INTEGRAL COACH FACTORY, CHENNAI-38

PART I

CERTAIN DEFINITIONS.

1. **“Integral Coach Factory”:** Integral Coach Factory” shall mean the President of the Republic of India acting through the Sr. EDP Manager, Integral Coach Factory, Chennai – 600038, and shall include his successors and permitted assigns. This includes the Successor Railway authorized to deal with any matters, which these presents are concerned on his behalf. The term “Purchaser” and “User” have been used synonymously as Sr. EDP Manager and at various places in this Tender/Agreement, it is referred to as The Railway.
2. **”Successor Railway”:** shall mean and include such other Railway to which for administrative or other reasons this contract may during its pendency be transferred.
3. **“Contract”** shall mean and include the Notice Inviting Tender, Instructions to Tenderers, General Conditions of Contract (GCC Works April 2022), Special Conditions of Contract, Schedule of Quantities, Specifications, Drawings, Letter of Acceptance, Agreement and all other documents forming part of the contract.
4. **“Writings”:** includes all matters written, typewritten, or printed, reproduced either in whole or in part.
5. **“General Manager”:** shall mean the Officer in Administrative charge of the whole of Integral Coach Factory and shall mean and include the General Manager of the successor Railway.
6. **“Sr. EDP Manager”:** Sr. EDP Manager” shall mean the Officer-in-charge of IT Centre, Integral Coach Factory, Chennai – 600038, acting on behalf of the Railway.
7. **CONTRACTOR:** “Contractor” shall mean the person/firm/company whose tender has been accepted by the Railway and shall include his heirs, executors, administrators, successors and permitted assigns.
8. **Contract Administering Official / Engineer-in-Charge:**
For the purpose of this contract, the term “Engineer-in-Charge” (EIC) shall mean the Railway official nominated by the Railway to supervise and administer the contract on its behalf.

The Engineer-in-Charge shall be responsible for overseeing execution of the works, issuing instructions, certifying measurements, approving bills, and ensuring compliance with

INTEGRAL COACH FACTORY, CHENNAI-38

contract conditions.

Unless otherwise specified, the Sr. EDP Manager, Integral Coach Factory, Chennai shall act as the Engineer-in-Charge.

- 9. Bill paying official:** Bill paying office for this Contract of Integral Coach Factory shall mean Railway Accounts officer who admits bills under this contract for payment.
- 10. Railway Site:** Railway site is a specific location in a Railway office within the jurisdiction of Integral Coach Factory and is referred to by the same name under this tender.
- 11. Certificate of Installation/ Completion:** Certificate of Installation/ Completion under this tender shall mean the certificate by the same name issued by the contract Administering Official to the contractor for having executed the various works and quantities under this contract.
- 12. “Migration”** means Migration of existing SAP S/4 HANA version 1809 to SAP S/4 HANA version 2025 in SAP certified new hardware. The project shall be executed as a Brownfield System Conversion from existing SAP S/4 HANA 1809 to SAP S/4 HANA 2025.

INTEGRAL COACH FACTORY, CHENNAI-38

PART – II

INSTRUCTIONS TO TENDERERS

1. Submission of offers:

A. This tender will be processed through a single bid system in online mode. Bidders shall submit their bids electronically through the IREPS e-tendering portal. The Technical Bid and Commercial Bid must be submitted in their respective designated online sections. All required technical particulars and supporting documents shall be uploaded in the Technical Bid section. The Commercial Bid, including price, taxes, duties, and other commercial details, shall be filled and submitted only in the Commercial Bid section of the portal. No physical submission of documents is permitted.

B. Contracts made under this tender shall be governed by Indian Railways Standard General Conditions of Contract (GCC) for Works – April 2022, along with Special Conditions of Contract and Tender Documents. In case of any conflict, the provisions of Special Conditions of Contract shall prevail over GCC, and GCC shall prevail over other tender documents.

C. Tenders are invited on behalf of the President of India from established and reliable Tenderers for the conclusion of a contract for Migration of existing SAP S/4 HANA version 1809 to SAP S/4 HANA version 2025 in SAP certified new hardware and provide OEM support service for a period of five years. And additional two years extended AMC support to be provided. including design, supply, installation, testing, commissioning, migration and associated works, to be completed within the stipulated completion period as defined in the tender, along with post-completion maintenance obligations for a period of five (extendable by 2 years) years as specified in the Special Conditions of Contract.

D. Tenderers may enclose with their offer any other documents containing explanatory memorandum, catalog, etc., should they so desire.

E. Tenderers must keep their offer open for a minimum period of 60 days from the date of opening of tender, within which date the Tenderers cannot withdraw their offer, subject, however, to the period being extended further if required by mutual agreement from time to time.

F. All information in the tender must be in English. Information in any other language must be accompanied by an authenticated translation in English. Failure to comply with this may render the offer liable to be rejected. In the event of any discrepancy between the offer in a language other than English and its English translation, the English translation will prevail.

G. The term “Tenderer” is used in the tender documents shall mean the company on whose behalf the tender form has been submitted. It is further clarified that the individual signing the tender or other documents should be the authorized signatory of the company.

INTEGRAL COACH FACTORY, CHENNAI-38

H. Tenderers must ensure that the conditions laid down for the submissions of the offers are completely and correctly fulfilled. All formats available in this tender document should be filled up without leaving any columns blank. Tenders that are not complete as stipulated above may be summarily rejected.

I. Wrong Information:

If the tenderer deliberately gives wrong information in his tender or wrongfully creates circumstances for the acceptance of his tender, the Railway reserves the right to reject such tender at any stage.

J. No separate communication bearing on the tender may be addressed by the Tenderers to the Sr. EDP Manager, Chennai-600 038, or any other officer, and all explanatory remarks and clarifications which the Tenderer may desire to make may be incorporated in the offer form, failing which the remarks/clarifications may be ignored and tenders dealt with as it stands.

2. Conditions of contract:

A. Indian Railways Standard General Conditions of Contract **Indian Railways Standard General Conditions of Contract (GCC) for works, April 2022** as of current on the date of the tender, subject to modifications or supplementary instructions to Tenderers and also any special terms and conditions of the contract as may be stipulated by the Railway shall govern the contract. The Tenderers shall be deemed to have offered their quotation after acquainting themselves with these conditions and agreeing to abide by them in case their tender is accepted.

B. They are requested not to quote their conditions or refer to their printed conditions. The Railway, however, does not bind himself to consider or accept these deviations requested for.

3. Price Quotation:

A. The Tenderers should quote their most competitive prices and it should be noted that their quotations will not ordinarily be subject to further negotiations. Negotiations may, however, be carried out by the Sr. EDP Manager, whenever it is considered justified and Sr. EDP Manager's decision therein shall be final.

B. All prices should be written both in figures and words. Failure to write rates both in words and figures shall render the tender liable for rejection. Tenderers in their own

INTEGRAL COACH FACTORY, CHENNAI-38

interest should avoid alterations/corrections in the rates submitted by them. However if alterations/corrections in rates are inescapable each alteration/ correction should be indicated both in figures and words and also duly attested under the full signature of the tenderer.

C. The prices quoted shall be firm throughout the validity of the offer and subsequently during the currency of the contract and shall not be subject to any variation.

D. The tenderer shall indicate a breakup of prices for individual parts forming part of the whole system and attach as Annexure. Offers received without price break up are liable to be deemed as complete.

E. The Tenderer should also indicate the GST element separately.

F. SITE VISITS : Bidders shall familiarize themselves with the existing IT environment and system setup related to the migration of SAP S/4HANA 1809 to SAP S/4HANA 2025 on SAP certified new hardware. Since this assignment involves migration and up gradation of an existing system, bidders are advised to review the current infrastructure and operational requirements before submitting their proposals. If required, bidders may seek clarifications through email (email address : itcbasis@icf.railnet.gov.in). Any site visit, if permitted, shall be at the bidder's own cost and expense. The tenderer shall be deemed to have fully satisfied himself regarding **site conditions, infrastructure constraints, and scope of work**, and no extra claims on this account shall be entertained later.

G. Pre-Bid Queries:

- a. Bidders may seek any clarification from Sr. EDP Manager/ICF in respect of any condition. However, such clarifications must be submitted online through email to itcbasis@icf.railnet.gov.in, on or before 23.04.2026 for submission of queries as specified in the tender document. Bidders are requested to carefully study these "Instructions to Bidders" and the other documents forming part of this Tender Document.
- b. The pre bid meeting will be held on 27.04.2026.

4. Time Schedule:

In case of delays, the Contractor shall apply for extension of time with justification to the competent authority as per GCC.

Failure to complete the work within the stipulated time or approved extended time shall render the Contractor liable for **Liquidated Damages (LD)** as per provisions of **Indian Railways Standard General Conditions of Contract (GCC) for works – April 2022**, subject to maximum limits specified therein.

INTEGRAL COACH FACTORY, CHENNAI-38

5. Acceptance of offer:

- a) The Sr. EDP Manager reserves the right to accept a tender or reject any tender without assigning any reason and may or may not accept the lowest tender.
- b) Acceptance of tender will be communicated by formal acceptance of tender/Letter of Acceptance.
- c) The ICF reserves the right to increase or decrease the quantity of items mentioned in the Part-III.
- d) ICF reserves the right to terminate the FMS engineer support at any time as per the conditions laid down in the IR Standard General Conditions for Works (April 2022) as per the provisions of **Indian Railways Standard General Conditions of Contract (GCC) for Works), April 2022..**
- e) Railway administration reserves the right to extend the contract or determine (terminate) the contract in accordance with provisions of **Indian Railways Standard General Conditions of Contract (GCC) for works – April 2022**, including clauses related to **extension of time, termination, and rescission of contract.**

6. Execution of Agreement:

- a) The successful tenderer shall be required to execute an agreement for executing the above said **works in accordance with Indian Railways Standard General Conditions of Contract (GCC) for works – April 2022** according to the conditions of tender/contract accepted rates, specifications, schedule of prices and time schedules. Such an agreement shall be executed with the President of India acting through the Sr. EDP Manager. The cost of the stamp duty on the agreement shall be borne by the Contractor.
- b) In case of any doubt/clarification regarding the provisions of this tender and /or scope and details of work or any item which has a bearing on the offer to be made by the tenderer is requested to contact Sr. EDP Manager after fixing mutually convenient date and time before the due date for submission of the offer. The tenderer is requested to avail himself the benefit of this provision. The tenderer shall avail this benefit of visiting the location/site to enable him to quote the comprehensive rate and also to avoid ambiguity after the submission of the tender document. No claim whatsoever on account of lack of site knowledge shall be entertained after submission of the tender.

INTEGRAL COACH FACTORY, CHENNAI-38

SCOPE OF WORK, PERFORMANCE REQUIREMENTS AND MAINTENANCE OBLIGATIONS

1. Objective

The objective of this project is to upgrade the existing SAP S/4HANA 1809 landscape to SAP S/4HANA 2025 on newly procured SAP-certified hardware using **Brownfield Conversion approach (system conversion)**, ensuring continued vendor support, improved performance, enhanced security, scalability, and high availability. The work shall be completed within **4 months from the date of issue of Letter of Acceptance**, in accordance with GCC for Works – April 2022.

