

Pre-Bid Query Responses

RFP: Request For Proposal (RFP) For Selection of Software Development Agency for Development, Customization and Deployment of Integrated Grievance and Services Management System (IGSMS) for the State of Gujarat

Tender No: 288438

Note: The interpretation of the Bid Document by the Buyer/Procuring Authority shall be final and binding on all bidders.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
1	9 Pre-Qualification Criteria Point No 2 / Financial Capability	89	Financial Capability The Bidder should have an average annual turnover from IT Software Design, Development & integration related services (Software Development & Operation & Maintenance / CRM / ERP / Grievance management application for workflow automation, Software Product Development) of at least Rs. 7.5 Crore in last three financial years (2022-23, 2023-24 and 2024-25). Bidder should not be Bankrupt.	We would like to kindly request you to consider relaxation in the turnover criteria specified in the tender, particularly to encourage participation from MSMEs and startups.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
2	9. Pre-Qualification Criteria point no. 7 / Certification	91	Certification:- The Bidder should have valid certificate CMMi level 3 or above for Application / Software Development as on bid submission date.	We kindly request you to consider removing the requirement of CMMI Level 3 certification as a mandatory criterion. This will enable greater participation from MSMEs and startups, encouraging wider competition and innovation in the bidding process.		As per RFP
3	Fact Sheet	7	Consortium / Joint Venture	Please allow Consortium		As per RFP
4	9 Pre-Qualification Criteria Point No 6/ Employee Strength	91	The Bidder shall have maintained a minimum strength of Hundred (100) IT professionals (including IT Project Managers, Solution Architects, Database Administrators, Software Developers, Software Testers, System Administrators, UI/UX Designers, Data Analysts, Business Analysts, DevOps Professionals, AI Engineers, and Technical Leads) on its payroll at different levels continuously during the immediately preceding one (1) year up to the bid submission date.	Requesting to you to reduce number of employee Considering MSME and Startup Criteria.		As per RFP
5	3.1.2	Page No. 15	Key Objectives of Grievance Management	Please specify Service and scheme knowledge repository ?		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
6	3.2.1	Page No. 16	Existing Ecosystem	Will the selected bidder be responsible for data migration from existing grievance systems, and if so, what is the volume and format of the data to be migrated?		No data migration will be required as of now.
7	3.3	Page No. 16	Detailed Scope of Work for the Selected Bidder	Are there any specific user training and support expectations outlined for government officers and citizens using the system?		As per RFP training is required for government officers and project related stakeholders. For Citizen no training required.
8	3.3	Page No. 16	Detailed Scope of Work for the Selected Bidder / Milestones	Could you elaborate on the reporting and dashboard requirements for real-time monitoring and management of grievances and services?		As per RFP
9	3.3.4.1	Page No. 25	GIS Module Integration	Could you elaborate GIS module integration ?		As per corrigendum 2
10	3.3.4.2	Page No. 31	API monitoring dashboard	Could you detail out API monitoring dashboard ?		As per RFP
11	3.3.11.2	Page No. 35	Functional Scope	Elaborate Broadcast and scheduling engine with dependency management ?		Details will be provided to the selected Bidder.
12	8.37	Page No. 85	Change Request Management	Is there a defined process for handling change requests that may arise during the project, especially those impacting scope, timeline, or cost?		As per RFP
13	NA	Page No. 118	Annexure 8 – Format for Certifying that Online & Offline Documents are Identical	Kindly clarify whether: Any offline/hard copy submission is required along with the online bid; OR		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
14	SI No 04 of Technical Evaluation	Page No. 96	The Bidder shall have experience in the development and Operation & Maintenance (O&M) of IT systems catering to a large user base for any Central Government, State Government, Public Sector Undertaking (PSU), or Government Autonomous Body. Such projects must have been successfully executed / completed and must be operational (Go-Live). • 5 lakh (500,000) users and above = 3 marks. • 15 lakhs (15,00,000) users and above = 4 marks. • 25 lakhs (25,00,000) user and above = 5 marks.	We are requesting the department kindly reduce the numbers of users so that maximum bidder will be participate.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
15	SI No 05 of Technical Evaluation	Page No. 96	The bidder should have valid and current relevant industry-recognized certifications as on the bid submission date. • ISO/ IEC 27000 series = 1 mark • ISO/ IEC 20000 = 1 mark • ISO 22301 = 1 mark • CMMi L5 = 2 marks	"While ISO 22301 focuses exclusively on resilience, but ISO 9001 system ensures comprehensive control over operational processes and risk management. This provides a high level of stability and consistency, ensuring we can maintain service delivery, which fulfills the functional requirements of business continuity."		As per RFP
16	SI No 07 of Technical Evaluation	Page No. 97	Experience in integration of multiple APIs with Government systems and external/third-party platforms as part of a single project that has been successfully completed and is currently operational (Go-Live). • Experience of ≥ 5 API integrations = 6 Marks • Experience of ≥ 10 API integrations = 8 Marks • Experience of ≥ 15 API integrations = 10 Marks	We are requesting the department kindly add project value and reduce the number of API integration.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response

21	5.7 Violations and Associated Penalties	6	a. Quarterly performance evaluation will be conducted based on monthly reporting periods. b. Performance will be measured against minimum/target SLA requirements, and violations calculated accordingly. c. If the overall penalty, exceeds 25% of the monthly payable amount for any review period; or Exceeds 20% of the monthly payable amount for three (3) successive months, the Client may: • Invoke the Performance Bank Guarantee, or •	Bidder requests the following modification: a. Quarterly performance evaluation will be conducted based on monthly reporting periods. b. Performance will be measured against minimum/target SLA requirements, and violations calculated accordingly. c. If the overall penalty, exceeds 25% of the monthly payable amount for any review period; or Exceeds 20% of the monthly payable amount for three (3) successive months, the Client may: • Invoke the Performance Bank Guarantee, or • Terminate the contract, or • Do both, at its discretion		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
			Terminate the contract, or • Do both, at its discretion			
22	3.3.6 AI, LLM, OCR, and Automation Components	32	Automatically categorize grievances using text analysis, speech transcripts, uploaded documents, and contextual indicators.	The bidder requests the following clarification: How many categories of the grievances are		Grievance categories are not fixed and vary across different portals; bidders may refer to the list of integrated portals specified in the RFP to understand the range and diversity of categories.
23	3.3.6 AI, LLM, OCR, and Automation Components	32	Automatically categorize grievances using text analysis, speech transcripts, uploaded documents, and contextual indicators.	The bidder requests the following clarification: Is the understanding correct that all grievance are first converted to text (if not already) and stored for categorization ? What's the language of the generated text?		The grievances received through various channels shall be converted into standardized text (where required) and processed for categorization as per RFP, supporting multiple languages as per RFP, may vary in direction with authority.
24	3.3.6 AI, LLM, OCR, and Automation Components	32	Automatically categorize grievances using text analysis, speech transcripts, uploaded	The bidder requests the following clarification: Can you example of contextual indicators to understand better?		Contextual indicators may include location, department, user history, channel source, keywords and etc. to assist in

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
			documents, and contextual indicators.			accurate grievance classification.
25	3.3.6 AI, LLM, OCR, and Automation Components	32	Automatically categorize grievances using text analysis, speech transcripts, uploaded documents, and contextual indicators.	The bidder requests the following clarification: What's the frequency of categorizing grievance? it is as soon as a grievance is received or once in a day or anything else?		Grievance categorization shall be performed in real-time at the time of grievance registration.
26	3.3.6 AI, LLM, OCR, and Automation Components	32	Generate concise summaries of lengthy grievances for faster officer review.	The bidder requests the following clarification: How many concurrent user for this functionality. It will determine GPU requirements		As per corrigendum 2
27	3.3.6 AI, LLM, OCR, and Automation Components	32	Extract text using OCR for handwritten and typed documents, with special support for Gujarati language content.	The bidder requests the following clarification: What kind of documents these are? is there any stamp or image or table to be read or understood to extract context of the document? Were the document be typed(like a metadata to say what kind of the document is this)?		Grievances may be received in physical or digital documents (handwritten or typed) in multiple languages, and the OCR solution shall extract relevant text and context accordingly.
28	3.3.6 AI, LLM, OCR, and Automation Components	32	Detect duplicate or similar grievances based on root cause analysis.P	The bidder requests the following clarification: Is the root cause analysis for each grievance is available as a separate filed or metadata? or this has to be derived from the resolution of the grievance		Root cause analysis is not provided as a predefined field and shall be derived by the system based on grievance content, resolution details, and related metadata.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
29	3.3.6 AI, LLM, OCR, and Automation Components	32	Support conversational AI interfaces through chatbots for citizen interaction and assistance	The bidder requests the following clarification: What all features or information needs to provide for citizen interaction and assistance. List down for estimation.		The proposed chatbot solution shall support features including, but not limited to, grievance registration, grievance status tracking, dissemination of scheme and service-related information, handling of frequently asked questions (FAQs), document-related guidance, and basic query resolution for effective citizen assistance.
30	3.3.10 Operations and Maintenance	34	Accordingly, the Scope of O&M shall include the following, without any additional financial or contractual implications to the Client • Application and infrastructure maintenance • Integration support and bug fixing • Feature enhancements and version upgrades • Database management, backup, archival, and restoration • 24×7 system monitoring • Security monitoring and incident response • Compliance with all existing and future laws,	Bidder requests the following modification: Accordingly, the Scope of O&M shall include the following, without any additional financial or contractual implications to the Client • Application and infrastructure maintenance • Integration support and bug fixing • Feature enhancements and version upgrades • Database management, backup, archival, and restoration • 24×7 system monitoring • Security monitoring and incident response • Compliance with all existing and future laws, rules, regulations, policies, standards, and government guidelines. • The Selected Bidder shall ensure strict and continuous compliance with all applicable Service Level Agreements (SLAs) throughout the contract period		As per RFP

				indemnifying party the right to have sole control over the defense and settlement negotiations; (ii) does not make any statement or admission in relation to such claim which may prejudicially affect the chances of settlement or defense of such claim; (iii) reasonably cooperate with the indemnifying party in assisting the defense of the claim and in the negotiations or settlements of any such claim, demand or action by providing all assistance and information to perform the above obligations; and (iv) allow the other party, at its own expense, exclusively defend such litigation, negotiations and settlements with counsel of its own choosing. The indemnifying party shall not have the right to settle any claim if such settlement contains a stipulation to, or an admission or acknowledgement of, any wrongdoing (whether in tort or otherwise) on the part of the indemnified party.		
70	Section 9	Page 89	Eligibility Criteria	For financial eligibility, is submission of 3 years audited balance sheets strictly mandatory?		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
71	Section 9	Page 89	Eligibility Criteria	In case the latest year audit is in progress, will 2 audited + 1 provisional (CA-certified) financial statement be acceptable?		As per RFP
72	Section 9	Page 89	Eligibility Criteria	Is there any flexibility or relaxation provided for companies with consistent growth but incomplete current-year audit?		As per RFP
73	Section 9 / 10	Page 89–93	Experience Criteria	What type of projects will be considered as “similar experience” for this tender?		As per RFP
74	Section 9 / 10	Page 89–93	Experience Criteria	Is prior government project experience mandatory, or will private sector projects (CRM, workflow systems, SaaS platforms) also be considered?		As per RFP
75	Section 9 / 10	Page 89–93	Experience Criteria	Is there any minimum project value or number of projects required for qualification?		As per RFP
76	Section 3	Page 16–32	Scope of Work	From the Authority’s perspective, what are the most critical system components (grievance workflow, integrations, analytics, etc.)?		As per RFP
77	Section 3.3.3	Page 20–21	Architecture	Are there any specific technology preferences or restrictions (open-source vs licensed tools)?		As per RFP
78	Section 3.3.3	Page 20–21	Architecture	Is a microservices-based architecture mandatory, or can alternative architectures be proposed?		As per RFP
79	Section 3.3	Page 18–19	Infrastructure (GSDC Support)	Could you elaborate on the exact infrastructure components that will be provided by GSDC?		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
80	Section 3.3	Page 18–19	Infrastructure	Are bidders expected to include costs for database licenses, monitoring tools, and security solutions?		As per RFP
81	Section 3.3	Page 18–19	Infrastructure	Will staging and testing environments be fully managed by the bidder?		As per RFP
82	Section 3	Page 16–32	AI Scope	What level of AI capability is expected in the system (basic chatbot, NLP-based classification, or advanced LLM-based automation)?		As per RFP
83	Section 3	Page 16–32	AI Scope	Is there any expectation for predictive analytics or recommendation systems within the platform?		As per RFP
84	PQ Eligibility /Experience	89	Annual Turnover Threshold	Kindly confirm that average IT turnover of ₹15 Cr (FY22-23 to FY24-25) qualifies for PQ eligibility and will be awarded full marks under financial scoring.	As per standard Gov/State eGovernance tenders, ₹15 Cr turnover is sufficient to demonstrate financial stability; ensuring full marks avoids unfair advantage to larger firms and promotes MSME participation.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
85	PQ Eligibility /Experience	89	Definition of “Similar Project”	Request confirmation that GIS, Smart City, eGovernance, and citizenfacing IT projects executed for State/ULB clients qualify as “similar projects” under PQ/TQ.	Government guidelines (MeitY eGovernance framework) recognize GIS/Smart City projects as equivalent IT experience; this ensures fair evaluation of bidders with proven government track record.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
86	Scope / Infrastructure	16	Hosting Infrastructure Responsibility	Kindly clarify whether hosting will be provisioned via Gujarat SDC/NIC Cloud, instead of bidders procuring infra separately.	As per GoG IT policy, State Data Centre is the designated hosting environment; using it reduces duplication of infra costs and ensures compliance with security norms.	As per RFP
87	PQ Certifications	89	Mandatory Certifications	Request confirmation that CMMI ML3, ISO 9001, ISO 20000, ISO 27001 certifications meet PQ requirements, and that CERT-In/STQC are desirable but not mandatory.	GoI guidelines (MeitY) emphasize ISO/CMMI as baseline certifications; making CERT-In/STQC optional ensures wider participation without compromising quality.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
88	EMD / Financial	11	Form of EMD	Kindly confirm whether Bank Guarantee (BG) from a scheduled nationalized bank will be accepted as EMD, in addition to DD.	As per GFR 2017 rules, BG is an accepted form of EMD; allowing BG reduces bidder cash flow burden and aligns with government procurement norms.	Demand Draft/ Bank Guarantee payable are acceptable.
89	JV / Consortium	Fact Sheet	Consortium Eligibility	The Fact Sheet states "Consortium/JV not permitted." Request confirmation if this is absolute, or whether a structured JV with Lead Member may be considered.	Allowing JV is consistent with GoI guidelines for large-scale IT projects; it enables pooling of expertise and ensures project success.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
90	Commercial	83	Terms of Payment	Request confirmation that a mobilization advance (10–15%) will be provided upon Work Order issuance, followed by milestone linked payments.	As per standard government contract practice, mobilization advance ensures bidder liquidity and timely project initiation; milestone payments safeguard both parties.	As per RFP
91	Scope / O&M	83	AMC Period & Pricing	Kindly confirm whether AMC/O&M costs may be quoted separately on a per-annum basis.	Government IT contracts typically separate AMC costs to ensure transparency; annual pricing avoids inflated upfront bids and ensures sustainable O&M.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
92	Technical	93	Technology Stack	Request confirmation that bidders are free to propose technology stack based on expertise, rather than being restricted to a prescribed stack.	MeitY guidelines encourage open standards and bidder flexibility; allowing choice ensures innovation and best-fit solutions.	As per RFP
93	Legal / IP	79	Source Code Ownership	Kindly confirm that while source code ownership will vest with GoG, bidders may retain rights to reuse generic components in other projects.	GoI model RFP permits reuse of non-custom components; this protects bidder innovation while ensuring government retains ownership of project-specific code.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
94		91	9. Pre-Qualification Criteria	The Bidder should have successfully executed completed and/or ongoing projects related to Software Development and Operations & Maintenance (O&M), including CRM / ERP / workflow automation solutions / software product development, for any Central Government / State Government / Public Sector Undertakings (PSUs) during the last three (3) years from the date of bid submission.	We request that projects of a similar nature (CRM/ERP/Software Development) executed in India and globally, be considered for eligibility.	As per RFP
95	3	90	Relevant Experience in Software/ Mobile app Projects.	The Bidder have successfully executed completed ongoing project related to software development and operation and maintenance including CRM/ERP/Workflow Automation Solutions/Software product development for any central government/State government/PSU during last three years.	We have successfully completed mentioned projects in California Bay Area in last three years.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
96	9	92	Local Office	The Bidder should have atleast one Physical Office in Ahemdabad/Gandhinagar.	We will submit the undertaking letter that as soon as the work order is placed in favor of our organisation, we will open the office in Ahemdabad/Gan dhinagar.	As per RFP
97	5	96	The Bidder should have valid and current relevant industry recognized certification as on the Bid submission date.	CMMi L5	As soon as issue of work order if is awarded then we will apply the same certification to the Concern Department.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
98	Section no. 4.1, User Acceptance Testing (UAT)	46	Factory Acceptance Testing	It is mentioned that "The project acceptance process shall follow the sequence: Internal Testing → Factory Acceptance Testing (FAT) → User Acceptance Testing (UAT) → Go-Live → Stabilization → Final Acceptance" Query i. Can you please specify the criteria for "Factory Acceptance Testing" and for what equipments will be included under the "Factory Acceptance Testing" Criteria? Since as per SoW the bidder is not supplying any hardware. Please Clarify.		Factory Acceptance Testing (FAT) is not required for this project.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
99	Section 7, Preparation and Submission of Proposal, 7.3 Evaluation Process, (f)	65	Selection and Award Methodology	It is stated that " <i>The technical proposals shall be evaluated for a total of 100 marks. The maximum of top three (03) bidders who secure a minimum technical score of 70 marks shall qualify for the opening of their Financial Bids. The contract shall be awarded to the L1 bidder among the technically qualified bidders whose financial proposals are opened</i>" Query / Suggestion i. We request the evaluation methodology to be revised to "Quality and Cost based Selection (QCBS)" instead of "Least Cost Method" keeping in mind the complexity of the project w.r.t its implementation as this will need considerable technical and implementation skills for ensuring quality in delivery. ii. If QCBS methodology is adopted, then we request the evaluation to be conducted on 70:30 basis (70% weightage for quality of the proposal and 30% weightage for financials)		As per RFP
100	Section 9, Pre-Qualification Criteria, S.No. 2, Financial Capability	89	The Bidder should have an average annual turnover from IT Software Design, Development & integration related services (Software Development & Operation &	Query / Suggestion i. 110	10 Technical Evaluation, sr.no. 7	Page 97 of 135	Experience in integration of multiple APIs with Government systems and external/third-party platforms as part of a single project that has been successfully completed and is currently operational (Go-Live). Experience of ≥ 5 API integrations = 6 Marks • Experience of ≥ 10 API integrations = 8 Marks • Experience of ≥ 15 API integrations = 10 Marks	Revised clause is " Experience in integration of multiple APIs with Government systems and external/third-party platforms as part of a single project that has been successfully completed and is currently operational (Go-Live) OR project under execution but API works done. • Experience of ≥ 5 API integrations = 6 Marks • Experience of ≥ 10 API integrations = 8 Marks • Experience of ≥ 15 API integrations = 10 Marks		As per RFP
111	Note	Page 99 of 135	The technical proposals shall be evaluated for a total of 100 marks. The maximum of top three (03) bidders who secure a minimum technical score of 70 marks shall qualify for the opening of their Financial Bids. The contract shall be awarded to the L1 bidder among the technically	Requesting to delete the clause 'The maximum of top three (03) bidders who secure a minimum technical score of 70 marks shall qualify for the opening of their Financial Bids.' this restrict the bidders from participation, allow the all technically qualified bidders for financial opening.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
			qualified bidders whose financial proposals are opened, as per Section 7.3.			
112	Award of Contract	Page 100 of 135	After Reverse Bidding process, L1 bidder shall be decided on lowest revised price.	Requesting to remove the reverse auction and make the award criteria only L1 after qualified in technical criteria.		As per RFP
113	3.3	16–25	AI Scope	Whether the Authority will provision GPU-enabled infrastructure for hosting LLMs within GSDC/MeitY/GoG-approved cloud, or should the Bidder include GPU hardware and associated costs in the financial proposal?		As per corrigendum 2
114	4.1	46	UAT	Are there defined OCR accuracy benchmarks (Gujarati handwritten and printed) required for UAT sign-off? Please specify thresholds and validation methodology.		Should be more than 90% Accuracy
115	3.3	16–25	AI/NLP	Are bidders permitted to use third-party AI/NLP APIs hosted in India, or must all models be self-hosted?		As per RFP
116	3.3	16–25	AI Data	Will historical grievance datasets (labeled/unlabeled) be provided for training and fine-tuning AI models?		Details will be provided to selected Bidder.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
117	3.3	20–30	Integration	For integrations (Digital Gujarat, eNagar, iORA), is bidder scope limited to IGSMS APIs or includes legacy system API enablement?		As per RFP
118	3.3	20–30	WhatsApp	Will the Department provide WhatsApp Business Account (WABA), or must bidder procure and manage it?		As per RFP
119	3.3	16–25	Data Migration	Is legacy data migration (e.g., SWAGAT) in scope? Provide volume, formats, and data quality details.		No data migration will be required as of now.
120	3.3	20–30	Mobile App	What level of offline functionality is expected (full submission vs read-only)?		The mobile application should primarily operate in online mode. However, standard offline functionalities, including but not limited to data capture with subsequent synchronization, may be supported subject to solution design and prior approval.
121	3.3	20–35	Performance	What are the expected peak transactions per second (TPS) and response time SLAs for critical operations?		As per RFP
122	3.3	20–35	Scalability	Should the system support auto-scaling? If yes, are there defined load benchmarks for validation?		As per RFP
123	3.3	20–35	DR/BCP	What are the defined RPO and RTO requirements for disaster recovery?		As per RFP
124	3.3	20–35	Environments	How many environments (Dev, SIT, UAT, Prod, DR) are expected to be maintained by the bidder?		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
125	3.3	20–35	Logging & Monitoring	Should centralized logging and monitoring tools be provisioned by bidder or provided by GSDC?		As per RFP
126	3.3	20–35	Security	Are security tools (WAF, SIEM, VAPT) to be provisioned by bidder or authority?		As per RFP
127	3.3	20–35	Audit	Is CERT-In empanelled auditor engagement in bidder scope or authority scope?		As per RFP
128	3.3	20–35	API	Are there standard API specifications (REST, SOAP, authentication protocols) mandated?		As per RFP
129	3.3	20–35	Multilingual	Should NLP models support Gujarati-English code-mixed inputs?		As per RFP
130	3.3	20–35	Chatbot	What accuracy or response quality benchmarks are expected for chatbot responses?		Should be more than 90% Accuracy
131	5	~50+	Timeline	Are timelines fixed or can they be adjusted based on mutually agreed detailed project plan?		As per RFP
132	5	~50+	Dependencies	Will delays due to third-party integrations be excluded from SLA penalties?		As per RFP
133	5	~50+	UAT	Who will be responsible for UAT test case preparation and sign-off criteria definition?		As per RFP
134	5	~50+	Change Mgmt	What is the formal change request mechanism and approval timeline?		As per RFP
135	5	~50+	Resource	Are there minimum onsite resource deployment requirements?		As per RFP
136	5	~50+	Training	Is end-user and admin training part of bidder scope? If yes, expected scale?		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
137	7	114–115	Financial	Should costs for third-party services (SMS, WhatsApp, APIs, cloud AI) be included or reimbursed separately?		As per RFP
138	7	114–115	Payment	What are the payment milestones and linkage with deliverables?		As per RFP
139	7	114–115	O&M	What is the duration and scope of post-go-live O&M support?		As per RFP
140	7	114–115	Penalties	How are SLA penalties calculated and capped?		As per RFP
141	7	114–115	Price Validity	What is the validity period of commercial bid and cost escalation provisions?		As per RFP
142	7	114–115	Licensing	Should all software licenses (DB, tools, AI) be included in bidder cost?		As per RFP
143	3.3	20–35	External Systems	Will API documentation for all third-party systems be provided upfront?		As per RFP
144	3.3	20–35	Integration Support	Will respective departments provide technical support during integration?		As per RFP
145	3.3	20–35	Failure Handling	What is expected behavior if external system APIs are unavailable?		As per RFP
146	3.3	20–35	Rate Limits	Are there any API rate limits imposed by integrated systems?		As per RFP
147	3.3	20–35	Dashboard	Are dashboard formats fixed or configurable by admin users?		As per RFP
148	3.3	20–35	Reports	What is expected complexity of MIS and analytical reports?		As per RFP
149	3.3	20–35	Data Retention	What is the data retention policy for grievance records?		As per RFP
150	3.3	20–35	Compliance	Which compliance standards are mandatory (ISO 27001, CERT-In, etc.)?		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
151	3.3	20–35	Encryption	Are there specific encryption standards for data at rest and in transit?		As per RFP
152	3.3	20–35	Access Control	Is role-based access control (RBAC) sufficient or is ABAC required?		As per RFP
153	3.3	16–25	AI Ownership	Who owns trained AI models/IP?		As per RFP
154	3.3	50–60	O&M AI	Is model retraining included in O&M?		As per RFP
155	3.3	20–35	Explainability	Are explainable AI requirements defined?		As per RFP
156	3.3	50–60	AI Drift	Any performance degradation thresholds?		As per RFP
157	3.3	20–35	Data Ownership	Who owns grievance & analytics data?		As per RFP
158	3.3	20–35	Data Localization	Any geo-storage restrictions?		As per RFP
159	3.3	20–35	PII	Masking/anonymization requirements?		As per RFP
160	3.3	20–35	Archival	Archival scope & retrieval SLAs?		As per RFP
161	5	50–60	Support	Is 24x7 L1–L3 support required?		As per RFP
162	5	50–60	Helpdesk	Is call center setup in scope?		As per RFP
163	5	50–60	Incident Mgmt	Defined resolution timelines?		As per RFP
164	5	50–60	Escalation	Escalation matrix ownership?		As per RFP
165	7	114–120	Liability	Is there a cap on bidder liability?		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
166	7	114–120	Penalty	Are penalties cumulative?		As per RFP
167	7	114–120	Exit	Exit management expectations?		As per RFP
168	7	114–120	Source Code	Source code ownership terms?		As per RFP
169	3.3	20–35	Architecture	Any mandated architecture pattern?		As per RFP
170	3.3	20–35	Database	Any DB technology restrictions?		As per RFP
171	3.3	20–35	Security	Expected auth mechanisms?		As per RFP
172	3.3	20–35	Performance	Any caching/CDN requirements?		As per RFP
173	3.3	20–35	User Load	Channel-wise user distribution?		As per RFP
174	3.3	20–35	Accessibility	WCAG or other standards required?		As per RFP
175	3.3	20–35	Language	Real-time vs static multilingual support?		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
176	Technical Evaluation Criteria	96	Point No. 4 The Bidder shall have experience in the development and Operation & Maintenance (O&M) of IT systems catering to a large user base for any Central Government, State Government, Public Sector Undertaking (PSU), or Government Autonomous Body. Such projects must have been successfully executed/completed and must be operational (Go-Live). Marks distribution: • 5 lakh users = 3 marks • 15 lakh users = 4 marks • 25 lakh users = 5 marks	The criteria restricts full marks only to projects with very high user base (25 lakh+), which may limit participation of otherwise qualified and experienced bidders having successfully executed similar IT projects with lower user base but comparable complexity.	It is requested to remove the user-base-based grading and instead award full 5 marks for experience in handling large-scale IT systems irrespective of user count, OR consider alternative parameters such as system complexity, transaction volume, or project scope for marking.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
177	Technical Evaluation Criteria	96	Point 5 The bidder should have valid certifications:• ISO/IEC 27000 series = 1 mark• ISO/IEC 20000 = 1 mark• ISO 22301 = 1 mark• CMMI Level 5 = 2 marks	As per the Pre-Qualification criteria, CMMI Level 3 is considered sufficient for eligibility. However, in Technical Evaluation, marks are awarded only for CMMI Level 5, which creates inconsistency between PQ and TQ criteria and disadvantages bidders who meet the required standards.	It is requested to align Technical Evaluation with PQ criteria by awarding full marks for CMMI Level 3 or higher, OR proportionately allocate marks (e.g., CMMI Level 3 = 1 mark, Level 5 = 2 marks), ensuring fairness and consistency in evaluation.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
178	Team Deployment / Annexure 13	38	The RFP specifies submission of CVs for key resources (Annexure 13) along with defined qualification and experience criteria for proposed team members.	Whether replacement of proposed key resources is allowed during project execution with prior approval of the authority, provided equivalent or better qualifications and experience are maintained? In case replacement is not permitted, it may restrict operational flexibility during long project duration.	It is requested to allow replacement of proposed key resources during project execution , subject to prior approval of the authority and ensuring that the replacement resource has equal or higher qualifications and experience , to ensure smooth project execution.	As per RFP
179	3.1	14	Unified Platform	Please confirm whether IGSMS will replace existing grievance systems or function as an aggregation layer.		As per RFP
180	3.1.1	14	System Coverage	Kindly provide list of all grievance systems/channels to be onboarded in Phase 1.		As per RFP
181	3.3.2	20	Requirement Study	Confirm availability and commitment of all departments for requirement workshops and approvals.		Not in Bidder scope.
182	3.3.3	21	Workflow Standardization	Whether standard workflows and escalation matrices will be provided or need to be defined by bidder.		Details will be provided to selected Bidder.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
183	3.3.4	22 - 26	Grievance Lifecycle	Kindly provide detailed grievance lifecycle stages, including approval hierarchy and status definitions.		Details will be provided to selected Bidder.
184	3.3.4	26	SLA Definition	Please provide SLA timelines across departments and grievance categories.		Details will be provided to selected Bidder.
185	3.3.4	26	Escalation Matrix	Provide detailed escalation hierarchy (L1, L2, L3) and trigger conditions.		Details will be provided to selected Bidder.
186	3.3.4	24 - 25	Assignment Logic	Clarify mapping logic between grievance categories, departments, and officers.		Details will be provided to selected Bidder.
187	3.3.4	25	Reassignment	Clarify rules for grievance reassignment and SLA recalculation post reassignment.		Details will be provided to selected Bidder.
188	3.3.4	24	Information Requests	Confirm whether service/information requests follow same workflow and SLA as grievances.		Details will be provided to selected Bidder.
189	3.1.1	15	Citizen 360 View	Clarify data sources, ownership, and validation responsibility for citizen profile data.		As per RFP
190	3.3.4.2	29 - 31	Service Integration	Confirm whether IGSMS will handle full service lifecycle or only redirect to departmental portals.		As per RFP
191	3.3.4	27	Dashboards & KPIs	Kindly provide list of key dashboards, KPIs, and reporting expectations.		As per RFP
192	3.3.4	28	Citizen Communication	Clarify approval workflow and responsibility for responses sent to citizens.		Details will be provided to selected Bidder.
193	3.3.4	29	Bulk Grievances	Define business rules for identifying and handling mass/bulk grievances.		Details will be provided to selected Bidder.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
194	3.3.6	33	AI Scope	Clarify expected business outcomes from AI features (advisory vs automated decision-making).		As per RFP
195	3.3.11	36	Chatbot Scope	Define chatbot scope (informational, transactional, grievance registration, etc.).		As per RFP
196	3.3.10	35	O&M Scope	Clarify whether new business requirements and integrations during O&M will be treated under Change Request (CR).		As per RFP
197	3.3.4.1	22-23	SWAGAT Transition	In the "subsequent phase," SWAGAT will be fully incorporated into IGSMS. What is the defined timeline for this phase, and will the existing SWAGAT database be merged or archived?		Details will be provided to selected Bidder.
198	3.3.6	33- 34	OCR for Local Languages	The system requires OCR for Gujarati. Does the client have a preferred OCR engine already licensed by the state, or is the SDA expected to procure and train a custom model for Gujarati handwriting?		As per corrigendum 2
199	3.3.4	26-27	Call Center Module Boundaries	As the CM Helpline call center solution is referred to as an internal module, please clarify whether the SDA is required to provide Telephony / IVR infrastructure or only the software CRM interface for call center executives.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
200	3.3.1.1	14-15	Citizen Identification & Registration	For the one-time citizen registration process, will Aadhaar-based e-KYC be mandatory for all users, or will mobile OTP / SSO-based registration be considered sufficient for citizen profile creation?		Details will be provided to selected Bidder.
201	3.3.4	27-28	Reporting Frequency & Granularity	For automated reports and dissemination mechanisms, kindly clarify the expected reporting granularity and frequency (e.g., real-time or hourly reports for CM Office, daily or weekly reports for District and Departmental authorities).		As per RFP
202	3.1.1	15, 24	Call Center Integration	As per RFP, integration with CM Helpline Call Center CRM is required. Kindly confirm: (a) Call recordings and historical call data will be provided by Department, (b) Vendor scope limited to integration, sync, visualization, (c) No responsibility for infra, IVR, hardware, manpower.		As per RFP
203	3.3	19, 63	Environment Setup	Confirm staging/testing hosting location (State DC vs Vendor infra) and ownership responsibilities.		As per RFP
204	3.3	19	Hosting Strategy	Confirm final deployment on Department infra; Vendor handles deployment & operations.		As per RFP
205	3.3	19, 116	Licenses & Tools	Confirm Vendor bears cost for paid tools; BI licenses by Department.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
206	3.3.3	21	SSO Integration	Confirm SSO ownership by Department; Vendor to integrate using standard protocols.		As per RFP
207	3.3.4.1	25, 28	Notifications	Confirm SMS, SMTP ownership; bulk mailer; WhatsApp API by Department; share yearly volumes.		Details will be provided to selected Bidder.
208	3.3.4	21	Multilingual Support	Confirm ownership of document conversion; share yearly volume estimates.		Details will be provided to selected Bidder.
209	3.3.4.1	28	IVR	Confirm IVR ownership, voice recording responsibility, and sample workflows.		Not in Bidder scope.
210	3.3.7	33	Voice Grievance	Clarify voice-based grievance submission approach, speech-to-text needs, channels.		Details will be provided to selected Bidder.
211	3.3.7	33	OCR & AI	Confirm OCR volumes, AI platform preference, and hosting compliance.		As per RFP
212	3.3.9	34, 35	Security Audit	Confirm Vendor bears audit cost; define frequency and timelines.		As per RFP
213	3.3.12	36	Payment Gateway	Confirm Department provides gateway; Vendor integrates.		Confirmed
214	3.3.5	33	GIS Integration	Confirm GIS licensing ownership and cost responsibility.		As per RFP
215	11	36, 101	Backup	Confirm backup tools by Department; Vendor integrates and manages.		As per RFP
216	11	32	Tech Stack	Confirm any mandated tech stack or restrictions.		As per RFP
217	3.3.11	36-37	WABA	Confirm Department provides WABA; share volumes; template approvals.		As per RFP
218	4.3	18, 48	Scalability	Confirm transaction and concurrent user assumptions for sizing.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
219	5.4	55	SLA Tools	Confirm if specific SLA monitoring tools required.		As per RFP
220	3.3.4.2	32	API Gateway	Confirm API gateway ownership (Department vs Vendor).		As per RFP
221	10 Technical Evaluation Point No. 2	93	The Bidder must have experience in the design, development, implementation, and operation & maintenance of at least one (1) project related to software development, including software product development, CRM, ERP, or automated workflow-based solutions, for any Central Government, State Government, or Public Sector Undertaking (PSU) during the last three (3) years, with a minimum project value of ₹1 Crore	Since this falls under the TQ criteria, you may request the bidder to provide details based on the number of projects executed rather than their value, as a work order of ₹3 Crore has already been considered under the PQ criteria.		As per RFP
222	Fact Sheet/ Point No.18	6	Consortium / Joint Venture	Please allow Consortium to participate in tender.		As per RFP
223	10 Technical Evaluation Point No. 4	96	The Bidder shall have experience in the development and Operation & Maintenance (O&M) of IT systems catering to a large user base for any Central Government,	We kindly request you to consider allowing vendors who have executed projects in cities with similar population criteria, in place of the requirement for registered users.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
			State Government, Public Sector Undertaking (PSU), or Government Autonomous Body. Such projects must have been successfully executed/completed and must be operational (Go-Live).			
224	10 Technical Evaluation	94	The Bidder must have experience in the design, development, implementation, and operation & maintenance of at least one (1) project related to software development, including software product development, CRM, ERP, or automated workflow-based solutions, for any Central Government, State Government, or Public Sector Undertaking (PSU) during the last three (3) years, with a minimum project value of ₹1 Crore.	We kindly request the department to consider and allow experience from reputed corporate organizations, in addition to Central Government, State Government, and Public Sector Undertakings (PSUs), during the last three (3) years.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
225	10 Technical Evaluation	95	The Bidder shall have experience in the design, development, implementation, and successful operation of at least one (1) project involving a Grievance Redressal System / Module for any Central Government, State Government, Public Sector Undertaking (PSU), or Government Autonomous Body during the last three (3) years, with a minimum project value of ₹1 Crore.	To encourage wider participation and enhance competition, we kindly request the department to consider and allow experience from reputed corporate organizations, in addition to Central Government, State Government, and Public Sector Undertakings (PSUs), for projects executed during the last three (3) years.		As per RFP
226	10 Technical Evaluation	97	The bidder should have valid and current relevant industry-recognized certifications as on the bid submission date. • ISO/ IEC 27000 series = 1 mark • ISO/ IEC 20000 = 1 mark • ISO 22301 = 1 mark • CMMi L5 = 2 marks	To encourage wider participation, we kindly request the department to relax the requirements of ISO 22301 and CMMI Level 5. We request that ISO 14001 be accepted instead of ISO 22301, and that CMMI Level 3 be allowed here as well, as already specified in the pre-qualification criteria, so that more bidders can participate.		As per RFP
227	Fact Sheet	7	Consortium / Joint Venture	We kindly request the department to allow Consortium / Joint Venture		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
228	3.1.1 & 3.3	14, 16	3.1.1 Key Objectives of Grievance Management Integration with All Existing Grievance Platforms • API-based integration with all existing grievance systems to enable secure two-way data exchange. • Seamless integration with the CM Helpline call centre CRM to ensure automatic flow of all call-based grievances into the IGSMS. • Enablement of a consolidated 360-degree view of citizen grievance history through seamless interoperability across systems. ---- The IGSMS shall enable seamless integration with existing grievance redressal and service delivery platforms, including but not limited to SWAGAT, CPGRAMS, eNagar portals, Municipal Corporation grievance systems, and other relevant platforms, in order to establish a unified grievance redressal ecosystem with real-time tracking, enhanced grievance resolution, and easy access to citizen services.	1. Kindly provide below details regarding Integration with all Existing Grievance Portals and other systems. 1.1 List of all existing grievance portals and departmental/ULB systems that are required to be integrated with IGSMS, along with their technology stack and integration readiness (API availability, database access, or middleware support). 1.2 Whether all integrations with existing grievance portals, departmental systems, ULB platforms, and legacy applications are to be implemented by the bidder, or will any integration support/APIs be provided by respective departments? 1.3 Please confirm the approximate number of systems to be integrated and whether integration with any third-party/state/national grievance platforms (e.g., CPGRAMS or other external systems) is also within scope. 1.4 In case APIs are not available for certain legacy systems, whether the client will facilitate API enablement or alternative integration mechanisms for such systems. Please clarify and provide details		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
229	3.1.1	14, 16	3.1.1 Key Objectives of Grievance Management Integration with All Existing Grievance Platforms • API-based integration with all existing grievance systems to enable secure two-way data exchange. • Seamless integration with the CM Helpline call centre CRM to ensure automatic flow of all call-based grievances into the IGSMS. • Enablement of a consolidated 360-degree view of citizen grievance history through seamless interoperability across systems.	1. We assume that the data structure and schema across all existing grievance systems are uniform in nature. In case the data structures vary, we kindly request the authority to provide details regarding the number of distinct or unique data structures currently in use across the existing grievance systems. This clarification is essential for accurate effort estimation, data mapping strategy, migration planning (if require), and ensuring seamless system integration without data inconsistency risks.		Details will be provided to selected Bidder.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
230	3.1.2	14-15	3.1.2 Key Objectives of the Service Engagement Portal • Scheme Registration and Application Management An integrated portal for registration and application to schemes and services, supported and guided by user-friendly workflows. • Service Request Tracking End-to-end tracking of each service application with real-time status updates available through the respective service delivery platforms.	1. How many service delivery platforms will be required to integrate with IGSMS? 2. We assume that the data structure and schema across all service delivery platforms are uniform in nature. In case the data structures vary, we kindly request the authority to provide details regarding the number of distinct or unique data structures currently in use across the service delivery platform. This clarification is essential for accurate effort estimation, data mapping strategy, migration planning (if require), and ensuring seamless system integration without data inconsistency risks.		As per RFP

