are provided by the Bank, we will assume this dashboard will be pre-configured to track the minimum 3 & up to 5 key quality indicators with the following complexity 1. Profile Completeness Score: A percentage score for each Customer record based on the completion of predefined critical fields (e.g., PAN, Mobile, Email). 2. TAT Adherence: Percentage of cases and leads resolved within the defined Turnaround Time (TAT). 3. Knowledge Base Usage: The number of cases resolved where a Knowledge Base article was attached, indicating reliance on approved processes. These metrics will be finalized during the design phase.	As per the RFP scope
-----	----	--------------------------------------	---	--	----------------------

708	88	Architecture Principles	Does the Bank have an existing mechanism or platform for managing a persistent interaction ID across channels? Or is the expectation that the CRM solution will provide this capability?	We will assume that the Bank does not have a pre-existing enterprise service for generating a universal Interaction ID. Therefore, our proposed CRM solution will serve as the authoritative source for omnichannel context management. Our approach will be: 1. The CRM will expose a dedicated API endpoint, CreateInteraction(). 2. When a customer starts an interaction on any channel (e.g., chatbot, web portal), that channel will be responsible for making an initial call to this CRM API. 3. The CRM will generate a unique InteractionID and return it to the source channel. 4. As the customer moves to a new channel, the source channel must pass this InteractionID to the destination channel, which will then use it, to retrieve the full context and history from the CRM. This model places the responsibility of generating the ID on the CRM and the responsibility of passing the ID between	The proposed solution must capable to integrate with Bank's internal systems. The proposed solution has to publish and consume API's as well for the integration.
-----	----	-------------------------	--	---	--

709	88	Data, Knowledge and Analytics	Does the Bank have an existing knowledge base for agents? If so, understanding its volume, format (e.g., SharePoint, documents), and structure is key for migration planning.	We will assume that the Bank does not have a structured, centralized, and migration-ready knowledge base. We assume that existing knowledge is dispersed across various formats (e.g., Word documents, PDFs, intranet pages, and emails). Therefore, our scope includes: 1. Providing a new, best-in-class Knowledge Management module with a pre-defined article template. 2. The responsibility for authoring, reviewing, and populating all knowledge articles into this new system will lie with the Bank's designated subject matter experts and content owners. 3. We will provide a bulk-import function for a simple, structured format (e.g., a single CSV file with fields for Title, Body, Category), but the effort of consolidating and formatting the existing disparate content into this template will be the	The proposed solution must capable to integrate with Bank's internal systems. Please refer RFP for volumetrics.
-----	----	-------------------------------------	---	--	--

710	88	Analytics/AI CoE	What is the intended real-time mechanism for this? Is the expectation that the CRM will make a synchronous API call to the Bank's AI service every time a user opens a customer record (which could impact page load time)? Or, will the Bank's Data Lakehouse asynchronously push these insights into the CRM data store via a background API or event stream (e.g., Kafka) on a regular basis (e.g., nightly)? The latency and architectural implications are significantly different.	To ensure a fast and responsive user experience while decoupling system dependencies, we will assume an asynchronous push/event-driven architecture. Our approach will be: 1. The CRM will not make a blocking, synchronous call to the AI service during the page load of the Customer 360 view. 2. We will assume the Bank's Analytics/AI platform will be responsible for proactively pushing updated insights (e.g., Next Best Action, propensity scores) to the CRM. 3. The CRM will expose a secure, bulk-update API endpoint for the Bank's platform to call. This process is expected to run periodically in the background (e.g., nightly or hourly) or via an event stream (e.g., Kafka). 4. The insights will be stored (cached) directly within the CRM data store, allowing them to be displayed instantly when a user accesses a customer record, without any real-time dependency on the external AI service.	As per the RFP scope.
711	88	Agentic AI	Will these AI APIs be available from Day 1?	We will assume that these Agentic AI APIs are ready; if not, related features will shift to later phases.	As per RFP and addendum

712	89	Security, Compliance and Governance	Please specify processes requiring maker-checker. And could the Bank prioritize the top 3-5 most critical business processes or data field updates (e.g., changes to customer PII, approval of large discounts, creation of a high-net-worth customer record) that will definitively require a maker-checker workflow at go-live?	Up to 10 maker-checker actions implemented.	The details will be shared with successful bidder.
713	89	Security, Compliance and Governance	This is a robust environment strategy. Does the Bank have an existing enterprise standard for its Change Advisory Board (CAB) process and a preferred toolset for Application Lifecycle Management (ALM) or DevOps (e.g., Azure DevOps, Jira, ServiceNow)? Understanding how the CRM's release cycle must integrate into the	Assuming that Azure DevOps will be used as ALM tool.	The details will be shared with successful bidder.

714	89 & 108	Security, Compliance and Governance & J.15.	The DPDP Act places immense importance on granular, auditable consent management. To implement a compliant solution, the ownership of the "Consent Master" is paramount. Given that consent applies across all Bank channels (not just the CRM): 1. Does the Bank have, or plan to build, a centralized, enterprise-wide Consent Management Platform (CMP) that will act as the single source of truth for all customer consent and preferences (e.g., for marketing, data sharing, etc.)? 2. If so, would the CRM's role be to integrate with this central CMP via API to fetch consent status before performing an action (like sending a marketing email) and to push new consents captured within the CRM to the CMP? 3. If a central CMP does not exist, is the expectation that the new CRM must be architected to serve as the Bank's primary, authoritative Consent Management Platform for all channels?	Given the enterprise-wide implications of the DPDP Act, we will assume that the Bank recognizes the need for a centralized Consent Management Platform (CMP) and that such a platform either exists or is planned as a separate enterprise initiative. Therefore, our CRM's role will be that of a compliant consumer and contributor to this central CMP.	No change
715	88 vs 91	Architecture Conflict	Critical: Confirm which directive governs system design.	CRM = System of Engagement & CBS = System of Record for all customer master data.	No change

716	88	Integration Architecture	Requesting an existing "as-is" inventory of all relevant applications (e.g., CBS, LLPS, EFRMS, etc.), including the currently available integration methods for each (e.g., REST API, SOAP, SFTP)? Can the Bank confirm that preparing and approving these comprehensive design documents will be a central task and deliverable during the initial "Discovery & Design Phase" of the project, before starting the main build and implementation activities?	We assume that a complete and up-to-date "as-is" integration inventory for the Bank's systems does not exist. Therefore, we have factored a significant Integration Discovery & Design workstream into our proposed initial "Phase 0: Discovery & Design." During this phase, our architects will work with the Bank's technical teams to analyze each required integration point. The "full integration inventory, target-state architecture, and all related design documents" will be a formal deliverable at the end of this paid phase. The Bank's sign-off on these documents will be a mandatory prerequisite to starting the main implementation phase, as they will form the definitive technical blueprint for all integration work.	No change
-----	----	--------------------------	--	---	-----------

717	89	Siebel CRM Migration	To accurately estimate the complexity and effort for both the discovery and the subsequent migration, could the Bank provide any available high-level metrics on the current Siebel environment? Approximate figures would also be highly beneficial: Customization: Approx. number of custom Applets, Business Components, and custom tables. Business Logic: Approx. number of active custom Workflows and an estimate of custom scripting (e.g., lines of eScript, Browser/Server Script). Data Volume: Total database size (in TB) and, more importantly, the approximate row counts for the core business objects (e.g., Accounts, Contacts, Service Requests, Activities). Integrations: The total number of inbound and	Full read only access assumed; minimal documentation expected. Reverse engineering required.	Please refer RFP for volumetrics. The inventory details will be shared with successful bidder.
718	90	Siebel CRM Migration	What is the Bank's current assessment of data quality within Siebel (e.g., percentage of duplicate customer records, completeness of contact information)? This will inform the level of data cleansing required. Furthermore, what are the key data points that must be included in the reconciliation reports to provide sufficient audit evidence of a successful migration?	We will assume the following regarding data quality and reconciliation: 1. Data Quality is the Bank's Responsibility: We assume that the existing Siebel data has an unknown level of quality. Therefore, our scope for the initial "Siebel Discovery" will include a Data Quality Assessment report, which we will provide to the Bank. 2. Reconciliation is Based on Record Counts and Key Financials (e.g. Opportunity value).	Please refer RFP for volumetrics. The inventory details will be shared with successful bidder. The entire data migration is part of the RFP scope of the bidder.

719	90	Siebel CRM Migration	This is a critical design decision. What is the primary access requirement for the archived Siebel data? (a) Compliance Archive: Is it for infrequent access by IT/legal teams for audit purposes, where a longer retrieval time is acceptable? (b) Business Archive: Or do business users (e.g., relationship managers) need regular, read-only access to historical records for customer context, requiring a more 'active' and accessible archive?	We will assume the requirement is for a (a) Compliance Archive, not an active business archive.	The entire data migration is part of the RFP scope of the bidder. The bidder has to size their solution as per the RFP scope.
720	90	Headless/Composable Design	To design the most effective API contracts and security patterns, could the Bank identify the primary applications or front-end frameworks (e.g., Net Banking Portal, Mobile App built on React/Angular) that will be the initial consumers of the headless CRM capabilities? Clarify initial uses of headless APIs (e.g., Bob	We will architect the solution with a comprehensive, "API-first" approach.	As per the RFP scope.
721	90	Technical Requirements	"Section 9 on page 90 requires us to define the solution's 'Performance and resilience', including 'concurrency, throughput... HA and DR design'. To meet this requirement and to correctly size the infrastructure for the 40,000 users mentioned on page 109, could you please provide the specific performance targets you need to achieve?	Specifically, what is your business requirement for: 1. Peak Concurrency: What is the maximum number of users expected to be actively using the system at the same time during your busiest day? 2. Peak Throughput: How many new service requests or leads are created during your	Please refer RFP and addendum for the details.
722	90	Seismic Compliance	For security requirements like firewalls (WAF), monitoring (SIEM), and encryption, does the Bank prefer that we use the built-in, integrated security services of the cloud provider (like Microsoft Azure or AWS), or are we mandated to buy and integrate separate, third-party security tools?	We will meet the RFP's advanced security and resilience requirements by using the native, fully-managed, and certified services of our chosen hyperscale cloud provider (e.g., Microsoft Azure).	DR should be in different Seismic Zone. For other details, please refer RFP and Addendum.

723	90	Technical Requirements	Our proposal covers all costs for the new CRM. Can the Bank confirm that all costs for your own internal systems that we need to integrate with—like the Core Banking System, your AI platform, and any BI tools—are outside of our scope and handled by the Bank?	Our Total Cost of Ownership (TCO) covers the proposed CRM platform only. All costs related to the Bank's own systems we integrate with—including development, licensing, and support for the Core Banking System, Analytics/AI platforms, and BI tools—are explicitly excluded. The Bank is solely responsible for the financial and resource costs of its own enterprise platforms.	Detailed responsibility of the bidder is mentioned in the RFP and addendum
724	90	Functional Requirements – Common Capabilities	Confirm data freshness for referenced systems—real-time or cached?	Cache less-volatile data; fetch high-volatility data (balances/status) real-time.	As per the RFP.
725	90	Functional Requirements – Common Capabilities	Who are the designated Bank leaders with final authority to approve the new processes, and how many journeys are in scope for the initial rollout ?	BPR conducted in Phase 0; timely SME sign-off required.	The details will be shared with successful bidder.
726	90	Functional Requirements – Common Capabilities	Confirm chatbot platform, technology, and whether APIs exist for case/lead creation.	Existing chatbot assumed API-ready or integrated through middleware.	The proposed solution must capable to integrate with Bank's internal systems.
727	91	Functional Requirements – Common Capabilities - KPI Measurement	Request precise definitions (start/stop for TAT, FCR window).		The details will be shared with successful bidder.

728	91	Functional Requirements – Common Capabilities - Omnichannel Continuity	Confirm handoff mechanism (CRM API called by channel?). How will interaction context be passed between the Bank's channels (e.g., from chatbot to a live agent)? Will the source channel be responsible for calling a CRM API to get and pass a unique "Interaction ID"?	We assume the CRM will provide a central API to generate a unique Interaction ID . Each of the Bank's channels will be responsible for calling this API and then passing this ID during any handoff..	As per the RFP.
729	91	Functional Requirements – Common Capabilities - Sales enablement	Sandbox availability, documentation, SLAs required.	CRM integrates only; AI performance outside scope.	As per the RFP.
730	91	Functional Requirements – Common Capabilities - UX & Adoption		Requests priority screens + scope of embedded training.	As per the RFP scope, the bidder should size their solution.
731	91	Functional Requirements – Common Capabilities	Which specific applications, beyond the named ones, are in scope? Are we using an existing middleware platform or procuring a new one? Who will provide the exact integration use cases and grant technical access to all required systems? Confirm bidder is <i>not</i> expected to procure middleware.	We assume the scope is limited to integrating only the named systems (Avaya, Cisco, CBS) using the Bank's existing middleware platform. We also assume the Bank will provide all necessary system APIs, documentation, and access for a successful integration.	The proposed solution must integrate with Bank's system/middleware platform. The solution has to publish and consume API's as well.

732	92	Details of Existing CRM application		Clarify migration depth for following applications. ▪ Marketing and Budgeting ▪ Complaint /Grievance Management ▪ Lead Management (Covering Retail Assets and Liabilities, MSME, Large Corporate, Referral DSA, DST, Supply chain finance, Government Business, and Agriculture verticals) ▪ Wealth Management Services ▪ Service Module ▪ Contact Centre Sales	The details will be shared with successful bidder.
733	94	Integration with Existing Applications & Systems	The phrase "some of the core systems" implies this list is not exhaustive. To avoid unlimited scope risk (as warned in Sec 1.3), can the Bank provide a definitive and complete list of all systems in-scope for integration for the 15-month project duration?	We assume the 12 systems listed here are the only systems in scope for integration. Any additional system will be treated as a Change Request, subject to separate scope, timeline, and cost evaluation.	As per RFP and addendum
734	94	Integration with Existing Applications & Systems	For each of the 12 listed systems, can the Bank provide 1. Detailed technical documentation for all available APIs/interfaces? 2. The specific versions of the applications? 3. Dedicated technical contacts (SMEs)? 4. Access to stable, non-production environments for development and testing?	We assume that for all 12 systems, the Bank will provide modern, stable, and well-documented REST/SOAP APIs. The project timeline is contingent on timely access to documentation, SMEs, and fully functional test environments. Any effort to <i>create</i> new APIs on these source systems is out of scope.	As per RFP and addendum
735	94	Integration with Existing Applications & Systems	Are the domestic and international CBS instances technically separate? Do they use different versions or require different integration points/APIs? Please specify the exact version of	We assume a single, unified Finacle Integrator provides access to both domestic and international CBS data through a consistent and singular set of	The bidder has to size their solution accordingly.

736	94	Integration with Existing Applications & Systems	Given this system is managed by a separate legal entity, what contractual framework is in place to guarantee their cooperation, resource availability, and adherence to project timelines? Will the Bank serve as the single point of coordination and accountability for the	We assume the Bank is solely responsible for ensuring the subsidiary provides all necessary access, documentation, and technical support in a timely manner, and we will not be held liable for delays caused by the subsidiary.	As per RFP and addendum
737	94	Integration with Existing Applications & Systems	Does "WMS" represent a single, consolidated platform, or is it a placeholder for multiple, separate applications for each product line (LI, GI, MF)? If multiple, please list each system and its integration capabilities.	We assume WMS is a single platform that exposes all required wealth product data through one unified set of APIs. If multiple systems are involved, our cost is based on integrating with a maximum of three distinct systems.	The proposed solution must capable to integrate with WMS platform for fetching wealth product data through API integration. The solution
738	94	Integration with Existing Applications & Systems	What are the non-functional requirements (NFRs) for these integrations? Specifically, what is the expected transaction volume (per second/hour), required latency, and is the integration real-time synchronous or asynchronous (e.g., batched)?	We assume these integrations are asynchronous and do not require sub-second, real-time synchronous processing that could impact CRM system performance. The CRM will consume data from these systems, not act as a real-time	As per the RFP scope.
739	94	Integration with Existing Applications & Systems	What is the exact scope of "synchronization"? Is it a one-way or two-way sync? What specific data fields (e.g., hierarchy, roles, location) are required and at what frequency (e.g., nightly batch, real-time)?	We assume a nightly, one-way batch file/API data feed from HRNES to the CRM is sufficient to synchronize employee, role, and hierarchy data. Real-time or bi-directional synchronization is not included.	The details will be shared with successful bidder.
740	95	Complaint Creation		Is the plan for a period of coexistence where complaints can be created in both systems? If so, for how long, and what are the requirements for data synchronization between the two during this period?	Its bank discretion
741	95	Complaint Creation		Is this simple keyword matching or NLP? Keyword count?	As per RFP and addendum
742	95	Complaint Creation	Confirm 1-way/2-way sync, duration, and API availability.	1-way sync from Siebel → CRM, Siebel exposes API.	The proposed solution has to publish and consume API's as well for the integrations.

743	95	Apart from the above-mentioned 5 core modules, the following sub modules are part of core modules expected to be implemented	Should CRM provide a customer-facing onboarding portal or only integrate with existing systems?	CRM will only capture onboarding leads & integrate with Bank's onboarding/KYC system.	As per RFP and addendum
744	90	Omnichannel continuity	Confirm each channel offers secure modern APIs + sandbox.	All channels assumed API-enabled. Non-API methods out of scope.	As per the RFP scope.
745	96	Complaint Creation	Confirm sentiment engine provided by Bank AI.	CRM calls Bank AI for sentiment; no internal AI built.	The proposed solution should capable to integrate
746	104	Data Analytics & Forecasting: C -Rules Engine	Could you please confirm that the rules engine is restricted solely to routing and assignment logic, and does not encompass any additional functionalities?	The rules engine is assumed to be limited exclusively to routing and assignment logic; no additional functionalities are included within its scope.	As per the RFP scope.
747	97	Campaigns, Events, Budgets	Is this a full budgeting system or campaign cost capture?	Only cost capture for ROI; no financial budgeting workflows.	As per the RFP scope, the bidder should size their solution.
748	97	Campaigns, Events, Budgets	Could you please specify the required end-to-end latency expectations?	CRM triggers within 1 second; external system latency outside CRM scope.	At per the RFP scope
749	98	Incident based campaigns (B>b >ii>r)	Could you please confirm which platforms are included and clarify the scope of integration?	Only Facebook + LinkedIn lead-gen and tracking; no publishing.	As per the RFP scope.

750	98	Associate target product to campaign & events 2.2.2) Target List	Does the solution require basic rule-based segmentation, or should it incorporate advanced analytics capabilities?	Rule-based segmentation in CRM. Predictive segmentation done in AI CoE.	As per the RFP scope, the bidder should size their solution.
751	99	2.2.4) Campaign response &	Could you please confirm the mechanism by which data will be pushed?	Analytical engine pushes daily updates via CRM bulk API.	As per the RFP scope.
752	101	3.3.6) SR Execution & Closure > a	Need list of SRs requiring STP vs manual execution.	20% (15 SRs) STP; 80% manual. Or share the actual break up.	The details will be shared with successful bidder.
753	101	4.2.2) Customer Creation & Lead Creation > a	Does the CIF get created in the CRM initially as a temporary placeholder, and then a separate, official CIF is created in the CBS upon conversion? Please clarify the exact sequence of customer and CIF creation across the CRM and CBS.	We will assume the following sequence: 1. A "Prospect" is created in the CRM (no CIF). 2. When the lead is won, an API call is made from the CRM to the CBS to create the official customer record. 3. The CBS returns the official CIF ID, which is then stored in the CRM, and the record is promoted from "Prospect" to "Customer." The CRM will not be the master system for	The details will be shared with successful bidder.
754	102	4.2.4) Lead Score & Lead Enrichment > c	Does "configurable" imply formula-builder UI?	Formulas hardcoded; weights adjustable via UI.	As per the RFP scope
755	103	4.2.6) Lead Execution/Closure, Customer on-boarding & Account	Could you please confirm the availability of the required APIs, the provision of a sandbox environment for testing, as well as any associated transaction costs?	Bank provides APIs & bears costs. CRM timeline dependent on API readiness.	The proposed solution has to publish and consume API's for the integration.

756	103	5.2.1) Sales planning > d	Is the CRM expected to perform the actual incentive calculations and manage payouts? Or is its role limited to tracking sales performance (e.g., deals won), with the data then being exported to a dedicated HR/Finance system that manages compensation?	CRM tracks performance; calculations managed by HR/Finance system.	The proposed solution should be capable to integrate with Bank's internal systems.
757	104	5.2.2) Sales Management > b	Could you please clarify the expected features for this request?	The gamification functionality is assumed to be limited to basic features such as leaderboards and milestone badges. It is not expected to include advanced or complex competition engines.	As per the RFP scope, the bidder should size their solution.
758	106	J.Data Management and Integration	Could you please confirm whether the CRM system is expected to generate machine learning models?	The CRM system will utilize AI-generated insights provided by the bank; it will not perform any machine learning modeling internally.	The proposed solution should be capable to integrate with Bank's internal systems.
759	104	F.Data Analytics & Forecasting:	Could you please clarify whether the scope of the rules is limited to basic routing and assignment logic, or if it is expected to	Rule engine limited to routing/assignment/SLA logic. No complex Business Rule Management System	As per the RFP scope, the bidder should size their solution.
760	104	G.Process Design	Could you please confirm whether a Siebel data dictionary is available?	It is assumed that a Siebel data dictionary is not available; therefore, reverse engineering will be conducted during	The details will be shared with successful bidder
761	104	H.Training	Clarify total trainer-days.		The details will be shared with successful bidder
762	104	Training Logistics	How should trainer travel/lodging be handled?	Travel & accommodation reimbursed at actuals.	As per the RFP and addendum. Commercial
763	104	Training Logistics	Must each be instructor-led?	Annual instructor-led training accompanied by quarterly digital updates.	The details will be shared with successful bidder
764	104	Training Logistics	Will the Bank provide venues/labs for training?	Bank provides venue/infrastructure; vendor provides trainers + materials.	The details will be shared with successful bidder

765	105	I. Technical Requirements: Infrastructure, Cloud and other CSP Requirements > 4	Is native mobile app required?	Delivery of Progressive Web Application is assumed; native apps excluded.	As per RFP and addendum
766	106	I. Technical Requirements: Infrastructure, Cloud and other CSP Requirements > 6	Please clarify the scope of applicability.	Applies only if baseline sizing fails; scaling beyond baseline chargeable.	As per the RFP scope.
767	106	J. Data Management and Integration	Could you please confirm whether an API-first approach is expected for all integrations? Additionally, kindly specify which, if any, legacy integration patterns are considered mandatory	Only API/Event integrations included. Legacy DB/file patterns excluded.	As per the RFP scope.
768	106	J. Data Management and Integration	Is a new Gateway required from the bidder?	Use Bank's existing Gateway. No new Gateway included.	The proposed solution must be capable to integrate with Bank's existing gateway.
769	106	J. Data Management and Integration	Is full event-sourcing required?	CRM publishes events; no internal event-sourcing.	As per the RFP scope
770	107	J. Data Management and Integration > 8	Mandatory for all services or selective?	Use gRPC selectively for high-throughput internal calls.	As per the RFP scope
771	106	J. Data Management and	Request data volumes, extraction ownership, cleansing responsibility.	Bank extracts & cleans data; bidder maps/transforms/loads.	Please refer RFP for data volumes

772	107	J. Data Management and Integration	Request formal retention policy.	System configured according to Bank's policy provided during design.	As per the Bank's requirement.
773	108	J. Data Management and Integration >	Confirm acceptable region pairs.		As per the RFP scope.
774	109	K. Cloud Infrastructure: > 4	Request preferred use cases.	Hybrid model: Kubernetes + serverless for async/event tasks.	The details will be shared with successful bidder.
775	109	K. Cloud Infrastructure:	Does this apply to APIs or full UI transactions?	Applies to APIs/simple lookups; not full UI flows.	As per the RFP scope.
776	109	K. Cloud Infrastructure: > 4	Which SLA is binding?	<1 second P95 for end-to-end. <200ms applies only to simple internal APIs.	No change
777	109	K. Cloud Infrastructure: > 7	Confirm concurrency.	4,000 concurrent (10%).	As per the RFP scope.
778	110-111)	K. Cloud Infrastructure: > 16	Should recurring audit cost be a separate line item?	Included as annual managed services component.	As per the RFP scope.
779	112	K. Cloud Infrastructure: > 27	Confirm if bidder must provide CASB.	Bidder integrates with Bank's CASB.	As per the RFP scope.
780	112-113	K. Cloud Infrastructure: > 30	Clarify responsibility and commercial model.	Lines treated as pass-through cost; upgrades governed by rate card.	As per the RFP and addendum. Commercial should include all the costs.
781	114	K. Cloud Infrastructure: > 42	Are we expected to procure and manage these?	CRM integrates with Bank's existing security stack.	As per the RFP scope.
782	115	K. Cloud Infrastructure: > 43	Is cloud-native KMS acceptable?	CSP KMS with BYOK is acceptable; no direct on-prem HSM integration.	As per the RFP scope.