2. Description of Turnkey Work

- Supply, installation, and commissioning of SAP HANA-certified compute infrastructure
- Augmentation of existing setup
- Seamless migration of SAP landscape
- Technical upgrade from S/4HANA 1809 to 2025 (or latest)
- The bidder shall provide comprehensive managed support for all supplied hardware and software at Integral Coach Factory (ICF) for a period of seven (07) years
- No supplied Hardware and software shall reach End-of-Life (EOL) or End-of-Support (EOS) within the 7-year support period, and any such occurrence shall be addressed by the vendor through replacement or upgrade at no additional cost to ICF.

13. Scope of Work

3.1 Project Objective

The objective of this project is to upgrade the existing SAP S/4HANA 1809 landscape to SAP S/4HANA 2025 on newly procured SAP-certified hardware using a Brownfield Conversion approach (System Conversion), ensuring continued vendor support, improved performance, enhanced security, scalability, and high availability, with minimal disruption to existing business processes and retention of current configurations. No Greenfield or Selective Data Transition approach shall be adopted without prior approval.

Project completion timeline: 4 months from Date of Award

3.2 Assessment & Planning

- Detailed assessment of SAP landscape (DEV, QAS, PRD)
- Execution of SAP Readiness Check
- Custom code and add-on compatibility assessment
- Sizing using SAP Quick Sizer
- Preparation of project plan and risk mitigation plan
- Assessment of customized cross-module processes (e.g., MRP in PP)
- Remediation strategy for all custom developments (Z programs, enhancements, exits, BADIs)
- Assessment of extensively customized business processes across modules, including

INTEGRAL COACH FACTORY, CHENNAI-38

- Cross-module configurations (e.g., MRP executed within PP and other non-standard implementations), and evaluation of their impact on S/4HANA conversion.
- Identification, adaptation, and remediation strategy for all custom developments (Z programs, enhancements, user exits, BAdIs) to ensure compatibility with S/4HANA 2025.

3.3 Hardware Setup

- Supply of SAP HANA-certified servers as per sizing recommendations in PART-III or better.
- Installation and configuration of CPU, memory, storage, networking
- RAID configuration and enterprise storage setup with redundancy.
- Installation of SAP-certified OS (SUSE / RHEL)
- Hardware performance benchmarking and commissioning

3.4 SAP Upgrade & Installation

- Upgrade / Migration of SAP S/4HANA from Version 1809 to SAP S/4HANA 2025
- SAP HANA database upgrade
- Kernel and support package updates
- Validation of installed components and add-ons.

3.5 Data Migration

- Full system backup prior to migration.
- Trial migration in non-production systems.
- Data reconciliation and consistency validation.
- Business process validation across modules.

3.6 Custom Code & Interface Adaptation

- Execution of ABAP Test Cockpit (ATC) checks for S/4HANA readiness.
- Identification and modification/remediation of incompatible custom programs (Z-reports, enhancements, user exits, BAdIs).
- Simplification Item Catalog impact analysis and necessary code adaptation.
- SPAU/SPDD adjustment activities during system conversion.
- Code optimization for HANA database (performance tuning, removal of database-specific logic).
- Identification and removal/archival of obsolete or unused custom code.
- Adaptation of custom code to align with S/4HANA data model changes (e.g., MATDOC, Business Partner approach, etc.).
- Validation and remediation of interfaces (RFC, IDoc, APIs, Web Services).
- Testing and reconfiguration of third-party integrations and middleware systems.
- End-to-end integration testing of all interfaces post-conversion.

INTEGRAL COACH FACTORY, CHENNAI-38

- Shall provide AI feature with joule.
- Preparation of detailed documentation for all modified custom objects and interfaces.
- Special attention shall be given to cross-module and non-standard implementations (e.g., MRP within PP and other customized configurations), ensuring full functional continuity post migration.
- All activities related to custom code remediation and interface adaptation shall be included in the bidder's scope. No additional cost shall be payable for unidentified custom objects discovered during execution.

3.7 Security

- Operating system hardening as per SAP best practices.
- Application of security patches.
- Performance Optimization
- HANA parameter tuning.
- Memory and CPU optimization.
- Performance benchmarking before and after migration.

3.8 Performance

- HANA tuning
- CPU and memory optimization
- Performance benchmarking

3.9 High Availability

- Configuration of HANA System Replication (if applicable).
- Backup strategy implementation (Full, Incremental, Log).
- Conducting failover testing.

3.10 Acceptance Testing & Go-Live

- Facilitation of Acceptance Testing.
- Rectification of identified defects.
- Preparation and execution of Cutover Plan
- Production Go-Live and stabilization support.

3.11 Support

- Implementation Phase Support – Dedicated Project Manager, SAP Basis Consultant, HANA Database Expert, and Security Specialist.
- Hyper care Support – Minimum three months post go-live including monitoring, issue resolution, and performance tuning.

INTEGRAL COACH FACTORY, CHENNAI-38

- Annual Maintenance Support – 24x7 critical support, quarterly patch updates, and The Contractor shall ensure **system performance and availability as per specified performance requirements**.
- Any failure impacting system functionality shall be treated as **defect/deficiency under contract and rectified within reasonable time**, failing which action may be taken as per GCC.

3.12 Acceptance Criteria

- Successful upgrade to SAP S/4HANA 2025.
- Business modules that are currently functional in SAP S/4HANA 1809 should be migrated to SAP S/4HANA 2025.

The following modules were currently in use:

- Production Planning (PP)
- Plant Maintenance (PM)
- Quality Management (QM)
- Product Costing (CO)) – Limited Functionality
- Sales & Distribution (SD) – Limited Functionality
- Inventory - Materials management (MM) – Limited Functionality
- Human resources (HR) -Payroll Incentive– Limited Functionality with FIORI
- Customized SAP Incentive Application (depends on HR & PP Module)
- Integration with the central applications of Indian Railways for information interchange
- No data loss and validated data integrity.
- Performance equal to or better than existing system.

4. Migration Methodology

Stage 1 – Assessment & Planning

- Analyse existing SAP S/4HANA 1809 landscape (DEV, QAS, PRD), including system architecture and database.
- Run SAP Readiness Check (latest version) and analyze results.
- Review custom code, add-ons, and third-party integrations for compatibility.
- Perform hardware sizing using SAP Quick Sizer and validate infrastructure requirements.
- Conduct Simplification Item Catalog analysis and identify impacted business processes.
- Assess extensively customized and non-standard configurations, including cross-module implementations (e.g., MRP within PP), and evaluate their impact on migration.
- Carry out data consistency checks and data volume analysis, including archiving requirements prior to migration.
- Perform Business Partner (BP) conversion readiness assessment (Customer/Vendor integration – CVI).
- Identify required system pre-checks (SPAM, add-on compatibility, Unicode status, etc.).
- Prepare detailed migration strategy (Brownfield / Complete Data Transition, as applicable).

INTEGRAL COACH FACTORY, CHENNAI-38

- Prepare detailed project plan, including milestones, resource plan, and downtime estimation.
- Prepare comprehensive risk mitigation and rollback strategy.

Stage 2 – New Hardware Setup

- End of life for the supplied hardware shall not be less than 7 years.
- Supply and install SAP HANA-certified hardware
- Install SAP-certified OS (SUSE / RHEL)
- Install compatible SAP HANA database version
- Configure storage, backup, and network
- Validate infrastructure readiness

Stage 3 – Development & Quality Upgrade

- Upgrade Development system
- Upgrade Quality system
- Perform unit testing and integration testing
- Conduct performance tuning
- Apply security patches

Stage 4 – Production Migration & Go-Live

- Take full production backup
- Execute production upgrade
- Perform post-upgrade validation
- Activate monitoring
- Confirm system stability

Stage 5 – Acceptance Testing & Go-Live

- Business process testing
- Data reconciliation
- Financial validation
- Fix identified issues
- Obtain sign-off

Stage 6 – Hyper care & Support 3-month stabilization

- Three months stabilization support
- Monitor performance
- Resolve incidents
- Fine-tune system
- Knowledge transfer to core members of the IT Centre.

INTEGRAL COACH FACTORY, CHENNAI-38

5. Backup and Restoration Policy

Type	Frequency	Retention
Incremental	Daily	7 Days
Full	Weekly	1 Month

Backups shall be configured and executed at the Virtual Machine (VM) level, Application level, and Database level. All backup configuration, scheduling, monitoring, and restoration testing shall be carried out by the Vendor at migration phase.

6. Performance level commitments

Performance Requirements During Stabilization Period (3 Months Post Go-Live)

6.1. Migration Completion Commitment

- Upgrade of SAP S/4HANA 1809 to 2025 shall be completed within the approved project timeline.
- Production migration should be executed in parallel with the live system, with final cutover carried out during weekends without any interruption.
- Zero data loss during migration.
- 100% financial and master data reconciliation before Go-Live sign-off.

6.2 performance obligation

During stabilization period:

- The Contractor shall ensure that the system remains operational and stable during the stabilization period during hyper care period, meeting the agreed performance benchmarks. Any failure shall be rectified on priority to ensure continuity of operations.

6.3 The Contractor shall provide necessary technical support during hyper care period to address system issues.

Critical issues affecting production shall be attended on priority and resolved within reasonable time acceptable to the Engineer-in-Charge.

6.4 Backup & Recovery Commitments

- Daily backups.
- Log backups as per RPO design.
- Backup success rate shall be ensured at 100%.

6.5 Performance Stabilization

- System performance shall be equal to or better than pre-migration baseline.
- Continuous monitoring during stabilization.
- Performance tuning of HANA and application layer.
- Resolution of post-upgrade performance issues.

6.6 Knowledge Transfer & Handover

Before completion of support period, vendor shall:

- Provide system documentation.

INTEGRAL COACH FACTORY, CHENNAI-38

- Share backup and recovery configuration procedures.
- Conduct knowledge transfer sessions.
- Submit final stabilization report.
- Provide database configuration details, data linkages, and data validation reports/requests.
- Provide details of data integration mechanisms (interfaces, APIs, data flow).
- Provide details of analytics and data models used (e.g., CDS views, embedded analytics).
- Provide details of security mechanisms implemented.
- Provide details of access control and role-based authorization (RBAC).

7. Post-Completion Maintenance Obligations

The Contractor shall provide post-completion maintenance support for the system for a period of 7 years.

During this period:

- The Contractor shall ensure proper functioning of installed systems.
- Any defects, failures, or deficiencies shall be rectified at no extra cost.
- Preventive and corrective maintenance shall be carried out.
- Necessary updates, patches, and configurations shall be maintained.

Failure to perform maintenance obligations may result in:

- Recovery from Performance Guarantee
- Action as per Indian Railways Standard General Conditions of Contract (GCC) for works – April 2022

8. Commercial Terms

Payments shall be governed by relevant clauses of Indian Railways Standard General Conditions of Contract (GCC) for works – April 2022.

Hardware

- 80% of the value of equipment supplied shall be paid after successful installation and commissioning, upon certification by ICF confirming receipt of complete equipment in good condition as per contract terms.
- The balance 20% shall be paid after successful go-live and acceptance testing of the equipment, upon issuance of the final acceptance certificate by ICF.