231	3.3.4.1	25	3.3.4.1 Integrated Grievance and Service Management System (IGSMS) – Core Components (Grievance Redressal System) • GIS Module Integration The IGSMS shall integrate with a GIS module to capture and utilize location information of citizens, officers, and officials for various use cases, including grievance registration, grievance disposal, and service request processing.	1. We assume that GIS-related functionalities shall be limited to utilization of the captured geo-coordinates for visualization, location tagging, and basic geo-referencing purposes only. Kindly confirm whether the scope includes only recording and displaying latitude–longitude information or if advanced GIS functionalities such as spatial analytics, route optimization, geo-fencing, map layer management, or third-party GIS licensing/customization are also envisaged under this project. This clarification is required to accurately define implementation scope, infrastructure requirements, GIS licensing considerations, and overall project effort estimation.		As per corrigendum 2

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
232	3.3.6	32	3.3.6 AI, LLM, OCR, and Automation Components The Selected Bidder shall integrate advanced AI, LLM, and automation-based components to: 1. Automatically categorize grievances using text analysis, speech transcripts, uploaded documents, and contextual indicators. 2. Generate concise summaries of lengthy grievances for faster officer review. 3. Extract text using OCR for handwritten and typed documents, with special support for Gujarati language content.	1. Kindly specify the expected annual/monthly volume of handwritten and typed documents (separately for each) to be processed through OCR services, including approximate file sizes and formats, to enable proper infrastructure and licensing estimation. 2. Kindly clarify whether the Selected Bidder is required to provide complete OCR engine licensing/subscription, or Department-owned OCR/Government platform/API will be made available for integration. 3. Apart from Gujarati, please confirm whether OCR support is required for Hindi and English or any additional regional languages.		As per RFP

235	3.3.12	36, 39	3.3.12 Team Deployment (Phase 1- Development, Rollout of Portal, Mobile App, WhatsApp Services, System Stabilization, and Go-Live) Key Resource: Tentative Team to be deployed for Project Implementation The Selected Bidder shall deploy a dedicated project team, including, but not limited to: The Selected Bidder shall be responsible for deploying key project resources at the client site during the development phase of the IGSMIS portal, including but not limited to: • Project Manager • Business Analyst • Developers (Atleast one)	1. We assume that onsite resources deployment will be required for key project resources (i.e. 1 Project Manager, 1 Business Analyst and 1 Developer) only whereas for other resources bidder can decide it based on requirement. Please confirm. 2. We also assume that 1 Project Manager and 1 Developer will be required to deploy onsite throughout the 1 year development period, whereas 1 Business Analyst only required to deploy onsite in the phases related with their activities like Requirement analysis, Solution Designing and for other phases Business Analyst can work remotely. Please confirm. 3. We assume that required office space, laptop/PC, infrastructure, and internet connectivity for on-site team members will be provided by Client (i.e. CM Helpline Coordination Unit (CMH-CU), General Administration Department (ARTD). Please confirm.		1. Minimum of 3 as per RFP is mandate but not limited to. 2. As per RFP 3. Only seating space, and internet connectivity for onsite resources shall be facilitated by the Department, while necessary devices shall be arranged by the bidder.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
236	4	40-45	4 Project Timelines and Milestones - Milestone 1 Sr.No.: 2 Scope of Work: Design, Development, Integration.....and compliance reports, as detailed in Section 3. Deliverable / (Reports/ Documents & Infra): • System Design Document (SDD) / Process Design Report • Testing Methodology including test cases and test plan and Test Results • UAT Sign off certificate by CMH-CU. • Handing over of i. Source code of the developed application Security audit of the system through a CERT-In–empanelled agency. Timeline/ (Duration): T4= T3+ 60 Days (83 Days)	1.Considering the extensive scope and complexity of the IGSMS project, the proposed implementation timeline of 83 days appears extremely stringent for milestone 1 - Sr.No. 2 work , which may pose challenges in ensuring comprehensive development, integration, testing, and quality assurance. In view of the above, we kindly request the Authority to extend the overall implementation timeline to a minimum of 183 days (approximately six months). Further, we request that the timelines for subsequent milestones be proportionately revised to 15–18 months, enabling adequate time for respective milestone of the project. Such a revision will help ensure a robust, secure, and stable Go-Live while maintaining the desired quality standards and long-term sustainability of the solution. We request the Authority to kindly consider.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
237		52	e. Helpdesk Support “Helpdesk Support” shall mean the centralized support facility responsible for fault reporting, trouble ticket management, and user assistance during the contract period. Helpdesk services shall be provided 12×7, operational from 09:00 AM to 09:00 PM, Monday through Sunday.	1. Is the 12×7 helpdesk (9 AM–9 PM) expected to be a dedicated team, or can it be a shared helpdesk model? What is the expected ticket volume / concurrent user base? 2. How many helpdesk staff headcount will be required to provide? 3. Who will provide the Ticketing system - Client or Vendor? 4.Does "helpdesk support" include L2/L3 technical support, or only L1 user assistance?		1.The helpdesk shall be provisioned by the bidder ensuring compliance with defined service levels and timelines. 2. Sufficient resources required to meet the SLA in shift from 9am to 9pm. 3. The ticketing system shall be provided and managed by the bidder as part of the solution. 4. Helpdesk support shall primarily include L1 user assistance, with escalation to L2/L3 support as required for issue resolution.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
238	5.4	55, 56	5.4 Implementation of SLAs Capping: Maximum penalty per milestone is 15%. If this is reached, the Client may invoke the termination clause. • Every week of delay also extends the maintenance period by 2 weeks beyond the standard 24 months, at no additional cost to the Client. -- 5.7 Violations and Associated Penalties a. Quarterly performance evaluation will be conducted based on monthly reporting periods. b. Performance will be measured against minimum/target SLA requirements, and violations calculated accordingly. c. If the overall penalty, exceeds 25% of the monthly payable amount for any review period; or Exceeds 20% of the monthly payable amount for three (3) successive months, the Client may:	1. Penalty cap of 15% is significantly higher than prevailing industry standards for similar IT implementation and managed service projects. Typically, industry practice — especially in large-scale government projects — limits per milestone or cumulative penalties to 5% of the contract value, ensuring a balanced risk allocation between the Authority and the Service Provider. A higher penalty cap may disproportionately increase commercial risk, impact project pricing, and discourage wider competitive participation from qualified bidders. Considering the complexity, dependencies on multiple stakeholders, third-party integrations, and factors beyond the direct control of the selected bidder, we kindly request the Authority to revise the penalty cap to 5% of the contract value for each milestone as well as cumulative penalty. Please consider. 2. We assume that delays caused by client dependencies (such as delayed approvals, feedback, or sign-off) be excluded from the calculation of penalties and maintenance extensions? Please confirm.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
239	7.3	65	7.3 Evaluation process f) Selection and Award Methodology - The technical proposals shall be evaluated for a total of 100 marks. The maximum of top three (03) bidders who secure a minimum technical score of 70 marks shall qualify for the opening of their Financial Bids. The contract shall be awarded to the L1 bidder among the technically qualified bidders whose financial proposals are opened. - The contract shall be awarded to the Lowest Financial Bidder (L1) among the technically qualified bidders.	1.Considering the strategic importance and mission-critical nature of the proposed state-wide IGSMS platform, which is expected to serve crores of citizens across Gujarat, it is essential to ensure selection of a bidder possessing strong technical capability, proven experience, and a robust implementation approach. In this regard, we respectfully request the Authority to adopt a QCBS (Quality and Cost-Based Selection) evaluation methodology, with a weightage of 70% for the Technical Proposal and 30% for the Financial Proposal. Further, only bidders securing a minimum technical score of 70 marks may be considered technically qualified for financial evaluation. The contract may thereafter be awarded to the bidder achieving the highest combined QCBS score among all technically qualified bidders. This approach will ensure an optimal balance between technical excellence and commercial competitiveness, thereby supporting successful implementation, long-term sustainability, and high-quality		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
				service delivery for the IGSMS platform. We kindly request the Authority to consider the above suggestion.		