783	118	Onsite Resources	The proposed resourcing model and the "no additional cost" clauses introduce significant commercial risk. 1. Please clarify the onsite resourcing model. Are we expected to deploy and bear the full cost of a 24x7 team during the entire implementation phase, with payment only beginning post-UAT sign-off? 2. Please provide a clear definition of a "change request" versus an enhancement that falls under the "no additional cost" clause. Does this apply to new regulatory requirements not known at the time of contract signing?.	Our proposal will be structured with a clear distinction between the Project Implementation Team (costed as part of the project) and the Post-Go-Live Managed Services Team (costed as a separate monthly fee that begins at Go-Live). The "no additional cost" clause will be assumed to apply only to bug fixes for in-scope functionality and to compliance with security/regulatory requirements that were explicitly defined in this RFP at the time of signing. All other work will be managed through a formal change control process.	For implementation, vendor need to size the resources according to the RFP scope. Post implementation support, resource requirement will be obtained as per the per resource cost provided by the bidder.
784	128	Functional and Technical Requirements Point 35	Need formats (e.g., RBI Ombudsman) if mandatory.	Bank will provide regulatory templates, with standard reporting included.	The details will be shared with successful bidder.
785	41, 53	Clause 4.9 at Page 41, Clause 4.27 (xi) at Page 53 Subcontracting	Subcontracting is allowed with prior written permission. In case any particular specialized service in the prescribed in the scope of work requires subcontracting, it needs to be specified in the proposal/ response document with all the details of the work/ services.	We understand that subcontracting is not prohibited under the RFP and a bidder may use third party / third party resources to provide services under the ensuing contract. However, in such a case, the bidder would remain responsible for the work of such subcontractors.	No change

786		Leveraging credentials of parent entity/subsidiaries	RFP is silent on leveraging credentials / experience of parent entity / subsidiaries	We would like to submit that PwC, like other similarly placed consulting firms, is not structured like a typical MNC, but operates as a network of firms under a common brand name, wherein each Network Firm is a separate and independent legal entity. These Network Firms often collaborate and share relevant skills and knowledge with each other in order to leverage the best global practices to enhance the services being rendered to their clients. We accordingly request you to allow Bidders to leverage the credentials and/or resources of such Network Firms to	As per RFP and addendum
787	9, 196	Clause 1.5 and 1.6 at Page 9, Clause 2 at Page 196- Term of Contract	Customer Relationship Management (CRM) Solution must be implemented as per project scope within -15- months in totality from the date of placing of purchase order by the Bank. The bank shall enter into an agreement with the selected bidder for a period starting from the date of the Purchase Order till -5- years from the Go-Live Closure Sign-off date given by the Bank officials. The contract will be deemed completed only when all the items and services contracted by the Bank are provided in good condition, implemented, tested and accepted along with the associated documentation provided to Bank's employees; as per the requirements of the contract executed between the Bank and the Bidder	We request the client to kindly consider that in the event project delivery is delayed due to reasons not attributable to the bidder, any extension of the duration of the Contract will be based on mutually agreed terms and conditions.	As per RFP and addendum

788	50, 210	Clause 4.23 (a) at Page 50, Clause 24 (h) at Page 210- Limitation of Liability	Aggregate liability is limited to 1X TCV, with following exceptions: *Willful Misconduct or Gross Negligence, infringement of patents, trademarks, copyrights or such other Intellectual Property Rights or breach of confidentiality obligations	Client is requested to delete exceptions to the limitation of liability.	No change
789	50, 210	Clause 4.23 (a) at Page 50, Clause 24 (h) at Page 210- Limitation of Liability	Indirect and consequential losses are not excluded from liability	Client is requested to include to clause to state that we will not be liable for any indirect and consequential losses or damages. This is as per GFR and MeitY guidelines and also the industry standard. Even the Contract Act, stipulates and remote and consequential damages are not payable. Client is requested to include the below clause: "Purchase/Client agrees that Consultant will not be liable for (i) loss or corruption of data from your systems, (ii) loss of profit, goodwill, business opportunity, anticipated savings or benefits or (iii) indirect or consequential loss."	No change
790	41-42, 203	Clause 4.11 at Page 41-42, Clause 16 at Page 203- Confidentialit y Obligations Clause 4.11	Obligations to survive for an indefinite period from the date of expiry or termination of contract	We request client to reduce the survival period of confidentiality obligations to one year post expiry or termination.	No change
791	42, 202	(e) at Page 42, Clause 16 (e) at Page 202- Confidentialit y Obligations	Obligation to return all confidential information / destroy all confidential and no right to retain a copy	We request client to allow us to retain our working papers and a copy of confidential information for our records and any future reference or audit requirements, subject to confidentiality obligations under this Agreement.	No change

792	47, 203-2	Clause 4.18 at Page 46-47, Clause 17 at Page 203-204 Indemnity	Indemnity for breach of contract obligations	There are several remedies available under law and contract to you for such breach of obligations. For eg., there are penalties and LDs that may be imposed for some of these breaches. Seeking indemnities for such breaches frustrates the entire purpose of such remedies available to you. We understand that remedies other than indemnity will be sufficient for such breaches. We request you to kindly delete this section	No change
793		Indemnity	Indemnities not subject to final determination by court/arbitrator	We agree to indemnify to the extent the damages/losses are finally determined by a competent court or arbitration. Please make indemnities subject to final determination by court/arbitrator. This is also the industry standard and prescribed by MeitY in its guidelines.	No change
794		Clause 4.12 (a) & (b) at Page 43, Clause 20 (h) and (i) at Page 206 Termination	Termination with notice and rectification period of 15 days	To uphold the principles of natural justice, we request client to notify us and give us a rectification period of at least 30 days, prior to invoking this clause.	No change
795	43, 206	Termination	We do not have any right to terminate	To uphold the principles of natural justice and to bring parity in the contract, we request client to give us the right to terminate the contract in case client breaches any of its material obligations under the contract, provided a notice for such breach is given to client along with a rectification period of 30 days.	No change
796		Termination	Unreasonable ground for termination	We request client to delete this ground for termination as it is unreasonable and there are several remedies in contract and law available to the client for such breach.	No change
797		Clause 4.29 at Page 55 Cancellation	Cancellation / Rescission of Contract	Cancellation / Rescission means voiding the contract and making the contract ineffective from its inception, thereby restoring the parties to the positions they would have occupied if no contract had ever been formed. In this scenario, bidder may be deprived of any payment and refund of all payments made already may be sought. Request	No change
798	206, 55, 2	termination clause at Page 44 and 206, Clause 4.29 at Page 55, Clause 38 at Page 214, Clause 3.1 (xx) at Page	Risk purchase	Request client to limit our liability under this clause to 10% of the value of corresponding goods/services not delivered by us. Please also confirm that client will use government procurement norms (including price discovery) for procurement of such services from third parties.	No change

799	53, 81	Clause 4.27 (xiii) at Page 53, Sl. No. 10 of Annexure 07 at	Related Party	We understand that the terms 'owned and controlled' shall mean such ownership and control by virtue of an individual singly holding 10% or more in the total capital of the bidder	No change
800	10, 175	Clause 1.5 at Page 10, Annexure 13 at Page 175, Penalty related to onsite resources - Liquidated damages	•Implementation delay penalty: 0.5% per week (or part) of the particular phase implementation cost, capped at 10% •Operations SLA penalties capped at 10% of the Quarterly Charges •Delay in deployment/replacement ≥ 1 month: 10% of monthly charges for total engineers per month; cost deductions for absence	We request client to cap the liquidated damages/penalties cumulatively to 5% of the total contract value.	No change
801		No clause in RFP. Please include in pre-bid - Liquidated damages	Not sole and exclusive remedy	We understand that as per Contract Act, where LDs are stipulated, generally any other damages cannot be claimed. Therefore we request you to kindly make imposition of liquidated damages as sole and exclusive remedy for corresponding breaches.	No change
802		No clause in RFP. Please include in pre-bid- Liquidated	Not limited to solely our fault	We understand that we would be liable to pay liquidated damages to the extent corresponding breach is solely attributable to us. Kindly confirm.	No change
803	16	Clause 1.14 at Page 16- Insurance	Wide insurance procurement obligations	We wish to clarify that we maintain insurances, at the firm level, which are required to be maintained by us as per the provision of laws. Separate insurances for this project may not be required in light of such firm level insurance. We can provide you with a confirmation about our firm level insurance and that to the extent required by law, this project will also be covered under that	No change
804		No clause in RFP. Please include in pre-bid. - No third party disclaimer	There is no restriction on the usage of deliverable. No third party disclaimers.	We will be providing services and deliverables to you under the contract. We accept no liability to anyone, other than you, in connection with our services, unless otherwise agreed by us in writing. You agree to reimburse us for any liability (including legal costs) that we incur in connection with any claim by anyone else in relation to the services. Please	No change
805	55, 214	Clause 4.29 at Page 55, Clause 38 at Page 214- Refund of fee	Consultant is liable to refund the fee received till date in case of termination/cancellation of contract	We request the client to consider that the consultant is entitled to fees for the services performed till date. Further, the client has the right to claim damages for breach under the applicable laws. In view of the same, we request the client to	No change

806	9	1.5 / Delivery	Phase 1 (6 months) includes Service Mgmt + Customer 360 (QRC) + Lead + Sales; Phase 2 (9 months) includes Complaint + Campaign + marketing budgeting + “all other functionalities as per scope”	Providing exact Modules that would be beneficial here. E.g Customer service will have the following modules as per RFP : 1) Service Management with Customer 360° (QRC) 2) Complaint Management 3) Contact Center with IVR integration (Optional) 4) Knowledge Base & Case Management 5) Omnichannel & Self-Service	As per RFP and addendum.
807	9	1.5 / Delivery	“Bank is already using inhouse apps for DSA, RMs and also having 3rd party integration... same need to be migrated within timelines.”	Request to provide a comprehensive inventory of in-house applications (e.g., DSA, RM360), along with interface details, API specifications, and ownership information. Also, request clarification on the definition of “migration,” specifically whether it entails rebuild, re-pointing, or coexistence.	As per RFP and addendum. The inventory details will be shared with successful bidder.
808	12	1.9 Payment Te	25% license + 25% implementation linked to “successful adoption” and measurable improvement in KPIs	Request to define the adoption KPI baseline and target for each module (including TAT, FCR, and usage), along with the measurement methodology, reporting mechanism, and sign-off authority. In the absence of these details, there is a high estimation and delivery risk.	As per RFP and addendum
809	11	1.9 / A	75% of the licence fee shall be payable upon Go-Live acceptance, evidenced by an Acceptance Form duly signed and stamped by the Bank’s authorized Project Manager and the Bidder’s authorized representative b.The remaining 25% of the licence fee shall be payable upon successful adoption of the module, measured against mutually agreed adoption criteria and KPIs, including Request for Proposal for Selection of Vendor for Supply,	Request the Bank to revise the licence fee payment milestone to 100% upfront upon licence procurement, as licence costs are payable in advance to the OEM	As per RFP and addendum.

810	13	1.11 Ownership	“Perpetual licenses”, copying rights, broad use	Standard D365 SaaS is subscription-based; perpetual licenses are not applicable here. Please confirm whether that Bank accepts SaaS subscription terms (or expects non-SaaS).	As per RFP and addendum
811	16	1.12 Escrow	Source code escrow required	Dynamics 365 is a SaaS platform, so Microsoft does not provide base source code to any customer or SI. This is standard across all enterprise SaaS products. Instead, Microsoft provides a controlled, compliant platform with audited security and a full extensibility framework. All customizations built by SI are fully accessible to the customer, but the core product code remains Microsoft IP for security	As per the RFP and addendum
812	18	2	The Bidder should have experience of implementing CRM Modules for which scoring will be done	Request to modify the clause to consider experience of CRM module implementation by the OEM and/or the Bidder for scoring purposes, instead of restricting it only to the	As per the RFP and addendum
813	88	6. Agentic AI Re	CRM must be able to leverage the Bank’s Agentic AI framework and guardrails for use cases such as agent assist, auto-summarization, next-best-action, intelligent routing and guided service-to-sales prompts.	What AI Framework currently does bank use ?	As per RFP and addendum
814	64	Annexure 02 / C	The solution should have been hosted in a public cloud with a single-tenancy architecture for scheduled commercial banks in India for a minimum of three years	Request to modify the clause to include Multi-Tenancy architecture, in line with the requirement mentioned in Section K: Cloud Infrastructure, Point 1, instead of restricting it only to single-tenancy deployments.	As per the RFP and addendum
815	64	Annexure 02 / C	Bidder should have implemented at least 3 modules out of 6 proposed modules* in one or more Scheduled Commercial Bank in India, having minimum 1,500 branches as on date of RFP, with minimum of 5,000 licensed users on	Request to modify the clause to consider implementation experience of the OEM and/or the Bidder, and to include BFSI references instead of restricting the experience only to Scheduled Commercial	As per the RFP and addendum

816	89	Annexure 07	Siebel CRM Migration	What is the database size of Customer data Migration of Siebel. Can historical leads and cases be stored as Archived data instead of live data.	Please refer RFP scope for volumetrics. As per Bank's requirement.
817	90	Agentic AI Read	Use Bank agentic AI framework; disable vendor AI add-ons	Clarify if Copilot or 3rd-party AI is allowed at all. If Bank wants strictly BYO-AI, confirm required APIs/hooks, audit fields, and telemetry expectations.	As per the RFP scope.
818	97	3/B	Campaigns (of all types – mass email, voice, sms & others) should be created from CRM &	Comment : Shall we assume bidder will integrated with banks vendor for SMS, Voice and other channels via Gateway	As per RFP and addendum
819	89	Headless/Com	“Decoupled UI”, CRM capabilities consumed via APIs/events	D365 CE can expose APIs, but “headless CRM UI not used” affects licensing and UX build. Confirm if Bank will build separate front-ends and expects vendor to deliver those.	The clause itself is self explanatory.
820	90	Siebel Migration	Discovery, coexistence, cutover/rollback, dry runs, reconciliation	Request to provide Siebel inventory and migration scope: objects, record counts, attachments, activity history, closed cases, and number of dry runs.	The inventory details will be shared with successful bidder.
821	90	Decommission	Retention and access to historical records	Define retention time and search requirements.	As per Bank's policy governed by regulatory
822	91	10. Functional Requirements – Common Capabilities	Digital enablement: Support integration with Bank digital channels and portals; support self-service initiation and tracking of service requests and cases, with status updates and notifications.	Please list down all Bank digital channels	As per RFP and addendum

823	93	G) CRM Mobile App-Lead Management Module	CRM Mobile app inhouse developed module used for Lead management module for the following products like Retail assets, Liabilities, Wealth management, Credit card with features like lead creation, status tracking and Lead dashboard integrated with CRM application. This app is accessed at field level i.e Relationship managers, Deposit sales managers, and Branches. ❖ RM360 mobile app inhouse developed app for corporates integrated with CRM application.	Please confirm whether the Bank intends to continue using these applications or replace them with Dynamics 365 CRM mobile applications if feasible	As per RFP and addendum
824	98	Social campaign	Integration with top social networks; publish posts	What social tool does the Bank currently use? Does the Bank currently use a dedicated social suite?	The proposed solution should be capable to integrate with Bank's internal systems
825	100	SR Management	SR creation from email/SMS keywords; dedupe for same SR type	Clarify dedupe logic rules, and what happens on duplicates (merge vs link vs	The details will be shared with successful bidder.
826	103	KYC validation	PAN/Aadhaar validation NSDL/UIDAI; maker-checker before CBS creation	Confirm whether vendor is expected to integrate directly with NSDL/UIDAI or through Bank services. Also confirm eKYC vendor, authentication method, and audit evidence needs.	As per RFP and addendum
827	103	Account opening	Print form with photo; capture signature; store online	Clarify signature capture device/process, storage repository, and whether digital signature/eSign is required. Impacts hardware and integration scope.	As per RFP and addendum
828	104	3/F	Data Analytics & Forecasting	Does Bank has any BI tool	The proposed solution should be capable to integrate
829	106	Sizing	Vendor to provide additional resources at no cost if sizing not met	For SaaS, infrastructure sizing is not customer-managed. Clarify whether Bank expects dedicated hosting or multi-tenant SaaS. Also clarify how “additional resources” is interpreted.	The bidder need to size their solution based on the scope provided in the RFP and addendum
830	106	API management	The proposed solution should include an API management platform with API gateways and API analytics to effectively manage and monitor API usage.	Bank also says integration through Bank platforms. Clarify whether vendor must provide API gateway/APIM or must use Bank’s existing gateway (preferred to avoid duplication).	As per RFP and addendum

831	113	Network	Dedicated leased line 500 Mbps from CSP DC/DR to Bank DC/DR, dual providers	For D365 SaaS, this resembles private connectivity requirements (ExpressRoute). Clarify if Bank expects vendor to procure/manage these links or Bank will. Major cost driver.	As per RFP and addendum
832	113	3/K/30	Bidder to provide dedicated Leased line from two different service providers from CSP DC and DR sites to Bank DC and DR sites. Bidder to provide link up to Bank's DC and DR router including CPE (Customer Premises Equipment), cross connect, SFP and cable laydown.	Request the Bank to waive the requirement, as the proposed solution is a SaaS-based implementation	As per RFP and addendum
833	113	3/K/31	The link should be of minimum 500Mbps capacity. The successful bidder has to maintain link uptime in line with application uptime of 99.90%.	Request the Bank to waive the requirement, as the proposed solution is a SaaS-based implementation	As per RFP and addendum
834	113	3/K/32	At any point in time, during the contract period, utilization of link should not cross 70%. In case link is utilized more than 70%, bidder to upgrade the link and associated hardware at no additional cost to the Bank.	Request the Bank to waive the requirement, as the proposed solution is a SaaS-based implementation	As per RFP and addendum
835	113	3/K/33	The CRM should support WAN optimization techniques to improve the performance of the application over wide-area networks, particularly for remote branches and users with limited bandwidth. The CRM should seamlessly integrate with Software-Defined WAN (SD-WAN) solution of the Bank for optimized and secure connectivity between bank branches and application, ensuring efficient network resource utilization and failover mechanisms.	Request the Bank to waive the requirement, as the proposed solution is a SaaS-based implementation	As per RFP and addendum
836	116	52. User Acceptance Test of	52. User Acceptance Test of Software	Are performance, security and penetration testing in scope?	As per RFP and addendum

837	116	Monitoring acc	Bank team to have dashboard access to logs/security events	Please confirm the expected level of access required by the Bank, including raw logs, SIEM feeds, audit exports, and API telemetry, along with the tooling to be used and reporting frequency.	As per RFP and addendum
838	119	Onsite 24x7	Onsite resources 24x7x365 post go-live	Clarify number of onsite resources and locations (Mumbai/others)	As per the RFP and addendum
839	129	57 / 40	Social Media Complaints	Does Bank has Social Media Engagement tool or expected bidder to provide	The proposed solution should capable to integrate
840	130	Social media	Image mentions, translation to vernacular, influencer/blogger tracking, competitor analysis	Many items resemble a full social listening platform. Clarify whether Bank expects a social suite or only ingestion of complaints	Social media is also one of the source channel where complaints to be ingested in
841	132	Marketing auto	Journeys, segmentation wizard, rescheduling based on response, IVR outbound campaigns	Does bank have any existing marketing platform. Also share details of email/SMS providers.	The proposed solution should capable to integrate with Bank's internal
842	137	Customer 360	On-demand CBS product details (statements, mini statements), alerts (QAB/MAB, KYC expiry), card ops (PIN change), transactions view	Please confirm which of these must be real-time vs batch cached, and which services already exist in Bank APIs. Real-time transaction retrieval can be costly/complex.	Both real time and on demand is expected to be implemented as per Bank's requirement/RFP scope.
843	140	KYC maker-che	Field-wise maker-checker enable/disable	Please confirm exact customer fields under maker-checker, approval hierarchy, and SLA for approvals.	The details will be shared with successful bidder.
844	145	Lead module	NLP text mining for email leads; lead nurturing; drop-off leads from multiple channels	Please clarify whether NLP/ML is Bank-provided (CoE) or vendor must build. Also confirm drop-off definitions and channel telemetry availability.	As per RFP and addendum
845	152	Sales module	track sales through call centres/IVR real time”; contact center dashboards	Please confirm if contact center is in scope for Phase 1 or later, and what “real-time” response capture means technically.	In later phase. The bidder should size their solution as per the RFP scope.
846	154	Mobile & Field	GPS tracking, offline mode, MDM integration, device binding, remote wipe	Confirm Bank’s MDM platform (Intune/other), offline scope (which entities/actions), and whether Bank expects native app vs browser-based.	The proposed solution should integrate with Bank's internal system.
847	156	Contact Center	Agent desktop pop-up, dispositions, transcripts references, KB-assisted service	Clarify CTI approach (Avaya/Cisco connectors, screen-pop mechanism), call recording/transcripts ownership, and whether Omni-channel routing is required.	The details will be shared with successful bidder. The requirement is as per the RFP scope.
848	164	Collections	Payment processing/reconciliation, legal action workflows	Please confirm whether the CRM solution is required to process payments.	The proposed solution should capable to integrate