Software and Licenses

- 100% payment shall be released after supply, installation, and successful activation of software licenses, duly certified by ICF.

Migration Activities

INTEGRAL COACH FACTORY, CHENNAI-38

- 80% payment shall be released after successful go-live and submission of completion certificate.
- The balance 20% shall be paid after completion of the hyper care support period and acceptance by ICF.

Support Service Charges

- FMS Engineer support charges shall be paid on a quarterly basis, after satisfactory completion of each quarter.
- CAMC charges, applicable after completion of the five-year warranty period, shall be paid quarterly, after satisfactory service delivery.

8.1 Go-Live:

- The system shall Go-Live within Four months from the date of issue of LOA, post successful completion of migration and user acceptance testing.

8.2 Project Timeline Submission:

- Tenderer shall prepare and submit a detailed project implementation timeline, outlining major milestones such as infrastructure readiness, data migration phases, testing, and Go-Live activities.
- The timeline shall be mutually discussed and agreed upon by ICF prior to commencement of the work.

INTEGRAL COACH FACTORY, CHENNAI-38

PART III Schedule of Rates

Rates for all items must be quoted in the following pro-forma. The description of taxes quoted should be given clearly along with the percentage and amount.

NOTE:

1. Based on the sizing parameters and minimum baseline hardware specification given below, bidders are required to submit their quote for the following Bill of Materials. This is the baseline requirement only. However, bidders are urged to conduct a proper Sizing activity before offering the Solution.
2. All rates should be in Indian Rupees.
3. The total value of bid should be given in figures as well as words. In case of any discrepancy between the two values, the amount given in words will be taken as correct.
4. Quantities given in the Schedule of rates should be same as the given in technical offer. Offered total quantity should not be less than minimum specified in the schedule.
5. Any additional item must be given at the end of each sub-heading.

A. Hardware and Software (Supply scope):

S. No	Item description	Units	Total Quantity	Unit Price	Sub total	Taxes as Amount	GST (18%)	Amount (Inclusive of GST)
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
1.	SAP Certified HCI Hardware	Number	3					
2.	TOR Network Switch	Number	2					
3.	NAS Storage	Number	1					
4.	Smart Rack 7.5 kw	Lot	1					
5.	Virtualization Software – With License/subscription (5 Years)	Lot	1					
6.	Operating System – With License/subscription (5	Lot	1					

INTEGRAL COACH FACTORY, CHENNAI-38

	Years)							
7.	Backup Software With License/subscription (5 Years)	Lot	1					
8.	FMS Engineer (For 1 year)	Lumpsum	1					
9	SAP Installation, configuration & Migration Cost with 5 years support`	Lot	1					

The bidder shall quote the cost of Extended Warranty Support (Hardware and Software) for a period of two (2) years beyond the initial five (5) year warranty period. The contract shall be treated as a single, indivisible, and non-severable contract in its entirety, including all components such as supply, installation, warranty, and extended support. The cost quoted for the extended warranty support shall be included in the total contract value and shall be considered for the purpose of financial evaluation.

S. No	Item description	Units	Total Quantity	Unit Price	Sub total	Taxes as Amount	GST (18%)	Amount (Inclusive of GST)
1	Extended Warranty Support for 2 years	Lumpsum						
2	FMS Engineer (for six (06) years after completion of the first year)	Lumpsum						

Baseline Hardware Specifications

S.No	Parameter	Description of Requirement
Hardware Specifications		
1	Chassis	Rack Mountable
2	CPU	hardware should be proposed with any of the following processor as supported by SAP for HANA Certified hardware on Intel Xeon-Gold with 16 Cores or higher processor model
3	Memory	DIMM Slots available - 32
4		Appliance should be configured with the required memory. Required memory should be at least 1024 GB of RAM. The required memory to be proposed using either 64GB or 128GB DDR5 only.
5	Bus Slots	6 x PCIe 5.0 slots
6	Storage Bays	Server must have 12LFF Bays, expandable up to 16LFF Bays
7	Storage	8x 4TB SAS HDD and 4x 3.84TB SSD

INTEGRAL COACH FACTORY, CHENNAI-38

8		Each Server Node proposed should have minimum 2 Processor (No Single Processor Servers are allowed). The server which will be supplied should be present in the list of sap certified hardware in this link https://www.sap.com/dmc/exp/2014-09-02-hana-hardware/enEN/#/solutions?filters=v:deCertified
9		Each Server Node proposed should provide minimum Memory 1024 GB per node & should be scalable to 2 TB
10		Each Server Node proposed Should have minimum 2x DualPort 10/25G SFP+ & Management Port
11	Controller	PCIe based x32 RAID controller with 8GB Flash backed write cache, supporting RAID 0, 1, 5, 6, 10, 50, 60, 1T, 10T supporting up to 32 direct-connected storage devices (SAS/SATA/NVMe). Must support mix-and-match SAS, SATA, and NVMe drives to the same controller. Controller must support 6G SATA, 24G SAS, 16G NVMe. Controller must support following : 1. Expand Logical Drive 2. Instant Secure Erase 3. Migrate RAID/Stripe Size 4. Modifying Cache Write Policy 5. Move Logical Drive 6. Re-enable Failed Logical Drive
12	Ethernet Networking	2 x 2P 10/25GB SFF28 Ports , 4 x 1Gb Ethernet ports
13	Interfaces	USB support with Up to 5 total: 1 front, 2 rear, 2 internal. 1GbE Dedicated management port
14	Power Supply	2 x 1000W hot plug redundant low halogen power supplies with minimum 94% efficiency
15	Fans	Redundant hot-plug system fans
16	System Security	UEFI Secure Boot and Secure Start support Tamper-free updates - components digitally signed and verified Immutable Silicon Root of Trust Ability to rollback firmware FIPS 140-2 validation Secure erase of NAND/User data Common Criteria certification TPM (Trusted Platform Module) 2.0 option Advanced Encryption Standard (AES) and Triple Data Encryption Standard (3DES) on browser Bezel Locking Kit option Support for Commercial National Security Algorithms (CNSA) Secure Recovery - recover critical firmware to known good state on detection of compromised firmware
17	Operating Systems and Virtualization Software Support	Windows Server. AHV Red Hat Enterprise Linux (RHEL) SUSE Linux Enterprise Server (SLES) Enterprise virtualization platform (or equivalent) ESXi. Canonical Ubuntu Oracle Linux and Oracle VM

INTEGRAL COACH FACTORY, CHENNAI-38

18	Provisioning	1. Should support tool to provision server using RESTful API to discover and deploy servers at scale 2. Provision one to many servers using own scripts to discover and deploy with Scripting Tool (STK) for Windows and Linux or Scripting Tools for Windows PowerShell
19	Firmware security	1. For firmware security, system should support remote management chip creating a fingerprint in the silicon, preventing servers from booting up unless the firmware matches the fingerprint. This feature should be immutable 2. Should maintain repository for firmware and drivers recipes to aid rollback or patching of compromised firmware. Should also store Factory Recovery recipe preloaded to rollback to factory tested secured firmware
20	Embedded Remote Management and firmware security	1. System remote management should support browser based graphical remote console along with Virtual Power button, remote boot using USB/CD/DVD Drive. It should be capable of offering upgrade of software and patches from a remote client using Media/image/folder; It should support server power capping and historical reporting and should have support for multifactor authentication 2. Server should have dedicated 1Gbps remote management port 3. Server should have storage space earmarked to be used as a repository for firmware, drivers and software components. The components can be organized in to install sets and can be used to rollback/patch faulty firmware 4. Server should support agentless management using the out-of-band remote management port 5. The server should support monitoring and recording changes in the server hardware and system configuration. It assists in diagnosing problems and delivering rapid resolution when system failures occur 6. Two factor Authentication 7. Local or Directory-based user accounts with Role based access control 8. Remote console sharing upto 6 users simultaneously during pre-OS and OS runtime operation, Console replay - Console Replay captures and stores for replay the console video during a server's last major fault or boot sequence. Microsoft Terminal Services Integration, 128 bit SSL encryption and Secure Shell Version 2 support. Should provide support for AES and 3DES on browser. Should provide remote firmware update functionality. Should provide support for Java free graphical remote console. 9. Should support managing multiple servers as one via - Group Power Control - Group Power Capping - Group Firmware Update - Group Configuration - Group Virtual Media and Encrypted Virtual Media - Group License Activation 10. Should support RESTful API integration 11. System should support embedded remote support to transmit hardware events directly to OEM or an authorized partner for automated phone home support 12. Server should have security dashboard : displaying the status of

INTEGRAL COACH FACTORY, CHENNAI-38

		important security features, the Overall Security Status for the system, and the current configuration for the Security State and Server Configuration Lock features. 13. One-button Secure Erase designed to decommission/repurpose servers 14. NVMe wear level display 15. Workload Performance Advisor - Provides server tuning recommendations to improve server performance
21	Server Management	Software should support dashboard view to quickly scan the managed resources to assess the overall health of the data center. It should provide an at-a-glance visual health summary of the resources user is authorized to view.
22		The Dashboard minimum should display a health summary of the following: • Server Profiles • Server Hardware • Appliance alerts
23		The Systems Management software should provide Role-based access control
24		Zero Touch Provisioning (ZTP) using SSDP with remote access
25		Management software should support integration with popular virtualization platform management software like Enterprise virtualization platform (or equivalent) vCenter & vRealize Operations, and Microsoft System Center & Admin Center
26		Should help provide proactive notification of actual or impending component failure alerts on critical components like CPU, Memory and HDD.
27		Should provide an online portal that can be accesible from anywhere. The portal should provide one stop, online access to the product, support information and provide information to track warranties, support contrats and status. The Portal should also provide a personalised dashboard to monitor device health, hardware events, contract and warranty status. Should provide a visual status of individual devices and device groups. The Portal should be available on premise (at our location - console based) or off premise (in the cloud).
28		Should help to proactively identify out-of-date BIOS, drivers, and Server Management agents and enable the remote update of system software/firmware components.
29		Should have dashboard for firmware baselines while performing minimum required firmware checks and highlighting out-of-compliance devices for updates with the selected firmware baseline
30		The Server Management Software should be of the Fully compatible and supported with single-point OEM support.
31	Warranty	5 Year Onsite OEM warranty .
32	Installation	Server Installation has to be done by OEM engineer
33	OEM Criteria	OEM should have Established OEM with minimum 5 years presence in India and proven enterprise deployments consistently in past two year period (2023 to 2025) as per the IDC reports.
Hyperconverged Infrastructure Specifications		