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
240	7.7	68	7.7 Deciding Award of Contract e.Upon acceptance of the Letter of Intent (LoI), the successful Bidder shall deposit a Performance Security in the form of a Performance Bank Guarantee (PBG) equivalent to 5% of the Total Contract Value, for a duration of three (3) years and six (6) months, as specified in Annexure 4, within twenty (20) days, as a prerequisite for signing the Agreement. The tenure of the PBG shall be three (3) years and six (6) months.	1. As per prevailing industry practices and recent government procurement trends, the standard PBG requirement for IT and e-Governance projects is generally maintained at 3% of the Total Contract Value to promote ease of doing business and reduce financial burden on bidders. Accordingly, we kindly request the Authority to revise the Performance Bank Guarantee requirement from 5% to 3% of the Total Contract Value, aligning the tender conditions with current industry standards while maintaining adequate safeguards for project performance. Kindly consider.		As per RFP
241	9	89,90	9 Pre-Qualification Criteria Sr.No.: 2 Functional Area: Financial Capability Criteria: The Bidder should have an average annual turnover from IT Software Design, Development & integration related services (Software Development & Operation & Maintenance / CRM / ERP / Grievance management application for workflow automation, Software Product Development) of at least Rs.	1. Considering the geographical scale and across the state usage of the system, it is essential that only financially strong and capable bidders participate in this project. However, the current minimum average annual turnover requirement appears to be considerably low for a project of this magnitude. Therefore, we request you to revise the minimum average annual turnover criterion to ₹20 Crores to ensure that only adequately qualified bidders meet the eligibility requirements. We kindly request the Authority to consider this revision.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
			7.5 Crore in last three financial years (2022-23, 2023-24 and 2024-25). Bidder should not be Bankrupt. Note: Turnover from the following activities shall not be considered: • Hardware supply and maintenance • Manpower outsourcing • Non-IT services.			
242	9	91	9 Pre-Qualification Criteria Sr.No.: 6 Functional Area: Employee Strength Criteria: The Bidder shall have maintained a minimum strength of Hundred (100) IT professionals (including IT Project Managers, Solution Architects, Database Administrators, Software Developers, Software Testers, System Administrators, UI/UX Designers, Data Analysts, Business Analysts, DevOps Professionals, AI Engineers, and Technical Leads) on its payroll at different levels continuously during the immediately preceding one (1) year up to the bid submission date.	1. Looking to the size and importance of the project, required Employee Strenght of Bidder is quite low, so we request you keep it as per below to get quality participations. "Criteria: The Bidder shall have maintained a minimum strength of Hundred (250) IT professionals (including IT Project Managers, Solution Architects, Database Administrators, Software Developers, Software Testers, System Administrators, UI/UX Designers, Data Analysts, Business Analysts, DevOps Professionals, AI Engineers, and Technical Leads) on its payroll at different levels continuously during the immediately preceding one (1) year up to the bid submission date." Please consider.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
243	10	93	10 Technical Evaluation Sr.No.: 1 Parameter: The Bidder shall have an average annual turnover of at least ₹7.5 Crore from IT software–related services, including Software Development and Operation & Maintenance, CRM and ERP–based workflow automation, Software Product Development, and Mobile Application Development, during the last three (3) financial years, i.e., FY 2022–23, FY 2023–24, and FY 2024–25. Criteria: a) Average Turnover ≥7.5 Crore and < 12.5 Cr = 6 marks b) Average Turnover ≥ 12.5 and < 17.5 Cr. = 8 marks c) Average Turnover ≥ 17.5 Cr. = 10 marks	1. We request you to amend this Technical Evaluation Criteria as outlined below, in alignment with the suggested revisions to the Bidder's Financial Capability Pre-Qualification Criteria: Criteria: a) Average Turnover ≥20 Crore and < 25 Cr = 6 marks b) Average Turnover ≥ 25 and < 30 Cr. = 8 marks c) Average Turnover ≥ 30 Cr. = 10 marks Please consider.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
244	10	93,94	10 Technical Evaluation Sr.No.: 2 Parameter: The Bidder must have experience in the design, development, implementation, and operation & maintenance of at least one (1) project related to software development, including software product development, CRM, ERP, or automated workflow-based solutions, for any Central Government, State Government, or Public Sector Undertaking (PSU) during the last three (3) years, with a minimum project value of ₹1 Crore. Criteria: • Implemented 1 Project: 6 marks. • Implemented 2 Projects: 8 marks. • Implemented ≥ 3 Projects: 10 marks	1. This criteria do injustice with bidder, who have large-scale project experience (having project value ≥ 3 Crores). Therefore we request the authority to consider project value–based experience eligibility in addition to number of projects so that bidder having executed large-scale government IT system implementation projects of comparable value have equal weightage. To improve competition while maintaining quality standards we would suggest below criteria for this Evaluation Paramer. Criteria: • Implemented 3 Projects with value of atleast 1.5 crores : 6 marks. • Implemented 2 Projects with value of at least 1.9 crores : 8 marks. • Implemented 1 Project with the value of at least 3 crores : 10 marks		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
245	10	94,95	10 Technical Evaluation Sr.No.: 3 Parameter: The Bidder shall have experience in the design, development, implementation, and successful operation of at least one (1) project involving a Grievance Redressal System / Module for any Central Government, State Government, Public Sector Undertaking (PSU), or Government Autonomous Body during the last three (3) years, with a minimum project value of ₹1 Crore. Note: The cited project must include any four (4) of the following grievance redressal functionalities: • Grievance registration by citizens • Assignment/auto-marking to L1 officer • Auto-escalation mechanism from L1 to higher levels (Ln) • Citizen feedback on grievance resolution • Re-opening of grievances. Criteria: • 1 Project	1. We request you include below two (2) additional functionality with requested 4 grievance redressal functionality in project criteria, which are also relevant to the project scope. • AI based Chatbot • Analytics Dashboard Kindly consider. 2. We also request you to reduce a minimum project value from Rs. 1 Crore to Rs. 50 lakhs for broader participation from well qualified bidders. Please consider.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
246	10	97,98	10 Technical Evaluation Sr.No.: 8 Parameter: Technical presentation - Capabilities, Approach and Methodology for execution of project. Criteria: Max Marks: 40 Marks	1. The allocation of 40 marks for the Technical Presentation appears relatively high and may introduce a degree of subjectivity in the evaluation process. In most comparable government and e-Governance tenders, the weightage assigned to technical presentations is generally limited to around 30 marks, ensuring a more balanced and objective assessment framework. In view of the above, we respectfully request the Authority to consider revising the marks allocated to the Technical Presentation from 40 marks to 30 marks. The remaining 10 marks may kindly be reassigned to more objective evaluation parameters such as bidder's organizational profile, employee strength, relevant project experience, certifications, and technical credentials, which can be assessed based on verifiable documentary evidence. This revision would help promote transparency, minimize subjectivity, and ensure a fair and balanced evaluation of technically competent bidders. Please consider.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
247	11	100	11 Evaluation of Financial Bids Tenderer may conduct the Reverse Bidding as per the following procedure. • The L1 bidder price shall be put up for starting price for Reverse Bidding. Reverse Bidding shall be for reducing the price and the bidders have to reduce their quoted price in decrement of value as decided by the Employer before start of Reverse Bidding. • If any bidder bids in last 2 minutes of deadline for submission of bid for Reverse Bidding, then, the time for reverse bidding shall be extended for further 5 minutes from its previous closing time. • After Reverse Bidding process, L1 bidder shall be decided on lowest revised price.	1. The proposed LCBS with Reverse Auction (RA) approach may reduce the overall project cost; however, it introduces significant execution risks that may adversely impact the quality and sustainability of project delivery. For large-scale and complex technology transformation programs such as the proposed initiative, excessive commercial pressure created through Reverse Auction mechanisms often leads to aggressive price reductions that may not realistically support the deployment of skilled resources, robust technology architecture, long-term operational commitments, and required service quality levels. In mission-critical e-Governance projects involving system integration, multi-stakeholder coordination, innovation, and long-term O&M responsibilities, project success depends substantially on technical capability, solution maturity, implementation methodology, and sustained service delivery rather than only lowest pricing. In view of the above, we respectfully request the Authority to kindly drop		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
				the Reverse Bidding process after QCBS-based bidder selection and retain QCBS as the final mechanism for determining the successful bidder, thereby ensuring quality-driven selection aligned with global best practices for e-Governance initiatives. Kindly consider. In respective of selection method we respectfully suggest that participation of all technically qualified bidders must be allowed, instead of restricting participation only to the top three bidders. Allowing all qualified bidders to participate will promote greater competition, enhance transparency, and enable more competitive price discovery, ultimately resulting in better value for the Authority.		

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
248	Annx-7	117	ANNEXURE 7: Financial Proposal Format Note: 4. All transaction charges towards SMS, WhatsApp messaging (WABA), or similar services shall be governed by Clause 3 (Exclusive Pricing) above and shall not form part of the Financial Quote.	1. The provided Financial Proposal Format does not include any provision for quoting third-party service charges such as SMS services, WhatsApp Business API (WABA) messaging, or similar communication services. Additionally, the RFP document does not provide sufficient information or usage estimates that would enable bidders to accurately assess and price these services. In view of the above, we kindly request the Authority to provide an amended Financial Proposal Format incorporating a separate provision for quoting such third-party service charges, along with indicative consumption details or estimation parameters, effect on bid evaluation to ensure fair and transparent commercial evaluation. Kindly consider. 2. We also request you provide payment temrs of these services.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
249	General		Data Migration	1. Is there any data will be required to migrate from any existing system to IGSMS? If yes, then kindly share below details 1.1 Name & Technology stack of each system, 1.2 size of data to be migrated from each system 1.3 Data format to be provide for migration - Database or CSV or Excel		No data migration will be required as of now.
250	General		Bid Submission Date	1. We request that a minimum period of THREE WEEKS be provided to all bidders for preparation and submission of bids AFTER the release of pre-bid query responses / corrigendum. Given the complexity and scale of the IGSMS project (web portal + mobile app + WhatsApp chatbot + AI/ML module + multiple integrations), adequate time is essential to prepare a thorough, high-quality technical and financial proposal. This additional time will benefit the evaluation authority by attracting more competitive bids. Kindly consider.		As per Corrigendum 2

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
251	3.1.1 and 3.3.4.1	14 and 21	* Key Objectives of Grievance Management * Integrated Grievance and Service Management System (IGSMS) – Core Components (Grievance Redressal System)	User Access Model — Direct Login vs. API-Based Integration The RFP does not clearly define whether departmental officers and call centre agents will log directly into IGSMS as their primary working system, or whether their existing systems will continue to be used with IGSMS acting as a backend integration hub. This distinction directly impacts infrastructure sizing, concurrent user capacity, software licensing, training scope, and overall solution design. A direct-login model for thousands of officers and agents is a significantly larger and costlier build than an API-based data exchange model. (a) Will departmental officers and call centre agents log into IGSMS as their primary working system, or will IGSMS function mainly as a backend integration platform connecting their existing systems via API? (b) If direct login is required, what is the estimated total number of internal users — both concurrent and absolute — across all departments and the CM Helpline? (c) For departments that do not have an existing grievance system, will IGSMS serve as their primary working		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
				interface with direct login access provided to their officers?

252	3.1.1 and 3.3.4.1	14 and 21	* Key Objectives of Grievance Management * Integrated Grievance and Service Management System (IGSMS) – Core Components (Grievance Redressal System)	(a) Automatic flow of grievances from CM helpline number to this system means do we have to enable login access for CM helpline employees in IGSMS, or will the integration be purely system-to-system (API-based) with the existing call centre CRM? (b) Should the system automatically determine the grievance category based on the text entered by the citizen (with out allowing citizen to select the category), or should it provide AI based classification while allowing the citizen to confirm or modify the category (assisted classification)?		(a) Both (b) As per RFP
253	3.1.1 and 3.3	14 and 18	* Key Objectives of Grievance Management * Detailed Scope of Work for the Selected Bidder	For voice-based grievance handling, is the expectation that voice inputs will be converted into text transcripts and processed within the system, or should the system also store and process audio clips as part of grievance records?		Voice inputs received through the Chatbot shall be converted into text transcripts for processing within the system. Audio recordings may also be stored as part of the grievance records. For voice inputs received through the Call Center, similar transcription functionality shall apply; however, call recording shall be outside the bidder's scope.
254	3.1.2	14	Service Engagement Portal	Please clarify whether the Service Engagement Portal is expected to be developed as a separate module integrated through APIs and SSO, or as part of the same application		Same Platform.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
				platform/codebase as the grievance management system		
255	3.3	16	Scalability and Infrastructure	Kindly confirm whether the stated capacity of 1,00,000 transactions per day and 18,000–19,000 concurrent users includes combined traffic from grievance, service requests, WhatsApp, chatbot, and legacy system integrations		As per RFP
256	3.3	16	Communication Integrations	Please clarify whether WhatsApp Business API, SMS gateway, chatbot platform licenses, and third-party communication costs shall be provided by the department / GSDC, or are to be included in the bidder's commercial proposal.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
257	3.3 and 4.3	18 and 47	* Container Orchestration Platform - GSDC shall provide the container orchestration infrastructure (e.g. VMware Tanzu Infra). Any application-level tools, enterprise add-ons, or paid licenses required for containerized application deployment shall be proposed, procured, configured, and supported by the SDA. * Section 4.3 Software Load Balancer	Infrastructure Demarcation — Load Balancer vs. VMware Tanzu The RFP requires the bidder to provide a Software Load Balancer covering L4/L7 routing, SSL termination, and WAF integration. At the same time, GSDC will provide the VMware Tanzu platform, which typically includes native ingress and load balancing features such as Contour or NSX Advanced Load Balancer. This may lead to functional overlap and unclear responsibility between platform-provided ingress and bidder-provided load balancing. (a) Does the VMware Tanzu environment provided by GSDC include native ingress and load balancing capabilities such as NSX Advanced Load Balancer or Contour? (b) If yes, can the bidder use these native Tanzu features to meet the requirements of Section 4.3 instead of deploying a separate software load balancer? (c) If a separate load balancer is still required, what specific functions are expected beyond what Tanzu's native ingress stack provides?		GSDC will provide Tanzu which include native ingress and load balancing capabilities such as NSX Advanced Load Balancer or Contour for Use.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
258	3.3.4	21	Development of Core IGSMS Platform	Kindly confirm whether bidders may propose customization and enhancement of an existing Public Grievance Redressal (PGR) module to meet the IGSMS requirements, instead of developing the grievance workflow entirely from scratch, provided all functional, technical, and SLA requirements are complied with.		Bidders may propose customization and enhancement of an existing solution, provided it meets all functional, technical, security, and SLA requirements specified in the RFP.
259	3.3.4	21	Integration Scope	Kindly confirm whether API specifications, data schemas, authentication methods, and sandbox/UAT endpoints for integrations with SWAGAT, CPGRAMS, eNagar, municipal systems, and CM Helpline CRM will be provided by the department during implementation.		The bidder shall coordinate with concerned stakeholders and adapt accordingly during API integration, approvals shall be facilitated by CMH-CU as needed for project execution. Rest follows as per RFP.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
260	3.3.4.1	21	Integrated Grievance and Service Management System (IGSMS) – Core Components (Grievance Redressal System)	(a) For voice-based grievance handling, is the expectation that voice inputs will be converted into text transcripts and processed within the system, or should the system also store and process audio clips as part of grievance records? Detect duplicate or similar grievances based on root cause analysis – details may be elaborated: (i) Is root cause analysis expected to be rule-based (e.g., category/location driven) or AI/ML-based semantic analysis? (ii) What parameters should be considered for duplicate/similarity detection (e.g., mobile number, location, department, keywords, time window)? (iii) Should the system auto-merge/club such grievances or only flag them for manual review?		a) Voice inputs received through the Chatbot shall be converted into text transcripts for processing within the system. Audio recordings may also be stored as part of the grievance records. For voice inputs received through the Call Center, similar transcription functionality shall apply; however, call recording shall be outside the bidder's scope. For (i), (ii), and (iii) Details will be provided to selected bidder.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
261	3.3.4.1 and 4	21 and 40	* Integrated Grievance and Service Management System (IGSMS) – Core Components (Grievance Redressal System) * Project Timelines and Milestones	SWAGAT — Integration vs. Full Migration Scope The RFP describes two phases for SWAGAT — Phase 1 API-based integration, and Phase 2 full incorporation into IGSMS where SWAGAT is decommissioned. Full incorporation involves significant effort including historical data migration, workflow migration, officer hierarchy migration, and system decommissioning. However, no milestone, timeline, or payment linkage is defined anywhere in Section 4 for this Phase 2 activity, making it impossible for bidders to scope and price the contract correctly. (a) Is the full incorporation of SWAGAT — including data migration and decommissioning — part of the current contract scope and pricing? (b) If yes, which milestone in Section 4 covers this activity and what is the associated payment linkage and acceptance condition? (c) If no, please confirm that only API-based integration with SWAGAT is required during the contract period, with SWAGAT continuing to operate as a separate system.		No data migration will be required as of now.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
262	3.3.4.1, 3.3.5 and 3.3.6	21, 32	* Integrated Grievance and Service Management System (IGSMS) – Core Components (Grievance Redressal System) * Development of Mobile Applications * AI, LLM, OCR, and Automation Components	AI and Voice Processing — Automation Level and Storage Requirements The RFP includes AI-based features such as grievance categorisation, duplicate detection, and handling of voice-based grievances. The level of automation expected — whether the system acts automatically or only assists human decisions — and the audio storage requirement significantly impact AI model complexity, GPU and infrastructure sizing, and overall project cost. (a) For duplicate detection and grievance categorisation, is the system expected to perform automatic actions such as auto-merging tickets and auto-assigning categories, or is it only required to provide recommendations for a human officer to review and confirm? (b) For voice-based grievances, is the requirement limited to storing and processing a text transcript, or must the system also store and provide playback of original audio recordings? If audio storage is required, what is the mandated retention period?		For GPU and infrastructuring details, As per corrigendum 2. (a) The system shall provide AI-based recommendations for categorization and duplicate detection, with provision for human review and confirmation before any action. (b) Voice inputs received through the Chatbot shall be converted into text transcripts for processing within the system. Audio recordings may also be stored as part of the grievance records. For voice inputs received through the Call Center, similar transcription functionality shall apply; however, call recording shall be outside the bidder's scope.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
263	3.3.10 and 5.4	34 and 55	* Operations and Maintenance * Implementation of SLAs	Third-Party API Readiness and Penalty Risk The RFP requires integration with over 30 external government systems listed in Table 1. The bidder has no control over the readiness, availability, or stability of APIs from these external platforms. Section 3.3.10 further makes the bidder responsible for all future API changes across these third-party systems at no additional cost, while Section 5.4 applies milestone and SLA penalties without any carve-out for delays caused by external departments. (a) Can CMH-CU provide a readiness status for all systems listed in Table 1, indicating which currently have live and accessible APIs and which require the owning department to develop APIs from scratch? (b) Will milestone timelines be extended without penalty when delays are directly caused by a third-party system not providing API access or support on time? (c) Will post go-live API changes required due to updates in third-party systems be treated as Change Requests under Section 8.37 rather than O&M obligations under Section 3.3.10?		(a) and (b) CMH-CU shall coordinate with the concerned departments to facilitate timely provision of API access and requisite technical details. Any delays arising due to non-availability or delayed support from third-party systems or departments shall not be attributable to the Selected Bidder and shall not attract any penalties. The Selected Bidder shall promptly notify CMH-CU of such delays. (c) As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
264	3.3.11 and 4	35 and 41-42	* WhatsApp Business API (WABA) Services * Project Timelines and Milestones	WhatsApp Business Account — Ownership and Timeline Risk The RFP requires end-to-end WABA integration with the WhatsApp chatbot operational by Day 180 (T7). However, setting up a Government WhatsApp Business Account requires Meta business verification, phone number provisioning, and BSP onboarding — a process that takes a minimum of 8 to 12 weeks. This account must be registered in CMH-CU's legal name and cannot be set up by the vendor on the department's behalf. If this process begins only at Lol, the account will not be ready before Day 84 to 90, leaving no realistic window for development, testing, and go-live within the T7 deadline. (a) Does CMH-CU already have a Meta-verified WhatsApp Business Account with a dedicated phone number ready for IGSMS use? If yes, will full API access be provided to the bidder within 7 days of Lol? (b) If no such account exists, who will be responsible for completing Meta verification, business onboarding, and number provisioning? (c) In such a case, will the T7 milestone clock start only from the		(a) No (b) Bidder, CMH-CU will facilitate the process requirement where required. (c) As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
				date the verified account and API access are handed over to the bidder?		
265	6.3.2	64	Earnest Money Deposit (EMD)	As BEL is a Navaratna PSU under Ministry of Defence, we request you to provide exemption from EMD.		As per RFP

266	9 Pre-Qualification Criteria	89	2. Financial Capability: The Bidder should have an average annual turnover from IT Software Design, Development & integration related services (Software Development & Operation & Maintenance / CRM / ERP / Grievance management application for workflow automation, Software Product Development) of at least Rs. 7.5 Crore in last three financial years (2022-23, 2023-24 and 2024-25). Bidder should not be Bankrupt. Note: Turnover from the following activities shall not be considered: • Hardware supply and maintenance • Manpower outsourcing • Non-IT services.	We understand that bidder having required turnover from IT Software Design, Development & integration related services (Software Development & Operation & Maintenance) can be considered. Please confirm our understanding	NA	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
267	10 Technical Evaluation	93	1. The Bidder shall have an average annual turnover of at least ₹7.5 Crore from IT software–related services, including Software Development and Operation & Maintenance, CRM and ERP–based workflow automation, Software Product Development, and Mobile Application Development, during the last three (3) financial years, i.e., FY 2022–23, FY 2023– 24, and FY 2024–25.	We understand that bidder having required turnover from IT Software Design, Development & integration related services (Software Development & Operation & Maintenance) can be considered. Please confirm our understanding	NA	As per RFP
268			General Understanding	We understand that any project under operations and Maintenance in last 3 years can be considered for evaluation. Please confirm.	NA	As per RFP
269	10 Technical Evaluation	93	2. The Bidder must have experience in the design, development, implementation, and operation & maintenance of at least one (1) project related to software development, including software product development, CRM, ERP, or automated	We understand that this criteria has requirement either of software product development OR CRM OR ERP, or automated workflow-based solutions. Please confirm our understanding.	NA	Confirmed

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
			workflow-based solutions, for any Central Government, State Government, or Public Sector Undertaking (PSU) during the last three (3) years, with a minimum project value of ₹1 Crore.			