849	166	Analytics & For	In-built ML models + integrate with Bank ML models; transcript mining	Bank earlier emphasized BYO analytics/AI. Clarify whether “in-built ML” is mandatory or optional and whether Bank prefers its own models only.	The clause itself is self explanatory.
850	168	RM Toolkit	CLTV calculated by CRM; portfolio tracking & rebalancing	Please clarify whether CLTV/TRV/AUM values will be computed by the Bank’s analytics systems and pushed to the CRM, or whether these calculations are expected to be performed within the CRM. Additionally, confirm whether portfolio rebalancing requirements imply integration with the Bank’s wealth management platform.	Both the approaches required -As per the RFP scope, the bidder has to size their solution. The solution must capable to integrate with bank's wealth management platform.
851	171	Partner manag	Partner onboarding, hierarchy, incentives feed	Please clarify the partner types involved (BC/DSA/Fintech), expected volumes, and portal requirements. Additionally, confirm whether the CRM is expected to only feed commission data to another system or perform commission calculations as well.	Refer RFP for volumetrics. Both the approaches required -As per the RFP scope, the bidder has to size their solution.
852	174	Knowledge bas	Multilingual, full-text search, deflection in self-service, AI hooks	Please confirm the supported languages, the knowledge article governance roles, and whether a self-service portal is required in Phase 1.	As per RFP and addendum
853	180	Annexure 15	Commercial Bid	Please provide Bifurcation of Sales Users, Service Users, Number of Customers	As per RFP and addendum
854	91	Annexure 12 Point 10	Integration with Bank Digital Channels and Portals	Please confirm the API readiness of these applications	The proposed solution capable to publish and consume API's for the The proposed CRM must enable Bank-owned agentic AI to assist users. The interface details, API's, middleware will be shared with successful bidder The proposed solution capable to publish and consume API's for the integration with Bank's contact The details will be shared with successful bidder.
855	91	Annexure 12 Point 10	AI/Agentic readiness using Bank framework	Kindly clarify the architecture and integration expectations for the Bank-owned Agentic AI platform. Specifically, please confirm whether the CRM is required to integrate with the Bank’s AI via APIs, events, or middleware, and share details on available interfaces	
856	91	Annexure 12 Point 10	Scope also includes providing and/ or customizing the necessary middleware & component to connect/integrate with Avaya / CISCO/IVR/ Contact Centre, CBS and various other applications running	Please confirm the API readiness of Contact Centre, CBS and other applications . Also, kindly specify the list of all applications.	
857	92	Annexure 12 Point 3A	Build required Outbound Interfaces	Kindly specify the SMS Gateway currently used	

858	92	Annexure 12 Point 3B	1) Complaint Creation through various channels (Website for the customers, internetbanking ,Bobworld, Business correspondents, Branches, Contact Centre, socialmedia, SMS Banking, Whatsapp banking etc.) 2) Integration with third party application DCRS for Debit Card Financial Complaints(DCRS) 2)Integration with internal and external applications	Please confirm the API readiness of the internal and external applications	The proposed solution capable to publish and consume API's for the integration with Bank's internal applications , third party sytems like Debit card (DCRS)and external applications like JANSURAKSHA, INGRAM-Ministry portal as well for The details will be shared with successful bidder. As per the RFP scope.
859	93	Annexure 12 Point 3C	Online E-OTS module	Please mention the expected working/process flow of this module	
860	93	Annexure 12 Point 3D	SSO integration with insurance and investment platforms	Please specify the supported SSO Protocols	
861	93	Annexure 12 Point 3F	Sales Module- Contact Centre	Is the CTI provider the same for both the Sales and Support module?	
862	94	Annexure 12 Point 3H	Integration with Existing Applications & Systems	Please mention the API readiness of these applications	
863	97	Annexure 12 Point 2.2.1	Campaigns (of all types – mass email, voice, sms & others)	Please specify the third party provider to send out Voice campaigns and its API readiness	Yes. The proposed solution should support as per the RFP
864	18	Technical Bid Evaluation (Stage 2) Technical Evaluation	Implementation of bidder all 6 module* of proposed CRM solution by themselves in -3- Scheduled Commercial Bank out of which one should be in India	Can the implementation experience be considered as BFSI instead of only scheduled commercial Banks. Request BOB to rephrase the clause as " Implementation of bidder all 6 module* of proposed CRM solution by themselves in -3- Scheduled Commercial Bank/ BFSI out of	
865	175	Annexure 13 – Service Levels and Service Credits	* The Platform / Application should be restored to working condition within the time stipulated. Apenalty of Rs. 25,000/- per hour shall be charged for non-conformance exceeding the restorationtime defined for Severity – 1, 2 & 3 on the aforementioned table.	Can this be discussed at a later staged and basis mutual acceptance	Repeated
866	180	Annexure 15–Commercial Bid	Commercial Table	Can we add more rows to capture the license cost for different license modules.	The details will be shared with successful bidder. The proposed solution capable to publish and consume API's for the integration As per RFP and addendum
867	NA	General	How many concurrent users are expected to use the	Pls specify the number of concurrent users	No change
					No change
					Please refer RFP scope and

868	NA	General	We can share the pricing per user per license however if you'd like to comprehensively understand the cost of ownership outside of implementation costs, we'd need more information on, • Number of cases created and managed year on year • Number of supporting records per case (lead, account, contact and other objects) • Number of documents which would be required to be stored and average file size	Pls share the data volumes	Please refer RFP scope and addendum.
869	NA	General	• Number of leads created per year with YOY increment. Also, please specify the total number of existing lead record which we need to migrate. • Number of documents which would be required to be stored per lead and average file size	Pls share the data volumes	Please refer RFP scope and addendum.
870	NA	General	What is the approximate number of active customers and transactional customers?	Pls share the data volumes	Please refer RFP scope and addendum.
871	107	Point 10	The selected bidder is responsible for Migration of customer data, existing leads, complaints and service request/case data, Migration strategy, Migration Plan, Pre and Post migration reconciliation and Audit support in the new solution.	Could you please provide the estimated volume of data to be migrated, including customer records, existing leads, complaints, and service requests/cases? Additionally, please share the year-on-year projected data growth	Please refer RFP scope and addendum.
872	128	Point 28	Auto-Quality Check Resolution of complaints option should be available	What is the logic behind the quality check of a resolution?	The details will be shared with successful bidder.
873	163	Point J1	The system should have the capability to process and track customer payments, including credit card, loan, wire transfer, and clearing house transactions etc. The system should also have the ability to allocate payments to specific accounts and reconcile	Could you please clarify whether these payment processing and reconciliation activities are expected to be performed within the CRM, or should the CRM integrate with an external Accounting system for this	The proposed solution must be capable to integrate with Bank's internal systems for the payment processing and reconciliation activities.
874	106	Point 28	The proposed solution should integrate with Middleware and APIs of Bank as per Bank's requirement	Please define the scope of Middleware	The details will be shared with successful bidder.
875	63	Annexure 02 – Evaluation Terms c. Experience & Support Infrastructure	The proposed CRM should support a subscription (SaaS) model, hosted on cloud infrastructure compliant with RBI and MeitY guidelines (for India) with DR setup.	The proposed CRM will be hosted in cloud infrastructures that is fully compliant with ISO 27001, ISO 9001 and SOC2 with data residency in India with DR setup. The applications are audited by CERT-in empanelled agencies. Please let know if the existing ISO report & CERT-in empanelled audited status can be shared for this clause of eligibility.	As per RFP and addendum

876	109	Annexure 12 - K. Cloud Infrastructure Point 9	The CRM Application and Data replication should happen from Primary site to DRsite in real time to keep those in sync with a Recovery Time Objective (RTO) of 60Minutes and near zero RPO (Recovery	The standard RPO that is followed is 30 minutes. Please let us know if this is suffice.	No change
877	111	Annexure 12 - K. Cloud Infrastructure Point 17	The cloud service to be availed by the bidder for Bank shall have the following latestcertifications, in addition to MEITY accreditation or System Audit Report (SAR) forData Localisation conducted by CERT-IN Empanelled Auditors for Cloud Service Provider	The proposed CRM solution is delivered as a secure, cloud-based SaaS platform hosted and managed by the Bidder/OEM within its own cloud infrastructure. The solution is provided exclusively in a SaaS delivery model and is not empanelled under the MeitY Cloud Service Provider (CSP) framework, which primarily applies to infrastructure-level service providers. We are fully compliant with below standards with data residency in India with DR setup. ISO 9001 ISO 27001 ISO 27701 ISO 27017 ISO 27018 ISO 22301 SOC 2 Type II The applications are audited by CERT-in empanelled agencies. Please let know if the existing ISO report & CERT-in empanelled audit compliance would be acceptable in lieu of	No change
878	110	Annexure 12 - K. Cloud Infrastructure Point 16	Regular VAPT, API Assessment, customized Source Code (related to Bank)audit certified by a CERT-IN empanelled auditor	Regular VAPT is performed by a CERT-In empanelled third-party firm. Source code analysis is performed with an internal tool and not CERT-In empanelled auditor. Kindly confirm	No change
879	110	Annexure 12 - K. Cloud Infrastructure Point 16	Adhering to NIST (especially 800-53) and CSF (Cyber Security Framework)standard best practices	The proposed solution is not formally certified against the NIST SP 800-53 control framework. However, the platform follows robust, industry-leading security and privacy practices and is certified against internationally recognised standards, including ISO 27001, ISO 27701, ISO 27017, ISO 27018, ISO 22301, and SOC 2 Type II,	No change
880	110	Annexure 12 - K. Cloud Infrastructure Point 13	Bidder should assess the compliance level of SaaS based application vis-à-visguidelines stipulated by Bank / regulatory / statutory body, through a CERT-IN certified auditors and submit assessment report/ audit certificate to Bank on quarterly basis or as per Bank's requirements	We perform ISO and SOC audits annually that is carried out by a CERT-In empanelled firm. The reports can be shared annually once on request with an NDA. Please confirm if this is suffice.	No change

881	198	15. COVENANTS OF THE SERVICE PROVIDER	"The Service provider and sub-contractor, if any, is required to adhere to RBI guidelines for storage of data in India as per regulatory requirements, also to provide complete details of data captured, processed and stored, maintain confidentiality of the Bank's and	We request you to kindly specify the RBI guideline that has to be adhere by the Service Provider.	No change
882	51	4.27 COVENANTS OF THE SERVICE PROVIDER	The Service provider shall ensure that it is complying with all the directions and clauses as stated in the said circulars: a) RBI/2023-24/102 DoS CO CSITEG/SEC 1/31 01 015/2023-24	We note that the guideline referred to has been withdrawn. Could you please specify the applicable guideline that you require the Service Provider to comply with?	No change
883	213	36). IT Risk Management	1. The Service Provider shall assist the Bank in adhering to compliance guidelines of theregulatory authorities and facilitate Bank from time to time. The Service Provider shall conform to the security practices and procedures laid down in the Information TechnologyAct 2000 as amended by the information Technology (Amendment) Act 2008 (IT Act and IT Amendment Act) and the information Technology (Reasonable Security Practices andProcedures and Sensitive Personal Data or information) Rules 2011 (Privacy Rules). 2. The Service Provider shall carry out Information security / cyber security risk assessment and apply risk treatment measures on regular intervals. The Service Provider shall put inappropriate cyber security measures in place and comply with the legal and regulatory guidelines and directives.	In Clause 2, where it states that the Service Provider shall "put in appropriate cyber security measures and comply with the legal and regulatory guidelines and directives," please confirm whether this refers only to the regulatory guidelines and directives already specified in Clause 1 (including the IT Act, 2000, the IT Amendment Act, 2008, and the IT Rules), or whether any additional guidelines or directives are intended.	No change

884	110	Annexure 12 - K. Cloud Infrastructure:	11. Bidder, its solution and Bidder's CSP must comply with bank's policies on cloud adoption, cyber security, information technology, information security, etc., • RBI guidelines on Outsourcing of IT Services, Data Storage and handling, Information Technology Governance, Risk, Controls and Assurance Practices, etc. • India's IT act and amendments, Security and Data Protection regulations such as proposed Digital Personal Data Protection Bill, any India's statutory and regulatory requirements. • Any other IT security/data protection & privacy policies, guidelines, regulations etc issued by Bank, Regulators, Government of India from time to time during the contract period	We note that the RBI Guidelines on Outsourcing of IT Services have been withdrawn. Could you please specify the current guidelines that you require the Service Provider to comply with? Additionally, we request you to share details of any other IT security, data protection, or privacy policies, guidelines, regulations, or standards that you require us to comply with.	As per RFP and addendum
885	198	15.) COVENANTS OF THE SERVICE PROVIDER	The Service provider and sub-contractor, if any, is required to adhere to RBI guidelines for storage of data in India as per regulatory requirements, also to provide complete details of data captured, processed and stored, maintain confidentiality of the Bank's and	We request you to kindly specify the RBI guideline that has to be adhered by the Service Provider.	No change
886	116	50 Monitoring and Incident Response - h)	The alerts from CRM Application should be able to integrate with Bank's incidentresponse process by automatically ingesting the alerts/logs offloaded to theBank's SIEM or IDS solutions.	At present, integration with third-party SIEM solutions is not supported. We request the following details to assess feasibility on our end: - Vendor details of the SIEM. - Expected log format. - API model	No change
887	114	Annexure 12 - K. Cloud Infrastructure Point 42	Database Activity Monitoring	Database activity monitoring is not implemented as a separate standalone solution. Instead, it is there as part of the existing monitoring framework which continuously tracks database access and activities for security performance and	As per RFP and addendum
888	181	Annexure 15-Commercial Bid	It is the responsibility of the Bidder to change or upgrade the licenses for ensuring the compliance to statutory, regulatory guidelinesfrom RBI, TRAI, IRDA, NPCI, IBA etc. at no extra cost to the Bank.	Kindly specify the regulations or circulars you require the Bidder to comply with.	No change
889	111	Annexure 12 - K. Cloud Infrastructure:	RBI and Government of India guidelines and mandates on Cloud Computing GDPR compliance	We request you to kindly specify the RBI guidelines and GOI guidelines that has to be adhered by the Service Provider.	No change

890	187	Annexure 17 – Declaration/undertaking from bidder to comply with the Information and cyber security controls	We hereby agree to comply with the Information and cyber security controls as per Bank's and Regulatory Authorities IT Security Guidelines on an ongoing basis and regulatory / legal guidelines and directives related to SP / outsourcing issued by regulators / legal entities from time to time. The SP shall provide access to the regulators, legal authorities, Bank and Bank appointed auditors for on-site/off-site supervision	Could you please clarify the specific IT security guidelines, regulatory directives, and legal requirements (including issuing authorities) that the Service Provider is expected to comply with under this clause, and confirm whether such requirements are limited to those applicable to the Service Provider in its capacity as a software/service provider?	No change
891			We abide with all clauses of Bank's Cyber Security Controls which will be part of the NDA/SLA signed with the Bank at the time of award of contract.	We request you to share Bank's Cyber Security Controls for our review	No change
892	52	4.27 COVENANTS OF THE SERVICE PROVIDER	vi. The Service provider shall be responsible for compliance of all laws, rules, regulations and ordinances applicable in respect of its employees, sub-contractors and agents (including but not limited to code of Wages Act, Provident Fund laws, Workmen's Compensation Act) and shall establish and maintain all proper records including, but not limited to, accounting records required by any	We request you to clarify the specific laws, rules, regulations, ordinances or corporate policy that are applicable and requires adherence by the Service Provider.	No change
893	9	1.6	The bank shall enter into an agreement with the selected bidder for a period starting from the date of the Purchase Order till -5- years from the Go-Live Closure Sign-off date given by the Bank officials. Bank will have the right to change the start of	Does the Go-Live date mentioned in this clause refers to the Go-Live of Phase 1, as defined in Section 1.5 (Delivery Timeline)?	as per RFP and addendum
894	11	1.9	A. License Cost b. The remaining 25% of the license fee shall be payable upon successful adoption of the module, measured against mutually agreed adoption criteria and KPIs, including	Licenses are provided by a 3rd party and have to be taken in the name of the bank at go-live and would be re-sold by the bidder. Transfer of licenses entails a commercial impact. Hence we request that the entire 100% of the license fee be payable upon go live acceptance	as per RFP and addendum
895	17	2. B	1. Implementation of bidder all 6 module* of proposed CRM solution by themselves in -3- Scheduled Commercial Bank out of which one should be in India.	We suggest this should be re-worded as follows: 1. Implementation of bidder by themselves at least 6 proposed modules* in -3- Scheduled Commercial Bank out	as per RFP and addendum

896	18	2. B	1. Implementation of bidder all 6 module* of proposed CRM solution by themselves in -3- Scheduled Commercial Bank out of which one should be in India.	We suggest this should be re-worded as follows: 1. Implementation of bidder/OEM all 6 module* of proposed CRM solution by themselves in -3- Scheduled Commercial Bank	as per RFP and addendum
897	17	2. B	Technical evaluation Criteria : The Scheduled Banks should have at least -1500- branches.	We request the Bank to consider revising this criterion to 1,000 branches, as the number of active licenses and users supported is a more relevant indicator of enterprise-scale capability. This revision will enable broader participation from proven CRM solutions providers, while fully preserving the intent of	as per RFP and addendum
898	64	Annexure 2	Bidder should have implemented at least 3 modules out of 6 proposed modules* in one or more Scheduled Commercial Bank in India, having minimum 1,500 branches as on date of RFP, with minimum of 5,000 licensed users on CRM Platform. e.g. Sales Management Module implemented at “X” Bank, Lead Management Module & Service Management Module implemented at “Y” Bank will be considered as implementation of 3 modules. The platform should be in use /live as on date of published RFP and should be in operation for minimum of 6 months. *Proposed Solution should include following Module 1. Lead Management 2. Campaign Management 3. Sales Management 4. Service Management and customer 360 degree 5. Complaint management 6.Contact center with IVR integration	We request you to change this clause as below :Bidder should have implemented at least 3 modules out of 6 proposed modules* in one or more Scheduled Commercial Bank in India, having minimum 1,000 branches as on date of RFP, with minimum of 5,000 licensed users on CRM Platform. e.g. Sales Management Module implemented at “X” Bank, Lead Management Module & Service Management Module implemented at “Y” Bank will be considered as implementation of 3 modules. The platform should be in use /live as on date of published RFP and should be in operation for minimum of 6 months. *Proposed Solution should include following Module 1. Lead Management 2. Campaign Management 3. Sales Management 4. Service Management and customer 360 degree 5. Complaint management 6.Contact center with IVR integration	as per RFP and addendum

899	19	2. C	The key considerations of the TCO would be the total payouts for entire project through the contract period of 3 years, discounted at 10% to arrive at the present value of the future cash outflows.	Section 1.6 defines the contract period as “5 years from the Go-Live Closure Sign-off,” whereas this section mentions a duration of 3 years. Please clarify the applicable contract period.	No change
900	10	1.5. Delivery	In case the individual phase wise deadlines are not met then the Vendor will have to pay penalty to Bank of Baroda @ 0.5% of particular phase implementation cost inclusive of all taxes, duties, levies etc., per week or part thereof, for late implementation beyond due date of implementation, to a maximum of 10%. If delay exceeds two weeks from due date of	We request the Bank to clarify that phase-wise penalties will be only when solely attributable to the bidder	as per RFP and addendum
901		Multiple Sections In RFP	The RFP specifies six core CRM modules for delivery phasing and payment milestones. Separately, the Project Scope lists multiple functional sub-domains such as Marketing Automation & Journeys, Wealth Management, Analytics & Forecasting, Relationship Banking & RM Toolkit, Omnichannel & Self-Service, Mobile & Field CRM, Knowledge Base, Collections Management, Partner & Channel Management, etc., without explicitly mapping them to the six modules.	Since phase-wise Go-Live, penalties, and payment releases are linked to module completion, kindly clarify and provide an explicit mapping of sub-domains to the respective six modules, and indicate which sub-domains are mandatory for Phase-1 and Phase-2 Go-Live closure. This will help bidders accurately plan delivery, pricing, and phase-wise acceptance criteria.	Please refer RFP and addendum for module mapping .
902	64	Annexure 2	The solution should have been hosted in a public cloud with a single tenancy architecture for scheduled commercial banks in India for a minimum of three years	Most OEMs will not be able to host the solution in a a single tenancy architecture. We request to remove this clause or to make it multi tenancy architecture.	As per RFP and addendum

903	106	Annexure 12: Technical Requirements: Infrastructure, Cloud and other CSP Requirements	Bidder should arrive at the sizing by considering data volume, performance requirements, integration needs, scalability, and estimated number of concurrent users till the end of contract period and should provide additional resources at no additional cost to the bank in case the requirements are not met. Also, during the contract period, growth of the bank should be considered and thus, the sizing proposed should have enough computing power, memory, and storage available to accommodate the predicted sizing required.	a. Kindly clarify the expected average and peak concurrent user volumes across all CRM user groups. b. Please provide the total number of unique customers of the Bank and the expected annual growth rate in the customer base during the contract period. Should we consider the active customer base or the total customer base. Please provide details of both c. Kindly share the average and peak daily volume of complaints, service requests (SRs), and queries, along with a detailed channel-wise breakup (Branch, Contact Centre, Digital, Email, WhatsApp, ATM, Social Media). d. Kindly indicate the expected lead volume per month, with segmentation across Retail, MSME, Corporate, and Wealth segments. e. Please indicate the expected number of campaigns per month, along with the average number of campaigns running concurrently. f. What is the expected volume of campaign collaterals to be managed per month and per year?	As per RFP and addendum
904	127	Annexure 12 - Complaint Management	Forwarding Grievances: Bulk Forwarding Option and Single forward should be available for Departments to forward number of grievances to other resolver group. The same shall be used judiciously. There should be option provided to the resolver groups. Ability to execute campaigns in Email/SMS/Social	Please specify the max bulk forwarding batch size for grievances and confirm if it must be configurable and asynchronous , as this impacts sizing and workflow design.	The proposed solution should be designed to handle high-volume bulk uploads efficiently and support scalability. It must also provide configurable
905	133	Annexure 12 - Marketing Automation & Journeys and Campaign Management	Ability to track campaign response from the users using a variety of metrics – such as count of e-mail pushed, delivered count, mail opened /attachment opened count, responded count, lead generated etc.	We assume that the campaign response metrics (delivery, open, click, attachment open, etc.) will be provided by the Bank's Email/SMS gateway service provider, and the CRM will consume these metrics for reporting and analytics purpose	The proposed solution should be capable to integrate with Bank's internal systems i.e Email/SMS gateway for campaign response metrics .

906	144	Annexure 12 - Service Management with Customer 360°	Option to modify specific customer fields and attach documents in different formats (like pdf, docx, jpg, png etc.) in Customer 360 View.	Please confirm that Customer 360 will primarily be read-only, with edits restricted to CRM-owned fields only, not directly on the customer master.	Yes.
907	87–89, 106–107	Annexure 12 – Siebel CRM Migration; Data Management	Data migration scope	Confirm estimated data volumes to be migrated (customers, complaints, SRs, leads, campaigns, interaction history) and historical retention period	Please refer RFP for volumetrics
908	95–96, 100	Annexure 12 – Complaint & Service Management	WhatsApp/SMS capability	Confirm whether two-way WhatsApp/SMS conversational capability is required or only outbound notifications and acknowledgements	Whatsapp, SMS banking are one of the source channels to capture complaints through API integration in CRM application. API's to be published and consumed by the proposed solution as well for the integration.
909	87–88, 90, 106–107	Annexure 12 – Data & Analytics; Reporting & Dashboards	ETL & BI tooling	We assume that we will be provided with bank standard ETL and Reporting/Bi tools	The proposed solution must capable to integrate with Bank's internal systems as mentioned in RFP.
910	88–90	Annexure 12 – Data, Knowledge & Analytics; Omnichannel	Consent & DPDP compliance	Our assumption is that the consent management will be taken in a separate consent management system/DPDP system and we will be integrating with the same	As per RFP and addendum
911	88–89, 94, 106	Annexure 12 – Architecture & Integration	Integration tooling	Confirm mandated Middleware/ESB, Social Media Listening, and integration platforms to be integrated (IVR assumed Avaya as per RFP) .	The proposed solution should be integrated with Bank's internal system as per the RFP;.
912	88–89, 94, 106	Annexure 12 – Architecture & Integration	Integration tooling	Assume that all integrations will support REST APIs as we propose API first Architecture	The proposed solution should support as per the RFP scope.