INTEGRAL COACH FACTORY, CHENNAI-38

34	The proposed system should be a Hyper converged infrastructure with a software-centric architecture that tightly integrates compute, storage, networking and virtualization resources and other technologies, from scratch in a commodity hardware box, supported by a single vendor. It should allow all the integrated technologies to be managed as a single system through a common toolset that can be expanded through the addition of nodes to the base unit. The proposed hyper converged system should have Single Management Console to manage integrated Compute, Storage and Hypervisor
35	System should be delivered with factory integration to reduce onsite deployment time and go live at rapid speed.
36	The bidder shall supply minimum 3 nodes to achieve the HCI solution with Two Processor in each Node
37	HCI solution should ship with Enterprise virtualization platform (or equivalent) vSphere Hypervisor/Hyper-V/AHV.
38	All nodes in HCI cluster should be connected over 10G SFP+, use of proprietary interconnects leading to vendor lock-in is unacceptable.
39	Proposed HCI solution should have minimum 5 customer references
40	Proposed solution should provide minimum of 24 TB usable storage without considering storage efficiency features . 10% of the raw capacity to be considered for SSD (Caching)
41	Proposed Solution should maintain two copies of data even in case of one Node Failure to maintain - Data Resiliency
42	The proposed HCI must maintain two copies (one original & one copy) of the data in the cluster. In the event of a node failure, the cluster should start rebuilding the second copy of data in the remaining two nodes.
43	The solution should be capable of intelligent placement for workloads, so that the load gets distributed dynamically without manual intervention and provides efficient performance.
44	The proposed solution should have the capability to configure Virtual Machines for 1 Node or 2 Nodes failure without the requirement of any additional software licensing.
45	The HCI solution should be proposed with the proven and leading hypervisors out of AHV, Hyper-V and vSphere. Hypervisor OEM MAF must be attached.
46	Server (HCI node) hardware shall be certified to run AHV (Acropolis Hypervisor) / Enterprise virtualization platform (or equivalent) ESXi hypervisor/ Hyper-V/RHEL.
47	Proposed HCI should support standard features like vmotion or equivalent, affinity rules, automated/dynamic resource scheduling and replication.
48	Proposed HCI shall support to, hot-add CPU & Memory without the need to reboot the VMs (if the underlying guest OS supports). All the features should be made available in GUI base interface for ease of operation
49	The solution should be capable of intelligent placement for workloads, so that the load gets distributed dynamically without manual intervention and get efficient performance.
50	The solution should natively support DR solution with ASync data replication- 1hr RPO. There should not be any license limitation on number of VMs being replicated.

HCI
Configurations

INTEGRAL COACH FACTORY, CHENNAI-38

51		The proposed solution should support multi-site (One to Many & Many to One) replication.
52		The solution should provide a single unified management console for the management of the entire environment including virtualized environment as well as software defined storage environment, underlying Hardware and associated components.
53		The management interface should provide timeline dashboard for cluster historical events such as upgrades, hardware replacements, and alerts, etc.
54		Solution should have provision to recover/restore a deleted VM or volume group vDisk within 12 hours of deletion.
55		The solution should also provide capacity analytics which can identify over-provisioned resources so they can be right-sized for most efficient use of virtualized resources.
56		Should support Rest API and Command line management along with GUI interface.
57		The HCI solution should support minimum 32-nodes in a single cluster. And the license supplied shall not limit the number of VMs.
58	File	File Services : The proposed HCI must natively support File Services (NFS, CIFS & SMB) and Should support file replication across HCI clusters and data centers. Files services should be configured with a usable capacity of 5 TB . If natively not available vendor must quote external NAS devices with 5 TB Usable capacity
59	HCI Configurations	The proposed HCI solution must support Data Compression and Deduplication natively and licenses for this feature should be factored in the bill of material. If the bidder's solution does not support compression and Deduplication, then the bidder should propose 100% additional capacity as at least 2:1 data efficiency is expected with modern day solutions without impact to performance
60	Resiliency	Resiliency: The solution should deliver zero data loss in case of disk, host or network failure. The HCI platform should have ability to replicate VMs independently & irrespective of the Hypervisor SW.
61	HCI Functionalities	The solution should support data replication and application consistent snapshots. There should not be any limitation on number of VMs to be replicated.
62	Scalability	Scalability: HCI solution should support dynamic scalability without downtime and automated resource allocation during upgrades. The upgrade should be granular and in 1node increments.
63	Interoperability	Interoperability: Proposed HCI solution should support mix and match various node configurations and Intel CPU generations in the same cluster. This will allow flexibility to use advancement in CPU technology without any limitations
64		The proposed solution should provide seamless upgrade for Firmware, Hypervisor, Storage OS, BIOS and other such functions which are required in the HCI platform. The upgrade should be online and should not mandate any kind of OEM engagement.
65		The solution should include security features like distributed firewall, micro-segmentation and identity-based security for securing the applications and virtual machines.
66	HCI Functionalities	The solution should provide overlay network with VPN, BGP, Access control lists and Policy-based routing features. Required licenses should

INTEGRAL COACH FACTORY, CHENNAI-38

		be supplied from day-1
67		Solution must provide native Data-At-Rest Encryption with native KMS support, Bidder should propose all required licenses from day-1
68		The proposed HCI solution should have security compliance to ensure highly secure HCI environment. As there are mission critical applications, the solution should have at least two or more industry certifications. (e.g., NIST, FIPS140-2, EAL2 CCC-Common Criteria Certified, DISA- approved STIG etc.,)
69		Must have provisioning, operations and lifecycle management of Kubernetes, automated deployment, scaling, and operation of application containers across a cluster of hosts
70		The management interface should provide timeline dashboard for cluster historical events such as upgrades, hardware replacements, and alerts, etc
71		Solution must provide platform ready for Kubernetes deployment and management. This must include RBAC,SSO and load balancing
72		HCI solution must support Kubernetes key automation for multi master/worker provisioning with storage Integration with require storage e.g. File/Block/Object with seamless upgrade rollout using automation engine.
73		HCI Solution should be cable of running Redhat Openshift
74		Solution must be platform ready for hybrid multicloud DBaaS
75		Proposed HCI Solution should be able to provide predictable overheads during implementation
76		No Hardware Lockin for DR
77		Virtualization software should provide enhanced visibility into storage throughput and latency of hosts and virtual machines that can help in troubleshooting storage performance issues.
78		HCI Management console must provide ways to optimize infrastructure by right sizing vms, reclaiming unused resources. Reporting of Inactive VM, IDLE VM & Overprovisioned VM should be available.
79		Capacity Planning & Just in time forecast to clearly predict the utilization & proactive avoid capacity issues.
80		Create Custom Dashboards for Monitoring Eg. CIO Dashboard
81		The vendor should submit copy of valid ISO 14001, ISO 27001 certificates as on tender submission date which is in the name of the respective HCI software and hardware
82		SI bidders should provide a purpose built hypervisor with minimal footprint that installs directly on the bare metal x86 server hardware with no dependence on general purpose OS for greater reliability and security.
83		Support for heterogeneous guest OS - desktop and server OS for Windows OS and Linux (Redhat, Centos, SuSE, Ubuntu). SI Bidders should own the migration of physical Windows and virtual workloads to proposed Hypervisor platform
84		Proposed hypervisor should support standard features like VM Migration, HA, DRS/Hot Spot avoidance and replication
85	Hypervisor	Hypervisor shall provide automated live migration for initial placement and balancing of available resources with the rules to define affinity and / or anti-affinity of workloads
86		Hypervisor should provide ability to grant / ensure resources to virtual

INTEGRAL COACH FACTORY, CHENNAI-38

		machines as they need for hosting latency sensitive workloads. Also the initial placement of workloads should consider CPU, Memory and Storage contentions / hotspots
87		Hypervisor shall provide zero downtime host patching with maintenance mode to move running workloads to other hosts on the platform with a consistent audit trail of the patching process
88		Hypervisor shall provide centralized interface from which virtual machine access switching for the entire datacenter can be configured, monitored and administered
89		Hypervisor should provide centralized disk based protection (backup/restore) capabilities for the virtual Windows and Linux workloads with file level restore and built-in deduplication to reduce backup storage requirements.
90	Network	Solution shall support configurations of 802.1q VLANs which are compatible with standard VLAN implementation of other vendors
91		Virtual machine performance reports for performance and utilization of resources- It shall co-exist and integrate with leading system management vendors
92		10 GB Switch Copper 24 Port + 4 SFP+ Uplink Ports Layer-3 Stackable , Dual personality 10G ports with Dual Power Supply loaded from Day-1 - 2Qty
93	Support	All the hardware & software to be quoted with 5 years of warranty. Bidder shall have back to back agreement with OEM with Next business Day (NBD) service for the 3 years.
94	Eligibility	HCI Eligibility Criteria
95		Proposed HCI Solution should be in the Industry-recognized enterprise solution of Recognized by leading global industry analysts for HCI solutions
96		Qualified HCI Solution
97		The manufacturers should have local TAC (Technical Assistance Centre) based in India for offering post-sales technical support
98		In case End-Customer demands for an Onsite demonstration, the bidder must comply with the requirements of
99		HCI solution must have direct OEM, L1, L2 and L3 support, 24x7x365 days with unlimited incident support (Telephonic/ Web/ Email) and technical contacts/contract with 60 mins or less response time including the unlimited upgrades and updates.
	ToR Switch Specifications	
100	Chassis	Rack Mountable
101	Power supply	The switch should support Dual hot-swappable power supplies
102	Ports	The switch shall support up to 24 x 10G SFP+ Ports with 4 x 1G/10G/25G/50G SFP ports and day one and populated with required 10G SFP+ transceivers
103		1 RJ-45 serial console port
104		1 RJ-45 out-of-band management port
105	Switching Capacity	Shall have switching capacity of 780 Gbps or more and throughput of 580 Mbps or More
106	Architecture	Should have 8GB DDR4
107		Should have Stacking Bandwidth of 200 Gbps

INTEGRAL COACH FACTORY, CHENNAI-38

108		Should have MAC Table capacity of 32500 or more
109	SDN	Open Flow protocol capability to enable software-defined networking
110		The switch should support HTTP redirect function
111		The switch should support User role to define a set of switch-based policies in areas such as security, authentication, and QoS. A user role can be assigned to a group of users or devices, using switch configuration
112	Features	The switch should support Remote intelligent mirroring to mirror selected ingress/egress traffic based on an ACL, port, MAC address, or VLAN to a local or remote switch anywhere on the network
113	Environmental Features	Shall support IEEE 802.3az Energy-efficient Ethernet (EEE) to reduce power consumption
114		Operating temperature of 0°C to 45°C
115		The Warranty shall be offered directly from the switch OEM
116	Warranty	Lifetime warranty with advance replacement and next-business-day delivery
117		Software upgrades/updates shall be included as part of the warranty
Backup Software		
118		The environments will have to be protected with policy-based backup scheduling capability and should leverage the common disk-based backup appliance.
119		The virtualized environment, should be protected with native integration into AHV/Enterprise virtualization platform (or equivalent)/Hyperv for providing control to the administrator to flexibly configure backup and recovery policies for the virtual environment
120	Features	The backup protection for virtualized environment should provide for data store level, VM level as well as granular file level recovery within a VM
121		The solution should have the capability to define specific retention policies for each of the backups stored on the backup appliance.
122		Proposed backup solution must have inbuilt capability to protect the backed up disk volume from Malware
123		The offered software must support agent-less backup of virtual environment including AHV, Enterprise virtualization platform (or equivalent), Hyper-V etc through integration with their hypervisor managers.
124		The software must provide inbuilt dedupe, compression and encryption feature to integrate with disk storage
SMART RACK		
125	Parameter	Description of Requirement
126	System Integration	Factory-integrated enclosure providing a complete "all-in-one" infrastructure including power, precision cooling, and management.
127	Internal Cooling	Integrated precision cooling units (e.g., 1TR/2TR) dedicated to the rack. System must support cooling redundancy to ensure continuous availability.
128	Power Protection	Integrated Rack-mount UPS with N+N redundancy options, supporting capacities from 7kVA to 10kVA.
129	Energy Storage	Internal battery bank providing a minimum backup time of 10 minutes, scalable up to 60 minutes.
130	Surveillance	Integrated security camera for real-time monitoring of the enclosure and