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
270	10 Technical Evaluation	93	4. The Bidder shall have experience in the development and Operation & Maintenance (O&M) of IT systems catering to a large user base for any Central Government, State Government, Public Sector Undertaking (PSU), or Government Autonomous Body. Such projects must have been successfully executed/completed and must be operational (Go-Live).	4. The Bidder shall have experience in the development and Operation & Maintenance (O&M) of IT systems catering to a large user base for any Central Government, State Government, Public Sector Undertaking (PSU), or Government Autonomous Body or listed organization. Such projects must have been successfully executed/completed and must be operational (Go-Live).	Including publicly listed companies broadens the eligibility to reputed and compliant organizations that follow stringent regulatory, governance, and operational standards comparable to government entities. This ensures wider competition while still maintaining quality.	As per RFP
271	3.3.12 Team Deployment	36-39	The number and type of resources to be deployed will be decided by SDA.	We understand the listed roles are the minimum required for technical evaluation. Kindly confirm if the SDA has the flexibility to propose a leaner O&M team (Phase 2) if automated monitoring and CI/CD tools reduce manual intervention, provided SLAs are met.	Allows for cost optimization through automation without compromising service delivery.	The listed roles represent the minimum requirement; however, the bidder may increase the resource deployment based on project needs, provided the minimum resources specified in the RFP are maintained.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
272	3.3.12 Team Deployment	39	Selected Bidder shall be responsible for deploying key project resources at the client site during the development phase...	Kindly clarify the definition of client site for the development phase. Does this require 100% physical presence in Gandhinagar for the entire dev team, or can a Lead-Only onsite model be adopted with the backend team working from the SDA's local Ahmedabad/Gandhinagar office?	Essential for calculating logistics, seat costs, and talent sourcing radius.	As per RFP
273	3.3.12 Team Deployment	39	Any subsequent replacement of approved personnel shall be subject to prior approval of CMH-CU.	We understand that the Key Resources require approval. Kindly confirm that for Support/Junior Staff not specifically named in the bid, the SDA may manage rotations and replacements internally to manage attrition, provided the new resources meet the minimum RFP qualifications.	Reduces administrative burden and prevents SLA delays during routine attrition.	Replacement of any resources shall require prior approval of CMH-CU; The new resources meet the minimum qualifications specified in the RFP.
274	5.2 Interpretation & General Instructions	54	Business Hours shall be 9:00 am to 9:00 pm on all calendar days... Client offices will require to work beyond business hours on need basis.	Kindly confirm that for any need basis work requested beyond the 12x7 window (e.g., midnight deployments or 24/7 disaster response), the Authority will provide 48-hour notice to allow for HR shift planning and compliance with statutory Overtime or Compensatory Off labor laws.	Ensures compliance with the Gujarat Shops and Establishments Act regarding working hours.	The bidder shall adhere to SLA requirements and plan resources accordingly, in compliance with applicable labor laws and project requirements.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
275	5.8 Show Cause Notice & 5.9 Table	57-60	Penalty for Non-Deployment of Resources... Rs. 1000/- per day... If absence exceeds 12 days.	We understand the penalty for absence. Kindly confirm that if a resource is on Emergency/Medical Leave, the 8-15 day penalty window will be waived if the SDA provides a temporary Shadow Resource of equal qualification within 48 hours to ensure continuity.	Protects the bidder from penalties during genuine medical emergencies while ensuring service.	As per RFP
276	3.3.12 Team Deployment	38	SN 11: Technical Infrastructure Manager... 8+ years of experience... Strong knowledge of Linux/Windows.	Given the GSDC provides the core infrastructure (VMware Tanzu/Infra), kindly confirm if this role can be shared across other GoG projects or if it must be a 100% dedicated headcount for IGSMMS only.	Optimizes cost for specialized infrastructure roles that may not require full-time attention.	The Technical Infrastructure Manager shall be deployed as required for the project provided all responsibilities and SLA requirements of the IGSMMS project are fully met.
277	11 Key Compliances for Bidder	102	Any disputes between the vendor & manpower related to minimum wages, EPF, ESIC... will be the sole responsibility of the successful Bidder.	Kindly confirm if the Authority requires a Monthly Compliance Certificate (signed by a CA or HR Head) alongside invoices to verify that all onsite resources have received statutory benefits, ensuring zero legal liability for the Department.	Standardizes the verification process and demonstrates bidder's commitment to compliance.	As per RFP
278	5.1 Definitions (e)	53	Helpdesk services shall be provided 12x7, operational from 09:00 AM to 09:00 PM.	Since the Helpdesk is 12x7, kindly confirm that the SDA should plan for a 2-shift model (6 hours each or overlapping) to stay within the 48-hour weekly limit per resource as per labor regulations.	Clarifies headcount estimation for the Helpdesk to avoid Single Point of Failure risks.	The bidder shall plan and deploy the helpdesk team in an appropriate shift model to meet the 12x7 requirement, ensuring compliance with SLA and applicable labor regulations.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
279	3.3.7 Capacity Building	33	The Selected Bidder shall prepare training and enablement materials... in Gujarati and English.	Kindly clarify if the Capacity Building Specialist (SN 9 in Table) is responsible for only Content Creation or if they are also required to conduct Train-the-Trainer (ToT) physical sessions for 18,000+ concurrent users across the State.	Impacts the volume of travel/conveyance costs and the total number of trainers required.	The Selected Bidder shall prepare training and enablement materials, including videos, user manuals, FAQs, and quick reference guides, in Gujarati and English. Training materials in additional languages shall be developed if required by the Competent Authority. The training shall be conducted across the state in virtual/hybrid mode. The necessary training infrastructure and transportation shall be provided by the Department.
280	3.3.12 Team Deployment	36-37	Minimum Qualification... Preferred: PMP or Prince2 Certified.	Regarding Preferred certifications (PMP, TOGAF, etc.), kindly confirm that resources with the required years of experience but without the specific Preferred certification will not be disqualified during the technical evaluation.	Increases the available talent pool and prevents disqualification on non-mandatory items.	As per RFP
281	5.8 Show Cause Notice & 5.9 Table	59	A maximum of 12 leaves per year per resource... subject to prior approval.	We understand the leave cap. Kindly confirm if Public Holidays as per the GoG calendar are counted within this 12-day limit or if they are granted over and above the 12 leaves.	Vital for calculating Effective Man-Days and total billing capacity.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
282	3.3.12 Team Deployment	39	Profiles, qualifications, relevant experience, and detailed CVs... shall be submitted... for review and approval prior to deployment.	Kindly confirm the Turnaround Time (TAT) for the Authority to approve a CV. We suggest a 5-working-day TAT to ensure that the SDA can secure the talent in a competitive market before the candidate accepts other offers.	Prevents the loss of high-quality candidates due to lengthy government approval cycles.	The Authority shall review and provide feedback on submitted CVs within a reasonable timeframe; however, the bidder shall plan resource onboarding accordingly to meet project timelines.
283	8.39.2 Exit Management Plan	87	Exit Management Plan shall include... measures to ensure uninterrupted service delivery... governance during transition.	Kindly confirm that during the 1-month Exit Management period, the SDA's staff will only be responsible for Knowledge Transfer and not for Parallel Operations with a new agency, unless additional man-month rates are paid.	Protects the SDA from Double-Work scenarios during the transition phase.	During the Exit Management period, the bidder shall ensure uninterrupted service delivery along with knowledge transfer and transition support
284	10 Technical Evaluation (Table)	99	Submission of profiles for the proposed team... interviews (if required) conducted by the TENDERER.	Kindly confirm if these interviews will be conducted virtually or physically in Gandhinagar, and if Alternative Candidates can be interviewed if the primary candidate is unavailable on the specific interview date.	Reduces the risk of Evaluation Failure due to scheduling conflicts with key experts.	As per RFP
285	3.3.4.1 Core Components	22	The interface for call centre shall function as an assisted grievance entry channel... All grievance details will be captured by CCEs.	Kindly clarify if the SDA is responsible for the HR Payroll & Management of the Call Centre Executives (CCEs), or if the SDA only provides the Software Interface for use by the existing CM-Helpline CCE team.	Major cost driver: distinguishes between a Software Development bid and a BPO/Manpower bid.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
286	9 Pre-Qualification (6)	92	Bidder shall have maintained a minimum strength of Hundred (100) IT professionals... on its payroll.	Kindly confirm that the 100 IT Professionals count can include Contractual/Project-based Employees who are on the SDA's payroll but assigned to specific long-term government projects.	Provides flexibility for agencies that use project-based staffing models for large-scale e-Gov.	As per RFP
287	8.37 Change Request Management	84	Quoted man-month rate shall be used for cost estimation... efforts of all technical resources... shall be considered.	Kindly confirm if the Man-Month Rate for Change Requests is a Blended Rate for all categories, or if the SDA should provide a Category-wise Rate Card (e.g., Developer vs. Architect) to ensure fair pricing for different skill levels.	Ensures transparency and fair compensation for high-end roles like Solution Architects during changes.	As per RFP
288	8.32 NDA	83	Bidder shall sign a mutually agreed Non-Disclosure Agreement (NDA) with the TENDERER at the time of deployment.	Kindly confirm that individual Employee NDAs are also required for every resource deployed onsite to ensure data privacy at the individual level, in addition to the Corporate NDA.	Enhances data security and ensures individual accountability for sensitive citizen data.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
289	4 Project Timelines and Milestones	41-45	Delivery of Milestone 1 (Grievance Module) in \$T4 = T3 + 60\$ days.	We understand the 60-day development window for the Core IGSMS platform. Kindly confirm that this timeline is contingent upon the Authority providing final approved SRS/SDD and all API documentation for the 30+ integrated platforms (Table 1) within \$T3+7\$ days.	Integrating 30+ diverse legacy systems in 60 days is a high-risk dependency; early access to API docs is critical for \$T4\$ feasibility.	The selected bidder shall plan and execute the project in alignment with the defined milestones, considering all dependencies as part of project planning.
290	3.3.4.1 Core Components & 4.1 UAT	23, 47	Integration and Future Consolidation of SWAGAT.	Please clarify the sequence for SWAGAT consolidation. Will Milestone 1 be considered Operational based on API-linkage only, or is the full data migration/code-incorporation of SWAGAT a prerequisite for UAT sign-off and the 40% payment?	Distinguishing between integration and full consolidation is vital for defining the Go-Live criteria for Milestone 1.	No data migration will be required as of now; rest remain as per RFP.
291	3.3.4.2 Service Delivery Facilitator	30-31	Integration with 30+ major online service delivery platforms.	We understand the SDA is responsible for integration. Kindly confirm that delays caused by third-party departmental system downtime or non-responsiveness of their technical teams will be treated as Excusable Delays and will not trigger liquidated damages or SLA penalties.	SDA cannot control the uptime or cooperation of external departmental portals; risk-sharing is necessary here.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
292	4.1 User Acceptance Testing (UAT)	47	UAT sign-off obtained only after all observations and change requests are addressed.	Kindly clarify the turnaround time (TAT) for the Authority to provide consolidated UAT feedback. We suggest a 7-day TAT for feedback to ensure the SDA can meet the 10-day stabilization Buffer mentioned in the timeline.	Without a fixed TAT for client feedback, the SDA's rectification window becomes unpredictable, risking the \$T5\$ milestone.	As per RFP
293	4.1 User Acceptance Testing (UAT)	48	Failover and recovery time during stress testing shall not exceed 15 minutes.	We understand the recovery SLA. Kindly confirm that this is dependent on the High Availability (HA) infrastructure and Load Balancers provided by GSDC being fully functional and configured as per the SDA's design.	SDA manages the software, but failover speed is physically limited by the underlying GSDC infrastructure and VM provisioning.	As per RFP
294	4 Project Timelines and Milestones	45	Stabilization Period of 90 days following Milestone 4.	Please clarify if Final Go-Live (Milestone 4) is declared at the start or end of the 90-day stabilization period. Furthermore, confirm if O&M payments commence immediately upon the issuance of the written Go-Live approval.	Clarifies when the 24-month O&M liability starts and ensures cash flow is not deferred by an additional 3 months of stabilization.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
295	3.3.2 Requirement Gathering & 8.37 CRM	21, 84	SRS/SDD approval prior to development.	We understand that SRS/SDD requires approval. Kindly confirm that any functional requirements identified after SRS sign-off will be processed through the formal Change Request Management (CRM) mechanism and potentially impact the \$T4\$ timeline.	Protects against Scope Creep during the development phase and ensures timeline adjustments for new requirements.	As per RFP
296	3.3.10 Operations and Maintenance	35	SDA responsible for API enhancements, replacements, and protocol modifications for existing/future systems.	Kindly clarify if there is a limit to the number of new departmental integrations required during the 2-year O&M phase. We suggest that more than 3 new integrations per year be treated as a Change Request.	Unlimited future integrations under O&M creates an unquantifiable resource risk for the SDA.	As per RFP
297	5.2.2 SLA Monitoring Tools	55	Bidder shall deploy automated tools for SLA reporting.	Please confirm if the Authority will provide a Centralized Monitoring Tool for cross-verification, or if the SDA's tool will be the sole System of Record for penalty calculations.	Essential for governance; a single source of truth for SLAs prevents disputes during quarterly payment cycles.	The bidder shall deploy and manage automated tools for SLA reporting; the Authority may use its own mechanisms for monitoring and validation, and final determination for SLA compliance.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
298	8.39 Exit Management	87	Exit Management Period is one month from commencement.	We understand the 1-month handover period. Given the complexity of 30+ integrations, kindly confirm if this is sufficient, or if the Authority requires a parallel support phase where SDA and the new vendor work together for 60 days.	A 1-month exit for an Integrated system of this scale is tight; 60 days ensures better business continuity.	As per RFP
299	4.3 Software Load Balancer	48	SDA to manage software-level load balancing; GSDC provides physical LB.	Please clarify the demarcation of responsibility if performance drops due to the physical Load Balancer. Will the SDA be penalized under the 3-second page load SLA if the GSDC physical layer is the bottleneck?	Infrastructure-linked performance issues must be excluded from SDA penalties to ensure fairness.	As per RFP
300	3.3.11.1 Key Functionalities	36	AI-powered chatbot for grievance registration, tracking, and service discovery.	We understand the AI/LLM requirement. Kindly confirm that the Knowledge Base content (FAQs, scheme details) will be provided by the respective Departments in a structured digital format to enable AI-training.	SDA can build the AI engine, but the accuracy of the engine depends entirely on the quality of departmental data provided.	The Knowledge Base content shall be provided by the CMH-CU; however, the bidder shall be responsible for structuring, processing, and enabling its use for AI-based functionalities.
301	5.4 Implementation of SLAs	56	Maximum penalty per milestone is 15%; Authority may terminate if reached.	Kindly confirm that the 15% cap is the exclusive remedy for delays. Also, clarify if Force Majeure events or Client Dependencies (e.g., delayed server access) will automatically stop the delay-clock.	Protects the SDA from termination due to external factors beyond their control.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
302	3.3.1 Project Planning & Governance	20	SDA to establish effective coordination with concerned departments and ULBs.	Will the Authority appoint a dedicated Nodal Officer from each of the 30+ integrated departments to facilitate API access and UAT sign-offs within the defined project timelines?	SDA lacks the authority to compel other departments to cooperate; a centralized GoG governance committee is vital.	Details will be provided to selected Bidder.
303	8.37 Change Request Management	85	Analysis and evaluation of Change Request.	Please clarify the timeline for the Authority to approve/reject a Change Request. We suggest a 10-day TAT to prevent Analysis Paralysis from delaying the primary project track.	Operational clarity on CRM ensures that mid-project changes don't stall the main delivery engine.	Approval or rejection timelines shall be subject to the nature, complexity, and administrative' s review requirements of the Change Request
304	3.3.6 AI, LLM, OCR, and Automation	33	All AI/LLM components shall be hosted on GSDC/GoG approved cloud.	Kindly confirm if the GPU-enabled infrastructure required for LLM/OCR processing will be provided by GSDC, or if the SDA must bundle these hardware/cloud costs into their financial bid.	Standard VMs often lack GPUs; this significantly impacts the Lumpsum cost of Milestone 3.	As per corrigendum 2 GPU-enabled infrastructure required for LLM will be provided by CMH-CU.
305	11 Evaluation of Financial Bids	102	SDA responsible for managing physical infrastructure and hardware.	This clause contradicts the Fact Sheet stating GSDC provides hardware. Kindly confirm that the SDA's responsibility is limited to Management/Administration and not the Procurement/Cost of server hardware.	Clarifies a major cost ambiguity between the SDA and GSDC.	As per RFP clause 3.3 Detailed Scope of Work for the Selected Bidder. PI refer Support provided by GSDC.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
306	4 Project Timelines & Milestones	41-45	Milestone payments (40%, 15%, 15%, 10%) linked to FAT/UAT.	We understand payments are milestone-based. Kindly confirm that if UAT/Go-Live is delayed beyond the stipulated timeline due to Client Dependencies or third-party API unavailability, the SDA can raise a Provisional Invoice for 70% of the milestone value to maintain project cash flow.	Protects against significant working capital blockage caused by external approval delays.	As per RFP
307	8.33 Terms of Payment & Annexure 7	83, 115	Prices are inclusive of all costs; GST must be shown separately.	Please clarify if the Total Contract Value has a built-in Tax Variation Clause. We understand that any statutory increase in GST rates or new central/state levies introduced post-bid submission will be reimbursed by the Authority on actuals.	Mitigates the risk of margin erosion due to mid-contract legislative tax changes.	As per the RFP terms, prices quoted by the bidder shall be inclusive of all costs, with applicable taxes, including GST. Any variation in statutory tax rates or introduction of new Central or State level after the bid submission date shall be governed by applicable laws and will be adjusted at the time of invoicing, subject to submission of documentary evidence and in accordance with Government of Gujarat financial rules.
308	11 Evaluation of Financial Bids	101	Reverse Auction will be conducted to decide L1 based on the lowest revised price.	Kindly confirm if the Reverse Auction applies only to the Part-A (Development) or the Grand Total (A+B). Also, please clarify the minimum Bid Decrement value to allow for rational pricing adjustments during the live auction.	Essential for pricing strategy and maintaining the integrity of the Least Cost Selection model.	The Reverse Auction shall be applicable on the Financial Proposal Grand Total (Part-A + Part-B). The minimum bid decrement value for the Reverse Auction shall be notified to the technically qualified top 3 bidders through the nProcure / e-Auction portal prior to

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
						commencement of the Reverse Auction process.
309	4 Project Timelines (Milestone 4)	45	20% of Part A payment retained and released quarterly (5% per quarter) during the first year of O&M.	We understand the 20% retention policy. Please clarify if this retention can be replaced by a Retention Bank Guarantee (RBG) of equivalent value to ensure the SDA can recover development costs upon Go-Live without a 12-month deferral.	Enhances immediate liquidity and reduces the long-term financial burden on the SDA's balance sheet.	As per RFP
310	8.12 Execution of Agreement & Annexure 4	72, 109	PBG of 5% valid for the entire contract period plus 6 months.	Kindly confirm that the PBG value will be step-down after the successful completion of Phase 1 (Development). We suggest reducing the PBG to 2% of the remaining contract value during the O&M phase.	Reduces bank limit utilization and the associated commission costs over a 3.5-year period.	As per RFP
311	8.37 Change Request Management	84-85	Change Request cost calculated per Man-Month Rates in the Financial Bid.	Please clarify if the Man-Month Rate is subject to an Annual Escalation (e.g., 5-10%) for the 2nd and 3rd years of the contract to account for inflation and professional salary increments.	Ensures that mid-term scope changes remain commercially viable over a multi-year engagement.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
312	3.3 Detailed SOW & Annexure 7	19, 115	GSDC provides infra for Production; SDA responsible for all other licenses/tools.	Kindly confirm that if the Authority requires a transition from Open Source to Commercial/Enterprise software post-award for security/compliance, the License & Subscription costs will be treated as a Pass-Through reimbursement.	Prevents the SDA from absorbing unquantified enterprise licensing costs not originally in scope.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.
313	5.4 Implementation of SLAs	56	Maximum penalty per milestone is 15%.	We understand the 15% cap. Kindly confirm that the Aggregate Liability for all penalties and Liquidated Damages across the entire contract duration is capped at 10% of the Total Contract Value.	Standardizes financial risk exposure and aligns with industry norms for IT service contracts.	Subject to the terms specified under Clause 8.17 of the RFP.
314	8.33 Terms of Payment & Annexure 7	83, 115	SDA initially incurs expenses for SMS/WhatsApp (WABA), reimbursed on actuals.	Please clarify the Reimbursement Cycle for these third-party costs. We suggest a monthly billing cycle with a 15-day payment TAT to prevent the SDA from carrying high-volume pre-paid out-of-pocket expenses.	High-volume SMS/WhatsApp usage can create significant cash-out pressure if reimbursements are quarterly.	As per RFP
315	8.14 Termination Clause (i)	74	Termination for Convenience with 30 days' prior written notice.	In the event of Termination for Convenience, kindly confirm that the Authority will pay a Demobilization Fee equivalent to 2 months of O&M costs to cover the SDA's unamortized setup and resource wind-down costs.	Protects the bidder from financial loss due to sudden, non-default contract termination.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
316	11 Evaluation of Financial Bids	101	Arithmetical errors rectified: unit price prevails; amount in words prevails.	Kindly confirm that if there is a discrepancy between the Online nProcure Total and the Physical Annexure 7, the Online submission will be treated as the final binding quote for evaluation.	Prevents disqualification due to clerical errors between digital and physical submission formats.	Online submission will be treated as the final binding quote for evaluation.
317	8.39.5 Enforcement & Withholding	88	Authority entitled to withhold pending payments during Exit Management.	Please clarify that Withholding will be limited only to the Final Milestone/Quarterly payment and will not apply to undisputed past invoices already certified for payment.	Ensures the SDA's right to receive payment for services already rendered and accepted.	As per RFP
318	4 Project Timelines (Milestone 9)	45	Quarterly O&M payments after necessary deductions towards penalties.	Kindly confirm the Interest Clause for delayed payments. We suggest that any undisputed invoice not paid within 45 days of submission shall attract interest at the SBI PLR rate.	Encourages timely payment processing and compensates the SDA for the Cost of Capital during delays.	As per RFP
319	8.13 Total Cost of Services	73	Payments shall not exceed the amount specified in the Commercial proposal.	Please clarify if the Lumpsum price for Part A includes a Contingency Buffer for unexpected Third-Party Integration Fees charged by other departments (if any) during the development phase.	Clarifies if integration access fees from other government entities are the SDA's liability.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
320	Annexure 7: Financial Proposal	116	O&M cost per annum must be within 10% to 20% of the Part A value.	We understand the 10-20% ratio requirement. Kindly confirm that if the Reverse Auction significantly reduces the Part A price, the Part B O&M price can be adjusted proportionally to maintain this required financial ratio.	Maintains the bid's responsiveness if the auction process creates an imbalance in the quoted ratios.	The Reverse Auction shall be applicable on the Financial Proposal Grand Total (Part-A + Part-B). During RA process, bidders has to maintain the ratio quoted in Annexure 7 of the RFP.
321	3.3.1 Project Planning & Governance	20	Bidder to establish coordination mechanisms with all stakeholders, including concerned departments and ULBs.	Kindly clarify the Apex Governance Structure. We understand the SDA reports to CMH-CU; however, will there be a Project Steering Committee (PSC) chaired by GAD (ARTD) with representation from integrated departments to resolve cross-departmental data/API bottlenecks?.	A high-level PSC is essential to mandate departmental cooperation, which the SDA cannot enforce independently.	Details will be provided to selected Bidder.
322	4.34 Obligations & 8.37 CRM	83-84	SDA to implement approved changes.	Please clarify the Change Control Board (CCB) workflow. We understand the SDA analyzes impact ; kindly confirm the expected turnaround time (TAT) for Authority approval and the Emergency Change protocol for critical security patches.	Defines a structured Change Governance process to prevent unauthorized scope creep or deployment delays.	Approval or rejection timelines shall be subject to the nature, complexity, and administrative review requirements of the Change Request

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
323	3.3.4.1 Dashboards & Analytics	27	Bidder to develop role-based dashboards for CM Office, departments, and CMH-CU.	Kindly confirm the Data Refresh Frequency (Real-time vs. Near Real-time) for the CM Dashboard. Furthermore, will the Authority provide a standardized reporting template for the Action Taken Reports (ATR) to ensure data uniformity across departments?.	Ensures the PMO can provide Single Source of Truth reporting to the CMO without manual data reconciliation.	Details will be provided to selected Bidder.
324	5.2.2 SLA Monitoring Tools	55	Bidder shall deploy automated tools to monitor and report SLA compliance.	Please clarify the SLA Validation Workflow. We understand the SDA provides the tool ; kindly confirm if the PMO will perform periodic audits of the underlying logs to validate the Automated Reports before quarterly penalty assessments.	Establishes a transparent Trust but Verify model for performance-linked payments.	Details will be provided to selected Bidder.
325	5.1 (e) Helpdesk Support	53	Helpdesk operational from 09:00 AM to 09:00 PM for user assistance.	Kindly confirm the Governance Tool for internal SDA-to-Authority communication. Will the Authority utilize the SDA's Project Management Information System (PMIS) for tracking Incidents and Issues to ensure a centralized audit trail?.	Centralizing all issue tracking in one PMIS prevents hidden delays and fragmented email communication.	Details will be provided to selected Bidder.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
326	4 Project Timelines & Milestones	45-46	SDA to submit Quarterly Progress Reports (QPR) during O&M.	Please clarify the Review Meeting Cadence. We understand QPR submission ; kindly confirm if the PMO expects Weekly Status Meetings during Development and Monthly Performance Reviews during O&M to track SLA trends.	Regular review cycles are standard PMO practice to identify and mitigate risks before they impact milestones.	Details will be provided to selected Bidder.
327	4.2 System Integration	48	SDA to transfer ownership and licenses in the name of CMH-CU.	Kindly clarify the Documentation Repository requirements. Does the PMO require all project artifacts (SRS, Code, UAT Sign-offs) to be maintained in a Digital Asset Management system accessible to the Authority \$24\times7\$?.	Crucial for Audit Readiness and ensuring smooth Exit Management at the end of the term.	Yes
328	8.19 Right of Monitoring & Audit	77	CMH-CU may conduct periodic technical, financial, or process audits.	Please clarify the Audit Protocol. Will the Authority engage a Third-Party Auditor (TPA)? If so, kindly confirm the SDA's obligation regarding Artifact Provisioning and the TAT for rectifying Non-Conformance (NC) reports.	Defines the scope of external oversight and the SDA's responsibility in the audit lifecycle.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
329	5.8 Show Cause Notice	57-58	CMH-CU may issue a Show Cause Notice for material or repeated SLA breaches.	Kindly clarify the Escalation Hierarchy. Before a formal Show Cause, is there a PMO-level Cure Notice period where the SDA can present a Service Improvement Plan (SIP) to the Technical Committee?.	Provides a structured Governance Gate to resolve issues before they escalate to contractual defaults.	As per RFP
330	8.29 Data Rights	80	GoG reserves the right to information and to prevent processing.	Please clarify the Data Governance Framework. Will the SDA be part of a Data Privacy Committee to ensure that all 30+ departmental data flows comply with the DPDP Act 2023 and Gujarat State Data Policy?.	Ensures the SDA is integrated into the client's compliance and risk management framework.	As per RFP
331	4.1 User Acceptance Testing	47	UAT plan includes test scenarios, formats, and acceptance criteria.	Kindly confirm the Sign-off Authority for each module. Will the PMO consolidate sign-offs from individual Departmental Heads, or will CMH-CU be the sole authorizing entity for all 30+ integrations?.	Multi-departmental sign-off is a high delivery risk; a single point of authority at CMH-CU is preferred.	Details will be provided to selected Bidder.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
332	3.3.11.2 Functional Scope	36	Analytics and reporting dashboards with export capabilities.	Please clarify the MIS Access Level. Will the SDA provide Read-Only direct DB access to the Authority's internal PMO team for ad-hoc Statistical Modelling and What-If analysis?.	Empowers the client PMO to perform independent analysis without relying solely on SDA reports.	RFP is self explanatory
333	8.39.2 Exit Management Plan	87	Plan covers transition, handover, and measure to ensure uninterrupted service.	Kindly confirm the Handover Governance. Does the PMO require a Shadow Period where the outgoing SDA and incoming agency operate the system in parallel for 30 days before Final Exit?.	Standard PMO procedure to ensure zero service disruption during vendor transition.	As per RFP
334	3.3.12 Team Deployment	39	Profiles and detailed CVs of all proposed resources to be submitted for review.	Please clarify the Resource Monitoring protocol. Will the SDA maintain an On-site Biometric/Attendance Log that is shared with the PMO weekly to validate the Availability of Manpower SLA?.	Directly links PMO monitoring to SLA-based penalty calculations for resource non-deployment.	Details will be provided to selected Bidder.
335	5.2.1 Availability Measurement	55	Availability calculated as average across all system components.	Kindly clarify the Service Continuity Governance. In the event of a GSDC infrastructure failure, what is the PMO reporting protocol to document the outage as Excludable from SDA penalties?.	Ensures clear documentation of infrastructure vs. application issues for accurate SLA reporting.	Delays due to GSDC dependencies shall be considered accordingly and shall not attract penalties on the bidder.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
336	10 Technical Evaluation (Point 8)	98	Technical presentation - Capabilities, Approach and Methodology... 40 Marks.	We understand the significant weightage (40%) given to the Technical Presentation. Kindly confirm if the Authority will provide a specific Case Study or Problem Statement 48 hours prior to the presentation to evaluate the bidders' real-time solutioning capabilities and AI-driven innovation beyond standard RFP responses.	High-quality bidders can differentiate through real-time expertise, effectively sidelining paper-only competitors who lack deep technical depth.	Sufficient time will be provided to eligible bidders for the Technical Presentation.
337	3.3.6 AI, LLM, OCR & 10 Technical Evaluation	33, 99	Selected Bidder shall integrate advanced AI, LLM... AI-driven auto-classification demo.	Please clarify the weightage of Innovation & Future Roadmap within the 40 marks for the presentation. We understand the core scope; however, will the Authority favor a solution that offers Predictive Governance (Proactive Grievance Redressal) over a traditional reactive ticketing system?	Allows us to position our advanced LLM and Predictive Analytics as a primary Win Theme rather than just a functional requirement.	As per RFP
338	10 Technical Evaluation (Points 2, 3, & 4)	93-96	Evaluation based on project count and user base (5 lakh to 25 lakh+).	We understand the tiered marking for experience. To ensure the selection of a robust partner, kindly confirm if the Authority will award additional Quality of Experience points for projects that have achieved national-level recognition (e.g., Digital India Awards) or have integrated with central systems like CPGRAMS.	Elevates our positioning by rewarding Excellence and Impact rather than just Quantity of past contracts.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
339	7.3 Evaluation process & 11 Evaluation of Financial Bids	65-66, 101	Contract awarded to the L1 bidder among the technically qualified bidders.	We understand the LCS model; however, given the complexity of IGSMs, kindly confirm if the Authority will consider a Quality and Cost Based Selection (QCBS) approach or a Technical-Financial Tie-Breaker rule where, if financial bids are within a 3-5% range, the higher technical scorer is preferred.	Subtly pushes the client to value technical superiority and reduces the risk of losing the deal to a marginally lower-priced, low-quality bidder.	As per RFP
340	3.3.11.2 WhatsApp-Based Chatbot & WABA	36-37	WABA integration... Automated notifications and acknowledgements via WhatsApp.	Kindly confirm if the Authority values a Unified Omni-channel Citizen Profile that provides a seamless journey across Web, App, and WhatsApp. We understand the integration requirement; would the Authority favor a solution that maintains stateful conversations across these channels to reduce citizen effort?	Positions our Omni-channel Architecture as a superior UX advantage that prevents the system from becoming a set of disconnected silos.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.
341	3.3 Detailed Scope & 3.3.3 System Architecture	17, 21	Modular, microservices-based architecture to be hosted on GSDC infrastructure.	We understand the requirement for a microservices architecture. Kindly clarify if the GSDC Container Orchestration Platform (VMware Tanzu) supports Horizontal Pod Autoscaling (HPA) based on real-time CPU/RAM metrics to handle the 2x surge conditions (emergency/policy launches) mentioned.	Essential for ensuring the system doesn't crash during surge loads.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
342	3.3 (Table Item 2 & 6) Load Balancer & Governance	19	GSDC provides physical Load Balancer; SDA manages software-level load balancing.	Please clarify the integration between the GSDC Physical LB and the SDA's Software LB (e.g., Nginx/HAProxy). Kindly confirm if SSL Termination will happen at the physical layer or if the SDA must manage End-to-End Encryption (\$mTLS\$) across the Service Mesh.	Defines the security perimeter and computational overhead for the Web/App servers.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.
343	5.1 (b) Scheduled Operation Time	53	Critical infrastructure (DC/DRC) shall operate on a \$24\text{ }\times\text{ }7\text{ }\times\text{ }365\$ basis.	We understand the \$24\text{ }\times\text{ }7\$ requirement. Kindly clarify the Disaster Recovery (DR) Architecture. Is the SDA expected to configure an Active-Passive or Active-Active setup between the Primary DC and the DR site to meet the 15-minute failover SLA mentioned in Section 4.1?.	Directly impacts the Availability calculation and RTO/RPO compliance.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.
344	3.3 (Table Item 1 & 5) Staging/Prod & Database	19	GSDC provides hardware for Prod only; SDA manages non-prod environments.	We understand GSDC provides Prod infra. Kindly confirm if the Staging environment must be an exact performance replica of Production for valid Load/Stress testing. If so, will GSDC provide this, or must the SDA factor in private cloud costs for the Staging replica?.	Ensuring testing validity requires high-cost infrastructure often overlooked in SDA-managed non-prod clauses.	As per RFP clause 5.9