913	97–99	Annexure 12 – Campaign Execution	Outbound campaign execution	We assume that the campaigns will be directly triggered by bank approved external systems/tools	The campaigns will be executed only through CRM solution.
914	90, 99	Annexure 12 – Reporting & Analytics	Campaign ROI reporting	We assume that campaign ROI, attribution, and performance reporting will be done using CRM	The proposed solution should support as per the RFP scope.
915	88–90	Annexure 12 – Knowledge Management / Service Management	Knowledge Articles	Please confirm whether Knowledge Articles currently exist. If yes, kindly confirm (a) approximate volume, and (b) format/type (structured articles, FAQs, documents, PDFs, etc.) to be integrated with CRM	Bidder may require to create additional process and artifacts to support the requirements of the RFP
916	88–90	Annexure 12 – Knowledge Management / Service Management	Knowledge Articles	We assume that bank will provide knowledge articles in a single DMS platform owned by the bank .	Bidder may require to create additional process and artifacts to support the requirements of the RFP
917	88–90	Annexure 12 – Omnichannel / User Experience	Vernacular language support	Most SAAS OEM platforms do not support vernacular languages as they are multi tenancy. Request for removal of this clause	As per RFP and addendum
918	87–89	Annexure 12 – Collections / Recovery / Loan Servicing	Collections Management	We assume collections/recovery functionality is expected to be integrated with an existing Bank collections/recovery system.	The proposed CRM solution capable to integrate with existing Bank collections/recovery system.
919	169	Annexure 12 –Relationship Banking & RM Toolkit	Platform should facilitate User to do the financial need analysis and risk profiling for the customers with respect to their portfolio periodically	We assume that financial need analysis and risk profiling logic will be executed by the Bank's Wealth / Investment platform, and the CRM will facilitate initiation, input capture, and display of assessment outcomes. Kindly confirm this assumption	As per the RFP scope, the bidder should size their solution.
920	9	1.5. Delivery	Bank is already using inhouse apps for DSA, RMs and also having 3rd party integration with different modules. The same need to be migrated within above mentioned timelines.		As per RFP and addendum

921	93	G) CRM Mobile App- Lead Management Module	CRM Mobile app inhouse developed module used for Lead management module for the following products like Retail assets, Liabilities, Wealth management, Credit card with features like lead creation, status tracking and Lead dashboard integrated with CRM application. This app is accessed at field level i.e Relationship managers, Deposit sales managers, and Branches. RM360 mobile app inhouse developed app for corporates integrated with CRM application.	Services provider to enable the integration with existing mobile app using API etc. and Implementation of Mobile Application for DSA, RM is not in scope. Please confirm	As per RFP and addendum
922	113	K. Cloud Infrastructure:	30. Bidder to provide dedicated Leased line from two different service providers from CSP DC and DR sites to Bank DC and DR sites. Bidder to provide link up to Bank's DC and DR router including CPE (Customer Premises Equipment), cross connect, SFP and cable laydown. 33. The CRM should support WAN optimization techniques to improve the performance of the application over wide-area networks, particularly for remote branches and users with limited bandwidth. The CRM should seamlessly integrate with Software-Defined WAN (SD-WAN) solution of the Bank for optimized and secure connectivity 34. between bank branches and application, ensuring efficient network resource utilization and failover mechanisms.	Lease line/ Wavelength cannot be resold in India as per the laws of the land except by very few companies who has a specific license by TRAI, please remove the scope of lease line procurement as its very restrictive. The lease line needs to be procured by the bank. Based on our Past experience Lease line come with CPE/router and managed services in case of any issues. Would recommend considering the same in Lease line procured by Bank.	As per RFP and addendum

923	113	K. Cloud Infrastructure:	30. Bidder to provide dedicated Leased line from two different service providers from CSP DC and DR sites to Bank DC and DR sites. Bidder to provide link up to Bank's DC and DR router including CPE (Customer Premises Equipment), cross connect, SFP and cable laydown. 33. The CRM should support WAN optimization techniques to improve the performance of the application over wide-area networks, particularly for remote branches and users with limited bandwidth. The CRM should seamlessly integrate with Software-Defined WAN (SD-WAN) solution of the Bank for optimized and secure connectivity 34. between bank branches and application, ensuring efficient network resource utilization and failover mechanisms.	To enable secure access via Lease line from Bank DC to Cloud Services. Couple services required which will be provided by Bank. Please confirm. 1. DNS services for Public Domain 2. Routing Traffic of Public IP from Bank Premises to CSP 3. Allow wildcard domain as SaaS solution works on multiple domain and IP which keep on changing.	As per RFP and addendum
924	106	Annexure 12: Technical Requirements: Infrastructure, Cloud and other CSP Requirements	Bidder should arrive at the sizing by considering data volume, performance requirements, integration needs, scalability, and estimated number of concurrent users till the end of contract period and should provide additional resources at no additional cost to the bank in case the requirements are not met. Also, during the contract period, growth of the bank should be considered and thus, the sizing proposed should have enough computing power, memory, and storage available to accommodate the predicted sizing required.	Please provide current Siebel CRM data volumes: Customer master records(Including Assets , liability , Nominee , cards and related records) Complaints SRs Leads / Opportunities Interaction history What is the expected annual data growth rate (%) for: Customers Interactions Attachments / documents Call / chat transcripts Please confirm data retention policies for: Complaints Service Requests Leads Campaign history	Please refer the RFP and addendum

925	115	Annexure 12:Technical Requirements: Infrastructure, Cloud and other CSP Requirements	Encryption keys which are used for encryption in cloud should support BYOK (Bring Your Own Keys) and use along with KMS (Key management Service). The solution should integrate with Bank's Hardware Security Module (HSM) for secure key management, ensuring that encryption keys are generated, stored, and accessed securely.	HSM and Key Management Solution will be enabled by Bank. CRM should able to integrate with Bank KMS for BYOK. Please confirm	The proposed solution should support BYOK (Bring Your Own Keys) and use along with KMS (Key management Service).
926	88	5. Agentic AI Readiness	CRM must be able to leverage the Bank's Agentic AI framework and guardrails for use cases such as agent assist, auto-summarization, next-best-action, intelligent routing and guided service-to-sales prompts.	CRM should be able to integrate with Agentic AI Framework/Platform using API or event based mechanism, Please confirm.	As per RFP and addendum
927	88	4. Data, Knowledge and Analytics	Support multimodal/structured and unstructured data references (notes, attachments, call/chat transcripts) with retention and privacy controls.	Please elaborate on the requirement Support multimodal/structured and unstructured and storage volumes & applicable retention	The solution should support as per the RFP scope.
928	115	Annexure 12:Technical Requirements: Infrastructure, Cloud and other CSP Requirements	Annexure 12:Technical Requirements: Infrastructure, Cloud and other CSP Requirements	Please confirm number of non-production environments required: Dev SIT UAT Pre-Prod Should non-prod environments be sized at: Full production scale? Percentage of production (please specify)?	Yes.The proposed solution should support as per the RFP scope and Bank requirements.
929	110	Annexure 12:Technical Requirements: Infrastructure, Cloud and other CSP Requirements	A Secure Software Development Lifecycle (Secure SDLC) must be followed by the bidder for all applications throughout their lifecycle, with a security assurance certificate provided accordingly.	1. Bank will provide the tooling for DevSecOps which include CI/CD, SAST, DAST and bidder needs to configure. Please confirm 2. Based on our previous implementation, Any custom code written as part for CRM application should be stored in Bank premises and entire DevSecOps pipeline should be enabled on prem including version control like GitHub etc. Please confirm	Bidder activity limited to the scope mentioned in the RFP

930	107	Annexure 12:Technical Requirements: Infrastructure, Cloud and other CSP Requirements	10. The selected bidder is responsible for Migration of customer data, existing leads, complaints and service request/case data, Migration strategy, Migration Plan, Pre and Post migration reconciliation and Audit support in the new solution.	Post One Time Data Migration, Any Incremental data migration for newly on-boarded customer or existing customers etc., changes in relationships with Bank etc. in any Bank internal systems or Sibel CRM etc.. would be published to SaaS CRM system using File based upload or API based or event based	The data migration is the scope of the bidder.
931	142	Service Management with Customer 360°	Plugin/Interface to integrate with Social Media Platforms (Facebook, Twitter, Instagram etc.) from Customer 360.	Bank will provide aggregator services to integrate with all social media tools and listeners around the same. Please confirm	The proposed solution must capable to integrate with Bank social media platforms i.e facebook, twitter, instagram etc..
932	155	Contact Center with IVR integration:	Integration and accessibility to Bank's existing/new Call Centre.	Integration with Bank IVR system will be enabled via Bank Middleware and SaaS CRM should be able to integrate with Middleware for any data exchange. Please confirm	The proposed solution must capable to integrate with Bank internal systems.
933	88	3. Architecture and Integration Principles	3. Architecture and Integration Principles	If custom microservices are required: Should they be deployed within the Bidder's SaaS cloud, or Deployed on Bank-provided infrastructure (on-prem or Bank cloud)?	As per RFP and addendum
934	130	Annexure 12 : Social Media Complaints	It should also suggest appropriate strategies according to the responses to enhance the bank image and goodwill among public.	We understand that the CRM platform is expected to provide capabilities for capturing, tracking, analyzing, and reporting on social media interactions and responses using social media listening tools, while we assume that execution of Online Reputation Management(ORM) or goodwill strategies would be handled by the Bank's designated social media management team or agency. Kindly confirm if this understanding is correct.	The proposed CRM platform is expected to integrate with Bank social media platforms through API integration. The solution has to publish API's and consume as well.

935	130	Annexure 12 : Project Scope - Functional & Technical requirements - Marketing Automation & Journeys and Campaign Management	Campaign Volume, Performance & Scale	•What is the expected annual outbound communication volumes per channel (SMS, Email, WhatsApp, Push, etc.), including peak campaign burst volumes during high-activity periods. •Does the Bank expect real-time event-triggered marketing journeys (ex: transaction-based triggers), and if so, what is the acceptable trigger latency (seconds/minutes/hours)? •What is the time lag currently for real-time engagement campaigns like transaction or complaint redressal etc.?	Please refer RFP for volumetrics. As per the RFP scope, the bidder has to size their solution.
936	165	Annexure 12 : Project Scope - Functional & Technical requirements - Data Analytics & Forecasting	Data, Segmentation & Decisioning	•What is the expected refresh frequency from Core Banking System and Data Warehouse (real-time / hourly / daily batch)? •Will segmentation be pre-computed in a data warehouse/lake or will be executed dynamically within CRM platform at runtime? •What are the different customer segments which are currently targeted? •What are the rules being used to classify customers into segments? •What is the frequency of data refresh for customer segments?	The details will be shared with successful bidder.

937	87	Annexure 12 : Project Scope - Functional & Technical requirements - Marketing Automation & Journeys and Campaign Management	Journey Orchestration, Execution & Coverage	• Is cross-channel journey orchestration within a single workflow mandatory (ex: SMS -> Email -> RM Call -> Call center follow-up), including prioritization and suppression logic? • Can we get a list of all customer facing journeys which are currently executed across products and touchpoints? What is the frequency of the same? • Are there any lifecycle journeys configured currently? If not, are they required? (ex: onboarding, activation, maturity, dormant) • Are campaigns linked/integrated to any other apps on phone, where RMs can update details from phone? • What is the scope of social media campaigns? What are the campaigns currently running on social media? Which platforms do you use currently	The bidder need to size their solution based on the scope provided in the RFP and addendum
938	-	Multiple Sections of the RFP	Governance, Ownership & Operating Model	• What is the expected attribution model? (Ex: last touch, first touch, multi touch) • Will consent to communicate centrally owned or will CRM own that as well? Is it updated real-time in our database currently? • Who will be responsible to track SLA adherence for RM/Branch follow-ups? • Given payment milestones linked to adoption, what measurable criteria will define “successful marketing adoption”? • Who are the key stakeholders and decision makers in planning & executing journeys from an end-to-end process standpoint?	As per RFP and addendum

939	89	Annexure 12 : Project Scope - Functional & Technical requirements -	Compliance, Localization & Measurement	• Are there any country-specific rules which need to be taken care of for international communications? • What are the KPIs that you currently track for campaigns? Are there any KPIs that you wish to track in the future? • How do you update the client interaction history currently?	As per RFP and addendum
940	113	Annexure 12 : Project Scope - Functional & Technical requirements - Cloud infrastructure	The link should be of minimum 500Mbps capacity. The successful bidder has to maintain link uptime in line with application uptime of 99.90%.	As this is SAAS implementation the mentioned point is not warranted	As per RFP and addendum
941	113	Annexure 12 : Project Scope - Functional & Technical requirements - Cloud infrastructure	At any point in time, during the contract period, utilization of link should not cross 70%. In case link is utilized more than 70%, bidder to upgrade the link and associated hardware at no additional cost to the Bank.	As this is SAAS implementation the mentioned point is not warranted	As per RFP and addendum
942	14	1.11	Ownership, Grant and Delivery	Bidder will supply all third-party products through the resale model, and such products shall be governed under the terms and conditions of the Resale Agreement to be signed between the parties, separately to the services agreement.	As per the RFP scope and addendum .
				All OEM products/Services shall be governed by the EULA/EUMA as provided by the respective OEM, which will be executed between the Bank and such OEM directly. Please confirm this understanding.	As per RFP and addendum

943	8	1.3	Project Scope	Our bid is based upon the information provided by the Client in the RFP, if at a later stage it is found that the information was not correct and the same impacts the commercials, the Bidder shall have the right to make the necessary changes and submit the revised price.	No change
				It is further clarified that the Bidder has relied on the information shared under the RFP and data shared by client thereafter for creating deliverables or performing of services by Bidder, accordingly Bidder will be not liable for deliverables if they don't yield expected results, when put into use. Bidder will not be able independently validate any information provided to it by the Client, its agents or third parties and shall be entitled to rely upon such information.	No change
				Bidder will perform services only in accordance with the written and agreed scope between parties. If there is any change in scope Bidder submits that the bid response including commercials will undergo changes pursuant to the said Amendments / Corrigendum / Addendum through the Change Control Process	No change
944	9	1.6	Contract Period	We understand that the contract will be effective from date of execution of Contract	No change
					No change
945	13	1.9	But, any benefit arising out of any subsequent reduction in the prices due to reduction in duty & taxes after the prices are fixed and before the	We request that in case of upward revision on the duty/taxes, the commercials can be revised accordingly. Please confirm.	No change
946	13	1.9	The Bank shall have the right to withhold any payment due to the vendor, in case of delays or	We request for the deletion of this point.	No change
947	15	1.12	Escrow Mechanism	We request this to be an arrangement between the Bank and the OEM as Accenture is providing third party products/software on	As per RFP and addendum

948	15 and 209	1.13 and Annexure 21-Service Level and Non-Disclosure Agreement Clause 23	Audit	While we agree in principle about the requirement of audit during term of contract, we request BOB to include the following modifications in the provision:	No change
				“The physical copy of records pertaining and maintained by the Bidder relating to this Contract only shall be available to BOB for conducting audit during validity of this Contract. The frequency of such audit will be limited to once a year. BOB will provide fourteen (14) days’ prior written notice of its intention to conduct such an audit. BOB will conduct such audits in a manner that will result in minimal disruption to Bidder’s business operations and subject to confidential obligations agreed at that stage. Audits shall be conducted only during normal business hours and working days of Bidder and that too once annually. Audit shall be conducted by BOB employees only and such third parties, which are mutually agreed (except for Bidder’s competitors), subject to agreeing confidentiality provisions with us and will not involve intrusive testing of Bidder systems or IT environment.	No change
				BOB will not be entitled to audit (i) data or information of other customers of Bidder; (ii) any cost information unless such is the basis of a reimbursable expense; (iii) Bidder quality assurance reviews and contract management reports; or (iv) any other Confidential Information of Bidder that is not directly relevant for the authorized purposes of the audit.”	No change
				We further request for the following to be deleted:	No change

				Compliance with best security practices may be monitored periodically by computer security audits / Information Security Audits performed by or on behalf of the Bank. The periodicity of these audits will be decided at the discretion of the Bank. These audits may include, but are not limited to, a review of access and authorization procedures, backup and recovery procedures, network security controls and program change controls. The Service Provider must provide the Bank access to various monitoring and performance measurement systems. Service Provider has to remedy all discrepancies observed by the auditors at no additional cost to the Bank.	No change
949	21	Commercial Bid terms	f. In case of any variation (upward or downward) in Government levies / taxes / cess / duties etc. which has been included as part of the price will be borne by the bidder. Variation would also include the introduction of any new tax / cess/ duty, etc. provided that the benefit or burden of other taxes quoted separately as part of the commercial bid like	We request that the responsibility and cost of any increase in taxes should be borne by the Bank. Please confirm.	No change
950	22	Price Comparisons- Point (b)	Normalization of Bids	We request for the deletion of this clause.	No change
951	24 and 25	3.1 and 3.1(l)	General terms and conditions: --	We understand that Bank has provided a template for contract to be executed at the time of contracting. We submit that bidder is bound to propose certain deviations to the terms of this RFP and the SLA and requests that contract should be finalized basis mutual agreement.	No change
			· Acceptance of Terms: the bidders will, by responding to the Bank's RFP document, be deemed to have accepted the terms as stated in this RFP document.		No change
			· The Bank expects Bidder to adhere to the terms of this tender document and would not accept any deviations to the same.		No change
952	30	3.2 (dd)	It would be the responsibility of the bidder to arrange / obtain necessary road permits or any other document for delivery of the material till Bank's premises. The bidder shall arrange road	We request for the deletion of this clause as the same is not applicable.	No change

953	32	3.2(xx)	In the event that the Bank is forced to cancel an awarded contract (relative to this tender document) due to the bidder's inability to meet the established delivery dates or any other reasons attributing to the bidder then that bidder will be responsible for any re- procurement costs suffered by the Bank. The liability in such an event could be limited to the differential excess amount spent by the Bank for procuring similar deliverables and services.	We request for the deletion of this clause.	No change
954	33	3.2(aaa)	Incidental Services	We request the Bank to specify what does Incidental Services mean so that the solution can be create accordingly.	No change
955	33	3.2 (bbb)	At Bank's discretion, there will be an acceptance test by the Bank after supply of services as mentioned in the RFP. In case of discrepancy in the implementation, the Bank reserves the right to cancel the entire purchase contract.	We request for the deletion of this clause	No change
956	33	3.2(ccc)	Indemnity	We request that this indemnity is limited to third party claims only. Please confirm.	No change
957	36	3.6	Performance Bank Guarantee and all other places with PBG and its format.	We request that there should be reasonable notice provided before invoking the PBG and the following line is deleted: <i>The Bank reserves the right to recover any dues payable by the selected bidder from any amount outstanding to the credit of the selected bidder, including the pending bills and/or invoking Performance Guarantee, if any, under this contract.</i>	No change
				Please confirm.	No change
958	36	3.7	Service Level Agreement and- Disclosure Agreement	We request that the SLA shall be executed on terms mutually discussed and agreed between the Parties within the time period as mutually agreed.	No change

959	38 and 46	4.1 and 4.17	Compliance with laws	We request for deletion of the non-exhaustive list of compliance with various laws, acts and regulations. Bidder request to delete the requirement of signing a undertaking in this regard. We propose a simple language for compliance with laws: “Each Party will retain responsibility for compliance with all central, state and local laws and regulations applicable to their respective businesses.” Further we request to delete the indemnity obligation with respect to compliance with law in general, as provided in RFP. Please confirm.	No change
960	41 and 201	4.11 and Annexure 21-Service Level and Non-Disclosure Agreement- Clause 16	Confidentiality	We request that the confidentiality obligations be made mutual. Additionally, we request inclusion of the following exclusions in the provision as per the language provided below:	No change
				“Nothing in this Agreement will prohibit or limit either party’s use of information (i) previously known to it without an obligation not to disclose such information, (ii) independently developed by or for it without use of Information, (iii) acquired by it from a third party which was not, to the receiver’s knowledge, under an obligation not to disclose such information, or (iv) which is or becomes publicly available through no breach of this Agreement; or (v) is required to be disclosed under orders of Court of competent jurisdiction or to fulfil legal or regulatory requirements.”	No change

				We further wish to clarify that any personal data shall be excluded from the ambit of the definition of Confidential Information. Request your confirmation on our understanding. Further Bidder will not need any personal data for this scope of work. If personal data is needed, parties will discuss the modalities separately.	No change
961	43 and 206	4.12 and Annexure 21- Service Level and Non-Disclosure Agreement, Clause 20	Termination	We request that in case of breach, a period of 30 days is provided to cure such breach, before the Agreement is terminated. We further request that the right to terminate for breach should also be available with the Service Provider in case of breach by the Bank. In case of termination without any reason, we request Bank to provide a prior notice of 90 days and in addition to payment of fees for services rendered, any out- of pocket expenses and termination fees/charges	No change
962	45 and 207	4.12 (f) and clause 20(l) of Annexure 21- Service Level and Non-Disclosure Agreement	In the event the Bank terminates the Contract on the ground of default/ breach in whole or in part, the Bank may, among other applicable remedies, procure Goods, Works or Services similar to those undelivered upon such terms and in such manner as it deems appropriate, and hold the Service Provider liable to the Bank for any excess costs for such similar Goods, Works or Services. However, the	We request for the deletion of this clause.	No change
963	45 and 212	4.14 and Annexure 21- Service Level and Non-Disclosure Agreement- Clause 32	Solicitation of employees/ Non-solicitation	We request that this clause is made mutual. We further request for the following line to be added to the clause: “The above clause shall not be applicable in case the recruitment is done through public advertisement.” Please confirm.	No change
964	48 and 203	4.18 and Annexure 21, Clause 17	Indemnity	We request that the following line is added in this clause: “Overall liability under this clause shall be capped to limitation of liability as per Clause ____”	No change

965	49	4.21	Information/Cyber Security Measures/Controls for selected SP	We request the Bank to share the requirements that need to be complied so that the same can be reviewed internally.	No change
966	50 and 210	4.23and Annexure 21-Service Level and Non-Disclosure Agreement-Clause 24	Limitation of Liability	We request for the clause on Limitation of liability to be amended to read as below:	No change
				“The Bidder’s aggregate liability in connection with obligations undertaken as a part of this Agreement whether arising under this project regardless of the form or nature of the action giving rise to such liability (whether in contract, tort, indemnity or otherwise), will be limited to the total contract value.	No change
				The Bidder’s liability in case of claims against the bank resulting from its own, its employees or its sub-contractors Willful Misconduct or Gross Negligence will be based at actuals.	No change
				Under no circumstances either Party will be liable to the Other Party for indirect, incidental, consequential, special or exemplary damages arising from termination of this Agreement, even if the Party has been advised of the possibility of such damages, such as, but not limited to, loss of revenue or anticipated profits or lost business.	No change
				For all purposes following definitions will be considered by the Parties:	No change
				“Willful Misconduct” means any act or omission of a party which is willfully intended to harm the interests of the other party, provided however, that willful Misconduct does not include ordinary negligence, an error of judgment or mistake of a person.	No change

				“Gross Negligence” means an indifference to, and a blatant violation of a legal duty with respect to the rights of others, being a conscious and voluntary disregard of the need to use reasonable care, which is likely to cause foreseeable grave injury or harm to persons, property, or both. Gross negligence involves conduct that is extreme, when compared with ordinary negligence. A mere failure to exercise reasonable care shall not be a Gross negligence.	No change
967	51	4.27	Covenants of the Service Provider: the Service Provider shall not substitute the key staff identified for the services mentioned in this Agreement.	We request that in certain circumstances like, death, injury, resignation, or prolonged illness, bidder should be allowed to replace the key resources.	No change
				Further we request to delete the following language from this clause:	No change
				"Shall be responsible for compliance of all laws, rules, regulations and ordinances applicable in respect of its employees, sub-contractors and agents (including but not limited to code of Wages Act, Provident Fund laws, Workmen's Compensation Act) and shall establish and maintain all proper records including, but not limited to, accounting records required by any law, code, practice or corporate policy applicable to it from time to time, including records and returns as applicable under labor legislations."	No change
				We have submitted that “Each Party will retain responsibility for compliance with all central, state and local laws and regulations applicable to their respective businesses." Kindly confirm the understanding.	No change