INTEGRAL COACH FACTORY, CHENNAI-38

	(Camera)	its immediate surroundings.
131	Local Visual Alerts	Mounted visual status beacon to provide immediate notification of hardware events or environmental alarms.
132	Physical Security	Integrated access control system supporting PIN/Biometric authentication for secure entry to IT assets.
133	Monitoring Interface	Centralized Rack Data Unit (RDU) with a front-mounted HMI touch display (minimum 7-inch) for local health assessment.
134	Remote Management	Software-enabled 360° visibility of all rack components, allowing real-time monitoring and performance insights.
135	Power Distribution	Integrated distribution panel and Rack PDUs (Basic, Metered, or Monitored types) for granular power tracking.
136	Safety Systems	Internal space must support smoke detection modules and optional fire suppression.
137	Cable Management	Dedicated internal vertical and horizontal cable managers to maintain optimal airflow and organization.
138	Floor Environment	Optimized for deployment in non-raised floor environments like standard office or utility rooms.
139	Certification	The fully assembled integrated unit must be CE certified for safety and quality compliance.
140	Required Accessories	KVM & LCD Console, DCIM Integration, Environmental Sensors, Cable Management, LTS Support
FMS Engineer		
141	FMS Engineer	FMS Engagement: A dedicated on-site engineer will be deployed. Scope of Support: Covers HCI solutions, backup software, Windows/Linux OS, and server/storage hardware. Daily Operations: Engineer will manage routine tasks and system monitoring. Troubleshooting: Handles issue resolution across supported systems. Outcome: Ensures high availability, optimal performance, and seamless IT operations.

INTEGRAL COACH FACTORY, CHENNAI-38

PART- IV

GENERAL CONDITIONS OF CONTRACT

1. Indian Railways Standard General Conditions of Contract (**GCC for Works**), **April 2022**, as amended up to date of tender, subject to modifications or supplementary instructions and Special Conditions of Contract stipulated in this tender, shall govern this contract and all matters arising out of or in connection with this contract.

No verbal or written arrangement varying, supplementing or abandoning this contract or any of its terms shall be binding on the Railway unless such variation is **formally incorporated through written amendment** and duly signed by the authorized representative of the Railway.

2. The powers conferred upon the President by these conditions and all directions, discretions and approvals to be given by him may, unless otherwise expressly provided by these conditions, may be exercised by the **General Manager or any officer authorized by him**, including the Sr. EDP Manager or any other officer duly empowered for the purpose.
3. The Tenderer whose tender is accepted shall hereinafter be referred to as the “**Contractor**”, and shall be bound by the terms and conditions of the contract.

4. **Law Governing the Contract:**

The contract shall be governed by law for the time being in force in the Republic of India.

5. **Income Tax and other Taxes:**

The Contractor shall be liable to pay all applicable taxes, duties, levies including **GST**, as per prevailing laws.

The Railway shall not be responsible for any such liabilities, except as specifically provided in the contract.

6. **Communication to being writing:**

All notices, communications, references and complaints concerning the works shall be in writing and no communication not in writing shall be recognized.

7. **Service of Notice on the Contractor:**

The contractor shall furnish to the Railway the name, designation and addresses of his authorized agent at Chennai and all complaints, notices, communications and references

INTEGRAL COACH FACTORY, CHENNAI-38

shall be deemed to have duly given to the contractor if delivered to the contractor or his authorized agent or left at or posted to the address given and shall be deemed to have been so given in the case of posting on the day on which they would have reached such address in the ordinary course of post or on the day on Which they were so delivered or left. In the case of contract by partners, any change in the constitution of the firm shall be forthwith notified by the contractor to the Railway.

8. Time Schedule:

In case of delay in completion of work, the contractor shall apply for extension of time, stating reasons for such delay, to the competent authority. The grant of extension of time shall be governed by the provisions of the Indian Railways General Conditions of Contract (GCC), April 2022. In the event of failure to complete the work within the stipulated time, Liquidated Damages (LD) shall be levied as per GCC provisions.

9. Validity of the offer:

The vendor should indicate the period for which their offer is valid, in any case the validity of offer cannot be less than 60 days from the date of opening of the tender.

10. Protection Clause:

The Railway reserves the right to terminate the contract in accordance with provisions of **GCC for Works – April 2022**, including termination for default, convenience, or other applicable conditions as specified therein.

11. Progress of work: The Contractor shall submit periodic progress reports in the format and frequency as directed by the Engineer-in-Charge. Submission of such reports shall not prejudice the rights of the Railway under the contract.

12. In the event of any dispute or difference arising out of or in connection with the contract, the same shall be referred to arbitration in accordance with the provisions of the Arbitration and Conciliation Act, 1996, **and** relevant clauses of GCC for Works – April 2022. The arbitral tribunal shall be appointed as per extant Railway rules. The award of the arbitral tribunal shall be final and binding on both parties.

13. Subject to the above arbitration provisions, the courts at **Chennai** shall have jurisdiction over matters arising out of this contract.

14. Performance Guarantee

The Contractor shall furnish a Performance Guarantee as per provisions of GCC for Works – April 2022 within the stipulated time after issue of Letter of Acceptance. Failure to submit Performance Guarantee shall render the contract liable for termination.

INTEGRAL COACH FACTORY, CHENNAI-38

PART V

Special Conditions of Contract

5.1 Conditions related to Execution of Work

- a) Instructions issued by Engineer-in-Charge (EIC) shall be followed during the supply and migration, screen changes knowledge transfer.

Execution and Inspection of Work:

The Contractor shall execute the entire work in a sound, efficient, and workmanlike manner to the satisfaction of the Railway.

The Engineer-in-Charge or his authorized representative shall have full powers, at all stages of execution, to inspect the work at any time.

The Engineer-in-Charge shall have the authority to reject any work or material which, in his opinion, does not conform to the specifications or requirements of the contract. Such decisions shall be final and binding on the Contractor.

The decision of the Engineer-in-Charge regarding the interpretation of specifications, drawings, and the intent of the contract shall also be final and conclusive.

5.2 Completion Period and Time Essence:

- a) The Contractor shall complete the migration work in all respects, leading to issuance of Acceptance Certificate by the Engineer-in-Charge, within a period of Four (04) months from the date of issue of Letter of Acceptance (LOA).

This shall be followed by a Three (03) months Hyper Care support period, as specified in the contract.

Time is the essence of the contract, and the Railway attaches utmost importance to the timely completion of the work.

The attention of the Contractor is invited to the provisions relating to Liquidated Damages, extension of time, and determination of contract due to default, as stipulated in the General Conditions of Contract.

- b) Once the LOA is issued and the Contractor has signed the agreement, no increase in rates will be granted during the tenure of the contract. If for any reason it is found necessary to insert any new item of work, rate for this item of work can be mutually decided. If the contractor is unable to do so, ICF reserves the right to cancel the entire contract and to call for fresh tenders at the risk and cost of the contractor as per GCC termination provisions.
- c) The contractor shall not sub-contract, assign or transfer this work or any part thereof, to any other person or persons nor shall the contractor take in any partners without the written consent of the Sr.EDP Manager/ICF. Any assignment or subletting of the contract in contravention of the above shall be held to terminate the contract and forfeit any amount due to the Contractor including Security Deposit as per GCC termination provisions.
- d) The work shall be carried out at Sr.EDP Manager's office associating nominated official and on ICF's working days. The working hours of the office are 09.30 A.M. to 5.30 P.M. Monday through Friday and 9.30 AM to 12.30 PM on Saturdays. However, if required, the work can be carried out beyond the

INTEGRAL COACH FACTORY, CHENNAI-38

working hours, at the discretion of ICF, with prior consent from the Sr.EDP Manager.

- e) Sr.EDP Manager, ICF shall have the option of associating his personnel with the entire work in all its phases. The contractor shall provide such personnel with all necessary information and facilities to carry out their functions. But the fact that ICF Personnel are associated with the Contractor's Personnel in the contracted work shall not reduce the Contractor's responsibilities under this contract in any manner. Final responsibility to satisfy ICF of the satisfactory completion of supplies rests with the Contractor.
- f) ICF shall not be responsible for providing accommodation to the Contractor or to his representatives who will be visiting Office of Sr.EDP Manager, ICF in course of work under this Contract. However, working space will be provided.
- g) All equipment/tools required for the Project implementation work as per scope of work will be provided by the Contractor.
- h) No allowance or any other compensation will be paid by ICF for the visits of the contractor or his representatives to ICF's sites and for the time spent by them at ICF site, for performing work covered under this contract.
- i) All the work shall be of the best quality and shall be to the entire satisfaction of ICF. For this purpose, the contractor shall adopt necessary quality assurance.

Delay Due to Railway (ICF):

In the event of any failure or delay by ICF in furnishing to the Contractor any data, drawings, or other particulars necessary for execution of the work, or in issuing instructions to commence or proceed with the work, or due to any other reason attributable to ICF, such failure or delay shall not vitiate the contract or alter its character.

The Contractor shall not be entitled to any compensation or damages on this account, except for grant of Extension of Time (EOT) as considered reasonable by the Engineer-in-Charge, in accordance with the provisions of the General Conditions of Contract.

- j) Progress Reports: The Contractor shall, from time to time render such reports concerning the progress of the contract work as required by ICF. The submission, receipt and acceptance of such reports shall not prejudice the rights of ICF under the contract nor shall operate as an estoppel against ICF merely by the fact that ICF has not taken notice of, or subject to test, any information contained in such report.
- k) ICF shall have the right to depute its staff to associate in the work during the course of development, testing and trial runs to be performed by the contractor with a view to develop skills. The contractor shall offer all reasonable facilities towards this end without any extra cost.
- l) The contractor shall train Associate ICF Officers/Staff in minor trouble-shooting, maintenance of application systems or any screen changes between the versions.
- m) The contractor shall test the applications and demonstrate to ICF that the requirements specified are met. This should be done to the satisfaction of ICF
- n) Arising out of the testing, the contractor shall establish to the entire satisfaction of ICF that the entire work supplied/executed/delivered/implemented is in accordance with the provisions of this tender.
- o) The bidder shall supply and install all the software with legal licenses for the software. The bidder will

INTEGRAL COACH FACTORY, CHENNAI-38

provide OEM disks also for all the software .Supply of freeware, shareware or similar is strictly prohibited. The contractor shall provide a list of software installed on all hardware.