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
345	3.3.9 Cloud Hosting & 4.3 Software LB	34, 47	If directed, SDA shall host on cloud as per DST Gujarat guidelines.	Please clarify the trigger for Cloud Adoption. If the 19,000 concurrent users exceed GSDC's capacity, will the Authority support a Hybrid-Cloud model, and who will bear the egress/ingress data transfer costs between GSDC and the Public Cloud?.	Network latency and data transfer costs are major financial risks in hybrid setups.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.
346	3.3 (Table Item 4 & 6) Platform & Governance Services	19	GSDC provides infra platform; SDA handles configuration/management.	Kindly clarify the Observability Stack. Does GSDC provide enterprise licenses for APM (Application Performance Monitoring) and Distributed Tracing (e.g., Dynatrace/New Relic), or must the SDA implement open-source alternatives like Prometheus/Grafana?.	Critical for meeting the 3-second page load time and identifying microservice bottlenecks.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.
347	3.3 (Table Item 8) Centralized Logging	20	GSDC provides storage; SDA responsible for sizing/retention.	We understand the SDA provides sizing. Kindly confirm the Log Retention Policy for audit compliance. Does the SDA need to provide a Log Aggregator (e.g., ELK Stack) to handle the log volume of 100,000 transactions/day?.	High-volume logging requires significant compute/IOPs, impacting system performance.	Details will be provided to selected Bidder.
348	3.3.3 System Architecture (5)	21	Include database design ensuring performance and scalability.	Regarding the Database Layer, kindly clarify if the GSDC-provided VMs support SSD/NVMe storage. Also, will GSDC provide Database-as-a-Service (DBaaS) with auto-failover, or is the SDA responsible for configuring DB Clusters/Always-On?.	The DB is usually the primary bottleneck for concurrent user scaling.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
349	3.3.11.2 WhatsApp Notification Broadcast	37	High-availability broadcast platform integrated with grievance systems.	Please clarify the Network Bandwidth allocation for WABA/API integrations. Will there be a dedicated Leased Line/MPLS between GSDC and the WABA provider to ensure the Instant Acknowledgement objective is met?.	Public internet latency can break Real-time notification SLAs.	Details will be provided to selected Bidder.
350	3.3.6 AI & LLM Components	33	All AI and LLM components shall be hosted on GSDC or approved cloud.	We understand the hosting requirement. Kindly confirm if GSDC provides GPU-enabled VMs (e.g., NVIDIA A100/H100) for LLM inference and OCR processing. If not, is the SDA permitted to use API-based AI services from MeitY-empanelled cloud providers?.	LLM/OCR performance is highly dependent on specialized hardware not standard in all DCs.	As per corrigendum 2
351	3.3 (Table Item 7) Cloud Backup	19	GSDC performs infra-level backups as per their standard policy.	Kindly clarify if GSDC's policy includes Point-in-Time Recovery (PITR) for the Database. If the SDA requires a custom backup frequency (e.g., every 15 mins) to meet RPO, will GSDC provide the Object Storage/Vault capacity?.	Standard infra backups often don't meet the granular recovery needs of transactional grievance systems.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.
352	4.1 User Acceptance Testing (viii)	48	Average response time not exceeding 3 seconds for critical transactions.	Please confirm if this 3-second benchmark includes network latency over GSWAN/Internet. We suggest the SLA be measured at the GSDC Edge Gateway to exclude ISP/Client-side network fluctuations.	Network jitter outside the DC is beyond the SDA's control but can impact perceived performance.	Delays due to GSDC dependencies shall be considered accordingly and shall not attract penalties on the bidder.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
353	3.3 Detailed Scope & 3.3.3 Architecture	17, 21	Modular, microservices-based architecture to be hosted on GSDC infrastructure.	We understand the microservices requirement. Kindly clarify if the GSDC Container Platform (e.g., VMware Tanzu) supports Horizontal Pod Autoscaling (HPA) and if the SDA will have Cluster Admin rights to configure auto-scaling triggers for the 100k+ daily transactions.	Critical for ensuring the infra can scale dynamically during peak grievance windows without manual tickets to GSDC.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.
354	5.1 (b) Availability & 4.1 (viii) UAT	53, 48	24x7 operation with a 15-minute failover/recovery time and 3s response time.	Kindly clarify the Disaster Recovery (DR) link speed and sync mechanism. To meet the 15-minute RTO and 3s response time, will GSDC provide an Active-Active setup across sites, and is the Global Load Balancer configured to handle automated failover without DNS propagation delays?	The 15-minute failover is aggressive; it requires specific infra-level automation that the SDA must coordinate with GSDC.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.
355	3.3 (Table Item 1, 4, & 6) Environments	19	GSDC provides hardware for Prod; SDA manages non-prod environments.	Please confirm if the Staging environment provided will be a 1:1 performance replica of Production. If not, kindly clarify how the SDA is expected to certify the 3-second response time and Load Testing benchmarks (19k concurrent users) prior to the Production Go-Live.	Performance testing on under-powered non-prod infra leads to Go-Live surprises and SLA penalties.	As per RFP clause 5.9

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
356	3.3.6 AI/LLM & 11 Evaluation	33, 102	AI and LLM components shall be hosted on GSDC or approved cloud.	We understand the hosting mandate. Kindly clarify if GSDC provides GPU-enabled Compute instances (e.g., NVIDIA A100/H100). If not, will the Authority facilitate a Public Cloud VPC for AI-inference, and who will bear the Data Egress costs between GSDC and the Cloud provider?	LLM performance on standard CPUs is significantly degraded; GPU availability is a major cost and performance driver.	As per corrigendum 2
357	3.3 (Table Item 7 & 8) Backup & Logs	19, 20	GSDC performs infra-level backups; SDA responsible for sizing and log retention.	Kindly clarify the IOPS (Input/Output Operations per Second) limits for the storage provided. Given the logging requirements for 30+ integrations, will the SDA be provided with a High-Performance Tier (SSD/NVMe) for the Database and Centralized Logging (ELK) stack?	High-volume logging and AI-processing can bottleneck standard HDD storage, causing application-level latency.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.
358	3.3.4.1 Core Components & 3.3.4.2	22-31	Integration with 30+ major online service delivery platforms and SWAGAT.	[Integration & Workflow] We understand the SDA must integrate with 30+ disparate systems. Kindly clarify the Integration Pattern: Is the SDA expected to build a Centralized ESB/API Gateway to pull data, or will the departments push data to IGSMS? Additionally, confirm if the Assisted Grievance workflow requires Two-Way Synchronization (status updates mirrored back to source systems) or a read-only aggregation.	Defines whether the architecture is an Aggregator (Passive) or an Orchestrator (Active), impacting the API Gateway design.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
359	3.3.3 System Architecture	21	Modular, microservices-based architecture... ensuring performance and scalability.	[Multi-Tenancy & Data Isolation] Given that multiple departments will use the IGSMS, kindly confirm if the architecture should be SaaS-style Multi-tenant (shared DB with logical isolation) or Isolated Tenancy (separate DB schemas/instances per department). How will the master Citizen Profile be governed across these tenants to prevent record duplication?	Impactful for DB scaling and data privacy (DPDP Act) compliance across government departments.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.
360	3.3.6 AI, LLM, OCR & Automation	33	Integration of advanced AI/LLM for auto-classification and sentiment analysis.	[AI & Data Engineering] Regarding AI/LLM: Is the SDA expected to host and fine-tune Local/Open-Source LLMs (e.g., Llama/Mistral) within GSDC, or is the use of Cloud-based Wrapper APIs (e.g., Azure/AWS AI) permitted? Also, clarify the Training Data source—will the Authority provide historical, labeled grievance data for model Grounding and Fine-tuning?	LLM deployment strategy (On-prem vs Cloud API) significantly changes the Infra and Security architecture.	As per corrigendum 2
361	3.3.11.2 WhatsApp & Multi-channel	36-37	High availability broadcast platform and chatbot integration.	[Omni-channel Session Management] We understand the requirement for Web, App, and WhatsApp channels. Kindly confirm if the architecture must support Cross-Channel Session Persistence (e.g., a grievance started on WhatsApp can be completed on the Web Portal without data loss). How will the Unified Notification Engine handle priority queuing for 18,000+ concurrent users?	Essential for the design of the Message Broker (Kafka/RabbitMQ) and Session Cache (Redis) layers.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
362	3.3.3 (5) Database Design	21	Database design ensuring performance, scalability, and security.	[Data Architecture & Analytics] Please clarify the requirement for Historical Data Migration. Is the SDA responsible for migrating legacy data from the current CM-Helpline/SWAGAT systems? If yes, provide the estimated volume and format (SQL/NoSQL/Files) to determine the ETL (Extract-Transform-Load) architecture and storage tiering.	Migration architecture often requires a separate Staging environment and custom scripts that impact the Go-Live timeline.	No data migration will be required as of now.
363	3.3.4.1 Dashboards & Analytics	27	Development of role-based dashboards for various stakeholders.	[Reporting Architecture] Will the reporting engine perform Real-time OLAP (Direct query on Prod DB) or will there be a dedicated Data Warehouse/Read-Replica to ensure that complex analytical queries by the CM Office do not degrade the performance of the grievance entry modules?	Prevents performance bottlenecks in high-concurrency environments.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.
364	3.3.11.1 Key Functionalities	35	Authentication through Mobile/OTP, Email, and integration with SSO.	[Identity & Access Management] Kindly clarify the SSO (Single Sign-On) standards. Does the state have a centralized Identity Provider (IdP) like Jan Parichay or DigiLocker that IGSMs must integrate with using OAuth2/SAML, or must the SDA design a custom Identity Management system for all 18,000 users?	IAM is the core of security architecture; knowing the Source of Truth for identities is critical.	A State-approved SSO shall be provided. However, if required, the selected bidder may also develop and implement an custom Identity Management system solution in compliance with the RFP requirements and applicable standards.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
365	3.3.10 Operations & Maintenance	35	SDA responsible for API enhancements, replacements, and future systems.	[Extensibility Architecture] We understand future systems will be added. Is the system required to provide a Developer Portal with Public APIs for other third-party Gov-Tech applications to consume IGSMS services? If so, what are the rate-limiting and Throttling requirements?	Impacts the External API Gateway design and security Sandbox requirements.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.
366	4.3 Software Load Balancer	48	SDA to manage software-level load balancing (SLB).	[High Availability Architecture] Kindly clarify the interaction between the GSDC Physical LB and the SDA's SLB. Will the SDA be responsible for Global Server Load Balancing (GSLB) to manage traffic between the Primary DC and the DR Site, or is this managed at the GSDC Network layer?	Determines the design of the Failover and Health-Check logic.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.
367	3.3.5 Monitoring and Observability	32	Centralized logging, monitoring, and audit trails.	[Observability Architecture] Does the SDA need to implement a Distributed Tracing solution (e.g., Jaeger/Zipkin) to monitor grievance status across the 30+ integrated departmental APIs, or is logging restricted to the internal IGSMS microservices?	Essential for troubleshooting failed integrations in a complex, multi-system environment.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.
368	3.3.7 Capacity Building	33	Content creation in Gujarati and English.	[Internationalization (i18n) Architecture] Beyond content, must the Database Schema and Application UI support native Gujarati storage (UTF-8/Unicode) for search, sorting, and AI-based sentiment analysis, or is the System Language primarily English with a translation layer for the UI?	Impacts the database collation settings and the AI/NLP model requirements.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
369	8.32 NDA & 8.30 IPR	81-83	Protection of data and IP rights of the Authority.	[Data Security Architecture] Kindly confirm if Field Level Encryption is required for PII (Personally Identifiable Information) like Aadhaar/Mobile numbers at rest. Also, clarify the Data Residency requirement—must all AI-model training data remain within the GSDC physical boundaries?	Directly affects the Database performance overhead and the selection of AI/ML infrastructure.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.
370	3.3.11.2 Call Center Interface	36	Assisted grievance entry channel for Call Center Executives (CCE).	[Integration with CTI/IVR] Does the IGSMS interface need to integrate with a Computer Telephony Integration (CTI) pop-up? Specifically, should the grievance form Auto-populate citizen details based on the incoming Caller ID (CLI) from the call center's EPABX system?	Impacts the Frontend Architecture and requires coordination with the call center hardware provider.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.
371	3.3.4.1 (6) Dynamic Form Builder	22	Ability to create and modify forms for various grievance types.	[Metadata-Driven Architecture] Regarding the Dynamic Form Builder: Should the system support Versioned Forms (allowing old grievances to stay on old form versions) and Conditional Logic (fields appearing based on previous answers)?	Requires a JSON-based metadata engine rather than a fixed relational schema for grievance data.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
372	5.2.2 SLA Monitoring Tools	55	Automated tools for SLA reporting and compliance.	[Rules Engine Architecture] To handle complex escalation SLAs (e.g., 24h, 48h, 7 days per department), will the SDA be allowed to use an Open Source Rules Engine (e.g., Drools) or a BPMN 2.0 Engine (e.g., Camunda) to manage the workflow logic dynamically?	Using a BPMN engine provides the flexibility required to change departmental workflows without code deployments.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.
373	4.2 System Integration	48	Testing with all integrated departmental systems.	[Sandbox Architecture] Will the Authority provide UAT/Sandbox API Endpoints for all 30 departments? If a department lacks a test environment, how will the SDA perform Integrated Load Testing without impacting the live departmental production systems?	A lack of departmental Test APIs is a major risk for architectural validation.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.
374	3.3.10 Operations and Maintenance	35	SDA responsible for Day-to-Day Operations & Maintenance for 2 years.	[Support Tiering] Kindly clarify the L1/L2/L3 support hierarchy. We understand the SDA provides technical support; however, will the Authority's existing Helpdesk handle L1 (Basic Reset/General Info), while the SDA is responsible for L2 (Application Issues) and L3 (Code/Database Bug Fixes)?	Prevents the SDA's technical team from being overwhelmed by non-technical password reset queries.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
375	3.3.12 Team Deployment	39	Deployment at client site... maintenance of all project components.	[Access & Admin Rights] Please clarify the Administrative Access Levels provided at GSDC. Will the SDA's IT Ops team have Sudo/Root access to the Application/Web servers and DBA access to the Database for performance tuning and log rotation, or must all changes be routed through GSDC tickets?	Indirectly impacts the SDA's ability to meet the 15-minute recovery and uptime SLAs.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.
376	5.1 (b) Availability & 5.2.2 Monitoring	53, 55	\$24\times7\times365\$ operation; SDA to deploy automated monitoring tools.	[Incident Management] Kindly confirm if the SDA's monitoring tools (e.g., Zabbix, Nagios) must integrate with a Centralized ITSM Tool (like ServiceNow/Jira Service Management) for automated ticket creation. Also, clarify the Escalation Matrix for infrastructure-level incidents occurring outside of business hours.	Ensures a seamless flow from Alert to Resolution without manual email-based delays.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.
377	3.3.5 Monitoring and Observability	32	SDA responsible for sizing, log retention, and system health.	[Patch & Vulnerability Management] Please clarify the Patching Window policy. We understand the SDA must keep software updated; kindly confirm that Critical Security Patches (OS/Middleware) can be applied during a pre-approved weekly maintenance window without incurring Scheduled Downtime penalties.	Essential for maintaining security posture without jeopardizing SLA-linked uptime credits.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
378	3.3.11.1 Key Functionalities (vii)	36	System Audit Trails and activity logs for all users.	[Log Management & Archival] Regarding the high volume of audit logs: Kindly clarify the Online vs. Offline retention period. We suggest 6 months of Hot searchable logs on-site and 2 years of Cold logs archived on GSDC-provided tape/cloud storage.	Managing petabytes of logs on primary storage is cost-prohibitive and degrades system performance.	As per RFP
379	3.3 Detailed Scope (Table Item 7)	19	GSDC provides backup hardware; SDA responsible for scheduling.	[Backup & Restore Drill] Kindly clarify the Restore Verification frequency. We understand SDA schedules backups; however, will the Authority provide a Restore Sandbox to perform quarterly Mock Drills to ensure data integrity as per the Disaster Recovery policy?	A backup is only as good as its last successful restore; drills are vital for high-availability systems.	As per RFP
380	3.3.12 Team Deployment	38	SN 11: Technical Infrastructure Manager (On-site).	[Environment Synchronization] Please clarify the process for Code Promotion across environments. Does the Authority require a strictly automated CI/CD pipeline (Jenkins/GitLab) for moving code from Dev $\rightarrow$ UAT $\rightarrow$ Prod, or will manual deployment be allowed following CAB (Change Advisory Board) approval?	Defines the level of automation and the specific DevOps skill set required in the Ops team.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
381	5.2.1 Availability Measurement	55	Availability = (Total Scheduled - Outage) / Total Scheduled.	[Exclusion Criteria] Kindly confirm that the Total Outage Time for SLA calculations will exclude failures caused by GSWAN (State Network) connectivity, GSDC hardware failure, or third-party API (SMS/WhatsApp) gateway downtime.	Protects the SDA from penalties caused by External Dependency failures beyond their control.	Delays due to GSDC dependencies shall be considered accordingly and shall not attract penalties on the bidder.
382	2.1 Vision Statement & 3.1 Objectives	13	To provide a single window for citizens... integrated system for grievance redressal.	We understand the primary goal is integration. Beyond reactive redressal, does the Authority envision IGSMS evolving into a Predictive Governance Tool that identifies Grievance Hotspots using geospatial AI to suggest policy interventions before citizens even register a complaint?	Positions the bidder as a strategic partner capable of delivering Proactive rather than just Reactive governance.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.
383	3.3.6 AI, LLM, OCR & Automation	33	Selected Bidder shall integrate advanced AI, LLM... for auto-classification and sentiment analysis.	While the RFP specifies auto-classification, kindly share if the Authority is open to exploring Generative AI for Draft Resolution Suggestions for government officers, aimed at reducing the manual burden of drafting responses and ensuring consistency in government communication?	Explores the client's appetite for Internal Efficiency innovation (G2G) alongside citizen-facing AI (G2C).	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
384	3.3.4.1 (10) Dashboards & Analytics	27	Development of role-based dashboards... for various stakeholders.	Beyond standard KPIs, does the Authority see a value-add in incorporating Citizen Sentiment Trend Analysis that correlates social media signals with formal grievances to provide a 360-degree view of public perception on specific government schemes?	Opens the door for Social Listening and Advanced Analytics as a premium value-add for the CM Office.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.
385	3.3.11.2 Multi-channel & WhatsApp	36	Functional scope for WhatsApp-based Chatbot... automated notifications.	We understand the chatbot is for entry/tracking. Kindly share if the vision includes Voice-AI (Voice-to-Grievance) capabilities in Gujarati dialects, allowing the elderly or semi-literate populations to file grievances via a simple phone call or voice note?	Highlights a focus on Inclusivity and Digital Divide reduction through advanced Natural Language Processing (NLP).	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.
386	3.3.7 Capacity Building	33	Preparation of training and enablement materials... user manuals.	Regarding long-term platform adoption, is the Authority open to integrating In-App Nudge Engines or Gamification elements for government officials to incentivize faster resolution times and reward high-performing departments through a digital Leaderboard?	Shifts the focus from Technical Training to Behavioral Change Management within the bureaucracy.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
387	4.2 System Integration	48	Testing with all integrated departmental systems.	As the IGSMS becomes the state's central data hub, does the Authority plan to open a Data-as-a-Service (DaaS) layer for academic researchers or policy think-tanks to perform anonymized trend analysis, fostering a Data-Driven Policy ecosystem in Gujarat?	Reveals the long-term vision for Open Data and positions the system as a foundational asset for the state's digital economy.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.
388	3.3 Detailed Scope (Table Item 1, 4 & 5)	19	GSDC provides hardware; SDA responsible for all other licenses, tools, and DB.	[Sourcing & GeM Compliance] We understand the SDA is responsible for procurement of licenses/tools. Kindly confirm if these must be procured specifically through GeM (Government e-Marketplace) or if the SDA can utilize its existing global enterprise agreements with OEMs (e.g., Microsoft, Oracle, MongoDB) to pass on volume-discount benefits to the Authority.	Ensures compliance with state procurement policies while optimizing for cost-efficiency.	As per RFP
389	3.3.6 AI, LLM & Analytics	33	Integration of advanced AI/LLM for auto-classification and sentiment analysis.	[AI Model Sourcing & Licensing] Regarding AI/LLM components: Kindly clarify if the SDA is responsible for the procurement and perpetual licensing of commercial LLM tokens/models, or if the Authority prefers the use of Open-Source models to avoid long-term third-party vendor lock-in and recurring subscription costs.	LLM licensing models (per-token vs. per-instance) are a major procurement lead-time and cost driver.	As per corrigendum 2

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
390	3.3.11.2 WhatsApp Notification	37	High availability broadcast platform for WhatsApp/SMS integration.	[Service Provider Onboarding] Kindly clarify the procurement of WhatsApp Business API (WABA) and SMS Gateway services. Will the SDA be required to onboard a specific State-Empanelled vendor, or can the SDA propose a global Tier-1 provider to ensure the 99.9% uptime SLA?	Onboarding new telecom/API vendors in government setups can take 4–6 weeks; early clarity prevents \$T1\$ delays.	The selected bidder shall procure and onboard SMS and WhatsApp Business API services in compliance with the RFP and applicable guidelines, subject to approval by the Authority.
391	4.2 System Integration & Commissioning	48	SDA to transfer all ownership and licenses in the name of CMH-CU.	[License Transfer & Logistics] Please clarify the process for License Handover. We understand licenses must be in the Authority's name; kindly confirm if the SDA is responsible for the Administrative Transfer of these digital assets and keys at the time of Go-Live, and if any physical media delivery is required for the Offline Audit Trail.	Defines the Transfer of Title for digital assets, which is a key procurement milestone for final payment.	The SDA shall transfer all ownership and licenses in the name of CMH-CU and complete the required handover at Go-Live, as per the RFP.
392	3.3.4.1 (6) Dynamic Form Builder	22	Provision for dynamic form builder for various grievance types.	[Third-Party Component Approval] If the SDA utilizes third-party commercial Low-Code/No-Code components to meet the Dynamic Form Builder requirement, kindly clarify the Approval Workflow. Does the Authority require OEM Back-to-Back Support (24x7) for these sub-components for the entire O&M period?	Ensures the supply chain for sub-components is robust and meets the long-term O&M support standards.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
393	8.32 Non-Disclosure Agreement	83	Bidder shall sign NDA; SDA responsible for third-party compliance.	[Sub-Vendor Compliance] We understand the SDA is liable for data security. Kindly confirm if the SDA must ensure all third-party SaaS/Software OEMs sign a Back-to-Back NDA with the Authority, or if the SDA's primary NDA covers all sub-vendors in the supply chain.	Clarifies the legal procurement burden when integrating proprietary third-party AI or Security tools.	As per RFP
394	8.37 Change Request Management	84	Quoted man-month rate shall be used for cost estimation of changes.	[Additional License Sourcing] In the event of a Change Request (CR) that requires additional third-party software licenses not in the original bid, kindly confirm the Procurement Markup policy. Will the Authority allow a Cost + Management Fee model for such pass-through procurements?	Prevents the SDA from bearing the financial risk of unquantified future software price hikes.	As per RFP
395	4 Project Timelines & Milestones	45	All software components must be delivered and installed as per \$T1\$ to \$T4\$.	[Lead-Time & Inventory Risk] Given the global lead times for specialized enterprise software and security certificates (SSL/HSM), kindly confirm if the Authority will provide Expedited Approval for the Bill of Materials (BoM) within 7 days of the Lol to ensure timely procurement and installation.	High-security components like HSM or SSL often have 3–4 week lead times that can stall the entire \$T2\$ development track.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
396	3.3.4.1 (1) & 3.3.4.2 Integration	22, 30	Integration with 30+ major online service delivery platforms... and future consolidation of SWAGAT.	We understand the requirement for extensive integration. Kindly confirm if the SDA is responsible only for Application-level integration (APIs), or if the scope includes Database-level migration and code-refactoring of legacy systems like SWAGAT into the new IGSMS microservices architecture.	Risk Neutralization: Distinguishes between simple connectivity and high-effort re-engineering, preventing a massive hidden effort driver.	Scope as per RFP and Data migration is not required
397	3.3.12 Team Deployment & 10 Tech Eval	36, 98	Number and type of resources decided by SDA... Technical presentation (40 marks).	Regarding resource flexibility: Kindly confirm that the Minimum Manpower listed in Annexure 16 is a baseline for the Development Phase only. Will the Authority allow the SDA to propose a Performance-Linked O&M Team size that scales based on actual ticket volumes rather than fixed headcount?	Competitive Positioning: Allows us to bid a more cost-effective, SLA-driven O&M model compared to competitors who may over-quote fixed staff.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
398	5.4 SLA & 5.11 Penalties	56, 61	Maximum penalty per milestone is 15%... Total penalty capped at 10% of contract value.	We understand the penalty framework. Kindly confirm if there is a Grace Period for the first 90 days of Go-Live (Stabilization Phase) where SLA penalties are suspended or capped at a lower rate to allow for fine-tuning of AI models and cross-departmental API performance.	Execution Feasibility: Protects against early-stage penalties caused by unoptimized departmental APIs or AI learning curves.	As per RFP
399	3.3.6 AI & LLM Components	33	SDA shall integrate advanced AI, LLM for auto-classification... hosted on GSDC/Approved Cloud.	Please clarify the Data Sovereignty vs. Innovation trade-off. If GSDC lacks GPU hardware, will the Authority approve the use of MeitY-empanelled Public Cloud AI Services (SaaS) for inference, provided no PII (Personally Identifiable Information) leaves the state's secure environment?	Strategy: Determines if the solution must be On-Prem AI (High Capex/Complexity) or Cloud-API (High Innovation/Speed), significantly impacting the price.	As per corrigendum 2