968	54 and 200	4.27 (xvi) and Annexure 21, Clause 15(xxxviii)	RBI Circulars	We request the Bank to specify the relevant provisions of the Circulars that need to be complied by the Service Provider so that the same can be reviewed internally.	As per RFP and addendum
969	55 and 214	4.29 and Annexure 21- Service Level and Non-Disclosure Agreement - clause 38	Order/Contract cancellation: In case of order cancellation, any payments made by the Bank to the Service provider would necessarily have to be returned to the Bank with interest @ 15% per annum. Further the Service provider would also be required to compensate the Bank for any direct loss incurred by the Bank due to cancellation of the contract and any additional expenditure to be	We request for the deletion of this clause. Please confirm.	As per RFP and addendum
970	89	Annexure 12- point 6	Security, compliance governance	We clarify that the Service Provider would not be providing any legal ,tax, regulatory, financial or investment advise. Please confirm on this understanding.	As per the RFP scope
971	89	Annexure 12- point 6	Security, compliance and governance: According to Digital Personal Data Protection (DPDP) Rules, 2025, Establish a comprehensive framework for processing digital personal data, empowering users with rights over their data and requiring strict compliance from fiduciaries regarding consent, data breaches, and	We request for the deletion of this clause as we are not a legal advisory firm and this should not form part of our scope of work.	As per RFP and addendum
972	106	Annexure 12- Point J(22)	Data Management and Integration: Bidder /CSP (Cloud Service Provider) should ensure that any data that is stored on the cloud is protected and appropriate policies and controls are put in place to provide data privacy and protection. The CSP should adhere to all laws pertaining to data privacy and protection that are applicable as per GoI, RBI and any other regulators. The CSP should also ensure that necessary enhancements are made to the services provided whenever there are changes	The CSP shall be provided on the re-sale basis. CSP will have their own terms and conditions and usually any changes to their terms may be mutually agreed between the Bank and CSP, where Accenture can facilitate such discussion being a re-seller of the CSP vendor.	As per RFP and addendum
973	108	Annexure 12, point K(11) and	Cloud Infrastructure	The CSP shall be provided on the re-sale basis. CSP will have their own terms and conditions	No change
					No change

974	175	Annexure 13	Service Level and Service Credits	We request that the Service Levels and the Service Credits are mutually discussed and agreed at the contracting stage. We also request that the SLA charges have an overall cap of 5% of the quarterly Charges and before cancellation of the contract, the Bank gives 30 days' notice to remedy the breach.	No change
975	178	Annexure 14	*There shall be no escalation for prices during the currency of 5 years contract period and any extension thereof. Bid submitted with an adjustable price quotation will be treated as non-responsive and will be rejected.	Our bid is based upon the information provided by the Client in the RFP, if at a later stage it is found that the information was not correct and the same impacts the commercials, the Bidder shall have the right to make the necessary changes and submit the revised price.	No change
			*It is the responsibility of the Bidder to change or upgrade the licenses for ensuring the compliance to statutory, regulatory guidelines from RBI, TRAI, IRDA, NPCI, IBA etc. at no extra cost to the Bank.	It is further clarified that the Bidder has relied on the information shared under the RFP and data shared by client thereafter for creating deliverables or performing of services by Bidder, accordingly Bidder will be not liable for deliverables if they don't yield expected results, when put into use. Bidder will not be able independently validate any information provided to it by the Client, its agents or third parties and shall be entitled to rely upon such information. Bidder will perform services only in accordance with the written and agreed scope between parties. If there is any change in scope Bidder submits that the bid response including commercials will undergo changes pursuant to the said Amendments / Corrigendum / Addendum through the Change Control Process	No change
976	197	Annexure 21-Service Level	13. Payment Terms After the dispute is resolved, Bank shall endeavour	We request that the clause is amended to read as below: "After the dispute is resolved,	As per RFP and addendum As per RFP and addendum

977	198	Annexure 21- Service Level and Non- Disclosure	14- Set off	We request for the deletion of this clause. Please confirm.	No change
978	201	Annexure 21- Service level	16-Confidentiality	We request that the following line is added in the clause: “Notwithstanding the above, Bank	No change
979	189 and 213	Annexure 19 and Annexure 21-Service Level and Non- Disclosure Agreement	35- Incident Response and Management	We request that the clause is amended to read as follows:	No change
				Service Provider must have a mechanism/resources to take appropriate action in case of any cybersecurity incident in its environment. They must have written incident response procedures including the roles of staff/outsourced staff handling such incidents; Response strategies shall consider readiness to meet various incident scenarios based on situational awareness and potential/post impact, consistent communication and coordination with stakeholders, including specifically the bank, during response.	No change
				Service Provider’s BCP/DR capabilities shall adequately and effectively support the Service Provider’s cyber resilience objectives and should be so designed to enable the Service Provider to recover rapidly from cyber- attacks/other incidents and safely resume critical operations aligned with recovery time objectives while ensuring security of processes and data is protected. This shall be as per the terms mutually agreed in the scope of work and the RFP and is limited to the services and bills of material provided by the Service Provider.	No change

				Service Provider is responsible for meeting the requirements mutually agreed in the scope of work and the RFP for incident management and BCP/DR even if their IT infrastructure, systems, applications, etc., are managed by third party vendors/service providers. Service Provider shall have necessary arrangements, including a documented procedure for such purpose. This shall include, among other things, informing the bank about any cybersecurity incident occurring in respect of the bank within 24 hours of detection to early mitigate the risk as well as to meet extant regulatory requirements.	No change
980	189 and 213	Annexure 19 and Annexure	Clause 36- IT Risk management	We request that this clause is amended to read as follows: The Service Provider shall	No change No change
981	198		The Service provider and sub-contractor, if any, is required to adhere to RBI guidelines for storage of data in India as per regulatory requirements, also to provide complete details of data captured, processed and stored, maintain confidentiality of the Bank's and its customers data and report the same to the Bank. The Service provider will be liable to the Bank for any event of security breach and leakage of data/information. The Service Provider and sub-contractor, if any, should not store or share any data outside the Bank's infrastructure.	We request that the clause is modified to read as below: The Service provider and sub-contractor, if any, is required to adhere to RBI guidelines for storage of data in India as per regulatory requirements, also to provide complete details of data captured, processed and stored, maintain confidentiality of the Bank's and its customers data and report the same to the Bank. The Service provider will be liable to the Bank for any event of security breach and leakage of data/information, to the extent of liability clause agreed in the Service Level Agreement. The Service Provider and sub-contractor, if any, should not store or share any data outside the Bank's infrastructure. We further request that the guidelines that need to be adhered by us are shared in advance so that the same can be reviewed internally.	No change
982	211	Annexure 21-	Clause 20- Information Ownership	We understand that any Background	as per RFP and addendum

982	211	Service Level	Clause 29- Information Ownership	Information of the Bidder will not form part of	as per RFP and addendum
983	214	Annexure 21- Service Level and Non-Disclosure	Clause 37- Blacklisting	We request for the deletion of this clause.	No change
984	214	Annexure 21- Service Level	Clause-39 Visitorial rights	The Parties agree that a reasonable notice shall be provided to the Bidder before any visit	No change No change
985	214	Annexure 21- Service Level and Non-Disclosure Agreement	Clause 40- Data protection clauses	We understand that there is no requirement to access the Personal Data of the Bank under this Project and therefore we request for the deletion of these clauses as the same are not applicable. In case there is requirement of access to Personal Data, please confirm. In that case, the Parties shall be required to execute the Data Protection Agreement.	No change
986	215	Annexure 21- Service Level	Clause 42-Right to Alter Quantities	Bidder submits that any change of scope/quantities will be agreed through a	No change No change
987	200	Annexure 21- Service Level and Non-Disclosure Agreement	Clause 15 (xxxvii) Background Check	We request the clause with respect to Background check to be modified to the following everywhere in the RFP and Service Level and Non-Disclosure Agreement: "Service Provider shall provide Background Check declaration of all the resources deployed on the Bank of Baroda project on the Bank's premises within 1 month from the date of onboarding on the project."	No change
988	9	Clause 1.5- Delivery	In case the individual phase wise deadlines are not met then the Vendor will have to pay penalty to Bank of Baroda @ 0.5% of particular phase implementation cost inclusive of all taxes, duties, levies etc., per week or part thereof, for late implementation beyond due date of implementation, to a maximum of 10%. If delay	We request for the penalty to be reduced to 5%. Please confirm.	No change
989	9	Delivery	Clause 1.5: Any deliverable has not been implemented or not operational on account of which the implementation is delayed, will be deemed/treated as non-delivery thereby excluding the Bank from all payment obligations under the	We request for the deletion of this clause.	No change

990	11	Clause 1.9- Payment terms	The Vendor must accept the payment terms proposed by the Bank. The commercial bid submitted by the vendors must be in conformity with the payment terms proposed by the Bank. Any deviation from the proposed payment terms would	We request that deviations and assumptions to the commercial bid are permitted to the extent required for the framing of the solution and capturing the understanding of the Parties.	as per RFP and addendum
991	113	Annexure 12 : Project Scope - Functional & Technical requirements - Cloud infrastructure	The CRM should support WAN optimization techniques to improve the performance of the application over wide-area networks, particularly for remote branches and users with limited bandwidth. The CRM should seamlessly integrate with Software-Defined WAN (SD-WAN) solution of the Bank for optimized and secure connectivity between bank branches and application, ensuring efficient network	Deviation : Since this is SAAS implementation the mentioned point is not warranted	As per RFP and addendum
992	180	Annexure 15	Commercial Bid	Please provide Bifurcation of Sales Users, Service Users, Number of Customers	as per RFP and addendum
993	49	4.21	The Service Provider (SP) shall provide an undertaking on their letter head as per Annexure 24 to comply with the Information	Annex. 24 is SLA/ BG Execution Conformity Letter. Please confirm which Annex to be referred here.	No change
994	49	4.21	The selected SP has to abide with all clauses of Bank's Cyber Security Controls which will be part of the NDA/SLA signed with the Bank at the time of award of contract.	Please provide the clauses in advance so SP can evaluate, discuss with the Bank for mutual agreement as per SoW and estimate the effort accordingly.	No change
995	86	Annex. 11	We hereby undertake that the proposed hardware / software/Services to be supplied will be free of malware, free of any obvious bugs and free of any covert channels in the code (of the version of the application being	The software will be free of any bugs or vulnerabilities at the time of Delivery/ go-live. However, new bugs or vulnerabilities may develop over the period of time which will be patched periodically. Please	No change

996	187	Annex. 17	We hereby agree to comply with the Information and cyber security controls as per Bank's and Regulatory Authorities IT Security Guidelines on an ongoing basis	Please share the details of Information and cyber security controls as per Bank's and Regulatory Authorities IT Security Guidelines so SP can evaluate, discuss with the Bank for mutual agreement as per SoW and estimate the effort accordingly.	No change
997	116	h	The alerts from CRM Application should be able to integrate with Bank's incident response process by automatically ingesting the alerts/logs offloaded to the Bank's SIEM or IDS solutions.	Please help with the frequency as concurrent logs sent from saas to bank side will put huge egress cost. Request you to please help with the frequency. Also mention the tools which you using along with frequency.	As per the RFP scope. The proposed solution must capable to integrate with Bank internal tools.
998	36	3.5	Self- Declaration as format mentioned under Annexure II under the same of notification (File No. 1(10)/2017- CLES dated 6.12.2019) regarding 'local supplier'	Please clarify the language of the form as it read "cyber security product mentioned in the form". How do we articulate this for self declaration	No change
999	104	H. Training	Refresher Training program on a frequency of 3 months for the updates in the platform. And yearly for next three years on the overall	Please clarify the training to given in this frequency to all the batches of 50 participants over the duration of	as per RFP and addendum
1000	109	K. Cloud Infrastructure 7.	The response time at server end should be always be less than 200 milli second. During the agreement period, if at any stage, it is found that the Platform provided by the Bidder is not able to give the requisite performance as per the sizing parameters (i.e., up time above 99.90% and response time < 1 seconds). the Bidder shall	While the industry standard is 5 seconds, the bank is aiming at < 200 milliseconds. Request to reconsider and accept industry standards.	No change

1001	15	1.3 Audit	The Bank and its authorized representatives, including Reserve Bank of India (RBI) or any other regulator shall have the right to visit any of the Bidder's premises without prior notice to ensure that data provided by the Bank is not misused.	We request the Bank to kindly consider providing prior intimation before any visit to the Bidder's premises by the Bank or its authorized representatives, including regulators, to enable necessary internal coordination and ensure availability of relevant personnel.	No change
1002	175	Annex. 13	The selected service provider shall guarantee monthly uptime of 99.90%. Also sev1,sev2 and sev3 mentioned 2,4,8 hrs. with penalty. From the date of Go Live Phase 1 Issue Classification Restoration Time Severity 1 2 hours Severity 2 4 hours Severity 3 8 hours	Global industry practice is to provide 24x7x365 availability with a monthly uptime commitment, where planned maintenance is excluded from uptime calculations. SLAs are typically backed by service credits rather than penalties. Considering the nature of CRM platforms and prevailing SaaS standards, an uptime commitment of 99.5% on a monthly basis is proposed. Restoration Time Severity 1 4 hours Severity 2 8 hours	No change
1003	113	K.39	Bidder to support in deporting/exporting data from cloud due to regulatory/statutory mandates/ Bank's requirements at no additional cost to the bank. Also, Bidder has to specify the mechanism in technical bid document to make sure that the bank's data is erased properly post transition.	Confirm the expected frequency and volume of data export requests and whether bulk exports beyond reasonable usage limits will be governed through a defined process.	No change

1004	109	k.9	The CRM Application and Data replication should happen from Primary site to DR site in real time to keep those in sync with a Recovery Time Objective (RTO) of 60 Minutes and near zero RPO (Recovery Point Objective).	Considering the inherent replication latency of cloud service provider storage services, such as Amazon S3, Google Cloud Storage (GCS), and Azure Storage, which can range from 30 minutes for cross-region replication, an achievable target RPO is 30 minutes, with a minimum	No change
1005	113	K.33	The CRM should support WAN optimization techniques to improve the performance of the application over wide-area networks, particularly for remote branches and users with limited bandwidth. The CRM should seamlessly integrate with Software Defined WAN (SD-WAN) solution of the Bank for optimized and secure connectivity between bank branches and application, ensuring efficient network resource utilization and failover mechanisms	Kindly provide additional details on what is expected under WAN optimization. Please clarify whether WAN optimization is expected only at the application level (such as smaller data payloads, compression, caching, and efficient API design), or whether any network-level optimization or integration with the Bank's SD-WAN controller or management systems is also required.	As per RFP and addendum
1006	115	43	Encryption keys which are used for encryption in cloud should support BYOK (Bring Your Own Keys) and use along with KMS (Key management Service). The solution should integrate with Bank's Hardware Security Module (HSM) for secure key management, ensuring that encryption keys are generated, stored, and accessed securely.	Which HSM is being used, and also bank has his on cmk in KMS ?	The proposed solution should support BYOK (Bring Your Own Keys) and use along with KMS (Key management Service).

1007	180	Annexure 15–Commercial Bid	The current Commercial Bid structure does not contain a dedicated section or table to capture cloud infrastructure and compute/consumption costs, which are fundamental to a SaaS deployment model.	Request for Clarification / Action: Kindly confirm whether the Bank will include a separate commercial table to capture cloud infrastructure and consumption costs (compute, storage, network, security, monitoring, backup, DR, etc.). If yes, request the Bank to share the prescribed table format and placement within the Commercial Bid. Refer to screenshot BOM-Cloud for sample table.	it should included in the licenses cost
1008	180	Annexure 15–Commercial Bid	The Commercial Bid structure does not include a table to capture software or platform component costs (where applicable), such as workflow engines, AI/analytics platforms, document management, integration middleware, etc.	Request for Clarification / Action: Kindly confirm whether the Bank intends to include a separate table for software / platform component costs or expects these to be captured as part of SaaS subscription pricing. Request the Bank to specify the preferred approach and update the commercial structure accordingly. Refer to screenshot BOM-Software for sample table.	it should included in the licenses cost

1009	180	Annexure 15–Commercial Bid	The Commercial structure does not include any table to capture subscription-based and serverless services (e.g., API gateways, event processing, serverless compute, managed databases, etc.), which are intrinsic to modern SaaS architectures.	Request for Clarification / Action: Kindly confirm whether the Bank will include a dedicated table to capture subscription-based and serverless service costs. If applicable, request the format for such a table. Refer to screenshot Serverless Services for sample table.	No change
1010	180	Annexure 15–Commercial Bid	The Commercial structure does not include any table to capture subscription-based and serverless services (e.g., API gateways, event processing, serverless compute, managed databases, etc.), which are intrinsic to modern SaaS architectures.	Please specify the production and non-production environments such as Dev, SIT, UAT, Pre-Prod, Prod, Training required by the bank.	Required as per the Bank requirement.
1011	180	Annexure 15–Commercial Bid	The Bank has projected a total requirement of 40,000 user licenses for the proposed CRM solution. The procurement and activation of these licenses shall be carried out in a phased manner, based on the Bank's operational requirements. The implementation should start development licenses. The production licenses will be activated at the time of go-live of the module.	As per the commercial structure, the development license is currently not included. Kindly confirm the number of developer licence and where this should be incorporated.	as per RFP and addendum

1012	180	Annexure 15-Commercial Bid	The Bank has projected a total requirement of 40,000 user licenses for the proposed CRM solution. The procurement and activation of these licenses shall be carried out in a phased manner, based on the Bank's operational requirements. The implementation should start development licenses. The production licenses will be activated at the time of go-live of the module.	We recommend Bank procures a certain minimum license count (say 2000) as developer licenses	as per RFP and addendum
1013	180	Annexure 15-Commercial Bid	The Bank has projected a total requirement of 40,000 user licenses for the proposed CRM solution. The procurement and activation of these licenses shall be carried out in a phased manner, based on the Bank's operational requirements. The implementation should start development licenses. The production licenses will be activated at the time of go-live of the module.	Bank must indicate a rough timeline to deploy 40,000 user licenses. For example how many licenses are expected to be activated after phase 1 and so on. This will help us in proper budgeting and planning at our end	as per RFP and addendum

1014	180	Annexure 15–Commercial Bid		for sizing (infra): 1. No of concurrent users 2. No of customers 3. No of Product Holdings per customer 4. No of leads (per year) 5. No of service requests (per year) 6. No of campaigns (per year) 7. No of offers per customer 8. No of document per customer Y-o-Y growth rate for 5 years Refer to the tab Sizing for more details	
			The commercial structure doesn't provide the volumetrics		as per RFP and addendum
1015	108	K. Cloud Infrastructure	30. Bidder to provide dedicated Leased line from two different service providers from CSP DC and DR sites to Bank DC and DR sites. Bidder to provide link up to Bank's DC and DR router including CPE (Customer Premises Equipment), cross connect, SFP and cable laydown. 31. The link should be of minimum 500Mbps capacity. The successful bidder has to maintain link uptime in line with application uptime of 99.90%.	As per the requirement, bidder to provide the leased lines. The leased line component is missing the commercial structure provided. Kindly confirm where this should be incorporated.	As per RFP and addendum

1016	106	Data Management and Integration	The proposed solution should integrate with Middleware and APIs of Bank as per Bank's requirement. All Application integration should be STP without manual interventions and all information exchange should happen over secured API channels using tokenized parameters for customer data. The proposed solution should include an API management platform with API gateways and API analytics to effectively manage and monitor API usage.	Will the bank provide an API management platform with API gateways and API analytics to monitor and manage API usage, or should the vendor include this as a separate line item in the commercials?	As per RFP and addendum
1017	107	Data Management and Integration	Database to support advanced querying capabilities (e.g., JSONB for semi structured data	In the SaaS model, where database access typically remains restricted to the provider, could the bank clarify its specific requirements regarding database	No change
1018	107	Data Management and Integration	Bidder should ensure data retention, masking of data, archiving, destruction / purging of data, sharing of data, encryption of data etc. as per the bank's requirement. The selected bidder should certify for purging all data at all locations including slack in data structures and on the media on Bank's request. The Bank will have the right to audit this practice.	Does the bank expect data to be maintained in the production environment? If so, for how many years, as this will have an impact on the TCO?	The clause is self explanatory. Hence no change

1019	107	Data Management and Integration	Bidder should ensure data retention, masking of data, archiving, destruction / purging of data, sharing of data, encryption of data etc. as per the bank's requirement. The selected bidder should certify for purging all data at all locations including slack in data structures and on the media on Bank's request. The Bank will have the right to audit this practice.	Could you elaborate on the bank's strategy for data retention, including the expected duration for retaining data during and after the contract period?	The clause is self explanatory. Hence no change
1020	116	Contracts and Continuity	Bidder to ensure secure purge of Bank's data stored on cloud including backups and residual data/metadata (e.g., system logs, audit logs, access logs, search indices) and written confirmation of successful deletion to be submitted by Cloud Service Provider within 15 days from termination of contract.	Could the bank clarify how file storage is to be considered in the SaaS model?	The clause is self explanatory. Hence no change
1021	116	Contracts and Continuity	Bidder to ensure secure purge of Bank's data stored on cloud including backups and residual data/metadata (e.g., system logs, audit logs, access logs, search indices) and written confirmation of successful deletion to be submitted by Cloud Service Provider within 15 days from termination of contract.	How many backup copies are expected to be maintained weekly, monthly, and yearly, as per the bank's backup policy?	As per Bank's policy governed by regulatory guidelines.

1022	116	Contracts and Continuity	Bidder to ensure secure purge of Bank's data stored on cloud including backups and residual data/metadata (e.g., system logs, audit logs, access logs, search indices) and written confirmation of successful deletion to be submitted by Cloud Service Provider within 15 days from termination of contract.	How many years are infrastructure, security, and application logs expected to be maintained?	As per Bank's policy governed by regulatory guidelines.
1023	116	Contracts and Continuity	Bidder to ensure secure purge of Bank's data stored on cloud including backups and residual data/metadata (e.g., system logs, audit logs, access logs, search indices) and written confirmation of successful deletion to be submitted by Cloud Service Provider within 15 days from termination of contract.	For log purging, how many days of logs should be retained as part of the bank's policy?	As per Bank's policy governed by regulatory guidelines.
1024	108	K. Cloud Infrastructure	10. Encryption keys which are used for encryption in cloud should support BYOK (Bring Your Own Keys) and use along with KMS (Key management Service). The solution should integrate with Bank's Hardware Security Module (HSM) for secure key management, ensuring that encryption keys are generated, stored, and accessed securely.	Kindly confirm the details of the Bank-provided Hardware Security Module (HSM) with which the proposed SaaS CRM platform is expected to integrate.	As per the RFP scope.

1025	108	K. Cloud Infrastructure	30. Bidder to provide dedicated Leased line from two different service providers from CSP DC and DR sites to Bank DC and DR sites. Bidder to provide link up to Bank's DC and DR router including CPE (Customer Premises Equipment), cross connect, SFP and cable laydown. 31. The link should be of minimum 500Mbps capacity. The successful bidder has to maintain link uptime in line with application uptime of 99.90%.	For on-premises application and cloud CRM what will be the integration methodology (ingress & egress)	As per RFP and addendum
1026	88	4. Data, Knowledge and Analytics	Knowledge management capability for agents and branch staff (knowledge capture, curation, contextual surfacing, and governance) to support consistent resolutions and faster FCR.	knowledgebase? If yes, kindly specify knowledgebase and integration expectation. If no, does the expectation is to build the enterprise DMS. Please elaborate the requirement.	As per RFP and addendum
1027	88	4. Data, Knowledge and Analytics	The CRM must integrate with the Bank's Data Lakehouse and Analytics/AI Centre of Excellence and consume Bank-provided insights (segments, next-best-action, propensity, risk flags etc).	Please provide the list of existing and planned AI/ML models and analytical use cases whose outputs are expected to be consumed by the CRM (e.g., segmentation, next-best-action, propensity-to-buy, churn, cross-sell, risk flags, early warning signals, fraud indicators, etc.).	The proposed solution must capable to integrate with Bank's internal systems. The details will be shared with successful bidder.