Failure of Contractor and Execution at Risk & Cost:

- (i) If the Contractor fails to execute the work, either in part or in full, in accordance with the terms of the contract, the Railway shall be entitled to take necessary action in accordance with the provisions of the General Conditions of Contract.
- (ii) The Railway may get the balance work executed through any other agency or departmentally, at the risk and cost of the Contractor, without prejudice to any other rights available under the contract.
- (iii) All additional costs, charges, damages, and expenses incurred by the Railway in completing such work shall be recoverable from the Contractor. Such recovery may be effected from:
 - any money due or becoming due to the Contractor under this contract, or
 - any other contract with the Railway, or
 - the Contractor's Security Deposit / Performance Guarantee.
- (iv) The decision of the Engineer-in-Charge regarding the necessity and extent of such work shall be final and binding, subject to the provisions of the contract.

Unsatisfactory Performance:

- (i) If at any time during the currency of the contract, the **Sr. EDP Manager/ICF** or his authorized representative is of the opinion that the Contractor is not executing the work in accordance with the contract requirements or is performing unsatisfactorily, the Railway shall have the right to take action as per the provisions of the contract.
- (ii) In such cases, the Railway may impose:

5.3. Service Level Commitments

5.3.1 Service Parameters

The following Service Level Agreements (SLAs) define the severity classification, response and resolution timelines, and applicable penalties for non-compliance during the contract to ensure effective system support and performance.

5.3.2 Hyper care support period

Severity	Description	Resolution Time	Penalty for Non-Compliance
Critical (P1)	Production down	30 minutes	Rs. 10,000 per every 10 mintues past 30 minutes
High (P2)	Major process impacted	1 hour	Rs. 5,000 per every 10 mintues past 1 hour

INTEGRAL COACH FACTORY, CHENNAI-38

Medium (P3)	Limited functionality impact	4 hours	Rs. 2,000 per every 10 minutes past 4 hour
Low (P4)	Minor issue	1 business day	Rs. 1,000 per every 1 hour past 1 day.

5.3.3

Hardware Warranty Support – Payment & Penalty

SLA Conditions

- Incident-Based Support
- Applicable for all hardware failures and performance issues.
- Penalty shall be calculated on a monthly basis, subject to a maximum of the BG value.
- Response Time: 4 hours
- Resolution Time / Spare replacement: 24 hours
- Minimum Uptime: 99%

Description	Resolution Time / Uptime	Penalty for Non-Compliance
Hardware Availability	As per SLA mentioned above	1% per instance
Hardware Failure Resolution	As per SLA mentioned above	1% per instance
Spare Replacement	As per SLA mentioned above	1% per instance
Preventive Maintenance	Quarterly	1% per instance

5.3.4

FMS Engineer

Description	Resolution Time / Uptime	Penalty for Non-Compliance
FMS Engineer Availability (during defined working hours)	100% availability	Penalty shall be calculated on a quarterly basis at 1% of the quarterly FMS charges per day of non-availability, subject to a maximum of quarterly charges
FMS Issue Response	Within 30 minutes	Penalty shall be calculated on a quarterly basis at 1% of the quarterly FMS charges per instance of delay, subject to a maximum of quarterly charges

Additional Conditions

- FMS engineer shall act as single point of contact for issue coordination.
- Vendor responsible for monitoring, backup verification, and escalation.
- No double penalty shall be imposed for the same fault.
- Shift timing is as directed by ICF.
- **Liquidated Damages (LD)** for delay in completion, as per the applicable clause of this contract.

(iii) In addition, action may be taken in accordance with the provisions of the **Indian Railways Standard General Conditions of Contract (GCC) – April 2022 (Works)**, including but not limited to recovery, determination of contract, or execution of work at risk and cost of the Contractor.

INTEGRAL COACH FACTORY, CHENNAI-38

(iv) The decision of the **Engineer-in-Charge** in this regard shall be final and binding, subject to the terms and conditions of the contract.

5.4. Minimum Resource Deployment

- The Contractor shall deploy a full-time, on-site dedicated team for the SAP ERP migration in new hardware at ICF. During the implementation stage i.e. till the last go-live date, the full team needs to be deployed on-site i.e. at ICF's premises. However, off-shore resources can be utilized with due permission from ICF.
- The Contractor shall deploy concurrent resources, comprising of members specified & approved by ICF, to ensure concurrent execution to meet overall contract period plan & detailed plan.

5.5. Hardware Sizing

- a) The Contractor shall carry out detailed hardware sizing for migration of the existing SAP S/4HANA system to SAP-certified infrastructure at ICF. Minimum specifications provided in Part-III shall be treated as baseline; however, the Contractor shall propose **equivalent or** higher configurations for the complete landscape (Development, Quality, and Production).
- b) Sizing shall be based on SAP standards, OEM guidelines, and industry best practices.
- c) The Contractor shall submit detailed sizing calculations, along with assumptions and methodology, as part of the proposal.
- d) The Contractor shall be fully responsible for sizing of servers, storage, and network infrastructure, including requirements for performance, scalability, and business continuity.
- e) The Contractor shall conduct necessary site assessment and prepare the Bill of Materials (BoM), considering reuse of existing infrastructure wherever feasible, without compromising performance.
- f) The proposed infrastructure shall ensure required system performance, response time, and availability throughout the contract period.

5.6. Project Migration Monitoring and Reporting

The Contractor should provide written progress reports at regular intervals, which have been defined below. The Contractor should ensure that all the issues/requirements flagged during discussions/meetings, shall be attended immediately and reported in the next meeting.

Weekly: The Contractor shall submit to ICF a written progress report every week. The Contractor shall also report exceptions and issues that require action.

Monthly: The Contractor shall conduct monthly project execution committee meetings that shall be held at ICF premises. The date and time of the meeting shall be decided mutually between the parties. The Contractor shall provide a written report on the following:

Progress against the Project Management Plan

Status of all risks and issues discussed in the last meetings

INTEGRAL COACH FACTORY, CHENNAI-38

Testing Strategy, Details on all the stages of testing that would be performed.

Test Result of each stage of Testing

Man Power Utilization and succession planning.

The formats and contents of the weekly and monthly progress reports will be finalized at the start of the project preparation phase with the program office. ICF reserves the right to ask the Contractor for the project review reports other than the standard weekly review reports.

5.7. Risk and Issue management

- a) The Contractor shall develop a Risk Management Plan and shall identify, analyze and evaluate the project risks, and shall develop cost effective strategies and action plans to mitigate those risks.
- b) The Contractor shall develop an issues management procedure to identify, track, and resolve all issues confronting the project. The risk management plan and issue management procedure shall be done in consultation with ICF's program management office.
- c) The Contractor shall monitor, report and update the project risk profile. The risks should be discussed and a mitigation plan be identified during the project review meetings with the program office.

5.8. Supply & Installation of Hardware

- a) The Bidder will prepare the complete hardware requirement for running all the applications along with the requisite software. The requirements have to be specified after due workload analysis, server sizing, and capacity requirement evaluation.

The hardware design shall include **adequate redundancy** to ensure continuous operation. The system shall be configured such that there is **no single point of failure**, and services remain available in case of component failure.
- b) The bidder shall ensure that, the hardware specifications submitted, would meet all the requirements of ICF S4 Hana migration project and provide the required performance and other criteria at the time of actual implementation.
- c) All software supplied with the Hardware shall have required licenses. Use of share-ware kind of software is strictly prohibited.
- d) Product Roadmap for the next 7 years, from the Hardware OEM, to be provided for each item under supply
- e) The compatibility of hardware, network and software systems must be analyzed before submitting the bid. The Bid will include a detailed solution proposed with the list of parts with the justification for choice of the quantity, capacity and other factors.
- f) The Bidder shall study this document, make site visits, get his doubts and prepare a complete solution for hardware for running all the applications, to be migrated, along with the requisite software. The Bidder shall prepare Bill of Materials for Hardware components, testing and certification plans with specifications for each component. The complete hardware requirements have to be specified considering all necessary factors such as performance, backup, security, availability, reliability, scalability etc. The hardware specifications shall be submitted along with the tender.
- g) The technical specifications for Hardware are indicated at Baseline hardware specification in PART-III. The specifications define the minimum, baseline requirements of ICF S4 Hana migration Project. The

INTEGRAL COACH FACTORY, CHENNAI-38

bidder is advised to study the entire document carefully, collect other inputs from ICF and prepare a complete specification for the solution proposed for submission along with the tender. ICF has made reasonable effort to make the approximate requirements in the specifications laid at baseline specification for hardware. The bidder should provide specifications that are either equal to or better than the specifications given by ICF. All the items that are required for fulfilling the scope of requirements of the project must be specified irrespective of whether they are included in ICF specifications or otherwise. This being a turnkey project, the final responsibility of offering the best solution that will meet the functional requirements with required performance, security, availability, reliability and scalability lies with the contractor.

- h) The bidder must quote for all essential hardware items required for successful functioning of the system as a whole. The bidder can consider optional items, over and above the essential items, which may not be required but can provide add-on/additional functionality in the interest of project.
- i) The bidder must quote for all the items specified, including optional items. Optional items will not be considered for evaluation of lowest offer. The bidder must quote for any item, which they find essential for implementation of turnkey project mentioning the same as additional items, which would be considered for evaluation. If the bidder desires to suggest any extra (optional) item, it must be mentioned separately indicating “Optional” which will not be considered for evaluation.
- j) The Bidder shall ensure availability of spares and software updates/patches for a period of at least 7 years from the date of purchase order.
- k) Bidder has to provide documentary evidence for back-to-back support agreement with the respective OEM.
- l) The installation of the ordered Systems shall be carried out without disturbing the ongoing working of the existing system seamlessly.
- m) Contractor will liaise with respective OEM and ensure installation / configuration / Support Issues for all Hardware/Software components installed including Factory Integrated items/components
- n) Detailed designs and drawings required for installation of equipment and the scheme of layout and connections required shall be submitted by the Bidder along with his offer.
- o) Obtaining of licenses in addition to the existing licenses or any other statutory requirement for installation and working of all equipment shall be the responsibility of the Contractor.

5.9. Integrated /Final acceptance Testing

- a) Go-live of the migration shall commence only after successful completion of Migration Acceptance Testing. The scope of migration includes upgrading SAP S/4 HANA from version 1809 to 2025 on the new hardware.
- b) Any defects noticed during the Final acceptance testing shall be set right through repair or replacement within a time period to be fixed. The Final acceptance shall be finalized only on completion of these deficiencies. In case the Contractor causes a delay in setting right the deficiencies within the time period, penalty will be applied and if the delay exceeds 30 days, the completion rectification of the deficiencies may be undertaken by ICF on account of the contractor, as at the same time applying penalty. These costs shall be recovered from the payments due to the contractor or from their performance guarantee Bond.

INTEGRAL COACH FACTORY, CHENNAI-38

- c) As the system configuration is to be proposed by the Contractor, it shall be ensured before Final Acceptance that the system has the capacity to take care of the existing applications being run and also provide suitable facilities for software development for future Applications. Any short comings, in this regard, will be made good by the contractor.