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
400	8.37 Change Request Management	84	Quoted man-month rate shall be used for cost estimation... any change in scope.	Given the Integrated nature of the system, kindly confirm that any Mandatory Integration with a new departmental system not listed in Table 1 (Page 31) will be treated as a formal Change Request, regardless of whether it uses standard APIs or requires custom middleware.	Profitability Protection: Prevents Scope Creep where the client might expect an unlimited number of new integrations under the original O&M price.	As per RFP
401	8.35 Limitation of Liability	83	The aggregate liability of the Bidder shall not exceed the contract value.	We understand the liability is capped at the contract value. Kindly confirm that this cap includes all liquidated damages, penalties, and third-party claims, and that Indirect, Consequential, or Special Damages (such as loss of profit or data) are expressly excluded from the Bidder's liability.	Standardizes risk by ensuring the Bidder is not liable for speculative or indirect losses beyond the project's direct value.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
402	8.30 Intellectual Property Rights (IPR)	81	All intellectual property rights... shall remain the property of the TENDERER.	Please clarify that while the Custom Code developed for IGSMIS belongs to the Authority, the SDA retains ownership of its Background IP (pre-existing frameworks, proprietary algorithms, and tools). We understand the SDA will grant a non-exclusive, perpetual, royalty-free license to the Authority for the use of such Background IP.	Protects the bidder's core assets and reusable technology stack from being appropriated under a work-for-hire interpretation.	As per RFP
403	5.11 Liquidated Damages (LD) & 5.4 SLA	61, 56	Maximum penalty per milestone is 15%... Total penalty capped at 10% of contract value.	There appears to be an inconsistency between milestone-specific caps (15%) and the overall contract cap (10%). Kindly confirm that the total cumulative liability for all Liquidated Damages and SLA penalties combined shall not exceed 10% of the Total Contract Value.	Resolves mathematical ambiguity in the penalty framework to ensure a predictable at-risk amount for the bidder.	Subject to the terms specified under Clause 8.17 of the RFP.
404	8.14 Termination & 8.39 Exit Management	74, 87	The Authority may terminate the contract for convenience by giving 30 days' notice.	In the event of Termination for Convenience by the Authority, kindly confirm that the SDA shall be entitled to payment for all work performed up to the termination date, including a pro-rata share of the current milestone and all non-cancelable third-party license costs incurred.	Protects the bidder from financial loss and unpaid effort in scenarios where the termination is not due to a bidder default.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
405	8.31 Indemnification	81-82	Bidder shall indemnify the Authority against all third-party claims... including IPR infringement.	We understand the indemnity obligations. Kindly confirm that the SDA's duty to indemnify for IPR infringement is contingent upon the Authority providing prompt written notice of a claim and allowing the SDA sole control over the defense and settlement of such litigation.	Standard legal protection ensuring the bidder can manage the legal defense of a claim they are expected to pay for.	As per RFP
406	8.34 Force Majeure	83	Neither party shall be liable for any delay... resulting from Force Majeure.	Please clarify the definition of Force Majeure to expressly include Pandemics, Cyber-terrorism, or prolonged failure of public infrastructure/internet which are beyond the SDA's control. Also, confirm that the SDA is entitled to a Time Extension for milestones affected by such events without penalty.	Updates the clause to reflect modern operational risks that could technically halt a cloud-based digital project.	As per RFP
407	8.20 Dispute Resolution & 12 Jurisdiction	77, 102	Disputes shall be settled through mutual consultation... subject to Gandhinagar jurisdiction.	Regarding the Dispute Resolution Mechanism: If mutual consultation fails, kindly confirm that the parties will refer the matter to Arbitration as per the Arbitration and Conciliation Act, 1996, with a sole arbitrator appointed mutually, before proceeding to litigation in court.	Arbitration is a faster, more professional alternative to traditional court litigation for complex technical contracts.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
408	8.32 Confidentiality & NDA	83	Bidder shall not disclose any information... for a period of 3 years after expiry.	We understand the 3-year confidentiality term. Kindly clarify that this obligation does not apply to information that is already in the public domain, was independently developed by the SDA, or is required to be disclosed by law or a regulatory authority.	Standardizes the NDA to align with common law principles and prevents over-reaching confidentiality constraints.	As per RFP
409	3.3.4.1 Core Components & 3.3.4.2	22-31	Integration with 30+ service delivery platforms and SWAGAT.	[Integration + Delivery + Risk] We understand the SDA must integrate with 30+ systems. Kindly clarify the governance for Data Readiness: If a third-party department lacks the necessary API infrastructure or data quality, will the Authority facilitate the Data Transformation, and how will such external delays impact the \$T4\$ (60-day) development milestone and subsequent payment?	Stitches together Technical (API), Delivery (Timeline), and Finance (Payment) risks.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.
410	3.3.12 Team Deployment & 5.11 Penalties	36, 61	SDA to deploy manpower; Penalty for non-deployment of resources.	[HR + Delivery + Operations] We understand the minimum manpower requirements. Kindly confirm that for the O&M phase, the SDA has the flexibility to optimize the team structure (e.g., using shared L3 resources or AI-automated monitoring) provided that the 24x7 availability and response SLAs are strictly maintained.	Aligns HR planning with Operational efficiency and cost-competitiveness.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
411	3.3.6 AI, LLM & 11 Evaluation	33, 102	AI/LLM components to be hosted on GSDC/Approved Cloud.	[Tech + Infra + Commercial] Regarding AI/LLM: Please clarify if the GSDC infrastructure includes GPU-optimized compute. If not, and a Public Cloud is required, will the Authority treat Cloud Consumption/Token costs as a Pass-Through reimbursement, or must these be bundled into the fixed Lumpsum bid?	Connects Architecture (AI) with Infrastructure (GPU) and Pricing (Financial risk).	As per corrigendum 2
412	4.1 UAT & 4.3 Software Load Balancer	47, 48	UAT sign-off after all observations are addressed; 3s response time SLA.	[Delivery + Tech + SLA] We understand the 3-second response time requirement. Kindly confirm that this SLA is measured at the Application Layer and excludes network latency caused by the client's GSWAN/Internet or the GSDC physical load balancer, which are beyond the SDA's control.	Protects the bid narrative by defining technical boundaries for SLA accountability.	Delays due to GSDC/GSWAN dependencies shall be considered accordingly and shall not attract penalties on the bidder.
413	3.3.11.2 Multi-channel & 3.3.4.1	36, 22	WhatsApp chatbot and Dynamic Form Builder integration.	[Product + Tech + UX] To ensure a unified citizen experience, kindly confirm if the Dynamic Form Builder metadata will be natively consumed by the WhatsApp Chatbot and Mobile App, or if separate development/configuration is required for each channel's specific UI/UX constraints.	Ensures architectural coherence across different citizen-facing channels.	The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
414	5.4 SLA & 5.8 Show Cause Notice	56-58	Penalties for breach of SLA; Maximum penalty 15% per milestone.	[Operations + Legal + Finance] Please clarify the Cure Period for SLA breaches. We understand the penalty triggers; kindly confirm if the SDA will be given a 30-day Stabilization Window post-Go-Live where penalties are indicative (for monitoring) rather than financial, to allow for AI model calibration.	Bridges Operational performance with Legal liability and Financial predictability.	As per RFP
415	8.39 Exit Management & 3.3.10	87, 35	Exit Management Plan for 1 month; SDA responsible for O&M for 2 years.	[Delivery + HR + Business] We understand the 1-month exit period. Given the complexity of 30+ integrations, kindly confirm that the Knowledge Transfer (KT) phase requires the incoming agency to provide a Shadow Team at least 60 days prior to the SDA's exit to ensure zero service disruption.	Protects the long-term operational integrity and ensures a smooth handover strategy.	As per RFP
416	3.3.11.1 (vii) Audit Trails & 8.32 NDA	36, 83	System Audit Trails and activity logs; NDA for data security.	[Security + Tech + Compliance] Regarding the audit logs: Please clarify the Log Ownership and Storage boundary. Is the SDA responsible for the Sizing and Procurement of dedicated log-retention hardware, or does GSDC provide the Storage-as-a-Service for the 2-year archival period?	Clarifies the split between SDA's software responsibility and GSDC's hardware provision.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
417	4.1 (v) Performance Testing & 3.3	48, 19	Load testing for 19,000 concurrent users; GSDC provides Prod hardware.	[Infra + Tech + Delivery] We understand GSDC provides Prod infrastructure. To ensure the \$T5\$ (Staging/UAT) milestone is met, will the Authority provide a Non-Production environment of equivalent scale for performance benchmarking, or is the SDA expected to provision this externally?	Highlights a critical dependency for technical validation and milestone achievement.	As per RFP
418	8.37 Change Request & 3.3.10 O&M	84, 35	Change Request pricing via man-month rates; O&M includes system enhancements.	[Commercial + Scope + Business] Please clarify the demarcation between O&M Bug Fixes and Change Requests. We suggest that any new functional module or integration with a departmental system not listed in the current RFP be treated as a Change Request to ensure a fair commercial balance.	Defends the commercial margin by preventing hidden scope expansion during the 2-year O&M.	As per RFP
419	Fact Sheet	6	Consortium / Joint Venture: Not permitted	We kindly request that consortiums/JVs be permitted, as they enable bidders to effectively execute field activities and deliver specialized components of the project requirements.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
420	Sec. 10 / Cl. 1	94	The Bidder shall have an average annual turnover of at least ₹7.5 Crore from IT software–related services, including Software Development and Operation & Maintenance, CRM and ERP–based workflow automation, Software Product Development, and Mobile Application Development, during the last three (3) financial years, i.e., FY 2022–23, FY 2023 24, and FY 2024–25.. a) Average Turnover ≥7.5 Crore and < 12.5 Cr = 6 marks b) Average Turnover ≥ 12.5 and < 17.5 Cr. = 8 marks c) Average Turnover ≥ 17.5 Cr. = 10 marks	We request to modify this clause as: “The Bidder shall have an average annual turnover of at least ₹7.5 Crore from IT software–related services, including Software Development and Operation & Maintenance, CRM and ERP–based workflow automation, Software Product Development, and Mobile Application Development, during the last three (3) financial years, i.e., FY 2022–23, FY 2023 24, and FY 2024–25. (a) Average Turnover ≥ 7.5 Cr and < 12 Cr = 6 marks (b) Average Turnover ≥ 12Cr and < 17 Cr = 8 marks (c) Average Turnover ≥ 17 Cr = 10 marks”		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
421	Sec. 10 / Cl. 2	94	The Bidder must have experience in the design, development, implementation, and operation & maintenance of at least one (1) project related to software development, including software product development, CRM, ERP, or automated workflowbased solutions, for any Central Government, State Government, or Public Sector Undertaking (PSU) during the last three (3) years, with a minimum project value of ₹1 Crore.	Kindly change this clause as below: "The Bidder must have experience in the design, development, implementation, and operation & maintenance of at least one (1) project related to software development, including software product development, CRM, ERP, or automated workflow-based solutions, for any Central Government, State Government, or Public Sector Undertaking (PSU) during the last three (10) years, with a minimum project value of ₹1 Crore."		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
422	Sec. 10 / Cl. 4	96	The Bidder shall have experience in the development and Operation & Maintenance (O&M) of IT systems catering to a large user base for any Central Government, State Government, Public Sector Undertaking (PSU), or Government autonomous Body. Such projects must have been successfully executed/completed and must be operational (Go-Live). • 5 lakh (500,000) users and above = 3 marks. • 15 lakhs (15,00,000) users and above = 4 marks. • 25 lakhs (25,00,000) user and above = 5 marks.	We request you to kindly clarify whether the 'user base' refers to registered users, active users, concurrent users, or the total population served by the system."		the 'user base' refers to the total number of registered users of the system.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
423	Sec. 9 / Cl.7		The Bidder should have valid certificate CMMi level 3 or above for Application / Software development as on bid submission date. (If validity is to be expired within the contract period, then bidder needs to provide us undertaking for the renewal of the certificate).	We request you to consider CMMI Level 3 in the marking criteria as well, for awarding full marks to bidders possessing CMMI certification.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
424	Sec. 10 / Cl. 5	96	The bidder should have valid and current relevant industry-recognized certifications as on the bid submission date. • ISO/IEC 27000 series = 1 mark • ISO/IEC 20000 = 1 mark • ISO 22301 = 1 mark • CMMI L5 = 2 marks Total: 5 Marks	We request to make ISO 22301 (Business Continuity Management System) optional or allow equivalent certifications/standards related to IT service continuity and risk management. Many capable bidders maintain robust business continuity practices without formal ISO 22301 certification. So, we request you to remove it from marking criteria. • We request the authority to kindly consider CMMI Level 3 certification in the evaluation criteria. CMMI Level 3 reflects a welldefined and standardized process maturity and is widely accepted across government and enterprise projects. Suggested Modification: • ISO/ IEC 27000 series = 1 mark • ISO/ IEC 20000 = 1 mark • CMMi L3 = 3 marks		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
425	Sec 3.0, Scope of work		General Query related to software	Kindly clarify the total number of systems involved and the number of services under each system. • Please confirm whether the portal will support one-way communication or two-way communication with the integrated systems. • Kindly confirm whether the scope of the chatbot extends across all integrated systems. • Please specify whether the integration approach will be UI redirection-based or APIbased. • Kindly confirm if there will be an associated admin portal. If yes, please elaborate on its functional scope. • The timeline specified for Phase 1 appears to be quite aggressive. While it may be feasible for vendors with a ready or near-ready solution, developing the system from scratch as per the defined requirements and subsequently implementing it may be challenging within the given timeframe. We request you to kindly review and consider providing a		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
				more practical timeline. • Clarification is requested regarding the responsibility for coordinating with the development teams or respective departments of the systems involved in integration, and for ensuring that the required activities are completed within the stipulated timelines.		

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
426	7.3	65	The contract shall be awarded to the Lowest Financial Bidder (L1) among the technically qualified bidders.	Request to consider Quality and Cost Based Selection (QCBS) with 80% weightage on the technical score and 20% weightage on the relative financial score.	We understand that the IGSMs will cater as an important enabling tool for efficiently addressing citizen grievances the quality, robustness and technology superiority of the solution are important. Selection based on L1 among technically shortlisted bidders may still leave chance of significant quality difference between the solution and bidder capabilities. The RFP also highlight the importance of the solution quality.	As per RFP
427	6	62	TENDERER shall hold a pre-bid meeting with the prospective Bidders on	We request to hold the pre-bid meeting online.		Not Applicable

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
			the Date & time and Address mentioned in the Fact Sheet of this document.			
428	Fact sheet		EMD: ... Demand Draft	We request to provide option to accept Bank Guarantee		Demand Draft/ Bank Guarantee payable is acceptable.
429	Fact sheet		Bid opening data	Please provide 3 weeks from pre-bid response publication for bid submission.		As per Corrigendum 2
430	8.37	35	Change Request Cost Table - The cost of approved Change Requests shall be calculated strictly as per the following table.....	We assume it's the blended rate. Actual manpower and deployment can be decided by the implementation partner.		As per RFP
431	8.31.1	135	The Exit Management Period shall continue until the earlier of .	We assume that the vendor will be paid for the period actually delayed.		Agreed
432	9	135	Pre-qualification: Financial Capability	You may please consider increasing the threshold qualifying financial capability.		As per RFP
433	10	Technical evaluation	Annual average turnover	We request to increase annual average turnover to INR 75 Crores and also increase the ranges in the scoring table by same proportion.		As per RFP
434	10	Technical evaluation	The Bidder must have experience in the design, development, implementation, and operation & maintenance during the last three (3)	We request to consider projects started within last 6 years that are completed and under continuous maintenance support contract be allowed.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
			years, with a minimum project value of ₹1 Crore.			
435	10	Technical evaluation	The Bidder must have experience in the design, development, implementation, and operation & maintenance during the last three (3) years, with a minimum project value of ₹1 Crore.	We request to increase threshold alue of the at least 10 Crores in single order and are complete or under continuous maintenance support contract since go-live.	The scope of the work specifies an innovative, efficient and resilient grievance management system. Similar type of projects are executed at much higher values.	As per RFP
436	10	Technical evaluation	The Bidder shall have experience in the development and Operation & Maintenance (O&M) of IT systems catering to a large user base for any Central Government, State Government, Public Sector Undertaking (PSU), or Government Autonomous Body. Such projects must have been successfully	We request to accept self certification of user based along with supporting proof.	Itt's difficult to get user count certificate form CMH-CU.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
			executed/completed and must be operational (Go-Live).			
437			Other	We would suggest to include the clause: "The bidder should have an established practice of AI, GenAI and have large customer base in India in the government and public sector. The bidder should have at least 25 qualified and certificated resources in AI with industry experience of over 10 years."	HR certificate of the bidder can be asked as proof.	As per RFP
438	10	Technical evaluation	Technical presentation - Capabilities, Approach and Methodology for execution of project.	We would request to allocate marks in each criteria.	We suggest to keep maximum score on the demonstration of relevant solution with example of implementation of the AI solution in government / PSU in India.	As per RFP
439	Annexure 7	115	Comprehensive Operation & Maintenance (O&M) for 2 years	How the cost of LLM solution to be quoted?	This will vary on usages.	As per corrigendum 2

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
440			Other	Does the bidder need to migrate existing grievance records to the new system? If so, please provide volume of the data.	We assume that client will facilitate access to the data.	No data migration will be required as of now.
441	3.3.4.1	23	Ticket Generation and Categorization	We assume that client will provide the SLA metrics of the issues types.		Details will be provided to selected Bidder.
442			Assignment to Departments and Officers	We assume that the implementation partner will not be penalised for any delay due to reasons not attributable to it.		Delays due to third party dependencies shall be considered accordingly and shall not attract penalties on the bidder.
443	8.14	74	CMH-CU may, at its sole discretion and without assigning any reason, terminate the Contract, either wholly or partially, by giving the Selected Bidder thirty (30) days' prior written notice.	Please consider amending the clause as below: The Consultant may suspend or terminate the Contract, by not less than thirty (30) days' written notice of termination to the CMH-CU, in case: a. The CMH-CU does not make the payment to the Consultant; or b. The CMH-CU does not adhere to the arbitration judgment; or c. If the Consultant determines that a law, regulation or anything having similar import, or circumstances (including cases where the CMH-CU's ownership or constitution has changed), makes the Consultant's performance of the Contract impermissible or in conflict with independence or professional rules applicable to the Consultant		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
444	8.15	76	Fails to meet agreed service levels, KPIs, milestones, or timelines, including where the SLA penalties exceed 25% of the monthly payable amount for any review period or exceed 15% of the monthly payable amount for three (3) successive months, in which case the Authority may treat the same as an Event of Default.	Please consider to limit the overall penalty capped at 10% of the Monthly/Quarterly Payment.		As per RFP
445	8.17	77	If the Selected Bidder fails to meet timelines, milestones, or performance requirements, CMH-CU may levy Liquidated Damages at rates specified in the Contract, subject to an overall ceiling of ten percent (10%) of the total Contract Value.	Please consider amending the clause as below: i. LD at a rate of 0.1% - 0.5% of the delayed milestone amount shall be levied on the Consultant per week of delay or part thereof. The ii. LD shall not be linked to the entire contract amount. Total LD of the Consultant as per this clause shall not exceed 5% - 10% of the contract value. iii. The LD shall be applicable only if the delay is solely attributable to the Consultant.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
446	8.17	77	If the Selected Bidder fails to meet timelines, milestones, or performance requirements, CMH-CU may levy Liquidated Damages at rates specified in the Contract, subject to an overall ceiling of ten percent (10%) of the total Contract Value.	Both the LD and penalty clauses (or both the LD clauses, as the case may be) are applicable on the same ground, therefore ET to request CMH-CU to delete the penalty clause (or the second LD clause, as the case may be).		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
447	8.19	77	Right of Monitoring, Inspection and Audit	We request to consider amending the clause as below: a) Whilst the Consultant shall work in good faith with the CMH-CU to provide the requisite information, due to confidentiality obligations, the Consultant would be unable to grant access to the CMH-CU or its nominated agencies to its records, premises or people, in which case the Consultant shall discuss in good faith and agree with the CMH-CU such reasonable steps to meet the purpose. b) Any access by the CMH-CU or its nominated agencies shall be conducted: (i) upon reasonable notice; (ii) either by the CMH-CU's team or by its nominated agency that is not a direct competitor of the Consultant; and subject to reasonable arrangements to ensure that duties of confidentiality on the part of the Consultant to its other CMH-CUs and third parties are preserved.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
448	3.3.4.1	25	GIS Module Integration	1. Does CMH-CU has an exiting GIS system or it refers to integration with an industry standard SaaS GIS solution? 2. For GIS integration would suggest CMH-CU to provide the base map. Else, CMH-CU may specify the source. 2. If SaaS GIS to be used, does CMH-CU has a preference.	Global SaaS GIS data many a times provide a distorted map of Indian.	As per corrigendum 2
449	3.3.4.1	25	GIS Module Integration	In case of SaaS GIS solutio,we suguest that CMH-CU bear the cost of SaaS GIS API usage cost at actual. Else, CMH-CU may provide API access for a SaaS GIS that it has tied up with.	Many GIS API usage are chargeable, beyond a free tier. On the other hand Opensource GIS data are usually not updated regularly.	As per corrigendum 2
450	3.3.4.1	26	Monitoring, Dashboards, and Analytics	Please provide tentative number of dashboards and repoprts to be designed.		As per RFP
451	3.3.4.1	30	Major Online service delivery platforms	We assume that CMH-CU will faciliate access to the APIs at the beginning of the project.		CMH-CU shall facilitate access to required APIs; however, overall planning, coordination, and timely execution shall remain the responsibility of the selected bidder.
452	3.3.4.1	30	Major Online service delivery platforms	We assume that development of any API for an integrating grievance application is not in scope of the bidder.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
453	3.3.6	32	AI, LLM, OCR, and Automation Components	AI Systems are subject to hallucinations, which can be caused by a variety of factors outside of bidders control. We assume that output of AI solution will be verified by concerned grievance redressal team and corrected if needed.		As per RFP
454	3.3.10	35	24x7 system monitoring	Does the CMH-CU expect to position manpower also on 24x7 basis?		As per RFP
455	3.3.12	36	Team Deployment	Does CMH-CU expect all these resources to be placed onsite?		As per RFP
456	4	40	Project Timelines and Milestones	We request change the payment terms for Milestone 1 as follows: 5% with LoA 10% with SRS 10% on UAT of Web platform 5% on operationalisation of web platform		As per RFP
457	5.1	53	Response and Resolution Times	Is SLA calculation based on working hours? Please clarify.		As per RFP
458	5.1	53	Response and Resolution Times	What are the penalties for each severity type?		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
459	3.3.6	32	The Selected Bidder shall integrate advanced AI, LLM, and automation-based components	Will CMH-CU provide the LLM solution to which the system need to use for groevance summarisation? Else, how the cost of ussage of LLM solution be paid.	Cost of LLM solution depends on service consumption. There are various proccing models for LLM solution usages, like Token based, Model based etc.	As per corrigendum 2
460	3.3.11	35	WhatsApp Business API (WABA) Services	We assume that the cost of conversations on WABA will be borne directly by CMH-CU.		As per RFP
461	3.3.11	35	WhatsApp Business API (WABA) Services	Is there a preferred WABA platform partner of the CMH-CU?		CMH-CU does not have any preferred WABA platform partner; the selected bidder may propose a suitable service provider, subject to approval by the Authority.
462	11	100	Tenderer may conduct the Reverse Bidding as per the following procedure.	Due to the word "May", kindly clarify under what circumstances reverse bidding be considered?		Reverse bidding shall be considered as part of the selection process, as per the provisions of the RFP.
463	11	100	Tenderer may conduct the Reverse Bidding as per the following procedure.	In reverse bidding, will the L1 bidder also be allowed to fiurther reduce quote?		Agreed

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
464	11	100	Tenderer may conduct the Reverse Bidding as per the following procedure.	Will the Technically highest cosring bidder among the shortlise be given first chance of refusal to match the L1 bid?		As per RFP
465	11	100	The financial proposal (Annexure 7) must include all costs, including taxes, duties, hosting charges, licensing (if any), manpower deployment, third-party integrations, and future enhancements as per scope.	Will the Technically highest cosring bidder among the shortlise be given first chance of refusal to match the L1 bid?		As per RFP
466	3.3	18	Staging and other non-production environments shall be managed by the SDA.	Please consider providing the staging environment by CMH-CU.	Staging envrinment need to be a replica of the prodction environment which can be best replicated in the same infrstructure where production enviornment is also configured.	As per RFP
467	3.3	19	Responsibility for Non-GSDC Components	We assume that infrastructure and network security will be outside the role of the SDA.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
468	3.3.9	34	Audit and Certification	Will CMH-CU select and contract the audit partners?		As per RFP
469	3.3.9	34	Audit and Certification	Will CMH-CU bear the cost the recurring audits separately?	The financial proposal doesn't have any line item for audit services.	As per RFP
470	3.3.9	34	Audit and Certification	Please provide security audit scope coverage. Does it include audit as per ISO 27000 standards too?		As per RFP
471	11	102	The Bidder is required to provide network security and IT security, Application security, Web security audit reports to the TENDERER as in accordance with the Timeframe decided by the TENDERER or as and when required.	The application will be hosted on CMH-CU provided environment. Therefore we suggest to consider any application security and web security as part of the bidders scope.		As per RFP
472	11	102	The Bidder is required to provide network security and IT security, Application security, Web security audit reports to the TENDERER as in accordance with the Timeframe decided by the TENDERER or as and when required.	Please provide number and frequency of audits to be conducted.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
473	3.3.4.2	30	Grievance redressal forum of different Dept/Organization	Does any backend process automation for grievance redressal at organisations / departments not covered in the table included in scope?		As per RFP
474	3.3.4.1	24	The system shall maintain an up-to-date officer and department directory along with configurable routing rules to forward grievances to the appropriate authority responsible for resolution.	Does the bidder need to create and maintain the directory and role mapping? If so, we assume that CMH-CU will provide the information at the beginning of the project and the subsequent updates. We also suggest to consider alternate value added proposals of vendors in this regard based on their merit.		CMH-CU shall facilitate access to required information; however, overall planning, coordination, and timely execution shall remain the responsibility of the selected bidder.
475	3.3.4.1	24	The system shall support document and image uploads, including Optical Character Recognition (OCR)-based data extraction where feasible.	OCR accuracy will depend on the inputs image file and/or type of the texts.		Should be more than 90% Accuracy
476	3.3.4.1	22	Integrated Grievance and Service Management System (IGSMS) – Core Components (Grievance Redressal System)	Is there any requirements for integrating IVRS with the IGSMS, including expected call volumes, language support, call flow design, and the level of automation needed for grievance registration and status tracking?		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
477	3.3.6	32	AI, LLM, OCR, and Automation Components - All AI and LLM components shall be hosted on GSDC or MeitY or GoG approved cloud infrastructure located within India, ensuring data privacy and compliance with Government regulations.	Whether SI can opt for the selection of deployment environment like gsdc or Meity or GoG approved cloud infrastructure or AI based API solutions located in India		As per corrigendum 2
478	3.1.1	14	Integration with All Existing Grievance Platforms	What is the current and projected data volume (including number of grievances, attachments, and historical records) across all existing grievance platforms to be integrated?		Details will be provided to selected Bidder.
479	Section 3.3, Table 1	Page No. 29 & 30	Integration with Existing Systems	Will CMH-CU provide documented API specifications (Swagger/OpenAPI) for all platforms listed in Table 1 (SWAGAT, CPGRAMS, eNagar, DISCOMs, Municipal Corporations, etc.) prior to or at the start of the requirement-gathering phase?		CMH-CU shall facilitate access to required APIs; however, overall planning, coordination, and timely execution shall remain the responsibility of the selected bidder.
480	Section 3.3, Table 1	Page No. 29 & 30	Integration with Existing Systems	Which of the platforms listed in Table 1 currently have functional, published REST APIs available? For those that do not, who will be responsible for developing those APIs - the bidder or the concerned department?		Details will be provided to selected Bidder.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
481	Section 3.2.1, 3.3.4.1	Page No. 16	Integration with Existing Systems	Will CMH-CU facilitate formal onboarding and coordination with all listed departments and ULBs for API integration? What is the escalation mechanism if a department fails to cooperate within the project timeline?		CMH-CU shall facilitate access to required APIs; however, overall planning, coordination, and timely execution shall remain the responsibility of the selected bidder.
482	Section 3.3.4.1	Page No. 21	Integration with Existing Systems	The RFP states SWAGAT shall first be integrated and subsequently 'fully incorporated' into IGSMS. Will the timeline for SWAGAT's full consolidation be defined by CMH-CU, and will it fall within the current contract period? Who bears the cost of SWAGAT data migration?		As per RFP But Data migration is not in bidder's scope.
483	Section 3.3.4.1	Page No. 21	Integration with Existing Systems	What is the current technical architecture of the CM Helpline call centre CRM? Will the current CRM vendor provide API access and SLA-backed support for bidirectional synchronization? Will CMH-CU bear the cost of any additional API development by the CRM vendor?		As per RFP
484	Section 3.3, GSDC Table	Page No.16	GSDC Infrastructure and Environment	Will CMH-CU / GSDC provide the finalized hardware sizing specifications (server configuration, RAM, storage, network bandwidth) for the Production environment before bid submission, so bidders can accurately scope their non-production environments?		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
485	Section 3.3, Section 5		GSDC Infrastructure and Environment	What is GSDC's committed SLA for Production infrastructure uptime and mean time to restore (MTTR)? Will penalties under the bidder's SLA be waived in cases of infrastructure downtime attributable to GSDC?		Delays due to GSDC dependencies shall be considered accordingly and shall not attract penalties on the bidder.
486	Section 3.3, GSDC Table (Row 1)		GSDC Infrastructure and Environment	Will GSDC provide the Staging/UAT environment infrastructure, or is this entirely the bidder's responsibility? What are the specifications and timelines for the Staging environment being made available?		As per RFP
487	Section 3.3, GSDC Table (Row 4)		GSDC Infrastructure and Environment	The RFP states GSDC provides 'container orchestration infrastructure (e.g. VMware Tanzu Infra).' Are bidders restricted to this platform, or can alternative containerization strategies (e.g., Kubernetes on OpenShift) be proposed?		The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.
488	Section 3.3.9		GSDC Infrastructure and Environment	The RFP requires GSDC clearance (safe-to-host report) before deployment. What is the estimated time required to obtain this clearance, and should this be factored into the project timeline by bidders?		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
489	Section 4, Milestone 1		Project Timelines and Milestones	The timeline for Milestone 1 (Go-Live of Grievance Management Module) is 90 days from Lol, including requirement study, design, development, testing, UAT, security audit, and deployment. Will CMH-CU confirm this timeline is firm, or is there scope for milestone-level negotiation based on complexity identified during SRS?		As per RFP
490	Section 4, Milestone 1 (T3)		Project Timelines and Milestones	Will the requirement-gathering and FRS validation phase (T3, 15 days) involve dedicated CMH-CU resources to review and approve SRS documents? What is the maximum permissible review turnaround time by CMH-CU for submitted documents?		As per RFP
491	Section 4, Milestone 1 (T5)		Project Timelines and Milestones	The timeline for UAT sign-off and commissioning (T5) allows only 7 days after development. Is there a buffer timeline defined for defect rectification if critical issues are found during UAT or CERT-In security audit?		As per RFP
492	Section 3.3, Section 4		Project Timelines and Milestones	If third-party integrations (e.g., CPGRAMS, eNagar, DISCOMs) are delayed due to the respective departments' readiness, will corresponding milestone dates be adjusted? How will such delays be formally documented and communicated?		CMH-CU shall facilitate access to required APIs, while overall planning, coordination, and execution shall be the responsibility of the selected bidder. Delays due to third party dependencies shall be