1028	88	4. Data, Knowledge and Analytics	The CRM must integrate with the Bank's Data Lakehouse and Analytics/AI Centre of Excellence and consume Bank-provided insights (segments, next-best-action, propensity, risk flags etc).	Kindly confirm whether the Bank maintains a master customer identifier / Golden ID across systems and analytics platforms, which should be used by CRM for mapping and reconciliation.	The proposed solution must capable to integrate with Bank's internal systems. The details will be shared with successful bidder.
1029	104	F. Data Analytics & Forecasting	a) The solution should provide robust analytics by analysing data for insights into customer behaviour and estimate the likely products that customers may take given the available customer profile and data from multiple sources b) Based on analytics, cross-sell and upsell opportunities are presented to customers at all touchpoints. c) Understanding existing Lead Management Model and other Analytic models and recommend customisation required, if any, in those models for seamless integration. The solution should be able to use an internal rule engine that is simple to change and test without writing any code, basic application logics and drag and-drop choices for rule modification.	It is mentioned in the Data, Knowledge and Analytics on page 88 "The CRM must integrate with the Bank's Data Lakehouse and Analytics/AI Centre of Excellence and consume Bank-provided insights (segments, next-best-action, propensity, risk flags etc)." As per our understanding CRM to integrate with the bank's Analytics/AI Centre of Excellence to consume insights. Kindly confirm confirm as the requirements stated says CRM to provide the Analytics solution.	The proposed solution must capable to integrate with Bank's internal systems.

1030	131	Marketing Automation & Journeys and Campaign Management	Segmentation and targeting of customer groups: CRM software should be able to segment customers into groups according to a wide range of characteristics, such as demographics (e.g., age, geographic location, job role, industry, company size) and activities (e.g., recent and past purchases, email response rates, social media activity, personal preferences). The information derived should enable us to create a very defined customer profiles and then personalize their marketing messages to target very specific groups of customers. Marketers can also create targeted business-to-business email marketing campaigns, which can increase subscriber numbers, email marketing metrics.	It is mentioned in the Data, Knowledge and Analytics on page 88 "The CRM must integrate with the Bank's Data Lakehouse and Analytics/AI Centre of Excellence and consume Bank-provided insights (segments, next-best-action, propensity, risk flags etc)." As per our understanding CRM to integrate with the bank's Analytics/AI Centre of Excellence to consume insights. Kindly confirm as the requirement stated, says CRM to do the segmentation whereas above it is mentioend to consume outcome via integration.	The proposed solution must capable to integrate with Bank's internal systems.
------	-----	---	---	---	--

1031	88	5. Agentic AI Readiness	• CRM must be able to leverage the Bank's Agentic AI framework and guardrails for use cases such as agent assist, auto-summarization, next-best-action, intelligent routing and guided service-to-sales prompts. • Ensure human-in-the-loop controls for any AI-assisted recommendations/actions, with explainability, audit trails and the ability to disable vendor AI add-ons while retaining core CRM functions. • Provide telemetry and observability for AI-assisted journeys (usage, quality, drift/exception tracking) and cost controls for any AI features	Is it mandatory for the CRM platform to use the Bank's Agentic AI framework for all AI use cases , or only for selected use cases ?	The clause itself is self explanatory.
------	----	-------------------------	--	---	--

1032	88	5. Agentic AI Readiness	• CRM must be able to leverage the Bank's Agentic AI framework and guardrails for use cases such as agent assist, auto-summarization, next-best-action, intelligent routing and guided service-to-sales prompts. • Ensure human-in-the-loop controls for any AI-assisted recommendations/actions, with explainability, audit trails and the ability to disable vendor AI add-ons while retaining core CRM functions. • Provide telemetry and observability for AI-assisted journeys (usage, quality, drift/exception tracking) and cost controls for any AI features	How is the bidder expected to integrate with the Bank's Agentic AI framework (API-based, SDK, orchestration, or any other preferred model)?	The solution should support per the RFP scope.
------	----	-------------------------	--	---	--

1033	88	5. Agentic AI Readiness	• CRM must be able to leverage the Bank's Agentic AI framework and guardrails for use cases such as agent assist, auto-summarization, next-best-action, intelligent routing and guided service-to-sales prompts. • Ensure human-in-the-loop controls for any AI-assisted recommendations/actions, with explainability, audit trails and the ability to disable vendor AI add-ons while retaining core CRM functions. • Provide telemetry and observability for AI-assisted journeys (usage, quality, drift/exception tracking) and cost controls for any AI features	When using the Bank's Agentic AI framework, who will own and manage the AI models, prompts, and decision logic—the Bank or the bidder?	The clause itself is self explanatory.
------	----	-------------------------	--	--	---

1034	88	5. Agentic AI Readiness	• CRM must be able to leverage the Bank's Agentic AI framework and guardrails for use cases such as agent assist, auto-summarization, next-best-action, intelligent routing and guided service-to-sales prompts. • Ensure human-in-the-loop controls for any AI-assisted recommendations/actions, with explainability, audit trails and the ability to disable vendor AI add-ons while retaining core CRM functions. • Provide telemetry and observability for AI-assisted journeys (usage, quality, drift/exception tracking) and cost controls for any AI features	Are human approval and override controls expected to be handled by the bidder's CRM platform, or will these be provided by the Bank's Agentic AI framework?	The clause itself is self explanatory.
------	----	-------------------------	--	--	--

1035	88	5. Agentic AI Readiness	• CRM must be able to leverage the Bank's Agentic AI framework and guardrails for use cases such as agent assist, auto-summarization, next-best-action, intelligent routing and guided service-to-sales prompts. • Ensure human-in-the-loop controls for any AI-assisted recommendations/actions, with explainability, audit trails and the ability to disable vendor AI add-ons while retaining core CRM functions. • Provide telemetry and observability for AI-assisted journeys (usage, quality, drift/exception tracking) and cost controls for any AI features	Will the Bank's Agentic AI framework provide explainability details and audit logs , or should these be implemented and stored within the CRM platform?	As per the RFP scope
------	----	-------------------------	--	--	----------------------

1036	88	5. Agentic AI Readiness	• CRM must be able to leverage the Bank's Agentic AI framework and guardrails for use cases such as agent assist, auto-summarization, next-best-action, intelligent routing and guided service-to-sales prompts. • Ensure human-in-the-loop controls for any AI-assisted recommendations/actions, with explainability, audit trails and the ability to disable vendor AI add-ons while retaining core CRM functions. • Provide telemetry and observability for AI-assisted journeys (usage, quality, drift/exception tracking) and cost controls for any AI features	How should AI usage monitoring, performance tracking, drift detection, and cost tracking be split between the Bank's framework and the bidder platform?	As per the RFP scope, the bidder should size their solution.
------	----	-------------------------	--	--	--

1037	88	5. Agentic AI Readiness	• CRM must be able to leverage the Bank's Agentic AI framework and guardrails for use cases such as agent assist, auto-summarization, next-best-action, intelligent routing and guided service-to-sales prompts. • Ensure human-in-the-loop controls for any AI-assisted recommendations/actions, with explainability, audit trails and the ability to disable vendor AI add-ons while retaining core CRM functions. • Provide telemetry and observability for AI-assisted journeys (usage, quality, drift/exception tracking) and cost controls for any AI features	Who will bear the AI processing and inference costs when the Bank's Agentic AI framework is used?	The clause itself is self explanatory.
------	----	-------------------------	--	--	--

1038	88	5. Agentic AI Readiness	• CRM must be able to leverage the Bank's Agentic AI framework and guardrails for use cases such as agent assist, auto-summarization, next-best-action, intelligent routing and guided service-to-sales prompts. • Ensure human-in-the-loop controls for any AI-assisted recommendations/actions, with explainability, audit trails and the ability to disable vendor AI add-ons while retaining core CRM functions. • Provide telemetry and observability for AI-assisted journeys (usage, quality, drift/exception tracking) and cost controls for any AI features	If the Bank's Agentic AI services are unavailable, is the bidder expected to provide a non-AI or rule-based fallback , or can bidder-native AI be used as an alternative?	The proposed solution capable to integrate with Bank's internal systems.
------	----	-------------------------	--	--	--

1039	88	5. Agentic AI Readiness	• CRM must be able to leverage the Bank's Agentic AI framework and guardrails for use cases such as agent assist, auto-summarization, next-best-action, intelligent routing and guided service-to-sales prompts. • Ensure human-in-the-loop controls for any AI-assisted recommendations/actions, with explainability, audit trails and the ability to disable vendor AI add-ons while retaining core CRM functions. • Provide telemetry and observability for AI-assisted journeys (usage, quality, drift/exception tracking) and cost controls for any AI features	What are the data security, access control, and data residency requirements when CRM data is sent to the Bank's Agentic AI framework?	As per the RFP scope, the bidder should size their solution.
------	----	-------------------------	--	--	--

1040	88	5. Agentic AI Readiness	• CRM must be able to leverage the Bank's Agentic AI framework and guardrails for use cases such as agent assist, auto-summarization, next-best-action, intelligent routing and guided service-to-sales prompts. • Ensure human-in-the-loop controls for any AI-assisted recommendations/actions, with explainability, audit trails and the ability to disable vendor AI add-ons while retaining core CRM functions. • Provide telemetry and observability for AI-assisted journeys (usage, quality, drift/exception tracking) and cost controls for any AI features	Will the Bank provide a sandbox or test environment to validate integration with the Agentic AI framework before production rollout?	As per the RFP scope, the bidder should size their solution.
------	----	-------------------------	--	---	--

1041	88	5. Agentic AI Readiness	• CRM must be able to leverage the Bank's Agentic AI framework and guardrails for use cases such as agent assist, auto-summarization, next-best-action, intelligent routing and guided service-to-sales prompts. • Ensure human-in-the-loop controls for any AI-assisted recommendations/actions, with explainability, audit trails and the ability to disable vendor AI add-ons while retaining core CRM functions. • Provide telemetry and observability for AI-assisted journeys (usage, quality, drift/exception tracking) and cost controls for any AI features	How will future changes or upgrades to the Bank's Agentic AI framework be communicated, and how should backward compatibility be handled?	As per the RFP scope, the bidder should size their solution.
1042	165	Technical and Functional Requirements	K) Data Analytics and Forecasting	As per our understanding, the new CRM will be integrating with the existing models where the required APIs for integration will be provided by the Bank. Please confirm.	The proposed solution capable to integrate with Bank;s internal systems. The solution has to publish API and consume API's as well for any integration.
1043	165	Technical and Functional Requirements	K) Data Analytics and Forecasting	Could the bank kindly provide a detailed list of all AI models expected to be integrated and implemented separately for normalization benchmarking across CRM vendors, as the absence of such a list could lead to variations and complicate	The details will be shared with successful bidder.

1044	167	Technical and Functional Requirements	L)Relationship Banking & RM Toolkit	scope includes RM Workbench functionalities such as Wealth Customer 360, Lead 360, Household Management, Call Planning etc However, the RFP also includes compliances related to Wealth Onboarding, such as: ☒ Needs Analysis ☒ Risk Profiling ☒ Portfolio Recommendations ☒ Portfolio Rebalancing ☒ Fee structure ☒ Quote generation ☒ Since these typically comes under wealth onboarding systems like Portfolio Management Systems (PMS), Risk Management Systems (RMS), and Financial Datamart, we seek clarification	The proposed solution must capable to integrate with Bank's internal systems.
------	-----	--	-------------------------------------	--	--

1045	167	Technical and Functional Requirements	L) Relationship Banking & RM Toolkit	management, we would also require: 1. Total number of wealth customers 2. Average number of holdings per customer. 3. Number and types of wealth products supported by the bank. 4. The specific portfolio recommendation models the bank intends to include (given that 16 industry-standard models exist). 5. Please share the sizing of the Financial Datamart DB.	The details will be shared with successful bidder.
1046	167	Technical and Functional Requirements	L) Relationship Banking & RM Toolkit Proposed CRM Platform should enable users to make Marketing Decisions on the basis of Customer Lifetime Value of customers. CLTV to	Please specify the logic to calculate CLTV. Is there any tool used at present for the same?	The details will be shared with successful bidder.
1047	171	Technical and Functional Requirements	L) Omnichannel & Self-Service	Does customer self-service journey (unassisted) to be considered in scope? If yes, kindly share the volumetrics details for sizing: 1. Number of service requests (yearly) to be handled in self service mode 2. Maximum Peak load 3. Y-o-Y growth rate 4. Number of SR category and sub	Please refer RFP for volumetrics.

1048	172	L) Partner & Channel Management (BC / Third-Party Workforce / Partners)	9 Incentive/commission support as feed to bank system (no mandatory calculation in CRM).	Kindly confirm the scope with respect to CRM.	The logic to be calculated in the system as per the Bank's requirement .
1049			10. Secure partner access via headless APIs and/or partner portal integration with throttling.	Expectation from CRM is to integrate with the existing partner portal. Kindly confirm the understanding.	The proposed solution must capable to integrate with Bank's internal
1050	129	Social Media Complaints	In case of Social media complaints- Ability to add/integrate custom sources for campaign impressions/source tracking using API's/UTM codes etc.	Kindly confirm if the bank has any social media tool currently.	The proposed solution must capable to integrate with Bank's internal systems.
1051		Social Media Complaints	In case of Social media complaints- Ability to add/integrate custom sources for campaign impressions/source tracking using API's/UTM codes etc.	Kindly confirm if the bank has any social media tool currently.	As per RFP and addendum

1052	89	Siebel CRM M	Perform Siebel discovery and inventory (data objects, workflows, reports, integrations, users/roles, volumes, data quality). • Provide phased migration/coexistence approach (where required), cutover/rollback plan, multiple dry runs, reconciliation reports and audit evidence. • Provide decommissioning and archival plan for Siebel including retention and access to historical records.	Which specific data entities need to be migrated (e.g., customer profile, service requests, etc)?	The data migration is the scope of the bidder
------	----	--------------	--	---	---

1053	89	Siebel CRM M	Perform Siebel discovery and inventory (data objects, workflows, reports, integrations, users/roles, volumes, data quality). • Provide phased migration/coexistence approach (where required), cutover/rollback plan, multiple dry runs, reconciliation reports and audit evidence. • Provide decommissioning and archival plan for Siebel including retention and access to historical records.	Please specify the volume and data size of the migration for the respective data entities to be migrated.	Please refer RFP for volumetrics.
------	----	--------------	---	--	--

1054	89	Siebel CRM M	Perform Siebel discovery and inventory (data objects, workflows, reports, integrations, users/roles, volumes, data quality). • Provide phased migration/coexistence approach (where required), cutover/rollback plan, multiple dry runs, reconciliation reports and audit evidence. • Provide decommissioning and archival plan for Siebel including retention and access to historical records.	Regarding Data migration, the data to be fetched from Core to be provided by the Bank in the CRM staging table on which ETL activity to be performed by the bidder, confirmation required from bank on this.	The data migration is the scope of the bidder
------	----	--------------	--	--	---

1055	89	Siebel CRM M	Perform Siebel discovery and inventory (data objects, workflows, reports, integrations, users/roles, volumes, data quality). • Provide phased migration/coexistence approach (where required), cutover/rollback plan, multiple dry runs, reconciliation reports and audit evidence. • Provide decommissioning and archival plan for Siebel including retention and access to historical records.	Since the Bank has on-prem solution (Core) to fetch and migrate data from and the CRM solution is to be deployed on cloud so what is the approach to integrate the two solutions.	The data migration is the scope of the bidder
------	----	--------------	--	--	--

1056	89	Siebel CRM M	Perform Siebel discovery and inventory (data objects, workflows, reports, integrations, users/roles, volumes, data quality). • Provide phased migration/coexistence approach (where required), cutover/rollback plan, multiple dry runs, reconciliation reports and audit evidence. • Provide decommissioning and archival plan for Siebel including retention and access to historical records.	Regarding Data migration, the data to be fetched from Core to be provided by the Bank on which ETL activity to be performed by the bidder, confirmation required from Bank on this.	The data migration is the scope of the bidder
------	----	--------------	--	--	--

1057	89	Siebel CRM M	Perform Siebel discovery and inventory (data objects, workflows, reports, integrations, users/roles, volumes, data quality). • Provide phased migration/coexistence approach (where required), cutover/rollback plan, multiple dry runs, reconciliation reports and audit evidence. • Provide decommissioning and archival plan for Siebel including retention and access to historical records.	Does the data to migrated is in the unified data table or there are mutiple tables bank will provide to migrate the data. Kindly specify the approach	The data migration is the scope of the bidder
------	----	--------------	--	--	--

1058	89	7. Siebel CRM	Perform Siebel discovery and inventory (data objects, workflows, reports, integrations, users/roles, volumes, data quality). • Provide phased migration/coexistence approach (where required), cutover/rollback plan, multiple dry runs, reconciliation reports and audit evidence. • Provide decommissioning and archival plan for Siebel including retention and access to historical records.	Is it permanent sunset or co-existence as later in the RFP it is mentioned to integrate to capture case details. Kindly elaborate the bank's strategy.	at Bank's discretion
1059	89	Technical R	Headless/Composable architecture: The CRM must support headless delivery where the user experience can be delivered via Bank-owned apps/portals while consuming CRM capabilities through secure, versioned APIs/events (decoupled	Kindly specify the use cases for headless architecture for better understanding.	The details will be shared with successful bidder.
1060	122	B Headless + Loosely Coupled Architecture		Kindly specify the use cases for headless architecture for better understanding.	The details will be shared with successful bidder.
1061	131	3.1. Complaint	Headless case APIs + milestone events; observability for channel/regulatory integrations incl. DLQ/replay structured classification (root cause/resolution	Kindly specify the use cases for headless architecture for better understanding.	The details will be shared with successful bidder.

1062	136	Budgeting	BYO analytics: ingest segments/scores from bank publish response/engagement events	Kindly specify the use cases for headless architecture for better understanding.	The details will be shared with successful bidder.
1063	144	Service Mand	Headless 360 APIs event ingestion from core systems and publishing to analytics row/field security reconciliation hooks for key fields	Kindly specify the use cases for headless architecture for better understanding.	The details will be shared with successful bidder.
1064	151	Lead Manage	Headless lead APIs + lead milestone events integration hooks for portals/partners score provenance storage.	Kindly specify the use cases for headless architecture for better understanding.	The details will be shared with successful bidder.
1065	162	Activity / Coll	Headless activity APIs event publishing for task lifecycle integration with bank collaboration standards audit logs.	Kindly specify the use cases for headless architecture for better understanding.	The details will be shared with successful bidder.
1066	163	Opportunity M	Opportunity events; headless APIs audit logs rule engine with versioning	Kindly specify the use cases for headless architecture for better understanding.	The details will be shared with successful bidder.
1067	170	Relationship	Headless RM APIs event publishing for RM activities role/field security audit of communications and recommendations.	Kindly specify the use cases for headless architecture for better understanding.	The details will be shared with successful bidder.
1068	171	Omnichanne	Headless APIs for all key actions (create/update/track SR/case, upload docs, comms, handoff).	Kindly specify the use cases for headless architecture for better understanding.	The details will be shared with successful bidder.

1069	173	Partner & Ch	Secure partner access via headless APIs and/or partner portal integration with throttling.	Kindly specify the use cases for headless architecture for better understanding.	The details will be shared with successful bidder.
1070	174	Knowledge B	Headless case APIs (create/update/assign/escalate/close/re op	Kindly specify the use cases for headless architecture for better understanding.	The details will be shared with successful bidder.
1071		-	-	Will vulnerability and security testing be handled by the bank or a third-party vendor? For a SaaS implementation, does the bank require a separate environment?	The details will be shared with successful bidder.
1072		-	-	DLP (Data Leak Protection) Tool and Kafka is mentioned in the RFP. Will the bank be providing these 2? Please clarify as it has an impact the TCO.	As per RFP and addendum
1073		-	AI/ML/Analytics	Since Bank has already made an investment in the Data Analytics models, the new CRM will be leveraging such data analytics models for any AI/ML/Analytics requirement listed in the entire RFP. Kindly	The proposed solution must capable to integrate with Bank's internal systems.
1074		-	Verticals	What are the different verticals for which Bank needs to implement this new CRM solution:	As per the RFP scope
1075				1. Retail (Individual)	As per the RFP scope
1076				2. Corporate (Non Individual)	As per the RFP scope
1077				3. SME	As per the RFP scope
1078				4. Wealth, etc	As per the RFP scope
1079		-	Team Structure	What is the team structure of the organization?	As per the RFP scope

1080		-	Role Management	Requesting Bank to share the various roles who will be the part of new platform along with count breakup (e.g. Sales Manager – 20, Supervisor – 15, Data Entry Operators, Quality Checker, Sales & Marketing, Service, Contact Centre, Analytics, Admin	The details will be shared with successful bidder.
1081		-	Product Management	What are the products & product categories across each vertical?	The details will be shared with successful bidder.
1082		-	Service Management	Do you envisage any STP (Straight Through Processing/Real time) based integration for customer servicing? If yes, then please share the list of STPs.	The details will be shared with successful bidder.
1083		-	Digital Journeys	Do you have any existing digital journeys? If yes, do you have a win-back process in place?	The details will be shared with successful bidder.
1084		-	Offer Management	How does the bank currently manage cross sell/up sell?	The details will be shared with successful bidder.
1085		-	Mobility	Please specify no. of users who will be accessing Mobile App and from which department.	The details will be shared with successful bidder.
1086		-	Segmentation	How does the bank do segmentation of customers currently?	The details will be shared with successful bidder.
1087		-	Marketing	Do you have an existing Digital/Social Media Marketing tool?	The proposed solution must capable to integrate
1088		-	Email	How many outgoing mail servers (SMTP) are to be configured for sending outgoing mails (if required)?	The details will be shared with successful bidder.
1089		-	Report Management	Kindly share the list of reports to be generated by the new CRM. If possible, please share sample reports (eg. RBI and Government of India	The details will be shared with successful bidder.

1090		-	Project Delivery	We understand and assume that CRM application solution activities and implementation services (Requirement gathering, development, testing support (SIT/UAT), go live) are provided by us and the remaining activities mentioned below are taken up by Bank's IT team or third party CSP team.	As per the RFP scope.
1091		-		Please confirm if Bank's IT team or CSP team can perform the following:	As per RFP and addendum
1092		-		A. Infrastructure Supply, Support and Maintenance	As per RFP and addendum
1093		-		B. Security Maintenance	As per RFP and addendum
1094		-		C. Deployment	As per RFP and addendum
1095		-		D. Disaster Recovery and Business continuity	As per RFP and addendum
1096		-		E. Testing:	As per RFP and addendum
1097		-		a. Application Security (VAPT)	As per RFP and addendum
1098		-		b. Performance Test	As per RFP and addendum
1099		-		c. Load/ Stress	As per RFP and addendum
1100		-		d. SIT	As per RFP and addendum
1101		-		e. UAT	As per RFP and addendum

1102		-		F. Customer's side integration	As per RFP and addendum
1103		-		a. Data Migration activity	As per RFP and addendum
1104		-		b. ETL activities	As per RFP and addendum
1105		-		c. Integration jobs (Any data, which has to be fetched from legacy system to staging)	As per RFP and addendum
1106		-		d. API/ webservice (Any API, which need to be custom developed to integrate with core system)	As per RFP and addendum
1107		-		G. Training and Roll out activities	As per RFP and addendum
1108		-	System Rollout	As per our understanding, the overall system rollout will be carried out by Bank. Please confirm.	As per the RFP scope.
1109		-	Language	We understand that Bank requires this Customer Relationship Management application to have English as the base language. Do you need any other languages? If yes, please mention.	As per the RFP scope and Bank requirement.
1110		-	Technical Challenges	Currently, are there any technical challenges you are facing with existing	Not applicable.
1111		-	IT Landscape	Please share the current IT Landscape. (Architecture diagram for all systems pulling data from/pushing data to current	The details will be shared with successful bidder.
1112		-	System Name	What are the systems planned to be sun-set during and post implementation?	it will be decided by the bank .
1113		-	System Name	Core Banking Solution	it will be decided by the bank .