5.10. Technical Documents

a) Hardware

- All hardware supplied must be provided with user, technical and administrative and any other standard manuals that are required for their installation, operation and maintenance.
- To prepare and furnish the documentation for the entire installation including Storage area networks, location of hardware components on the Rack, important cabling done for interconnecting devices.
- The detailed documentations on the test performed on various hardware components along with the test results. Any specific test requested by ICF should be carried out and submit the test results.

b) Application Software

- Documents shall, inter alia, include:
 - a) Installation Procedure
 - b) Operation Procedure, System initialization, audit trails backup, recovery etc.
 - c) Administration procedure – role based security scheme, user authentication and management, Disaster Recovery Procedure.
- c) All documents should be in English using commonly used conventions and clearly understandable format.

5.11. Deliverables:

The deliverables necessarily, but not exclusively, include the supply/services mentioned in Part III (hardware and software).

5.12. Hardware Warranty

- a) The Contractor shall carry out installation and commissioning of all hardware and software and provide comprehensive onsite warranty for a period of five (05) years from the date of commissioning, covering both hardware and system software.
- b) FMS Engineer support shall be provided for One (01) year in scope of the work in this contract.
- c) The Contractor shall quote separately for Extended Warranty from OEM for hardware and software for an additional two (02) years and FMS Engineer support for six (06) years as per Part III. The contract shall be treated as a single, indivisible and non-severable contract in its entirety, including all components such as supply, installation, warranty, extended warranty and FMS support. The cost of such extended warranty and FMS support shall be included in the total contract value and shall be considered for financial evaluation
- d) During the warranty period, the Contractor shall ensure 24×7 maintenance support.
- e) The Contractor shall have a back-to-back support agreement with OEM, and a copy shall be submitted to ICF.

INTEGRAL COACH FACTORY, CHENNAI-38

f) Warranty shall include, but not be limited to:

- Installation / re-installation / migration of SAP S/4 HANA (1809 to 2025)
- Database, OS, and firmware upgrades
- Troubleshooting, failure recovery, and performance tuning
- Configuration / reconfiguration and security management

g) The Contractor shall **repair or replace defective equipment/parts free of cost**, including all duties and incidental expenses.

h) If defects are not rectified within **10 days** of notification, the warranty period shall be extended by the period of delay.

i) Replaced or repaired components shall carry the **same warranty terms** as the original equipment.

j) In case of failure by the Contractor to rectify defects within stipulated time, ICF shall have the right to:

- Get the work executed at the risk and cost of the Contractor, and
- Recover such costs from payments due or Performance Guarantee.

l) The Contractor shall ensure **onsite support at Chennai**, without any additional cost, for all warranty-related services.

m) The Contractor shall submit **OEM Warranty Certificate** for all supplied items.

5.13. Hyper Care Support

- a) The Contractor is required to provide an active Hyper Care support after Go-Live for a period of 3 months.
- b) The „Hyper Care“ starts immediately after the date of Go-Live.
- c) Full project team deployed during the Project implementation is required to be present during Hyper Care period.
- d) All application/technical/other issues arising during the post Go-live operation of the system will be addressed by the Contractor as per SLA.
- e) The system should be stabilized during this period and the ICF users must be able to perform their day to day activities as envisaged in the Scope of work.

5.14. Final Acceptance Certificate

- a) On successful completion and acceptability tests, receipts of all deliverables etc., and after ICF is satisfied with the working of the system and completion of various stages of project, the Final Acceptance Certificate signed by the Contractor and the representative of ICF will be issued.
- b) The final acceptance certificate will be issued separately for Hardware and Migration work, after the supply, installation and commissioning of all hardware, after due tests, and after the successful go-Live.

INTEGRAL COACH FACTORY, CHENNAI-38

Installation, migration, integration, and final acceptance of applications on the new hardware infrastructure and training (for any screen changes) completed to the satisfaction of ICF.

5.15. Delays in the Contractor's Performance

- a) Delivery of the hardware and software and performance of other activities shall be made by the contractor in accordance with the time schedules specified in the PART-VII.

Any delay in the performance of the Contractor's obligations shall be dealt with in accordance with the provisions of the **Indian Railways Standard General Conditions of Contract (GCC) for works) – April 2022**. In case of delay, the Contractor shall be liable for one or more of the following actions:

- Levy of Liquidated Damages (LD) as per relevant Indian Railways Standard General Conditions of Contract (GCC) for works
 - Termination of Contract in terms of Indian Railways Standard General Conditions of Contract (GCC) for works
 - Forfeiture of Performance Guarantee and Security Deposit, as applicable under Indian Railways Standard General Conditions of Contract (GCC) for works
- b) If at any time during performance of the contract, the contractor should encounter conditions impeding timely performance of the activities, the contractor shall promptly notify ICF in writing of the facts of the delay, its likely duration and its cause(s). As soon as practicable after receipt of the contractor's notice, ICF shall evaluate the situation and may at its discretion extend the contractor's time for performance, in which case the extension shall be ratified by the parties by amendment of the contract.

5.16. Termination of the Contract

- a) ICF may without prejudice to any other remedy for breach of contract, by written notice of default sent to the contractor, terminate the contract in whole or in part if: -
- The contractor fails to perform the activities determined by the contract within the time periods specified in the contract, or any extension thereof granted by ICF.
 - The contractor fails to perform any other obligations under the contract
- b) The contractor shall continue performance of the contract to the extent of the part not terminated.

5.17. Completion Period

The Project implementation until "Go-Live" is to be completed within Four months from the date of issue of Letter of Acceptance of the Tender. This will be followed by Hyper Care" for a period of three months. The contractor should give the split up of various activities of time schedule given in PART-VII.

5.18. Contractor's Responsibility

All costs, damages and expenses which ICF may have incurred or suffered and compensation for not supplying/providing the facilities contemplated in the tender are recoverable from the contractor under the terms of this contract or the relevant law may, at the discretion of ICF be recovered by deducting the requisite amounts from any money due and payable or refundable to the contractor on any account whatsoever or by legal proceedings. ICF also reserves the right and shall be entitled to retain payments due to the contractor under this contract and to set off the same against all claims whether arising out of this contract or out of any other transaction whatsoever against the contractor. In exercising this right ICF

INTEGRAL COACH FACTORY, CHENNAI-38

shall not act unreasonably.

5.19. Execution of Work

- a) All the work shall be executed in strict conformity to the provisions of the contract document and with such explanatory detailed designs, specifications and instructions as may be approved from time to time by ICF based on detailed design and engineering carried out by contractor in line with requirements as per contract document. The contractor shall be responsible for ensuring that the work throughout are executed in the most substantial, proper and work man like manner with the quality of material and workmanship in strict accordance with the specifications and as per sound industrial practices and to the entire satisfaction of ICF.
- b) Contractor shall bring all tools that are required by the contractor for the purpose of transportation of materials and execution of the work. This shall include spare parts and consumable miscellaneous stores. The rates quoted by the contractor shall be deemed to be inclusive of labour required to ensure efficient and methodical execution of work.
- c) The contractor shall take all precautionary measures in order to ensure protection of his own personnel moving about or working on ICF premises and shall have to conform to the rules and regulations of ICF. If help or intervention of ICF is required for this purpose, the contractor shall apply in writing to ICF for protection.
- d) The contractor should abide by all ICF regulations and also ensure that his representatives, agents or sub-contractors follow the same, by giving notice to them about the provision for this clause and consequent liability of the contractor under the agreement.
- e) The contractor shall keep on the works, at all times, efficient and competent staff to give necessary directions to his workman and to see that they execute their work in sound and proper manner.
- f) The contractor shall take necessary precautions for working near the power lines. If at any time ICF finds the safety arrangements is inadequate or insufficient, the contractor shall take immediate corrective action as directed by ICF representative at site. Any direction in the matter shall in no way absolve the contractor of his sole responsibility to adopt safe working methods.

5.20. Price (Lump Sum):

- a) The rates to be quoted against this tender shall cover all the charges like freight, installation etc and all taxes like GST etc., .No other charges shall be payable by ICF. In the event of granting extension to the contract period on any ground(s), ICF is not liable to pay any additional amount on this count. It holds good even if the contractor completes the work before stipulated time.
- b) Under various statutes if any recoveries are required to be made by ICF from the amounts payable to the contractor, these shall be recovered by ICF as per clauses of the relevant statute. This includes recoveries to be made with retrospective effect etc. ICF does not accept any liability for such eventualities.
- c) If the work is not completed within the stipulated / extended period, ICF will be entitled, without prejudice to any other right and remedy available on that behalf, to recover damages from the contractor for each week or part of the week. Attention of the Bidders is specially invited to the clause regarding such damages under General Conditions of contract for engineering works.

INTEGRAL COACH FACTORY, CHENNAI-38

- d) If by adopting/accepting the advice given by the Contractor, if ICF suffers any financial loss or suffers in any other manner, including loss of time, having to face embarrassment etc., the loss suffered as estimated by Senior EDP Manager, Integral Coach Factory, Chennai – 600 038, shall be recovered from the payments due to the Contractor.
- e) The Contractor will conform to ICF's procedural requirements for releasing payment with respect to „form of billing“, “enclosure to bill”, “certification” raising bills against ICF for the services under this agreement etc. This includes submission of GST registration details also. The contractor will comply with all the internal procedures with respect to entry into ICF's premises, confidentiality of certain documents/drawings, acknowledgement etc., which are required for executing the supplies under this agreement.

5.21. System Performance Guarantee:

Since the design of the system is to achieve the end objective it shall be ensured and confirmed by the Contractor and the completion of work should be in accordance with the requirements specified in the tender. The contractor shall give unqualified and unconditional guarantee that work carried out by him shall achieve the desired objective and that in the event of performance of the work is not complying with the end objectives or with the specifications, he shall provide further inputs to enable ICF to realize the end objectives with full compliance of the specifications contained in these documents .No additional payment will be made to the Contractor for any additional service required in this regard.

5.22. Authority for Acceptance:

The authority for the acceptance of the tender in whole or in-part rests with ICF. ICF shall not be bound to accept the lowest or any tender or to assign any reason for non-acceptance or rejection of a tender. ICF reserves the right to sub-divide the work among different Contractors or to reduce the work or to accept any tender for less than the tendered quantities without assigning any reason therefor.

5.23. Supply of Electric Power:

ICF shall provide single-phase L/T Power supply for soldering, lighting and minor drilling works wherever electric supply is available. The charges for electric consumption at site in connection with the erection have to be borne by the contractor at the rate specified by ICF.

5.24. Other Special Conditions:

- 5.24.1. ICF shall be indemnified against any loss or damage during execution of work by the contractor's labour / supervisors etc.,
- 5.24.2. If anyone engaged by the Contractor to working ICF's premises meets with an accident during the execution of work, ICF will not be responsible for any damage or compensation on this account. The contractor will have to adhere to the Workmen's Compensation act, Motor Vehicles Act etc., and any infringement to the same shall be at contractors own cost.
- 5.24.3. The contractor shall take special care while moving the materials alongside the railway track and take necessary precautions to prevent accident to the Railway staff and property.
- 5.24.4. The Bidders are required to inspect the site of works and acquaint/satisfy himself about the nature and magnitude of the job, constraints involved and facilities required in executing the work.