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
						considered accordingly and shall not attract penalties on the bidder.
493	Section 3.3.2, Section 3.3.4.1		Data Migration and Historical Data	What is the approximate total volume of historical grievance data (number of records, size in GB) available across existing platforms (SWAGAT, CPGRAMS, eNagar, departmental systems)? Will this data be migrated into IGSMS, and if so, is data migration included in the bidder's scope?		No data migration will be required as of now.
494	Section 3.3.2		Data Migration and Historical Data	Will CMH-CU provide the data format, schema documentation, and quality assessment (e.g., completeness, duplicates, encoding) of the legacy data? Who is responsible for data cleansing and validation prior to migration?		No data migration will be required as of now.
495	Section 3.3.4.1		Data Migration and Historical Data	For the 360-degree citizen grievance view, will historical grievance records from all integrated systems be visible, or only those registered post-IGSMS go-live? Please clarify the expected depth of historical data visibility		As per the RFP, data migration is not part of the scope. Accordingly, the 360-degree grievance view shall include grievances registered in IGSMS post Go-Live.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
496	Section 3.3.6		AI, LLM, and Automation Components	The RFP requires AI/LLM components to be hosted on 'GSDC or MeitY or GoG approved cloud infrastructure within India.' Is there an approved list of cloud AI providers or LLM models that bidders should use? Can bidders propose open-source LLMs (e.g., LLaMA, Mistral) hosted on GSDC, or are commercial APIs (e.g., GPT, Gemini) permitted?		As per corrigendum 2
497	Section 3.3.6 (Point 3)		AI, LLM, and Automation Components	Gujarati OCR for handwritten content is listed as a required capability. Has CMH-CU assessed the current maturity and availability of such tools? Will CMH-CU provide a labeled training dataset for Gujarati OCR, or is the bidder expected to develop or procure this independently?		Details will be provided to selected Bidder.
498	Section 3.3.6 (Points 1, 4)		AI, LLM, and Automation Components	For the AI-based grievance categorization and duplicate detection features, will the bidder be provided access to existing historical grievance data for training and testing models before go-live? What is the expected accuracy threshold for these AI features?		As per the RFP, Accuracy should be more than 90%.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
499	Section 3.3.11		WhatsApp Business API (WABA) and Communication Channels	Will CMH-CU procure and provide the WhatsApp Business API (WABA) account and Meta Business Manager access, or is the bidder responsible for WABA onboarding, verification, and recurring subscription costs? Who will bear the cost of WhatsApp message charges (per-message fees) during the O&M phase?		CMH-CU does not have any preferred WABA platform partner; the selected bidder may propose a suitable service provider, subject to approval by the Authority. The bidder shall be responsible for WABA onboarding, business verification, and all associated setup and recurring subscription costs. WhatsApp message charges shall be borne by CMH-CU, based on actual transactions, as per the provisions of the RFP.
500	Section 3.3.11		WhatsApp Business API (WABA) and Communication Channels	Is there an existing verified government WhatsApp Business account for the Government of Gujarat / CM Helpline? If yes, will access to this account be provided to the selected bidder?		CMH-CU does not have any preferred WABA platform partner; the selected bidder may propose a suitable service provider, subject to approval by the Authority.
501	Section 3.1.2, Section 3.3.11		WhatsApp Business API (WABA) and Communication Channels	The RFP requires document sharing via WhatsApp 'through official WhatsApp Business API integration.' Does CMH-CU have a TRAI-registered sender ID and existing SMS gateway? Will this gateway be made available to the bidder, or must the bidder procure a new one?		CMH-CU does not have any existing WhatsApp Business account. However, CMH-CU may provide an SMS gateway for integration. The bidder may alternatively procure a more cost-effective option and shall be responsible for configuring and maintaining a TRAI-compliant SMS gateway and sender ID, subject to CMH-CU approval, and for integrating the same and other communication

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
						channels, as required under the RFP.
502	Section 3.3.3 (Point 1)		Licensing and Commercial Software	The RFP mandates open-source technologies to 'avoid vendor lock-in.' If the optimal solution for certain components (e.g., database, BI tool, API gateway, monitoring) requires a commercial product, will CMH-CU consider such proposals? Is there a specific approved list of open-source or commercial tools?		The selected bidder shall design and implement the best solution based on the industry standards and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.
503	Section 3.3.4.1		Licensing and Commercial Software	The BI tool required for dashboards and analytics is referenced but not specified. What BI platform does CMH-CU prefer (e.g., Grafana, Metabase, Apache Superset, PowerBI)? Will the license cost for a commercial BI tool be borne by CMH-CU or the bidder?		As per RFP
504	Section 4, Milestone 1 Deliverables		Licensing and Commercial Software	The RFP requires the bidder to provide 'server and client edition perpetual licenses in the name of the purchaser' at handover. Does this apply to all third-party components proposed by the bidder? How should bidders factor this into their financial proposal?		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
505	Section 3.3.4.1		Licensing and Commercial Software	For GIS module integration: is there an existing GIS platform (e.g., from NIC, State GIS Cell, or GSWAN) that the IGSMs should integrate with, or does the bidder need to procure and deploy a GIS solution independently?		As per corrigendum 2
506	Section 3.3.10		Operations & Maintenance (O&M) Scope	The RFP states that 'all API integrations (existing and new), enhancements, upgrades, replacements, migrations... shall be treated as an integral part of the Scope of Work.' Does this mean all future feature enhancements and new departmental integrations requested during the O&M period are covered within the fixed O&M price, with no additional payment to the bidder?		As per RFP
507	Section 3.3.10		Operations & Maintenance (O&M) Scope	Is there a cap (in terms of man-hours or number of enhancements) on the scope of changes covered under O&M, or is it unlimited? How will the scope of new change requests during O&M be formally governed and approved?		As per RFP
508	Section 4, O&M Milestone		Operations & Maintenance (O&M) Scope	Is there a provision to extend the O&M contract beyond two years? If yes, on what terms (same pricing, renegotiated, or escalated at a fixed rate)?		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
509	Section 4, O&M Milestone		Operations & Maintenance (O&M) Scope	After the 2-year O&M period, what is the transition and handover mechanism? Will CMH-CU re-tender for support, or does the original bidder have the right of first refusal?		As per RFP
510	Section 3.3.8, Section 3.3.9		Security, Compliance, and Audit	How many rounds of CERT-In VAPT audits are expected during the project lifecycle — at go-live, and how frequently during O&M? The RFP states these are at 'no additional cost.' Should bidders factor in cost for multiple VAPT audits across the 2-year O&M period?		As per RFP
511	Section 3.3.9		Security, Compliance, and Audit	Is STQC certification mandatory for this project, or only 'wherever applicable'? If mandatory, what is the expected timeline for STQC certification, and will it impact the go-live milestone?		As per RFP
512	Section 3.3.9		Security, Compliance, and Audit	The system must comply with the Digital Personal Data Protection Act (DPDP) 2023. Has CMH-CU identified a Data Protection Officer (DPO) and defined a consent management framework? Will the bidder be responsible for implementing consent management features as part of the scope?		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
513	Section 3.3.12		Manpower, Staffing, and Resource Governance	For Phase 1, the RFP mandates on-site deployment of the Project Manager, Business Analyst, and at least one Developer. What is the minimum number of on-site working days per week required? Will CMH-CU provide office space, internet connectivity, and workstations for the deployed team?		Only seating space, and internet connectivity for onsite resources shall be facilitated by the Department, while necessary devices shall be arranged by the bidder.
514	Section 3.3.12		Manpower, Staffing, and Resource Governance	The RFP requires CMH-CU to review and approve CVs before deployment. What is the expected turnaround time for CV approval? If CMH-CU rejects a proposed resource, how many re-submissions are permissible before a penalty is triggered?		As per RFP
515	Section 3.3.12		Manpower, Staffing, and Resource Governance	Can offshore resources (not on-site) be counted towards the minimum team requirements for non-client-facing roles such as Backend Developer, DBA, and QA Engineer?		As per RFP
516	Section 4, O&M Payment		Financial Bid and Payment Structure	20% of Part A payment is to be retained and released quarterly (5% per quarter) during Year 1 of O&M. Will this retention be subject to SLA penalties in addition to the regular O&M penalty regime, potentially resulting in double deductions for the same SLA breach?		SLA breach penalty will remain stick to the respective milestones/phase.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
517	Section 4, Milestone Payments		Financial Bid and Payment Structure	Is GST applicable on all milestone payments, and will it be paid over and above the quoted price? Should bidders quote prices exclusive or inclusive of GST in the financial bid?		As per RFP
518	Section 4		Financial Bid and Payment Structure	In the event of a force majeure or delay attributable to CMH-CU / GSDC (e.g., infrastructure not ready, departments not providing API access), will the corresponding milestone payment date be adjusted without penalty to the bidder?		Delays due to third party dependencies shall be considered accordingly and shall not attract penalties on the bidder.
519	Section 3.3.4.1		Miscellaneous	The RFP references 'Annexure 15' for an exhaustive list of dashboards and analytics. This annexure does not appear to be included in the draft RFP. Will it be shared as part of the final RFP or made available for review during the pre-bid phase?		Annexure 15 (Page no. 133), containing the exhaustive list of dashboards and analytics, is already included in the RFP document.
520	Section 3.3.4.1, Table 1		Miscellaneous	Is the scope of the system limited to the State of Gujarat, or will it need to interface with or be accessible from Central Government systems (CPGRAMS, NIC, etc.) in a bidirectional manner beyond what is currently described?		As per RFP
521	3.3.4.1 Integration with Existing Grievance Portals	28	The IGSMS shall be designed to integrate with all existing grievance portals and systems operated by Government departments, Urban	Is any existing system present for raising grievance? Will the as-is process documents, APIs, data schemas, and workflows of existing grievance and service portals will be shared?		Details will be provided to selected Bidder.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
			Local Bodies, and other legacy platforms.			
522	3.3.4.1 Integration with Existing Grievance Portals	28	The IGSMS shall be designed to integrate with all existing grievance portals and systems operated by Government departments, Urban Local Bodies, and other legacy platforms.	Is there any scope of data migration?		No data migration will be required as of now.
523	3.3.4.1 Integration with Existing Grievance Portals	28	The IGSMS shall be designed to integrate with all existing grievance portals and systems operated by Government departments, Urban Local Bodies, and other legacy platforms.	How many Govt dept, MC and ULBs are there for integration?		As per RFP
524	3.3.4.1 Integration with Existing Grievance Portals	28	The IGSMS shall be designed to integrate with all existing grievance portals and systems operated by Government departments, Urban Local Bodies, and other legacy platforms.	How many legacy applications are there for integration?		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
525	3.3.4.1 Real-Time Bi-Directional Synchronization	23	Any updates made by call centre executives, including corrections to citizen details, additional information captured during follow-up calls, or revisions to grievance records, shall be synchronized instantly with the IGSMS. Similarly, any changes in grievance status, escalation, remarks, or closure recorded within the IGSMS shall be immediately reflected in the call centre application.	Can IGSMS system can take action in external grievance resolution workflow?		Details will be provided to selected Bidder.
526	3.3.4.1 Integration and Future Consolidation of SWAGAT	22	In the subsequent phase, the SWAGAT system shall be fully incorporated into the IGSMS platform	What is scope of SWAGAT integration in current RFP		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
527	3 Scope of work	14	In addition to grievance redressal, the IGSMs shall function as an integrated service facilitation and engagement platform, enabling citizens to discover, access, apply for, and track Government schemes and services through a single interface. The system shall provide a centralized knowledge repository, real-time status tracking, and seamless API-based integration with departmental service delivery portals to ensure efficient service fulfilment and improved citizen convenience.	We understand that scope of SDA is to integrate with existing Schemes or Services portal. The scope is not to develop those schemes or services portals. The SDA will develop a centralized Knowledge Repository for those Services or Schemes and will provide links to redirect to those existing services and schemes portals so that Citizens can avail those services from existing Dept portals. Please confirm if this understanding is correct.		As per RFP
528	3.1.1 Key Objectives of Grievance Management	15	Integration with All Existing Grievance Platforms	How many approx. number of existing Grievance Platforms are required to be integrated.		As per RFP
529	3.1.2 Key Objectives of the Service Engagement Portal	16	Integration with Departmental Service Systems	How many approx. number of existing Departmental Service Systems are required to be integrated.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
530	3.3.4.1 Integrated Grievance and Service Management System (IGSMS) – Core Components (Grievance Redressal System)	26	GIS Module Integration	We understand that Dept already has an existing GIS System which will provide APIs for integration. The scope of SDA is to integrate with APIs of existing GIS Portal provided by Dept. Please confirm.		As per corrigendum 2
531	3.3.11 WhatsApp Business API (WABA) Services	36	The solution shall integrate with WhatsApp Business API (WABA) to enhance citizen engagement through automated grievance registration, real-time updates, and information dissemination.	We understand that all required Ecosystem for WhatsApp integration will be provided by Dept/Client. Please confirm.		CMH-CU does not have any preferred WABA platform partner; the selected bidder may propose a suitable service provider, subject to approval by the Authority.
532	3.3.12 Team Deployment	37	(Phase 1- Development, Rollout of Portal, Mobile App, WhatsApp Services, System Stabilization, and Go-Live) Key Resource: Tentative Team to be deployed for Project Implementation	We understand that all team members are not required to be deployed at Client side. Only key resources will be required at Client side like Project Manager, Business Analysts and rest of resources can work from SDA office locations. Please confirm		Key resources identified for onsite deployment in the RFP shall be stationed at the client site, while remaining resources may operate from the bidder's location.
533	5.4 Implementation of SLAs	55	Capping: Maximum penalty per milestone is 15%. If this is reached,	We recommend to reduce the capping to maximum 10%		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
			the Client may invoke the termination clause.			
534	9	91	The Bidder should have successfully executed completed and/or ongoing projects related to Software Development and Operations & Maintenance (O&M), including CRM / ERP / workflow automation solutions / software product development, for any Central Government / State Government / Public Sector Undertakings (PSUs) during the last three (3) years from the date of bid submission. 1. One project with the value of at least 3 crores OR 2. Two projects with the value of at least 1.9 crores OR 3. Three projects with the value of at least 1.5 crores	We kindly request the department to consider and allow experience from reputed corporate organizations, in addition to Central Government, State Government, and Public Sector Undertakings (PSUs), during the last three (3) years.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
535	10 Technical Evaluation	94	The Bidder must have experience in the design, development, implementation, and operation & maintenance of at least one (1) project related to software development, including software product development, CRM, ERP, or automated workflow-based solutions, for any Central Government, State Government, or Public Sector Undertaking (PSU) during the last three (3) years, with a minimum project value of ₹1 Crore.	We kindly request the department to consider and allow experience from reputed corporate organizations, in addition to Central Government, State Government, and Public Sector Undertakings (PSUs), during the last three 7 years.		As per RFP
536	10 Technical Evaluation	95	The Bidder shall have experience in the design, development, implementation, and successful operation of at least one (1) project involving a Grievance Redressal System / Module for any Central Government, State Government, Public Sector Undertaking (PSU), or Government Autonomous Body	To encourage wider participation and enhance competition, we kindly request the department to consider and allow experience from reputed corporate organizations, in addition to Central Government, State Government, and Public Sector Undertakings (PSUs), for projects executed during the last three (3) years.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
			during the last three (3) years, with a minimum project value of ₹1 Crore.			
537	10 Technical Evaluation	97	The bidder should have valid and current relevant industry-recognized certifications as on the bid submission date. • ISO/ IEC 27000 series = 1 mark • ISO/ IEC 20000 = 1 mark • ISO 22301 = 1 mark • CMMi L5 = 2 marks	To encourage wider participation, we kindly request the department to relax the requirements of ISO 22301 and CMMI Level 5. We request that ISO 14001 be accepted instead of ISO 22301, and that CMMI Level 3 be allowed here as well, as already specified in the pre-qualification criteria, so that more bidders can participate.		As per RFP
538	Fact Sheet	7	Consortium / Joint Venture	We kindly request the department to allow Consortium / Joint Venture		As per RFP
539	9 Pre-Qualification Criteria	92	The Bidder shall have maintained a minimum strength of Hundred (100) IT professionals (including IT Project Managers, Solution Architects, Database Administrators, Software Developers, Software Testers, System	We kindly request the department to modify the clause from '100 technical resources on bidder's payroll during the last one year' to '100 technical resources of the same profile as mentioned in the RFP should be on the bidder's payroll as on the date of submission.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
			Administrators, UI/UX Designers, Data Analysts, Business Analysts, DevOps Professionals, AI Engineers, and Technical Leads) on its payroll at different levels continuously during the immediately preceding one (1) year up to the bid submission date.			
540	10 Technical Evaluation	94	The Bidder shall have experience in the design, development, implementation, and successful operation of at least one (1) project involving a Grievance Redressal System / Module for any Central Government, State Government, Public Sector Undertaking (PSU), or Government Autonomous Body during the last three (3) years, with a minimum project value of ₹1 Crore.	We request to the department kindly relax the criteria and allow project executed in last 7 Years in the place of last 3years		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
541	10 Technical Evaluation	94	The Bidder must have experience in the design, development, implementation, and operation & maintenance of at least one (1) project related to software development, including software product development, CRM, ERP, or automated workflow-based solutions, for any Central Government, State Government, or Public Sector Undertaking (PSU) during the last three (3) years, with a minimum project value of ₹1 Crore.	We understand that any projects of software development and O&M having any of solutions like CRM/ ERP/ automated workflow-based solutions would be considered under this clause please confirm.		Confirmed
542	3.3 Scope of Work	17	Transaction & concurrency load	Kindly confirm whether the stated load of ~1 lakh transactions/day and 18,000–19,000 concurrent users represents peak load or average load. Also request indicative growth projection (3–5 years) for accurate sizing of application and licenses.		As per RFP
543	3.3 Scope of Work	17	Surge load (2× scaling)	In case of surge scenarios (2× load), whether additional infra provisioning (compute, storage, network) will be handled by GSDC or expected to be managed within bidder-proposed architecture.		Infrastructure provisioning as mentioned in the RFP shall be facilitated by GSDC; however, the bidder shall design the solution architecture to support scalability and efficient utilization of such resources.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
544	3.3 Scope of Work	16	Integration with existing systems	Request department to provide system-wise inventory including: (a) API availability, (b) API maturity (ready/partial/not available), (c) integration protocol, to assess integration effort and timelines.		The bidder shall coordinate with concerned stakeholders and adapt accordingly during API integration; approvals shall be facilitated by CMH-CU as needed for project execution.
545	3.3 Scope of Work	16	API-based integrations	In cases where APIs are not available or require modification/enhancement at source systems, kindly clarify whether such development effort and associated cost shall be borne by respective departments or included in bidder scope.		Development or enhancement of APIs at source systems shall be the responsibility of the respective departments.
546	3.3 Scope of Work	30–31	API integration framework	Kindly clarify if any API gateway/platform is already available at State level or bidder needs to provision and manage the same including licensing/support.		As per RFP
547	3.3 Scope of Work	16	WhatsApp (WABA) integration	Kindly confirm whether WhatsApp Business API account, onboarding approvals, and messaging credits will be provided by department or to be arranged by bidder.		CMH-CU does not have any preferred WABA platform partner; the selected bidder may propose a suitable service provider, subject to approval by the Authority. All transaction based charge related to third party services such as SMS, WhatsApp messaging, etc. shall be reimbursed on actuals during the project execution.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
548	3.3 Scope of Work	16	WhatsApp communication	In case WABA is to be arranged by bidder, please clarify whether recurring messaging costs (per conversation/template) will be reimbursed separately or deemed included in O&M.		As per RFP
549	3.3 Scope of Work	24	Call center integration	Kindly provide details of existing call center solution (OEM/platform, architecture, API availability) to assess integration approach and effort.		Details will be provided to selected Bidder.
550	3.3 Scope of Work	24	Call recording management	Please confirm storage responsibility, retention duration, and expected volume of call recordings. Also clarify whether storage infra will be provisioned by GSDC.		Voice inputs received through the Chatbot shall be converted into text transcripts for processing within the system. Audio recordings may also be stored as part of the grievance records. For voice inputs received through the Call Center, similar transcription functionality shall apply; however, call recording shall be outside the bidder's scope. Storage infra for call recording will be provided by CMH-CU.
551	3.3 Scope of Work	27	Notification channels (SMS/IVR/Email/WhatsApp)	Kindly clarify whether SMS/IVR/email gateways are available centrally or bidder is required to provision them. If bidder scope, confirm billing/reimbursement mechanism.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
552	3.3 Scope of Work	18–19	Support provided by GSDC	For components not explicitly listed under GSDC scope, kindly confirm that all associated costs (licenses/tools/security solutions) are deemed included in bidder scope without separate reimbursement.		As per RFP
553	3.3 Scope of Work	18	Load balancer	GSDC provides physical load balancer; please clarify whether any limitations (throughput, SSL offloading, scaling constraints) should be considered during design.		The selected bidder shall design and implement the best solution based on the industry standard and their technical expertise in compliance with the scope, requirements, and milestones specified in the RFP.
554	3.3 Scope of Work	18	Container platform (VMware Tanzu)	Kindly confirm whether application deployment must strictly align with provided container platform or bidder can propose alternate deployment approach (if justified).		Application deployment shall align with the provided container platform; however, the bidder may propose alternatives if justified and approved.
555	3.3 Scope of Work	20	SSO & authentication	Please confirm whether State SSO integration APIs and documentation will be provided along with support during integration.		Details will be provided to selected Bidder.
556	3.3 Scope of Work	21–22	CM Helpline integration	Whether real-time bi-directional integration SLAs (latency/availability) are defined for call center integration to ensure system consistency.		As per RFP
557	3.3 Scope of Work	23	Ticket categorization (AI/ML/LLM)	Kindly clarify availability of historical grievance datasets for training/tuning AI/ML/LLM models and expected accuracy benchmarks (if any).		Details will be provided to selected Bidder.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
558	3.3 Scope of Work	27	BI dashboards	Please confirm whether any standard BI platform is mandated or bidder can propose suitable tool. Also clarify if licenses (if any) are to be included in bidder scope.		No specific BI platform is mandated; the bidder may propose a suitable tool to meet the functional requirement of the RFP, and required licenses shall be included as part of bidder scope.
559	3.3 Scope of Work	27	Data integration & analytics	Kindly provide estimated historical data volume for migration and expected data retention period for analytics.		No data migration will be required as of now.
560	3.3 Scope of Work	16	Multi-language support	Please confirm whether content translation (Gujarati/Hindi/English) will be provided by department or to be managed by bidder.		Content translation shall be managed by the bidder as part of the scope, with support from the Department where required.
561	3.3 Scope of Work	17	Mobile application	Kindly confirm whether both Android and iOS applications are required or only Android is in scope.		As per RFP
562	5 SLA	51–56	SLA penalties	Request clarification on maximum penalty cap (monthly/overall contract value) applicable under SLA deviations.		As per RFP
563	5 SLA	56	Data breach & security SLA	Kindly confirm liability limits applicable in case of data breach/security incidents.		As per RFP
564	4 Project Timelines	40+	Milestone dependencies	Please clarify dependencies on department/third-party readiness (APIs, data, approvals) and whether delays due to such dependencies will impact bidder timelines/penalties.		CMH-CU shall facilitate coordination; delays due to third-party dependencies shall be considered accordingly and shall not attract penalties on the bidder.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
565	3.3 Scope of Work	16	Knowledge repository	Kindly confirm whether initial data/content for schemes/services will be provided in structured format or bidder is expected to digitize and curate the same.		Initial content may be provided where available; the bidder shall be responsible for structuring, digitizing, and curating the same.
566	3.3 Scope of Work	26	Escalation matrix	Please confirm whether escalation hierarchy and SLA definitions will be standardized across departments or vary department-wise.		Details will be provided to selected Bidder.
567	4 Project Timelines & Milestones	40+	Milestone-based payment structure	The current payment milestones appear significantly back-loaded, with limited cash flow during initial development and deployment phases. Request authority to consider a more balanced payment structure (e.g., linked to SRS sign-off, design approval, development completion, UAT, and Go-Live) to ensure adequate liquidity for timely and quality project execution.		As per RFP
568	4 Project Timelines & Milestones	40+	Payment dependency on Go-Live	Kindly clarify whether any interim payments are planned prior to Go-Live (e.g., post design, development, or integration stages), as complete dependency on Go-Live may create financial strain and execution risk.		As per RFP
569	4 Project Timelines & Milestones	40+	O&M payment start	Please confirm whether O&M payments will commence immediately after Go-Live or after a defined stabilization period (e.g., 3–6 months).		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
570	4 Project Timelines & Milestones	40+	Acceptance dependency	Kindly clarify whether milestone payments are dependent solely on bidder deliverables or also on department approvals (UAT sign-off, integrations readiness). Also confirm if delays in approvals will impact payment timelines.		Milestone payments shall be linked to deliverables and necessary approvals as defined in the RFP.
571	4 Project Timelines & Milestones	40+	UAT & Go-Live linkage	If UAT or Go-Live is delayed due to dependencies on third-party systems (APIs, departmental readiness), whether corresponding milestone payments will still be released upon bidder readiness.		Delays due to third party dependencies shall be considered accordingly and shall not attract penalties on the bidder.
572	4 Project Timelines & Milestones	40+	Integration milestone	Considering integration is a major effort, request to define a separate milestone/payment for completion of integrations with identified systems rather than linking entirely to final Go-Live.		As per RFP
573	4 Project Timelines & Milestones	40+	Resource mobilization	Request provision of an initial mobilization advance or early-stage milestone payment (e.g., on SRS/HLD approval) to support project initiation and resource onboarding.		As per RFP
574	4 Project Timelines & Milestones	40+	Payment timelines	Kindly confirm payment release timelines post milestone approval (e.g., 30/45/60 days), as this significantly impacts working capital planning.		CMH-CU will make best efforts to release the payment at its earliest.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
575	4 Project Timelines	40+	Overall timeline feasibility	Considering extensive integration scope across multiple departments and platforms, request confirmation whether timeline assumptions account for inter-department coordination and external dependencies.		The bidder shall plan and execute the project in alignment with defined timelines, considering inter-department coordination and dependencies as part of project planning.
576	4.1 UAT	46	UAT responsibility	Kindly confirm roles/responsibilities for UAT execution (test cases, environment readiness, user availability).		The bidder shall support UAT through test cases and environment readiness, while the Department shall facilitate user availability and approvals.
577	4.2 System Integration	47	Integration readiness	Please confirm whether all stakeholder departments will be mandated to provide APIs/data access within defined timelines to avoid delays.		CMH-CU shall facilitate access to required APIs; however, overall planning, coordination, and timely execution shall remain the responsibility of the selected bidder.
578	4.2 System Integration	47	Integration delays	In case of delays due to external system readiness, whether project timeline and SLA obligations will be correspondingly adjusted.		As per RFP
579	4.3 Load Balancer	47	Performance responsibility	Since load balancer is provided by GSDC, kindly clarify responsibility in case of performance bottlenecks arising due to infra constraints.		The bidder shall design and optimize the application to meet performance requirements; any bottlenecks arising due to infrastructure constraints shall be addressed by bidder in coordination with GSDC.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
580	Eligibility Criteria		Average Annual Turnover (₹7.5 Cr)	The tender requires an average annual turnover of ₹7.5 Crores from IT services. We request the authority to kindly provide relaxation in turnover criteria for MSME and DPIIT-recognized startup companies.	As per Government of India initiatives to promote MSMEs and startups, relaxation in financial criteria encourages wider participation. Many MSME/startup firms possess strong technical capabilities and skilled resources despite lower turnover. Allowing such relaxation will enhance competition and enable participation of competent and innovative bidders.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
581	Eligibility Criteria		CMMI Level & Multiple ISO Certifications	The tender requires CMMI Level 3/5 along with ISO/IEC 20000 and ISO 22301 certifications. We request the authority to kindly consider allowing ISO 9001 (Quality Management) and ISO 27001 (Information Security) certifications as sufficient in place of mandatory CMMI and additional ISO requirements.	ISO 9001 and ISO 27001 cover essential aspects of quality processes and information security required for IT service delivery. Mandatory requirement of multiple certifications may limit participation of technically capable firms. Relaxation will broaden competition while maintaining service quality and security standards.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
582	Eligibility Criteria		Consortium / Joint Venture	As per the tender document, consortium participation is not permitted. We kindly request the authority to allow consortium / joint venture bidding for this project.	Allowing consortium participation will enable companies to combine Government experience, technical expertise, and certifications collectively. This will strengthen proposal quality, reduce execution risk, and ensure successful and timely project completion.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
583	Technical Experience		Government API Integration Experience	The tender requires experience in integration of multiple APIs with Government systems in a single project. We request the authority to kindly consider similar API integration experience executed for private sector or enterprise platforms as eligible.	API integration capabilities are technology-driven and involve similar architecture, protocols, and security practices across sectors. Allowing equivalent private sector experience will enable participation of technically capable bidders and enhance competition.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
584	Eligibility Criteria		EPF Registration	The tender requires mandatory EPF registration. We request the authority to kindly allow submission of undertaking or alternative statutory compliance proof in cases where EPF registration is not applicable as per statutory norms.	Certain organizations may not fall under mandatory EPF applicability based on employee structure. Allowing flexibility will enable compliant and capable bidders to participate while ensuring adherence to labour laws.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
585	Eligibility Criteria		MSME / Startup Eligibility	The tender document does not specify any exemption or relaxation for MSME or DPIIT-recognized startups. We request the authority to kindly consider providing suitable relaxations in eligibility criteria such as experience, turnover, and certification requirements for MSME/startup registered companies.	As per Government of India initiatives under MSME and Startup India, encouraging participation of such entities promotes innovation, competitiveness, and cost-effective solutions. Providing relaxations will enable capable and emerging technology firms to participate while maintaining quality and efficiency in project execution.	As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
586	Commercial Terms		EMD Requirement	We request the authority to kindly allow exemption from submission of Earnest Money Deposit (EMD) for bidders registered under MSME and DPIIT-recognized startups, upon submission of valid registration certificates.	As per Government procurement policies, MSME and startup entities are often eligible for EMD exemption to promote their participation in public tenders. Granting such exemption will encourage wider participation and align the tender with national policies supporting small and emerging enterprises.	As per RFP
587	3	16–20	Project Planning & Mobilization	Whether project resources required during development are required to be deployed onsite at Gandhinagar or can be offsite/hybrid?		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
588	3	16–18	Scope of Work – WABA Integration	Whether WhatsApp Business API (WABA) license, number, and BSP will be provided by the department or needs to be procured by the bidder?		CMH-CU does not have any preferred WABA platform partner; the selected bidder may propose a suitable service provider, subject to approval by the Authority.
589	3	26–28	Notifications & Citizen Communication	If bidder is to provide messaging services, please specify expected monthly volume of SMS, WhatsApp, and email notifications.		As per RFP
590	3	25–26	GIS Module Integration	Who will provide GIS platform, APIs, and required licenses? If bidder scope, please specify preferred GIS solution or standards.		As per corrigendum 2
591	3	22–23	CM Helpline Integration	Clarification required whether bidder has to only integrate with existing CM Helpline CRM or develop a complete call center CRM solution.		As per RFP
592	3	19–20	Non-GSDC Components	Please provide detailed list of software/tools expected to be procured by bidder (DB, BI tools, API gateway, monitoring tools, etc.). For better understanding		As per RFP
593	3	26–27	Dashboards & Analytics	Whether any specific BI tool (Power BI, Tableau, open-source) is mandated or bidder is free to choose? If commercial tool required, who will bear license cost?		No specific BI platform is mandated; the bidder may propose a suitable tool to meet the functional requirement of the RFP, and required licenses shall be included as part of bidder scope.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
594	3	18–19	Database & Storage	Please specify whether data migration from existing/legacy systems is in scope. If yes, kindly provide details on the volume of data to be migrated, data formats, and the number of source systems involved.		No data migration will be required as of now.
595	Bid Submission	-	The RFP contains contradictory clauses regarding bid submission. One clause specifies online submission on or before 20/04/2026 (up to 06:00 PM) and physical submission on or before 21/04/2026 (up to 14:00 hrs at CMH-CU Office) . Additionally, Annexure 8 is provided for offline submission. However, another clause states that bids shall be submitted only online through the nProcure portal and that offline submissions shall not be accepted.	Kindly clarify the correct mode of submission to be followed, as there is inconsistency in the RFP regarding online and offline submission requirements.	It is requested to kindly amend the RFP and allow online submission only through the nProcure portal, ensuring clarity and consistency in the submission process.	As per RFP
596	3.12	45	Integration & Interoperability	Kindly clarify whether GIS functionality is required only for location capture i.e. geo tagging only (citizen/field officer) or full GIS-based visualization and analytics. As location will be captured by mobile application. Is GIS license of ArcGIS required here?		As per corrigendum 2