1114		-	System Name	Enterprise Document Management System	it will be decided by the bank .
1115		-	System Name	AD platform/User access management /SSO logins	it will be decided by the bank .
1116		-	System Name	Loan Origination System	it will be decided by the bank .
1117		-	System Name	Digital Lending Platform	it will be decided by the bank .
1118		-	System Name	Digital Marketing Platform	it will be decided by the bank .
1119		-	System Name	CTI/IVR	it will be decided by the bank .
1120		-	System Name	EFRMS System	it will be decided by the bank .
1121		-	System Name	CGRS System	it will be decided by the bank .
1122		-	System Name	Trade Finance System	it will be decided by the bank .
1123		-	System Name	Debit Card Management System	it will be decided by the bank .
1124		-	System Name	Credit Card Management System	it will be decided by the bank .
1125		-	System Name	eKYC System	it will be decided by the bank .
1126		-	System Name	vKYC System	it will be decided by the bank .
1127		-	System Name	FI Solution/Gateway	it will be decided by the bank .
1128		-	System Name	Mail Server	it will be decided by the bank .
1129		-	System Name	SMS Gateway	it will be decided by the bank .
1130		-	System Name	Chatbot/Chat tool	it will be decided by the bank .
1131		-	System Name	HRMS	it will be decided by the bank .
1132		-	System Name	Analytical/BI	it will be decided by the bank .

1133		-	System Name	AI/ML	It will be decided by the bank .
1134		-	System Name	Cross sell System	It will be decided by the bank .
1135		-	System Name	Enterprise Service Bus/API engine	It will be decided by the bank .
1136		-	System Name	ETL Tool	It will be decided by the bank .
1137		-	System Name	Database Activity Monitoring Tool	It will be decided by the bank .
1138		-	System Name	Privileged Identity Management	It will be decided by the bank .
1139		-	System Name	Security Information and Event Management	It will be decided by the bank .
1140		-	System Name	Any other?: (Please mention)	It will be decided by the bank .
1141		-	System Name	Is reporting DB required or not?	As per the RFP scope
1142		-	CI/CD	What is the tool Bank uses for CI/CD pipeline? We understand that pipeline creation & maintenance will be done by Bank, and	The details will be shared with successful bidder.
1143		-	Infra	Do you require DR with 50% or 100% capacity of Production?	As per the RFP scope.
1144		-	Infra	As per the RFP, the production environment require high availability.	As per the RFP scope.
1145		-	Infra	Please share Purging policy percentage for volume data at the end of each year	As per the RFP scope.
1146		-	Infra	Is DMZ required? (If system is to be accessed over internet as well)	As per the RFP scope.
1147		-	Integration	Do you have a Middleware/DWH in place? If Yes, kindly mention which. If No, kindly share Integration strategy.	As per the RFP scope.

1148		-	Business Outcome	What are the 3 most important Business outcomes Bank requires from the new CRM solution?	As per the RFP scope.
1149		-	Challenges	What are the top challenges which you are facing currently? If possible, kindly share the Use cases	Not applicable.
1150		-	-	Is single-tenant, bank-exclusive application and database deployment mandatory for Bank of Baroda?	As per the RFP scope.
1151		-	-	Will logical multi-tenancy with shared application runtime be acceptable?	As per the RFP scope.
1152		-	-	Will any data processing outside India, even transient, be disallowed?	As per the RFP scope.
1153		-	-	Does bank have their CMK for encryption ?	As per the RFP scope.
1154		-	-	The alerts from CRM Application should be able to integrate with Bank's incident response process by automatically ingesting the alerts/logs offloaded to the Bank's SIEM or IDS solutions.	As per the RFP scope.
1155	2	Bid Security (Earnest Money)	Rs. 2 Cr (Rupees Two Crore only). MSE / Startups will be exempted from EMD submission as per Govt.	Kindly extend this clause to MSME also.	No change
1156	11	1.9 Payment Terms		Kindly specify the Key Performance Indicators (KPIs) along with their definitions that are expected to be	as per rfp and addendum
1157	12	9 Payment Terms		In the event that the defined KPIs are partially achieved due some circumstances, kindly clarify the payment mechanism in this scenario. Will the bank	as per rfp and addendum

1158		Annexure 02 – Evaluation Terms		Kindly clarify whether the Eligibility Criteria specified in the RFP are required to be met independently by both the Prime Bidder (System Integrator) and the OEM, or whether compliance by either the Prime Bidder or the OEM (as part of a consortium / teaming arrangement) would be considered sufficient. Additionally, please confirm if the Bank expects any specific eligibility conditions to be applicable exclusively to the Prime Bidder and/or exclusively to the OEM.	as per rfp and addendum
1159	13	1.11 Ownership, Grant and Delivery	The bidder shall procure and provide a non-exclusive, non-transferable, perpetual licenses to the Bank for the solution to be provided as a part of this project.	As per our understanding, in SaaS world there is no concept of perpetual licences. However, if the bank wants the perpetual licences then we recommended to opt for an on premise or a private landing zone (bank managed) deployment model.	as per rfp and addendum
1160	14	1.11 Ownership, Grant and Delivery	To Copy. (i) to copy the Software that operates on server systems to support the users of the Bank; (ii) to make additional copies of the Program Material for archival, emergency back-up, testing, or disaster recovery purposes; and (iii) to copy the Program Documentation to support its Users.	Kindly provide detailed clarification on Point (iii) regarding program documentation, including what specific documentation is required.	as per rfp and addendum

1161	19,35,36	3.4 Exemption for EMD amount & 3.6 Performance Guarantee C.	The key considerations of the TCO would be the total payouts for entire project through the contract period of 3 years, discounted at 10% to arrive at the present value of the future cash outflows. The evaluation will be done as follows	Bank asked PBG for 5 years but for the purposes of Final evaluation Bank is going to consider TCO for 3 years. So we request Bank to synchronize these two either by seeking PBG for 3 years contract value OR consider 5 year TCO for final commercial	as per rfp and addendum
1162	22	Price Comparisons	c. The Price offer shall be on a fixed price basis. Bid submitted with an adjustable price quotation will be treated as non-responsive and will be liable to be rejected. The rate quoted by the bidder should necessarily include the following	In a SaaS deployment model, certain components such as API calls and cloud infrastructure are inherently consumption-driven and may not align with a fully fixed-cost structure. Kindly confirm whether a consumption-based pricing approach would be acceptable for such components. In cloud all ingress of data is free however every egress is chargeable so Bank to consider revision in this clause	No change
1163	25	3.1 General Terms and conditions	k) Only one submission of response to RFP by each Respondent will be permitted.	To ensure fair and transparent evaluation, we strongly recommend that the Bank allow only a single OEM per bid, either directly or via an SI/Bidder.	No change

1164	27	3.2 Rules for Responding to this RFP	o) All submissions, including any accompanying documents, will become the property of the Bank. The bidder shall be deemed to have licensed, and granted all rights to, the Bank to reproduce the whole or any portion of their submission for the purpose of evaluation, to disclose the contents of the submission to other bidders who have registered a submission and to disclose and/or use the contents of the submission as the basis for any resulting RFP process, notwithstanding any copyright or other intellectual property right of the Recipient that	Request bank to drop this clause to be fair with all the bidders.	No change
1165	41	4.9 Sub-Contracting		As per our undersnaing, our arrangement with CSP will be outside of this clause and we don't require any special permission for any arrangement with the CSP.	No change
1166	63	B Financial	The Bidder must have registered average annual turnover of Rs. 75 Crore during the last three completed financial years i.e for FY 2022-23, 2023-24 & FY 2024-25* from Indian Operations only (Not inclusive of the turnover of associate companies).	Considering the scale and strategic importance of the proposed transformation program, we recommend that the Bank consider increasing the minimum turnover eligibility criterion from INR 75 Crore to INR 200 Crore to ensure participation of bidders with adequate financial strenath and delivery capability.	as per RFP and addendum

1167	64	C Experience & Support Infrastructure	2. The Bidder should be an OEM/OSD or authorized partner of OEM/OSD in India at least for the last three years (OEM proposed by bidder should have its development & support centre in India. This should be full fledged establishment and not created for the submission of this Bid)	To ensure fair and transparent evaluation, we strongly recommend that the Bank allow only a single OEM per bid, either directly or via an SI/Bidder.	as per RFP and addendum
1168	64	C Experience & Support Infrastructure	The solution should have been hosted in a public cloud with a single tenancy architecture for scheduled commercial banks in India for a minimum of three years	1. We request the Bank to kindly consider relaxing or removing the minimum three-year hosting duration condition to 18 months OR allow bidders experience for hosting for a scheduled commercial bank on a Private Cloud (Single tenancy) directly managed by them. OR 2. The bidder should have a minimum of three years' experience in hosting the proposed solution in public/ private cloud having single tenancy architecture for scheduled commercial banks in India.	as per RFP and addendum

1169	65	Proposed Solution should include following Module	Bidder should have direct support offices at Mumbai and Hyderabad. In case direct support office of the bidder is not present in Hyderabad / Mumbai then an undertaking to be provided by the Bidder stating that direct support would be provided by the bidder at Hyderabad / Mumbai whenever desired by the Bank	We currently have offices in Mumbai, Noida, and Pune, and do not have an existing office in Hyderabad. However, we are open to establishing an office or deploying resources in Hyderabad, if required. Kindly confirm whether the Bank has workspace facilities in Hyderabad and, if so, the approximate number of resources that bidders are expected to deploy at this location. This will help us	as per RFP and addendum
1170	155	F. Mobile & Field CRM:	Offline mode for core actions minimal-click field capture secure evidence upload where relevant.	Kindly elaborate on the requirement related to offline mode.	The solution should support per the RFP scope.
1171	155	F. Mobile & Field CRM:	Chatbot facility between the workforce for any knowledge gaining/query/information/ sharing of information etc.	Kindly confirm whether the Bank currently has a chatbot solution in place. If yes, please clarify whether the CRM solution is expected to integrate with the Bank's existing chatbot and elaborate on the scope of such integration.	The proposed solution must capable to integrate with Bank's internal systems.
1172	130	Social Media Complaints	52. Collaboration tool: Ability for multiple agents to collaborate and resolve customer inquiries together.	As mentioned under the Collaboration section regarding integration with MS Teams, kindly confirm whether the same MS Teams instance is expected to be consumed for this requirement as well.	The proposed solution must capable to integrate with Bank's internal systems.
1173	131	General	Timeline extension	From the date on which the Bank shares consolidated clarifications with all bidders, we request the Bank to kindly allow a minimum of three (3) weeks' extension for bid submission, in line with industry best practices.	PL find the submission date

1174		Technical		What are the volumes (number of CRM users, number of field agents, daily transaction (Lead, complaints etc)	Please refer RFP for volumetrics.
1175		Technical		Any preferred Cloud for hosting the platform?	Please refer RFP scope.
1176		Technical		Do you have common customer repository (Datawarehouse, Data lake etc)	Please refer RFP scope.
1177		Technical		Today are you servicing all customer segments ? Retail , Corporate, Wealth etc	Please refer RFP scope.
1178		Technical		What are external channels of sourcing leads ? both within bank and external to bank?	Please refer RFP scope.
1179		Technical		Are you expecting any of your Agentic AI Framework or Infrastructure ? or Agentic AI has to be from OEM?	As per RFP and addendum.
1180	64	Eligibility Criteria	The solution should have been hosted in a public cloud with a single tenancy architecture for scheduled commercial banks in India for a minimum of three years	Request deviation/change as "The solution should have been hosted in a public cloud/On premises with a single tenancy architecture for Global banks for a minimum of three years" or " Enterprise Grade CRM solution should have been hosted in a public cloud/On premises with a single tenancy architecture for scheduled commercial banks in India for a	As per the RFP and addendum

1181	64	Eligibility Criteria	Bidder should have implemented at least 3 modules out of 6 proposed modules* in one or more Scheduled Commercial Bank in India, having minimum 1,500 branches as on date of RFP, with minimum of 5,000 licensed users on CRM Platform. e.g. Sales Management Module implemented at "X" Bank, Lead Management Module & Service Management Module implemented at "Y" Bank will be considered as implementation of 3 modules. The platform should be in use /live as on date of published RFP and should be in operation for minimum of 6 months.	have implemented at least 3 modules out of 6 proposed modules* in one or more Global Bank, having minimum 1,500 branches as on date of RFP, with minimum of 5,000 licensed users on CRM Platform. e.g. Sales Management Module implemented at "X" Bank, Lead Management Module & Service Management Module implemented at "Y" Bank will be considered as implementation of 3 modules. The platform should be in use /live as on date of published RFP and should be in operation for minimum of 6 months. " or Request deviation/change as "Bidder should have implemented at least 3 modules out of 6 proposed modules* in one or more Client in India (including BFSI), having minimum 1,500 branches as on date of RFP, with minimum of 5,000 licensed users on CRM Platform. e.g. Sales Management Module implemented at "X" Bank, Lead Management Module &	
1182	9	1.5 Disaster Recovery Mechanism	The bidder needs to submit the technical architecture relating to data replication between primary and secondary site	Requesting BoB, to remove this clause as this is not relevant for a SaaS service	As per the RFP and addendum The bidder must submit the technical architecture
1183	14	1.11 Ownership, Grant and	(i) to copy the Software that operates on server systems to support the users of the Bank	Requesting BoB, to remove this clause as this is not relevant for a SaaS service	As per the RFP and addendum

1184	14	Delivery	C. To work as interface: (i) to work with other Application Software packages at the Bank as interface; (ii) to allow other application software packages at the Bank to work as interfaces to the Software. If such interfacing requires any modification or change to the Platform, such modification or change has to be carried out by the Bidder free of any additional License charge or fees or expenses	Requesting BoB, to remove this clause as this is not relevant for a SaaS service, and this may be discussed with your Partner. But OEM is not liable to change the core product	As per the RFP and addendum
1185	15	1.12 Escrow Mechanism	The Bank and the successful bidder shall agree to appoint an escrow agent to provide escrow mechanism for the deposit of the source code for the software product supplied / procured by the Bidder to the Bank in order to	Requesting BoB, to remove this clause as this is not relevant for a SaaS service	As per the RFP and addendum
1186	16	1.13 Audit	All Bidder records with respect to any matters covered in this RFP shall be made available to auditors and or inspecting officials of the Bank and/or Reserve Bank of India and/or any regulatory authority, at any time during normal business hours, as often as the Bank deems necessary, to audit, examine, and make excerpts or transcripts of all relevant data. Said	Our Organization DPA(Data Processing Agreement) grants audit rights to the customer and/or their auditors, subject to prior formal notice. Audits cannot be conducted at any time, as they require advance planning, coordination, and internal management by Our Organization. Requesting BoB, to remove this clause as	As per the RFP and addendum
1187	18	2. Evaluation process	Compliance with regulatory and Gov. regulation & Master direction , Data Privacy (DPDP) & Security	Master direction: It has been withdrawn and no longer relevant https://website.rbi.org.in/web/rbi/-/notifications/master-direction-on-outsourcing-of-information-technology-	As per the RFP and addendum
1188	25	3.1 General Terms and conditions	i) Standards: All standards to be followed will adhere to Bureau of Indian Standards (BIS) specifications or other acceptable standards (IS 17802:2021)	Our Organization SaaS aligns with multiple global standards such as NIST, ISO, and SOC standards. Hence, requesting BoB to remove this clause	As per the RFP and addendum

1189	54		The Service provider shall ensure that it is complying with all the directions and clauses as stated in the said circulars: a) RBI/2023-24/102 DoS.CO.CSITEG/SEC.1/31.01.015/2023-24 dated 10.04.2023 regarding Master Direction on Outsourcing of Information Technology Services b) RBI/2023-24/107	Note: The Master Direction on IT Outsourcing has been withdrawn, hence no more applicable https://website.rbi.org.in/web/rbi/-/notifications/master-direction-on-outsourcing-of-information-technology-services-12486	As per the RFP and addendum
1190	59	Annexure 01 – Guidelines for submission details and E-tendering	Letter of Undertaking from Bidder and OEM/ OSD on Compliance to RBI Master Direction on Outsourcing of IT Services RBI/2022-23/xx DoS.CO.CSITEG/SEC.xx/31.01.015/2022-23 Dated 23rd June 2022	N/A - The Master Direction on IT Outsourcing has been withdrawn, hence no longer applicable https://website.rbi.org.in/web/rbi/-/notifications/master-direction-on-outsourcing-of-information-technology-services-12486 Requesting BoB to remove this clause	As per the RFP and addendum
1191	62	Annexure 02 – Evaluation Terms	The solution should have been hosted in a public cloud with a single-tenancy architecture for scheduled commercial banks in India for a minimum of three years	Our Organisation SaaS services run on (OCI), which, like other public cloud platforms, operates in a multi-tenant model. However, Our Organisation SaaS uses customer-specific pods, application instances, databases, encryption keys etc. to logically separate each customer's data and workloads. This approach ensures strong isolation and security while following standard cloud best practices. Hence requesting BoB to remove this single tenancy clause	As per the RFP and addendum
1192	89	Annexure 12 – Project Scope	According to Digital Personal Data Protection (DPDP) Rules, 2025, Establish a comprehensive framework for processing digital personal data, empowering users with rights over their data and requiring strict compliance from fiduciaries regarding consent, data breaches, and child data protection	Requesting bank for further clarity and relaxation on the clause	As per RFP and addendum

1193	105	Technical Requirements : Infrastructure, Cloud and other CSP	1. The proposed CRM Solution shall be configured, deployed On-Cloud under SaaS based model, and managed to meet security, privacy, legal, ethical and compliance requirements of the Bank.	Will need clarity on the Compliance requirements of the Bank	As per RFP and addendum
1194	108		22. Bidder /CSP (Cloud Service Provider) should ensure that any data that is stored on the cloud is protected and appropriate policies and controls are put in place to provide data privacy and protection. The CSP should adhere to all laws pertaining to data privacy and protection that are applicable as per GoI, RBI and any other regulators. The CSP should also ensure that necessary enhancements are made to the services provided whenever there are	Requesting bank for further clarity and relaxation on the clause	As per RFP and addendum
1195	108		15. As per the Digital Personal Data Protection (DPDP) Rules , 2025, notified by India's Ministry of Electronics and Information Technology (MeitY), establish a comprehensive framework for processing digital personal data, empowering users with rights over their data and requiring strict compliance from fiduciaries	Requesting bank for further clarity and relaxation on the clause	As per RFP and addendum
1196	109		3. The platform should use Micro-services based architecture using kubernetes or equivalent orchestration for scalability. The solution must utilize Docker or equivalent technology to package microservices, ensuring the solution can be consistently deployed across various environments (development, testing, production). The bidder must provide detailed architecture diagrams of the proposed solution, showing how all components of the system will	This is not relevant for a Service offered under a subscription based SaaS model with SLAs and managed by the CSP. Requesting BoB to remove this clause	As per RFP and addendum
1197	109		7. The response time at server end should be always be less than 200 milli second . During the agreement period, if at any stage, it is found that the Platform provided by the Bidder is not able to give the requisite performance as per the sizing parameters (i.e., up time above 99.90% and response time < 1 seconds), the	Request the bank to provide more clarity on this requirement	As per RFP and addendum

1198	110		13. Bidder should assess the compliance level of SaaS based application vis-à-vis guidelines stipulated by Bank / regulatory / statutory body, through a CERT-IN certified auditors and submit assessment report/ audit certificate to Bank on quarterly basis or as per Bank's requirements	Oracle provides the third-party SOC reports on an annual basis which satisfies the need of our other public sector / Banking customers. Requesting BoB to rmeove this clause	As per RFP and addendum
1199	110		11. Bidder, its solution and Bidder's CSP must comply with bank's policies on cloud adoption, cyber security, information technology, information security, etc., • RBI guidelines on Outsourcing of IT Services, Data Storage and handling, Information Technology Governance, Risk, Controls and Assurance Practices, etc. • India's IT act and amendments, Security and Data Protection regulations such as proposed Digital Personal Data Protection Bill, any India's statutory and regulatory requirements. • Any other IT security/data protection & privacy policies, guidelines, regulations etc issued by Bank, Regulators, Government of India from time to time during the contract period	This will need more detailed discussion on understanding Bank's cloud adoption policies	As per RFP and addendum
1200	110		13. Bidder should assess the compliance level of SaaS based application vis-à-vis guidelines stipulated by Bank / regulatory / statutory body, through a CERT-IN certified auditors and submit assessment report/ audit certificate to Bank on quarterly basis or as per Bank's requirements.	Our Organisation provides the third-party SOC reports on an annual basis which satisfies the need of our other public sector / Banking customers. Requesting BoB to rmeove this clause	As per RFP and addendum

1201	110		16. As and when Bank requests, bidders should provide the following certificates/proof from third party vendor/ bidder / CSP providers for their systems: • Regular VAPT, API Assessment, customized Source Code (related to Bank) audit certified by a CERT-IN empanelled auditor. • A Secure Software Development Lifecycle (Secure SDLC) must be followed by the bidder for all applications throughout their lifecycle, with a security assurance certificate provided accordingly. • All security controls of the CSP should be monitored/ audited by bidder/OEM and report of the same to be shared with the bank. • Regular Hardening of System preferably CIS Benchmark, System & Application Patching to latest release patches and security updates. • Adhering to NIST (especially 800-53) and CSF (Cyber Security Framework) standard best practices. • Monitoring CERT-IN released advisories and fixing applicable vulnerabilities.	Our Organisation continuously monitors relevant security advisories and manages vulnerabilities in accordance with its global security and patch management processes. However, Oracle does not commit to tracking or remediating advisories issued by any specific external agency on a one-to-one basis; remediation is addressed based on risk assessment, applicability to the service, and Oracle's standard update cycle. Requesting BoB to remove this clause	As per RFP and addendum
1202	111		21. The bidder must have a documented patch management practice in place, ensuring that security patches and upgrades are applied promptly to the product and cloud infrastructure. The bidder must provide a certificate of assurance to the Bank every quarter, confirming that the latest patches have been applied and the infrastructure is secure. Detail	Requesting BoB to remove this clause	As per RFP and addendum