INTEGRAL COACH FACTORY, CHENNAI-38

- 5.24.5.** Operation of the items of work in the schedule will rest entirely on discretion of ICF and no claim whatsoever will be entertained for the non-operation / partial operation of any of the item.
- 5.24.6.** Observance of Bonded Labour system (Abolition) ordinance 1975 would apply to present contract. The contractor shall duly observe the provision thereof.
- 5.24.7.** Number of site Engineers working at Chennai and the company's profile have to be specified. He should have sufficient number of engineers at Chennai to communicate and maintain the work for eight months.

INTEGRAL COACH FACTORY, CHENNAI-38

PART VI Eligibility Criteria

1. General Eligibility

- a) The bidder shall be a registered legal entity in India (Company / LLP / PSU / Government Organization) under the Companies Act, 1956/2013.
- b) The bidder shall not have been blacklisted, debarred, or declared ineligible by any Government Department / PSU / Indian Railways as on the date of tender submission.
- c) The bidder shall possess:
- Valid GST Registration
 - PAN
 - Registered Office in India
- d) The bidder shall submit a declaration regarding non-blacklisting and correctness of submitted documents.

2. Technical Eligibility

- a) Technical eligibility shall be governed by **Indian Railways Standard General Conditions of Contract (GCC) for works – April 2022**.
- b) The bidder shall have successfully completed similar works during the **last 7 years**, ending last day of month previous to the one in which tender is invited.
- c) The bidder shall satisfy any one of the following:
- 3 similar completed works each costing $\geq 30\%$ of tender value as per IRGCC For Works – April 2022
 - 2 similar completed works each costing $\geq 40\%$ of tender value as per IRGCC For Works – April 2022
 - 1 similar completed work costing $\geq 60\%$ of tender value as per IRGCC For Works – April 2022

2.1 Definition of Similar Work

“Similar Work” means:

Execution of **SAP S/4 HANA Implementation / SAP S/4 HANA Migration / SAP S/4 HANA Upgrade along with SAP Infrastructure Services** in Government / PSU / Public listed company having average annual turnover of Rs 500 crore and above in last 3 financial years excluding the current financial year as per 10.1 of **Indian Railways Standard General Conditions of Contract (GCC) for works – April 2022**.

In addition, the following conditions shall be satisfied:

- Executed in an organization with **minimum 100 SAP users**
- At least **one SAP S/4HANA migration / upgrade project**, involving:
 - SAP ERP → SAP S/4HANA OR

INTEGRAL COACH FACTORY, CHENNAI-38

- SAP S/4HANA version upgrade.

The work shall include:

- Database migration to SAP S4 HANA and/or
- Use of tools such as **SUM with DMO or equivalent** or better

The work shall:

- Be deployed on **SAP S4 HANA certified infrastructure**
- Be **successfully completed (Go-Live achieved)**

2.2 Supporting Requirements

a) Work Experience Certificates shall:

- Clearly indicate scope, value, and duration
- Be issued by client / authorized signatory

b) The bidder / Lead Member shall possess **SEI CMMI Level 3 or higher certification** (Development & Implementation).

c) Manufacturer Authorization:

- Authorization letter from OEM shall be submitted as per format given in the Annexure.
- Back-to-back support confirmation required

d) The bidder shall have experience in:

- HANA database migration
- SAP kernel upgrade
- SAP Basis administration

e) The bidder should deploy **certified professionals**, such as:

- SAP S/4HANA System Administration
- SAP HANA Consultant
- SAP Basis Consultant
- Certified Linux Administrator (SUSE / RHEL)

3. Financial Eligibility

a) Financial eligibility shall be governed by **Indian Railways Standard General Conditions of Contract (GCC) for works – April 2022**.

INTEGRAL COACH FACTORY, CHENNAI-38

4. Compliance

a) Compliance with:

- SAP Product Availability Matrix (PAM)
- SAP HANA Hardware Directory
- Government of India IT Security Guidelines
- CERT-In advisories
- Supplied hardware shall be **SAP HANA certified**.

5 .Manpower and Resource Availability

a) The bidder shall be an SAP Authorized Partner.

b) The bidder must deploy adequate SAP Certified professionals including (Supply and migration phase):

- SAP Project Manager
- SAP Basis Consultant
- SAP Module consultants
- SAP HANA Database Administrator

c) The bidder team must be available during (during hyper care) :

- Assessment Phase
- Migration Phase
- Go-Live Cutover
- Post Go-Live Stabilization

d) The bidder must provide onsite support during Production Go-Live and critical cutover window.

6. Support and Maintenance Capability

a) The bidder must provide post-migration Hyper care support for minimum 3 months from date of successful Go-Live.

7. Documents to be submitted

The bidder shall submit the following documents along with duly filled and signed annexures.

- a. Declaration by the Bidder – Annexure-1
- b. Certificate as to authorised signatories. – Annexure-2
- c. Declaration on Government Regulation – Annexure-3
- d. Deployment of man power with sap certificate – Annexure-4
- e. Details of Bidder Organization – Annexure-5
- f. Manufacturers authorization form – Annexure-6

INTEGRAL COACH FACTORY, CHENNAI-38

- g. Quality Assessment Details (CMMI Level) – Annexure-7
- h. Annual turnovers for the last three years – Annexure-8
- i. Financial Information of the Bidder – Annexure-9
- j. Performance-details (Similar Works) – Annexure-10
- k. Proforma of Bank Guarantee – Annexure-11 *
- l. Request for Pre-Bid Clarification – Annexure-12
- m. WARRANTY – Annexure-13 **
- n. GST and PAN details - Annexure-14
- o. Proof of SAP HANA Certified Hardware supply - Annexure-15 **
- p. SAP Authorization certificate – Annexure -16
- q. Declaration as per Annexure-V & V(A) of GCC - Annexure – 17
- r. Declaration on IPR/Patent rights – Annexure – 18
- s. India presence for support – Annexure - 19
- t. Proforma for statement of deviation from tender condition – Annexure – 20
- u. SAP ERP Implementation in Govt/PSUs/Public listed Company. – Annexure – 21

* After LOA from successful bidder.

** Along with supply of Hardware

INTEGRAL COACH FACTORY, CHENNAI-38

**PART VII
TIME SCHEDULE**

Format for Stage Wise Time Schedule:

(Bidder to quote the schedule in column 4)

S.No	Milestone description	Expected Time from date of LOA in Months	Time Period (Accepted Time)
1	Supply, Installation and commissioning of hardware with required landscapes in SAP Certified Hardware.	D + 2	
3	Migration and configuration of existing S4 hana 1809 version to S4 hana 2025 version. Production cutover and pre Go-live preparations; Final Acceptance Certificate for hardware; Final Training. Go-Live	D + 4	
	Hyper Care Support & Final Acceptance Certificate for applications system	D + 7	

“D” is the date of issue of letter of Acceptance. All milestones are indicated as Months from “D”.

PROFORMA FOR SUBMISSION OF THE TENDER

To

The President of India, Through Sr.EDP
Manager Integral Coach Factory,
Chennai -600 038

Sir,

Sub: Tender document for Migration of existing SAP S/4HANA 1809 to SAP S/4HANA 2025 on SAP-Certified New Hardware

1. I/We have read the various conditions to tender attached here to and hereby agree to abide by the said conditions. I/We also agree to keep this tender open for acceptance for a period of 60 days from the date fixed for opening the same and in default thereof. I/We offer to do the work for..... at the rates quoted in the attached schedule and hereby bind myself / ourselves to maintain the work for the period mentioned in the Tender from the date of issue of letter of acceptance of the tender. I/We also hereby agree to abide by the general and Special Conditions of Contract and to carry out the work according to the specifications for materials and works laid down by the Railway for the present contract.

2. Any legal/penal action can be taken without prejudice to any other rights or remedies if;
- (a) I/We do not execute the contract documents within seven days after receipt of notice issued by the Railway that such documents are ready; or
 - (b) I/We do not commence the work within three days after receipts of orders to that effect.

3. Until a formal agreement is prepared and executed, acceptance of this tender shall constitute a binding

INTEGRAL COACH FACTORY, CHENNAI-38

contract between us subject to modifications as may be mutually agreed to between us and indicated in the letter of acceptance of my/our offer for this work.

ANNEXURE – 1

Declaration by the Bidder

(To be submitted on the Letterhead of the Bidder)

(Place)

(Date)

To

The Sr. EDP Manager,

Integral Coach Factory,

Chennai - 600038.

Dear Sir,

We, on behalf of _____ Company, have read the Indian Railways General Conditions of Contract for works – April 2022 and declare the following:

(Strike out which ever not applicable)

(i) Employment/Partnership etc. of Retired Railway Employees.

- We do not have, any Retired Manager of the Gazetted Rank or any other Gazetted Officer working before his/her retirement, whether in the Executive or Administrative capacity or holding a pensionable post or not, in any department of any of the Railways owned and Administered by the President of India, as employee OR one of our Partners OR one of our Directors.

OR

- We have the following employees/ Partners/ Directors, who is a Retired Manager of the Gazetted Rank or any other Gazetted Officer working before his/her retirement, whether in the Executive or Administrative capacity or holding a pensionable post or not, in any department of any of the Railways owned and Administered by the President of India.

NAME: _____ Date of Retirement _____

INTEGRAL COACH FACTORY, CHENNAI-38

(ii) Relatives/Share holders/ Relatives of Share Holders employed in Gazetted capacity in Railways.

- We do not have, any relative(s) or share holder(s) or relatives of share holder(s) who are employed in Gazetted capacity in any Department of Indian Railway.

OR

- We have the following relative(s) or share holder(s) or relatives of share holder(s) who are employed in Gazetted capacity in Indian Railways.

NAME: _____ Department _____

(iii) Penalty for Violation of Labour Laws.

- We/any of our Constituents have not been levied with any penalty for violation of Labour Laws by the appropriate enforcing agency like the Labour Commissioner etc.

OR

- We/any of our Constituents have been levied with a penalty for violation of Labour Laws for _____ times in the last two years (from the date of opening of Tender) by the appropriate enforcing agency like the Labour Commissioner etc.

(iv) Termination of Contract.

- None of our previous Contracts or any of its constituents, with Indian Railways, had been terminated under the Indian Railways General Conditions of Contract for works – April 2022.

(v) Penalty

- We or any of our constituents have not been imposed a penalty equivalent to the maximum penalty that can be imposed under any previous Contract with Railways, within previous two years from date of submission of Bids.

Sir,

Sub: Undertaking on Patent Rights/copy rights for the ERP project of ICF.

I/We do hereby undertake that none of the deliverables being provided by us is infringing on any patent or intellectual and industrial property rights as per the applicable laws of relevant jurisdictions having requisite competence.

I/We also confirm that there shall be no infringement of any patent or intellectual and industrial property rights as per the applicable laws of relevant jurisdictions having requisite competence, in respect services/tools or any part thereof to be supplied by us. We shall indemnify ICF against all cost/claims/legal claims/liabilities arising from third party claim in this regard at any time on account of the infringement or unauthorized use of patent or intellectual and industrial property rights of any such parties, whether such claims arise in respect of manufacture or use. Without prejudice to the aforesaid indemnity, we shall be responsible for the completion of the project of ERP to ICF, irrespective of the fact of claims of infringement of any or all the rights mentioned above.

If at a later date it is found that it does infringe on patent rights, I/We absolve and indemnify ICF of any legal action.