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
597	3.3	38–40	Application Development	For capturing citizen details during call center interactions, should the information be manually entered by the agent or is any automated caller identification expected?		As per RFP
598	3.12	45	Integration Scope	Regarding CRM/Call Center integration, please confirm whether bidder is required to develop only an agent interface complete CRM solution including ticketing, call logs, and reporting. Or any responsibility bidder has?		As per RFP
599	3.6	42	Security Requirements	Kindly specify the required security audits (CERT-In, STQC, VAPT, etc.), their frequency.		As per RFP
600	3.12	45	Integration & Interoperability	Kindly clarify whether the bidder is required to develop a complete end-to-end ticketing/grievance management system as part of the platform, or only integrate with an existing grievance/ticketing system (if available). If integration is required, please provide details of the existing system and APIs.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
601	9. Pre-Qualification Criteria, Caluse2, Financial Capability	90	The Bidder should have an average annual turnover from IT Software Design, Development & integration related services (Software Development & Operation & Maintenance / CRM / ERP / Grievance management application for workflow automation, Software Product Development) of at least Rs. 7.5 Crore in last three financial years (2022-23, 2023-24 and 2024-25). Bidder should not be Bankrupt. Note: Turnover from the following activities shall not be considered: • Hardware supply and maintenance • Manpower outsourcing • Non-IT services.	Request you to kindly amend the clause as: The Bidder should have an average annual turnover from IT & Software Design, Development & integration related services (Software Development & Operation & Maintenance / CRM / ERP / Grievance management application for workflow automation, Software Product Development) of at least Rs. 7.5 Crore in last three financial years (2022-23, 2023-24 and 2024-25). Bidder should not be Bankrupt. Note: Turnover from the following activities shall not be considered: • Hardware supply and maintenance • Manpower outsourcing • Non-IT services.	Since most large-scale software solutions are inherently integrated with IT infrastructure, associated hardware, and manpower as part of a comprehensive project, we request you to kindly consider the turnover derived from complete IT projects. This approach will also facilitate broader participation from potential bidders, thereby ensuring a more competitive and inclusive bidding process.	As per RFP

			12.5 and <17.5 Cr. = 8 marks c) Average Turnover ≥ 17.5 Cr. =10 marks			
611	Section 10: Technical Evaluation	96	5. The bidder should have valid and current relevant industry-recognized certifications as on the bid submission date. • ISO/ IEC 27000 series = 1 mark • ISO/ IEC 20000 = 1 mark • ISO 22301 = 1 mark • CMMi L5 = 2 marks	Kindly ammend as: "5. The bidder should have valid and current relevant industry-recognized certifications as on the bid submission date. • ISO/ IEC 27000 series = 1 mark • ISO/ IEC 20000 = 2 mark • CMMi L3 and above = 2 marks"		As per RFP
612	Annexure1	103	Format For Power of Attorney	Request you to kindly remove Annexure 1 and accept Power of Attorney in any format.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
613	Section 9, PQ-7	91-92	Pre-Qualification — CMMi Level 3+ Certification	PQ Criterion 7 mandates a valid CMMi Level 3 or above certificate for Application / Software Development as on bid submission date. Query: If a Bidder has formally initiated the CMMi Level 3 appraisal process and the appraisal is currently underway with a CMMI Institute—authorized Lead Appraiser, with documented evidence of engagement (appraisal contract, readiness review completion, or SCAMPI initiation), will such an in-progress appraisal be considered acceptable for Pre-Qualification? The Bidder is willing to provide an undertaking to complete the appraisal and obtain the certificate within a defined timeframe (e.g., 90 days from bid submission or prior to Lol issuance). This is sought in the spirit of encouraging broader participation from competent software development firms that have the requisite process maturity but are in the final stages of formal appraisal.		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
614	Section 9, PQ-7	91-92	Pre-Qualification — CMMi Level 3+ — Alternative Certifications	Further to the CMMi L3 requirement: Query: Will any of the following internationally recognized process maturity and quality management certifications be accepted as equivalent or alternative to CMMi Level 3, either individually or in combination? a) ISO/IEC 33001 (Software Process Assessment) b) ISO/IEC 12207 (Software Lifecycle Processes) c) ISO 9001:2015 (Quality Management Systems) with scope covering Software Development d) ISO/IEC 27001 (Information Security Management) combined with ISO/IEC 20000 (IT Service Management) e) Any other equivalent certification that demonstrates software development process maturity Many competent software development agencies, particularly those focused on agile and DevOps practices, have adopted ISO-based frameworks rather than CMMi. Accepting equivalent certifications would widen the pool of qualified		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
				bidders and promote competitive pricing under the LCS methodology.		

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
615	Section 9, PQ-7	91-92	Pre-Qualification — CMMi — Relaxation Request	We respectfully request the Tender Authority to consider relaxing or removing the CMMi Level 3 requirement as a mandatory Pre-Qualification criterion, and instead consider it as a Technical Qualification criterion with appropriate marks allocation. Rationale: a) CMMi certification is a process maturity assessment, not a measure of technical capability or project delivery quality. Several highly capable software firms delivering mission-critical government projects operate under ISO or agile frameworks without CMMi. b) The RFP already evaluates certifications under TQ Criterion 5 (Section 10), where CMMi L5 earns 2 marks. Making CMMi L3 a mandatory PQ gate eliminates firms that may score higher on all other TQ parameters. c) Under LCS methodology, wider participation drives competitive pricing, directly benefiting the Government. d) The Government of India's GFR 2017 (Rule 173) and DPIIT notifications encourage reducing restrictive eligibility criteria to		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
				promote participation of competent firms. If relaxation is not possible, we request confirmation of whether CMMi certification of a formally engaged implementation partner / subcontractor would be accepted (as the subcontractor would execute the software development scope).		

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
616	Fact Sheet, Sr. 18	6	Consortium / Joint Venture — Not Permitted	The Fact Sheet states that Consortium / Joint Venture is not permitted. Query: We understand that the Bidder must be a single legal entity for bid submission, contractual accountability, and PQ/TQ qualification purposes. However, we seek clarification on whether the selected Bidder (SDA) is permitted to engage a local implementation partner / deployment partner / subcontractor specifically for: a) On-site resource deployment at CMH-CU, Gandhinagar b) Local government liaison and coordination with departments c) Capacity building, training, and user acceptance support d) Day-to-day O&M support and helpdesk operations e) UI/UX development and mobile application development In this arrangement, the Bidder retains full contractual responsibility, accountability, performance liability, and PBG obligation. The local partner acts under the Bidder's direction and supervision. This is not a JV or consortium — it is a standard		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
				subcontracting arrangement for operational efficiency. Kindly confirm whether such an arrangement is permissible.		

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
617	Section 9, PQ-9	92	Local Office — Ahmedabad / Gandhinagar	PQ Criterion 9 requires a physical office in Ahmedabad or Gandhinagar, with an option to submit an undertaking to open one within 45 days of Lol. Query 1: If the Bidder has a formally engaged local deployment / implementation partner with an established, operational physical office in Ahmedabad, and the Bidder's project team operates from this partner's office for all local activities (liaison, coordination, on-site deployment, training), will this arrangement satisfy the local office requirement? Or must the office be registered exclusively in the Bidder's own name? Query 2: If the Bidder submits the undertaking to set up an office within 45 days, can the Bidder operate from the local partner's office during the interim 45-day period to ensure no disruption to project mobilization activities?		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
618	Section 9, PQ-6	91	Employee Strength — 100 IT Professionals	PQ Criterion 6 requires a minimum of 100 IT professionals on the Bidder's payroll continuously during the preceding one year. Query 1: Can the Bidder count IT professionals who are on the payroll of its wholly-owned subsidiary or group company, provided such professionals are available for deployment on this project and the Bidder furnishes a board resolution / undertaking confirming their availability? Query 2: If the Bidder engages a dedicated local implementation partner for this project (as discussed in our query on Consortium/JV), can the combined IT professional strength of the Bidder and its formally engaged partner be considered to satisfy this criterion, provided both entities furnish HR declarations?		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
619	Section 10, TQ-3	94-96	Technical Evaluation — Grievance Redressal System Experience	TQ Criterion 3 requires experience in a Grievance Redressal System / Module with 4 of 5 specified functionalities, for Central/State Govt / PSU, minimum ₹1 Crore project value. Query 1: If the Bidder has developed and operated a comprehensive CRM / case management / citizen service platform for a Government or enterprise client that includes grievance-equivalent workflow features (ticket registration, auto-routing to officers, multi-level escalation, status tracking, citizen feedback, and re-opening), will such a project qualify? The RFP uses 'Grievance Redressal System / Module' — does the term 'Module' confirm that grievance functionality delivered as part of a larger platform is acceptable? Query 2: Does the ₹1 Crore minimum value apply to the overall project value, or specifically to the grievance module's cost? In most enterprise projects, grievance management is one module within a larger engagement and is not separately priced.		1: The term “module” includes grievance functionality implemented as part of a larger system. 2. ₹1 Crore minimum value applies to the overall project value.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
620	Section 9, PQ-3	90-91	Pre-Qualification — Relevant Experience (Similar Project)	PQ Criterion 3 requires completed/ongoing projects related to Software Development & O&M (CRM / ERP / Workflow Automation / Software Product Development) for Central/State Govt / PSU, with specified value thresholds. Query 1: Will software development projects executed for Government-owned / Government-regulated entities such as public sector banks (SBI, BoB), public sector insurance companies (LIC, GIC), regulatory bodies (RBI, SEBI, IRDAI, PFRDA), statutory authorities, or autonomous bodies of Central/State Government qualify under this criterion? Query 2: The criterion specifies 'last three years from the date of bid submission.' For ongoing O&M projects that commenced more than 3 years ago but are currently under an active O&M contract with the client, will such projects qualify? The software development was completed earlier, but the O&M is ongoing within the 3-year window. Query 3: Will projects executed for private sector clients with similar technology scope (CRM, workflow		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
				automation, mobile apps, API integrations) be considered if they demonstrate equivalent technical capability, even though the client is not a Govt/PSU entity?		

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
621	Section 3.3.10	34	O&M Scope — All Future Integrations at No Additional Cost	Section 3.3.10 states that ALL API integrations (existing and new), enhancements, upgrades, replacements, migrations, version changes, protocol modifications, and interface adaptations shall be treated as an inseparable part of the Scope of Work during O&M, with no additional financial implications. Query 1: Is there any defined upper limit on the volume or complexity of new integrations that can be demanded during the O&M period without triggering the Change Request mechanism under Section 8.37? For instance, if 10 entirely new Government portals are launched during the 2-year O&M period and each requires full API integration, is this entirely within O&M scope? Query 2: Will existing integrations listed in Table 1 be frozen at the specifications available at Go-Live? Or if a platform listed in Table 1 undergoes a complete re-architecture post Go-Live (e.g., migrates from SOAP to REST, or changes authentication protocol), is the SDA required to re-integrate at no cost?		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
622	Section 3.3.4.1, Table 1	29-30	Integration with Existing Platforms — Third-Party API Readiness	Table 1 lists 25+ grievance redressal forums and 15+ service delivery platforms for integration. Query 1: Will the respective departments / platform owners be mandated to provide API documentation, sandbox environments, test credentials, and technical support to the SDA within a defined timeline? What coordination mechanism is proposed? Query 2: In cases where an existing platform does not expose APIs, or the platform owner does not provide timely API support, will the SDA's milestone timelines and SLA obligations be adjusted accordingly? Query 3: For Municipal Corporation systems (which may vary across 8+ cities with different technology stacks), will a standardized integration specification be provided, or must the SDA individually engage with each Municipal Corporation?		1. CMH-CU shall facilitate access to required APIs; however, overall planning, coordination, and timely execution shall remain the responsibility of the selected bidder. 2. Delays due to third party dependencies shall be considered accordingly and shall not attract penalties on the bidder. 3. The bidder shall coordinate with respective Municipal Corporations for integration; standardization, where feasible, shall be facilitated by CMH-CU.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
623	Annexure 7	114-116	Financial Proposal — Part B O&M Range (10-20% of Part A)	Annexure 7 specifies that Part B (O&M cost per annum) shall be within the range of 10% to 20% of Part A. The O&M scope includes: • 4 mandatory on-site resources (PM + Sr Dev + 2 Devs) for 24 months • 24x7 system monitoring • 12x7 helpdesk • All future integrations at no extra cost • Feature enhancements and version upgrades • Security monitoring and incident response • Staging / dev / QA environment management • All software licenses for Phase 2 Query: Given the comprehensive and open-ended O&M scope, if a Bidder's genuine O&M cost estimate exceeds 20% of Part A, is the 20% ceiling a hard constraint? Or can the Bidder represent the O&M cost realities and seek an adjustment? Alternatively, would the Authority consider increasing the ceiling to 25% to ensure sustainable service delivery quality during the O&M period?		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
624	Section 4, Milestone Table	40-45	Project Timelines — External Dependencies	The milestone timelines are calculated from T1 (LoI). However, several deliverables depend on actions by external stakeholders: • GSDC hardware provisioning and environment setup • Departmental API documentation and sandbox access • CMH-CU approvals (SRS, UI/UX, UAT sign-off) • CERT-In empanelled agency scheduling for security audit Query: Will delays solely attributable to external stakeholders (GSDC, departments, CMH-CU review cycles, CERT-In agency availability) be excluded from milestone delay calculations and associated penalties under Section 5.4? If yes, what is the proposed mechanism for documenting and mutually agreeing on such exclusions?		Delays due to third party dependencies shall be considered accordingly and shall not attract penalties on the bidder. Further documenting mechanism will be provided to selected bidder.

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
625	Section 3.3.6	32-33	AI, LLM, OCR — Hosting and Gujarati Language	Query 1: The RFP mandates AI/LLM hosting on GSDC or MeitY or GoG approved cloud within India. Will the use of commercially available LLM APIs from MeitY-empanelled / GoI-approved cloud providers (e.g., Indian AI platforms, Azure India region, AWS Mumbai region) be permitted? Or must all models be self-hosted on GSDC infrastructure? Query 2: For Gujarati handwritten OCR — given the limited availability of pre-trained models for Gujarati handwriting recognition and the nascent state of this technology globally, will the Authority accept a phased approach where: • Phase 1 (Go-Live): OCR for typed/printed Gujarati and English documents • Phase 2 (within 6 months post Go-Live): OCR for handwritten Gujarati with progressively improving accuracy benchmarks?		As per corrigendum 2

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
626	Section 5.7, SLA Table Point 3	58-59	SLA — Availability 99.7% — GSDC vs SDA Attribution	Query 1: What is the formal mechanism for attributing downtime to GSDC infrastructure failure vs. SDA application issues? Will there be a joint incident review committee? Query 2: Will GSDC provide infrastructure monitoring dashboards / APIs accessible to the SDA for real-time infrastructure health visibility and SLA evidence? Query 3: In cases of ambiguous root cause (e.g., performance degradation at the infrastructure-application boundary), who bears the burden of proof — GSDC or SDA?		Details will be provided to selected Bidder.
627	3.1.2	15	Key Objectives of Grievance Management	Please specify Service and scheme knowledge repository ?		As per RFP
628	3.2.1	16	Existing Ecosystem	Will the selected bidder be responsible for data migration from existing grievance systems, and if so, what is the volume and format of the data to be migrated?		No data migration will be required as of now.
629	3.3	16	Detailed Scope of Work for the Selected Bidder	Are there any specific user training and support expectations outlined for government officers and citizens using the system?		As per RFP

Sr. No.	Section No.	Page No.	Tender Clause	Query	Remarks	Response
630	3.3	16	Detailed Scope of Work for the Selected Bidder / Milestones	Could you elaborate on the reporting and dashboard requirements for real-time monitoring and management of grievances and services?		As per RFP
631	3.3.4.1	25	GIS Module Integration	Could you elaborate GIS module integration ?		As per corrigendum 2
632	3.3.4.2	31	API monitoring dashboard	Could you detail out API monitoring dashboard ?		As per RFP
633	3.3.11.2	35	Functional Scope	Elaboarate Broadcast and scheduling engine with dependency management ?		Details will be provided to selected Bidder.
634	8.37	85	Change Request Management	Is there a defined process for handling change requests that may arise during the project, especially those impacting scope, timeline, or cost?		As per RFP
635	7.3 "Evaluation Process"	65	The technical proposals shall be evaluated for a total of 100 marks. The maximum of top three (03) bidders who secure a minimum technical score of 70 marks shall qualify for the opening of their Financial Bids.	Please Clarify, in case of tie between participants how we will proceed.		Committee will decide as per standard practice.