1203	111		18. ISO 27001, ISO 22301 certification • ISO 27017 (Cloud Security Management Certified) • ISO/IEC 27018 (Personal Data in Cloud Certified) or similar certification • ISO/IEC 27701 PIM (Privacy Information Management) certified or similar certification • ISMS (Information Security Management System) • ISAE (International Standard on Assurance Engagements) 3402. • Meet the Cloud Security Alliance Cloud Controls Matrix and compliance with CSA Star CCM • RBI and Government of India guidelines and mandates on Cloud Computing GDPR compliance • CERT-In guidelines as and when they are released and become applicable	Our Organisation SaaS is aligned with CSA Star, ISO 27001, 27017, 27108, 27701, ISMS (ISO 27001 implemented on ISO 27002). Further, Oracle CRM and Service aligns with ISAE 3401 for SOC 1. - RBI & Government of India Guidelines: The Master Direction on IT Outsourcing has been withdrawn, hence no more applicable https://website.rbi.org.in/web/rbi/-/notifications/master-direction-on-outsourcing-of-information-technology-services-12486 - CERT-In Guidelines as and when they are released and become applicable: Oracle SaaS follows the Oracle corporate security practices Requesting BoB to remove these two above clauses	As per RFP and addendum
1204	112		24. The Bidder or Bidder's CSP must ensure the presence of Runtime Application Self-Protection (RASP) or an equivalent control, along with strong data security practices.	Could you elaborate on this and specifically mention which runtime application self-protection is being referred here?	As per RFP and addendum
1205	112		27. The CASB (Cloud Access Security Broker) security controls need to be enforced from cloud standpoint. In case the solution is not covered by CASB, the CSP should offer CWP (Cloud Workload Protection) compatibility and offer points engineering solution. Appropriate security controls/components from the cloud orchestration layer has to be made available by default as per Bank policy/Regulatory Guidelines at no additional cost to the Bank. Bidder to submit Security Architecture diagram to Bank as part of technical bid detailing all the	Our Organisation SaaS is secured using a defense-in-depth architecture with multiple layered controls. While a CASB is not used within the managed SaaS environment, native security controls such as perimeter security, network monitoring, and vulnerability scanning provide equivalent protection. These controls collectively enable continuous threat detection and risk mitigation in line with industry-recognized cloud security practices.	As per RFP and addendum

1206	112		29. Bidder to regularly conduct and provide results of fault tolerance testing, scalability testing and load balancing testing, every quarter or as per Bank's requirements, validating that the solution is: - o able to recover seamlessly from failures - o able to scale horizontally (adding resources) and vertically (enhancing existing resources) to handle peak load scenarios without performance degradation. - o able to provide consistent performance even	As a CSP-managed SaaS service, fault tolerance, scalability, and load-balancing testing are performed as part of Our Organisation standard platform operations, not on a customer-specific or quarterly basis. These capabilities are contractually assured through defined SLAs such as uptime, RPO, and RTO commitments. Requesting BoB to remove this clause	As per RFP and addendum
1207	113		30. Bidder to provide dedicated Leased line from two different service providers from CSP DC and DR sites to Bank DC and DR sites. Bidder to provide link up to Bank's DC and DR router including CPE (Customer Premises Equipment), cross connect, SFP and cable laydown. 31. The link should be of minimum 500Mbps capacity. The successful bidder has to maintain link uptime in line with application uptime of 99.90%. 32. At any point in time, during the contract period, utilization of link should not cross 70%. In case link is utilized more than 70%, bidder to upgrade the link and associated hardware at no additional cost to the Bank.	Customer's connectivity to SaaS services, are over the internet on TLS 1.3 encrypted network. As the Bank is looking for a dedicated private connectivity , the Bank can opt for Oracle FastConnect SKU which facilitates private connectivity between our DC and customer's DC/corporate offices.	As per RFP and addendum

1208	114			1- Use of dedicated DLP tool, File Integrity monitoring, API Gateway are not used for SaaS. 2- Does the Bank expect the bidder to provide all the 8 listed software solutions (for example, Sr. No. 4 – Anti-Virus solution or PIM solution)? 3 - If the proposed SaaS product already has these capabilities built in, would the bidder still be required to provide these solutions separately, or would the embedded SaaS functionalities be considered sufficient?	As per RFP and addendum
1209	115		b. Bidder to Implement automated monitoring tools and systems to track the platform's health, uptime, and response times. Bank's Team also to be given login for dashboard access for checking of the audit logs and security events if required	This is not a relevant ask for a SaaS service where CSP is managing the infra. Requesting BoB to remove this clause	As per RFP and addendum
1210	116	51. Contracts and Continuity	a. Bidder to support in deporting/export of data from cloud to on-premises or cloud to cloud migration on termination of contract at no additional cost to the bank. Bidder to handover entire Bank's CRM data along with data dictionary as per Bank's requirements, at the time of deporting data from cloud. c. The CSP should provide access to their IT infrastructure as and when required for audit from security perspective which may also include visits at short notice to ensure Bank's data are not misused and to review IT controls of Cloud Service Provider.	Our Organisation DPA(Data Processing Agreement) grants audit rights to the customer and/or their auditors, subject to prior formal notice. Audits cannot be conducted at any time, as they require advance planning, coordination, and internal management by Our Organisation. Requesting BoB, to remove this clause as this needs formal prior notice	As per RFP and addendum

1211	176	Penalty due to application downtime		We offer: • 10%: < 99.9% but > 99.5% • 15%: <= 99.5% but > 99.0% • 25%: <= 99.0% but > 95.0% • 100%: <= 95.0% in the applicable calendar month Requesting BoB to remove the clause	No change
1212	187		We hereby agree to comply with the Information and cyber security controls as per Bank's and Regulatory Authorities IT Security Guidelines on an ongoing basis and regulatory / legal guidelines and directives related to SP / outsourcing issued by regulators / legal entities from time to time. The SP shall provide access to the regulators, legal authorities, Bank and Bank appointed auditors for on-site/off-site supervision.	We maintains a comprehensive, regulator-aligned information and cyber security framework that is continuously updated to address evolving regulatory and legal requirements. Our SaaS services operate under mature internal security controls, governed by global policies, secure-by-design architecture, and continuous monitoring. Our organization is independently audited and holds internationally recognized certifications (such as ISO/IEC 27001, SOC 1/2, and related standards), demonstrating ongoing compliance. These controls collectively ensure sustained alignment Requesting BoB to remove this clause	As per the RFP and addendum
1213	189	2. IT Risk Management	2.3 The SP shall be subjected to the annual IT audit / Technology risk assessment process by an independent professional agency as approved by the local government or	Requesting bank for further clarity and relaxation on the clause	As per the RFP and addendum
1214	195	Annexure 21 – SERVICE LEVEL AND NON-DISCLOSURE AGREEMENT FORMAT	The solutions shall be designed in such a way that they cover all the divisions of the Bank's Data Centre i.e., Domestic, Foreign territories and its RRBs, associates, subsidiaries, having separate networks & all separate network segments of each. Bank at its discretion, may use and/or procure (any/all) solution / hardware and its licenses as per the same quoted rates for its RRBs, associates, subsidiaries upon arising the requirements for them	Customer's connectivity to SaaS services, are over the internet on TLS 1.3 encrypted network. Customer connects to the SaaS over this secure network. Requesting BoB to remove this clause	As per the RFP and addendum

1215	211	29. INFORMATION OWNERSHIP	All information processed , stored, or transmitted by Service provider equipment belongs to the Bank . By having the responsibility to maintain the equipment, the Service provider does not acquire implicit access rights to the information or rights to redistribute the information. The Service provider understands that civil, criminal, or	This is a very broad statement and is prone to interpretation. Requesting BoB to remove this clause	As per the RFP and addendum
1216	213	35. Incident Response and Management	any cybersecurity incident. They must have written incident response procedures including the roles of staff/outsourced staff handling such incidents; Response strategies shall consider readiness to meet various incident scenarios based on situational awareness and potential/post impact, consistent communication and coordination with stakeholders, including specifically the bank, during response. Service provider shall report all cyber incidents to the Bank immediately upon detection (if	Our Organisation follows a structured incident response process that ensures timely containment, impact assessment, and verified information collection before external communication. Accordingly, We contractually commits to a 24-hour notification timeline for confirmed security breaches, which aligns with industry best practices and enables clear, accurate, and actionable disclosure.	As per the RFP and addendum
1217	213	36. IT Risk Management	The Service Provider shall assist the Bank in adhering to compliance guidelines of the regulatory authorities and facilitate Bank from time to time. The Service Provider shall conform to the security practices and procedures laid down in the Information Technology Act 2000 as amended by the information Technology (Amendment) Act 2008 (IT Act and IT Amendment Act) and the information Technology (Reasonable Security Practices	Requesting bank for further clarity and relaxation on the clause	As per the RFP and addendum
1218	220	Annexure 20 – Software Bill of Materials (SBOM)	All the software supplied to the Bank or developed for the Bank must be accompanied by a complete SBOM. The SBOM of the software supplied to the Bank or developed for the Bank must include the data fields mentioned below. In addition, the Software OEM/Owner/Vendor must ensure that:	This is not a relevant ask for a SaaS service managed by Our Organisation. Requesting BoB to remove this clause	No change

1219	Page 64	Eligibility Criteria	Bidder should have implemented at least 3 modules out of 6 proposed modules* in one or more Scheduled Commercial Bank in India, having minimum 1,500 branches as on date of RFP, with minimum of 5,000 licensed users on CRM Platform.	Request bank to change this clause to: Bidder/OEM should have implemented at least 3 modules out of 6 proposed modules* in one or more Scheduled Commercial Bank in India, having minimum 500 branches as on date of RFP, with minimum of 2,500 licensed	As per the RFP and addendum
1220	Page 13	1.11 Ownership, Grant and Delivery	1.11 Ownership, Grant and Delivery The bidder shall procure and provide a non-exclusive, non-transferable, perpetual licenses to the Bank for the solution to be provided as a part of this project. The Licenses for the solution should not be restricted to use case. The Bank can use the solution at any of its overseas branches / offices and locations and present & future RRBs without restriction and use of software by service providers on behalf of the Bank would be considered as use thereof by the Bank and the software should be	Request bank to share further clarity on the license modality.	As per the RFP and addendum
1221	Page 18	Scoring Criteria :	Scoring Criteria : The bidder should have experience of implementing CRM Modules for which scoring will be done as given below Implementation of bidder all 6 module* of proposed CRM solution by themselves in -3- Scheduled Commercial Bank out	Total Marks mentioned is 25 points whereas the highest mark attainable is 15. Request to clarify.	As per the RFP and addendum

1222	8 of 222	1.3 - Project S	Section says : Considering the enormity of the assignment, any service which forms a part of the Project Scope that is not explicitly mentioned in scope of work as excluded would form part of this RFP, and the Bidder is expected to provide the same at no additional cost to the Bank. The Bidder needs to consider and envisage all the services that would be required in the Scope and ensure the same is delivered to the Bank. The Bank will not accept any plea of the Bidder at a later date for omission of services on the pretext that the same was not explicitly mentioned in the RFP	While the Bidder understands the intent of the clause to ensure completeness of delivery, it is practically difficult to take responsibility for services that are not documented or reasonably inferable from the stated scope. Request the Bank to confirm that the Bidder's responsibility shall be limited to services explicitly mentioned in the RFP or those reasonably required to fulfil the documented scope, and that any materially new requirements will be addressed via a formal change request.	As per the RFP and addendum
1223	9 of 222	1.5	RFP says : Bank is already using inhouse apps for DSA, RMs and also having 3rd party integration with different modules. The same need to be migrated within above mentioned timelines. The solution as per the required scope needs to be rolled out as per the delivery timelines	Want to know if the Bank intends to keep the inhouse Apps for DSA / RM or the Bank is open to look at Apps that comes OOTB (Out of the Box) with the CRM product	As per RFP and addendum
1224	88 of 222	Annexure 12/ \$	Section 3 says: PCB / Modular design.	Can you please elaborate on the statement of "Reuseable modules that can be composed and recomposed"	As per the RFP scope
1225	88 of 222	Annexure 12/ \$	Section 4 says : Support multimodal/structured and unstructured data references (notes, attachments, call/chat transcripts) with retention and privacy controls.	Need more clarity on this	The clause itself is self explanatory
1226	88 of 222	Annexure 12/ \$	RFP says " CRM must be able to leverage the Bank's Agentic AI framework and guardrails for use cases such as agent assist, auto-summarization, next-best-action, intelligent routing and guided service-to-sales prompts.".	Need more clarity on this. The proposed CRM already comes with a Agentic AI framework . So will the Bank be fine with leveraging the OOTB Agentic AI framework ?	As per RFP and addendum

1227	88 of 222	Annexure 12/	Point 2 mentions Phased Migration / coexistence of Siebel.	Has there been any decision or whether Bank will continue with Siebel and Siebel will co-exist in the TO BE Architecture OR the Bank wants to Sunset Siebel	Its banks discretion
1228	88 of 222	Annexure 12/	Point 4 about Data, Knowledge and Analytics : The section speaks of Knowledge management capability for agents and branch staff (knowledge capture, curation, contextual surfacing, and governance) to support consistent resolutions and	Want to know if the Bank has a repository of KM articles and whether the scope includes migrating the entire repository to the new CRM	As per RFP and addendum
1229	90 of 222	Annexure 12/	RFP speaks of : AI/Agentic readiness using Bank framework: CRM must enable Bank-owned agentic AI to assist users (summaries, recommendations, drafting, next-best-action) and	Can you elaborate on the Bank's own Agentic AI framework ? Also is the Bank open to look at the Agentic AI framework that the CRM will provide OOTB ?	As per RFP and addendum

1230		Count of Users		Can you please share some high-level details on the following: 1) Approximate number of Sales users, Collection users and others who will use the CRM application for Lead and Opportunity Management, Collection management and so on. 2) Approximate number of users from the Service, Contact Center, and Grievance teams who will use the proposed CRM for service-related functionalities. Also a high level count of SR's/Incidents that are created on a monthly basis across all channels 3) Approximate total number of bank customers (this will help in estimating marketing communication volumes). 4) Number of Partners and Channel users who are not bank employees but work on behalf of the bank (excluding DSAs of BOB). 5) Approximate number of campaigns executed per month and the estimated volume of communications	Please refer RFP for volumetrics
1231	Page 14	1.11 Ownership, Grant and	(i) to copy the Software that operates on server systems to support the users of the Bank	Could you elaborate on which software to be copied in the context of a SaaS service deployed on Oracle's public cloud OCI?	As per the RFP and addendum

1232	Page 14	1.11 Ownership, Grant and Delivery	C. To work as interface: (i) to work with other Application Software packages at the Bank as interface; (ii) to allow other application software packages at the Bank to work as interfaces to the Software. If such interfacing requires any modification or change to the Platform, such modification or change has to be carried out by the Bidder free of any additional License charge or fees or expenses	For a SaaS service with built-in modules and existing APIs, if additional interfaces are required for system integration, the core SaaS will not be modified. Instead, any required changes or new APIs would be handled by the customer's System Integrator or Partner. Is this assumption correct?	As per the RFP and addendum
1233	Page 14	1.11 Ownership, Grant and Delivery	D. The grant of license by the Bidder herein shall be for processing the internal business of the Bank or its permitted affiliates and does not, without limitation, include the rights to reverse engineer, reverse compile or otherwise arrive at the source code of the Software nor does it include the rights to sell, lease, license, sublicense or otherwise transfer, convey or	Could you clarify if this is applicable for a SaaS where the underlying source code is Oracle's intellectual property?	As per the RFP and addendum
1234	Page 15	1.12 Escrow Mechanism	The Bank and the successful bidder shall agree to appoint an escrow agent to provide escrow mechanism for the deposit of the source code for the software product supplied / procured by the Bidder to the Bank in order to protect its	Is this relevant for a SaaS service, where the source code is the intellectual property of the SaaS provider?	As per the RFP and addendum
1235	Page 133	1.13 Audit	32. At any point in time, during the contract period, utilization of link should not cross 70%. In case link is utilized more than 70%, bidder to upgrade the link and associated hardware at no	N/A for SaaS - Could you confirm!	As per RFP and addendum
1236	Page 133	K. Cloud Infrastructure	33. The CRM should support WAN optimization techniques to improve the performance of the application over wide-area networks, particularly for remote branches and users with limited bandwidth. The CRM should seamlessly integrate with Software-Defined WAN (SD-WAN) solution of the Bank for optimized and secure connectivity	N/A for SaaS - Could you confirm!	As per RFP and addendum
1237	Page 112		24. The Bidder or Bidder's CSP must ensure the presence of Runtime Application Self-Protection (RASP) or an equivalent control, along with strong data security practices.	could you elaborate on the specific RASP capabilities?	As per RFP and addendum

1238	206	Effect of termination n	If bank terminates or cancels the assignment on the default mentioned in the termination clause, in such case Bank of Baroda reserves the right to get the balance contract executed by another party of its choice. In this event, the Service Provider shall be bound to make good the additional expenditure which the Bank may have to incur to carry out bidding process for the selection of a new service provider and for execution of the balance of the contract.	Bidder request for Below term : - Cure period of 30 days before invocation of this clause. - Bidder's liability limited to incremental cost capped at 10% of the cost of the undelivered systems/services. This clause can be invoked only on termination of contract and only for failure solely attributed to bidder	No change
1239	206	Termination	Notwithstanding above, in case of change of policy or any unavoidable circumstances or without any reason Bank reserve the right to terminate this assignment or any subsequent agreement and / or any particular order, in whole or in part by giving Service Provider at least 30 days prior notice in writing..... Without prejudice to the rights of the Parties, upon termination or expiry of this Agreement, Bank shall pay to Service Provider, within thirty (30) days of such termination or expiry, All the undisputed fees outstanding till the date of termination;.....	Bidder request for below terms / modification : - Bank shall provide 180 days notice period before termination of contract, - Bidder proposes mutual termination for convenience right between bidder and bank - Bank has to pay for undisputed fees for services rendered till date of termination. In addition to undisputed fees outstanding till date of termination, Bank shall also pay the Bidder for any hardwares/Appliances/licenses and AMC/ATS for which Bidder has made payment to OEM. - Bank would also require to pay for reverse transition fees proposed by Bidder	No change

1240	36	3.6 Performance Guarantee	The successful Service Provider shall provide a Performance Bank Guarantee (PBG) within 30 days from the date of receipt of the order or signing of the contract whichever is earlier in the format mentioned under Annexure 16 to the extent of 5% of the total order value for the entire period of the contract plus 3 months and such other extended period as the Bank may decide for due performance of the project obligations. The guarantee should be of that of a schedule commercial Bank in India, other than Bank of Baroda. In the event of non-performance of obligation or failure to meet terms of this Tender the Bank shall be entitled to invoke the performance guarantee without notice or right of demur to the bidder. Any	Bidder request for below terms : - PBG of 3% of the total annual value of contract and to be renewed every anniversary on subsequent annual value. We also request the PBG will be provided only for contract duration. - Bank shall invoke the PBG only on occurrence of material breach and after the Bank provides a 30 days cure period to the bidder to rectify the material breach for which the PBG is sought to be invoked.	no change
1241	11--13	1.9 Payment Terms	1.16 Payment Terms	Bidder request for below payment terms for following : a) Cloud Cost - 100% on delivery b) Software Cost - 100% on delivery c) Implementation Cost - Bidder request for below payment terms - On PO signing - 20% of implementation cost - On Delivery of Software and Hardware - 40% of implementation cost - On Successful Implementation & acceptance by the Bank - 30% of implementation cost - after conduction of successful drill - 10% of implementation cost D) Facility Management Charges - Quarterly in Advance E) OEM Assessment Services – Monthly in arrears	As per RFP and addendum

1242	16	Payment Terms	The Bank will pay invoices within a period of 30 days from the date of receipt of undisputed invoices. Any dispute regarding the invoice will be communicated to the selected vendor within 15 days from the date of receipt of the invoice. After the dispute is resolved, Bank shall make payment within 30 days from the date the dispute stands resolved	Bidder request for below term : - Invoices shall deemed to be accepted by bank, unless any dispute is raised by bank within 7 days from date of receipt of invoice by bank - Bidder request for Bidder's right to suspend the services in case of non payment of overdue amount for more than 90 days - Bidder will charge interest @2% per month for any delay beyond due date for non-payment of invoices.	As per RFP and addendum
1243	13	Payment Terms	There shall be no escalation in the prices once the prices are fixed and agreed to by the Bank and the vendor. Payment will be released as per above payment terms on submission of relevant documents.	Bidder request for below terms : - is a fixed price bid for contract duration. Hence, request for deletion of this clause	As per RFP and addendum
1244	13	Payment Terms	If any of the items / activities as mentioned in the price bid is not taken up by the bank during the course of the assignment, the bank will not pay the professional fees quoted by the vendor	Bidder request for below terms : - Any changes in the scope will be mutually agreed through change management process	As per RFP and addendum
1245	13	Payment Terms	The Bank shall have the right to withhold any payment due to the vendor, in case of delays or defaults on the part of the vendor. Such withholding of payment shall not amount to a	Bidder request for deletion of this clause.	As per RFP and addendum
1246	10	Delivery	Successful bidder will have to pay late delivery charges to Bank of Baroda @ 0.5% of the purchase order value inclusive of all taxes, duties, levies etc. of the delayed portion, per week or part thereof, for late delivery beyond due date of delivery, to a maximum of 10% of the purchase order value inclusive of all taxes, duties, levies etc. of the delayed portion. If delay exceeds the maximum percentage of 10%, Bank of Baroda reserves the right to cancel the respective order of the delayed portion and deduct the penalty charges from the overall cost payable to	Bidder request for below term - Late Delivery charges - 0.5% per week of the cost of delayed deliverable, subject to maximum 5% of cost of delayed deliverable.	No change

1247	51	4.26 SET-OFF	4.25 SET-OFF Without prejudice to other rights and remedies available to Bank, Bank shall be entitled to set-off or adjust any amounts due to Bank under this clause from the Service Provider against payments due and payable by Bank to the Service Provider for the services rendered. The provisions of this Clause shall survive the termination of this Agreement.	Bidder request for deletion of this clause	No change
1248	177	Annexure 14 – Masked Commercial Bid	*Bank will avail optional items whenever desire during the contract period. Facility Management Charges will be at discretion of Bank. Actual FM resources count will be required on need basis.	Bidder request that it is fixed price bid. Any variation should be done through mutually agreed change management process	No change
1249	175-176	Annexure 13 – Service Levels	Service levels	Bidder request for below terms : - Maximum cumulative aggregate all types of penalties/Service Credits/ Liquidated Damages under this agreement shall not exceed 5% of monthly invoice value of respective month . - The overall cap for all types of penalties/Service Credits/ Liquidated Damages under this agreement shall not exceed 5% of Annual contract value.	No change
1250	11	1.8Right to Alter Quantities	1.18 Right to Alter Quantities The Bank reserves the right to alter the requirements specified in the Tender. The Bank also reserves the right to delete one or more items from the list of items specified in the Tender. The Bank will inform all Bidders about changes, if any. The Bidder agrees that the Bank has no limit on the additions or deletions on the items for the period of the contract. Further the Bidder agrees that the prices quoted by the Bidder would be	Bidder request for below term : - It should be discussed between both the parties (Bank & Bidder) - Rates for additional quantity should be discussed and mutually agreed between both the parties (Bank & Bidder) - Bank reserves the right to alter the quantities at any time not exceeding 10% of the quantities mentioned in the commercial bid after mutually discussing	No change

1260	Page no. 63, (Refer Annexure 02 – Eligibility Criteria)	Eligibility Criteria – Financial Turnover	The Bidder should have a minimum average annual turnover of Rs. 75 Crore during the last three financial years.	We have successfully implemented similar large-scale CRM projects for leading banks across India and possess extensive experience in CRM implementation within the BFSI sector. To promote fair, transparent, and wider competition in line with the principles of procurement guidelines, we respectfully request the Bank to consider revising the minimum average annual turnover requirement from Rs. 75 Crore to Rs. 50 Crore over the last three financial years. Eligibility criteria should be reasonable, proportionate, and not unduly restrictive, so as to encourage participation from competent and experienced bidders. Reducing the turnover requirement to Rs. 50 Crore would still ensure adequate financial strength and stability of bidders while enabling broader participation. Such a revision would foster healthy competition, improve value discovery, and provide the Bank access to a larger pool of technically qualified and experienced CRM	As per the RFP and addendum
